# PART I INTERNATIONAL ORGANIZATIONS

#### THE UNITED NATIONS

The United Nations is an association of states which have pledged themselves, through signing the Charter, to maintain international peace and security and to co-operate in establishing political, economic and social conditions under which this task can be securely achieved Nothing contained in the Charter authorizes the organization to intervene in matters which are essentially within the domestic

jurisdiction of any state.

The United Nations Charter originated from proposals agreed upon at discussions held at Dumbarton Oaks (Washington, DC) between the USSR, US and UK from 21 Aug to 28 Sept., and between US, UK and China from 29 Sept to 7 Oct 1944 These proposals were laid before the United Nations Conference on International Organization, held at San Francisco from 25 April to 26 June 1945, and (after amendments had been made to the original proposals) the Charter of the United Nations was signed on 26 June 1945 by the delegates of 50 countries. Ratification of all the signatures had been received by 31 Dec. 1945. (For the complete text of the Charter see The Statesman's Year-Book, 1946, pp. xxi-xxxii)

The United Nations formally came into existence on 24 Oct 1945, with the deposit of the requisite number of ratifications of the Charter with the US Department of State The official languages of the United Nations are Arabic, Chinese,

English, French, Russian and Spanish

The headquarters of the United Nations is in New York City, USA

Flag UN emblem in white centred on a light blue ground.

Membership Membership is open to all peace-loving states whose admission will be effected by the General Assembly upon recommendation of the Security Council The table on pp 7-8 shows the member states of the United Nations

The Principal Organs of the United Nations are 1 The General Assembly 2 The Security Council 3 The Economic and Social Council 4 The Trusteeship Council. 5 The International Court of Justice 6. The Secretariat.

1 The General Assembly consists of all the members of the United Nations Each member has only 1 vote. The General Assembly meets regularly once a year, commencing on the third Tuesday in Sept; the session normally lasts until mid-December and is resumed for some weeks in the new year if this is required. Special sessions may be convoked by the Secretary-General if requested by the Security Council, by a majority of the members of the United Nations or by 1 member concurred with by the majority of the members. The Assembly also meets in emergency special session. The General Assembly elects its President for each session.

The first regular session was held in London from 10 Jan to 14 Feb and in New

York from 23 Oct. to 16 Dec. 1946.

Special sessions have been held on Palestine (1947, 1948), Tunisia (1961), Financial Situation of UN (1963), South West Africa, Peace-Keeping, Postponement of Outer Space Conference (1967), Raw Materials and Development (1974), New International Economic Order (1975), Peace-keeping force in the Lebanon, Namibia, Disarmament (1978, 1982), Economic Issues (1980); Emergency Special sessions were held on Suez, Hungary (1956), Lebanon-Jordan-United Arab Republic dispute (1958), Congo (1960), Middle East (1967), Afghánistán, Palestine (1980) and Namibia (1981).

The work of the General Assembly is divided between 7 Main Committees, on which every member state is represented. These are: First committee (disarmament

and related international security matters), special political committee, second committee (economic and financial matters); third committee (social, humanitarian and cultural matters), fourth committee (decolonisation matters), fifth committee (administrative and budgetary matters), sixth committee (legal matters)

In addition there is a General Committee charged with the task of co-ordinating the proceedings of the Assembly and its Committees; and a Credentials Committee which verifies the credentials of the delegates The General Committee consists of 25 members, comprising the President of the General Assembly, its 17 Vice-Presidents and the Chairmen of the 7 Main Committees. The Credentials Committee consists of 9 members, elected at the beginning of each session of the General Assembly. The Assembly has 2 standing committees—an Advisory Committee on Administrative and Budgetary Questions, and a Committee on Contributions The General Assembly establishes subsidiary and ad hoc bodies when necessary to deal with specific matters. These include, Special Committee on Peace-keeping Operations (33 members), Commission on Human Rights (32 members), Committee on the peaceful uses of outer space (28 members), Conciliation Commission for Palestine (3 members), Conference on Disarmament (42 members), International Law Commission (25 members), Scientific Committee on the effects of atomic radiation (15 members), Special Committee on the implementation of the declaration on the granting of independence to colonial countries and peoples (25 members), Special Committee on the policies of Apartheid of the Government of the Republic of South Africa (11 members), UN Commission on International Trade Law (29 members) and Committee on the Peaceful Uses of Sea-bed and Ocean Floor Beyond the Limits of National Jurisdiction (91 members)

The General Assembly may discuss any matters within the scope of the Charter, and, with the exception of any situation or dispute on the agenda of the Security Council, may make recommendations on any such questions or matters. For decisions on important questions a two-thirds majority is required, on other questions a simple majority of members present and voting. In addition, the Assembly at its fifth session, in 1950, decided that if the Security Council, because of lack of unanimity of the permanent members, fails to exercise its primary responsibility for the maintenance of international peace and security in any case where there appears to be a threat to the peace, breach of the peace or act of aggression, the General Assembly shall consider the matter immediately with a view to making appropriate recommendations to members for collective measures, including in the case of a breach of the peace or act of aggression the use of armed force when

necessary, to maintain or restore international peace and security

The General Assembly receives and considers reports from the other organs of the United Nations, including the Security Council The Secretary-General makes an annual report to it on the work of the Organization

2. The Security Council consists of 15 members, each of which has 1 vote. There are 5 permanent and 10 non-permanent members elected for a 2-year term by a two-thirds majority of the General Assembly.

Retiring members are not eligible for immediate re-election. Any other member of the United Nations will be invited to participate without vote in the discussion of

questions specially affecting its interests.

The Security Council bears the primary responsibility for the maintenance of peace and security. It is also responsible for the functions of the UN in trust territories classed as 'strategic areas' Decisions on procedural questions are made by an affirmative vote of 9 members. On all other matters the affirmative vote of 9 members must include the concurring votes of all permanent members (in practice, however, an abstention by a permanent member is not considered a veto), subject to the provision that when the Security Council is considering methods for the peaceful settlement of a dispute, parties to the dispute abstain from voting

For the maintenance of international peace and security the Security Council can, in accordance with special agreements to be concluded, call on armed forces, assistance and facilities of the member states. It is assisted by a Military Staff Committee consisting of the Chiefs of Staff of the permanent members of the Security

Council or their representatives.

The Presidency of the Security Council is held for 1 month in rotation by the member states in the English alphabetical order of their names.

The Security Council functions continuously. Its members are permanently represented at the seat of the organization, but it may meet at any place that will best facilitate its work.

The Council has 2 standing committees of Experts and on the Admission of New Members. In addition, from time to time, it establishes *ad hoc* committees and commissions such as the Truce Supervision Organization in Palestine

Permanent Members China, France, USSR, UK, USA

Non-Permanent Members Australia, Denmark, Madagascar, Thailand, Trinidad and Tobago (until 31 Dec. 1986), Bulgaria, Ghana, United Arab Emirates, Venezuela (until 31 Dec. 1987)

- 3. The Economic and Social Council is responsible under the General Assembly for carrying out the functions of the United Nations with regard to international economic, social, cultural, educational, health and related matters
- By Nov. 1977, 15 'specialized' inter-governmental agencies working in these fields had been brought into relationship with the United Nations. The Economic and Social Council may also make arrangements for consultation with international non-governmental organizations and, after consultation with the member concerned, with national organizations, by 1983 over 600 non-governmental organizations had been granted consultative status

The Economic and Social Council consists of 54 Member States elected by a two-thirds majority of the General Assembly. Nine are elected each year for a 3-year term Retiring members are eligible for immediate re-election. Each member has 1 vote Decisions are made by a majority of the members present and voting

voting

The Council nominally holds 2 sessions a year, and special sessions may be held if required. The President is elected for 1 year and is eligible for immediate reelection

The Economic and Social Council has the following commissions

Regional Economic Commissions ECE (Economic Commission for Europe. Geneva), ESCAP (Economic and Social Commission for Asia and the Pacific Bangkok), ECLAC (Economic Commission for Latin America Santiago, Chile), ECA (Economic Commission for Africa Addis Ababa) ESCWA (Economic Commission for Western Asia Baghdad) These Commissions have been established to enable the nations of the major regions of the world to co-operate on common problems and also to produce economic information.

Six functional commissions, including (1) a Statistical Commission with subcommission on Statistical Sampling (2) Commission on Human Rights, with subcommission on Prevention of Discrimination and Protection of Minorities, (3) Social Development Commission; (4) Commission on the Status of Women, (5) Commission on Narcotic Drugs, (6) Population Commission.

The Economic and Social Council has the following standing committees. The Economic Committee, Social Committee, Co-ordination Committee, Committee on Non-Governmental Organizations, Interim Committee on Programme of Conferences, Committee for Industrial Development, Advisory Committee on the Application of Science and Technology to Development, Committee on Housing,

Building and Planning

Other special bodies are the International Narcotics Control Board, the Interim Co-ordinating Committee for International Commodity Arrangements and the Administrative Committee on Co-ordination to ensure (1) the most effective implementation of the agreements entered into between the United Nations and the specialized agencies and (2) co-ordination of activities.

Membership Bangladesh, Brazil, Colombia, France, Federal Republic of Germany, Guinea, Haiti, Iceland, India, Japan, Morocco, Nigeria, Romania, Senegal, Spain, Turkey, Venezuela, Zimbabwe (until 31 Dec. 1987). Argentina, Canada, China, Costa Rica, Finland, Indonesia, Papua New Guinea, Poland, Rwanda, Somalia, Sri Lanka, Sweden, Uganda, USSR, UK, Yugoslavia, Zaire (until 31 Dec.

1986): Algeria, Botswana, Bulgaria, Congo, Djibouti, Ecuador, German Democratic Republic, Lebanon, Luxembourg, Malaysia, Mexico, Netherlands, New Zealand, Saudi Arabia, Sierra Leone, Suriname, Thailand, USA (until 31 Dec. 1985)

4. The Trusteeship Council. The Charter provides for an international trusteeship system to safeguard the interests of the inhabitants of territories which are not yet fully self-governing and which may be placed thereunder by individual trusteeship agreements. These are called trust territories

All of the original 11 trust territories except one, the Pacific Islands (Micronesia), administered by the USA, have become independent or joined independent countries. The Trusteeship Council consists of the 1 member administering trust territories. USA; the permanent members of the Security Council that are not administering trust territories. China, France, USSR and UK. Decisions of the Council are made by a majority of the members present and voting, each member having 1 vote. The Council holds one regular session each year, and special sessions if required

5. The International Court of Justice was created by an international treaty, the Statute of the Court, which forms an integral part of the United Nations Charter All members of the United Nations are ipso facto parties to the Statute of the Court

The Court is composed of independent judges, elected regardless of their nationality, who possess the qualifications required in their countries for appointment to the highest judicial offices, or are jurisconsults of recognized competence in international law. There are 15 judges, no 2 of whom may be nationals of the same state. They are elected by the Security Council and the General Assembly of the United Nations sitting independently. Candidates are chosen from a list of persons nominated by the national groups in the Permanent Court of Arbitration established by the Hague Conventions of 1899 and 1907. In the case of members of the United Nations not represented in the Permanent Court of Arbitration, candidates are nominated by national groups appointed for the purpose by their governments. The judges are elected for a 9-year term and are eligible for immediate re-election. When engaged on business of the Court, they enjoy diplomatic privileges and immunities.

The Court elects its own President and Vice-President for 3 years and remains permanently in session, except for judicial vacations. The full court of 15 judges normally sits, but a quorum of 9 judges is sufficient to constitute the Court It may form chambers of 3 or more judges for dealing with a particular case or particular categories of cases. Nagendra Singh (India) and Guy Ladreit de Lacharnère (France) are, respectively, President and Vice-President of the Court until 1986.

Competence and Jurisdiction Only states may be parties in cases before the Court, which is open to the states parties to its Statute. The conditions under which the Court will be open to other states are laid down by the Security Council The Court exercises its jurisdiction in all cases which the parties refer to it and in all matters provided for in the Charter, or in treaties and conventions in force Disputes concerning the jurisdiction of the Court are settled by the Court's own decision.

The Court may apply in its decision: (a) international conventions; (b) international custom; (c) the general principles of law recognized by civilized nations, and (d) as subsidiary means for the determination of the rules of law, judicial decisions and the teachings of highly qualified publicists. If the parties agree, the Court may decide a case ex aequo et bono. The Court may also give advisory opinions on legal questions to the General Assembly, the Security Council, certain other organs of the UN and a number of international organizations.

Procedure. The official languages of the Court are French and English. All questions are decided by a majority of the judges present. If the votes are equal, the President has a casting vote. The judgment is final and without appeal, but a revision may be applied for within 10 years from the date of the judgment on the ground of a new decisive factor. No court fees are paid by parties to the Statute.

Judges. The judges of the Court, elected by the Security Council and the General Assembly, are as follows: (1) To serve until 5 Feb 1988 Roberto Ago (Italy), Mohammed Bedjaoui (Algeria), José Sette-Camara (Brazil), Stephen Schwebel (USA), Nikolai Konstantinovich Tarassov (USSR) (2) To serve until 5 Feb 1991 Nagendra Singh (India), José Maria Ruda (Argentina), Sir Robert Jennings (UK), Guy Ladreit de Lacharrière (France), Kéba Mbaye (Senegal) (3) To serve until 5 Feb 1994: Taslım Olawale Elias (Nigeria), Manfred Lachs (Poland), Jens Evensen (Norway), Shigeru Oda (Japan), Ni Zhengyu (China)

If there is no judge on the bench of the nationality of a party to a case, that party has the right to choose a person to sit as judge for that case. Such judges take part in the decision on terms of complete equality with their colleagues

The Court has its seat at The Hague, but may sit elsewhere whenever it considers this desirable. The expenses of the Court are borne by the UN

Registrar Santiago Torres Bernárdez (Spain).

6 The Secretariat is composed of the Secretary-General, who is the chief administrative officer of the organization, and an international staff appointed by him under regulations established by the General Assembly However, the Secretary-General, the High Commissioner for Refugees and the Managing Director of the Fund are appointed by the General Assembly The first Secretary-General was Trygve Lie (Norway), 1946-53, the second, Dag Hammarskjold (Sweden), 1953-61, the third, U Thant (Burma), 1961-71; the fourth, Kurt Waldheim (Austria), 1972-81

The Secretary-General acts as chief administrative officer in all meetings of the General Assembly, the Security Council, the Economic and Social Council and the Trusteeship Council

The financial year coincides with the calendar year, accountancy is in US\$ Budget for 1985-86, \$1,731,875,093.

Secretary-General Javier Perez de Cuellar (Peru), appointed 1 Jan 1982 for a 5-year term

The Secretary-General is assisted by Under-Secretaries-General and Assistant Secretaries-General

#### UNITED NATIONS SYSTEM

The bulk of the work of the UN, measured in terms of money and personnel, is aimed at achieving the pledge made in Article 55 of the Charter to 'promote higher standards of living, full employment and conditions of economic and social progress and development'.

In addition to the 18 independent specialized agencies, there are some 14 major United Nations programmes and funds devoted to achieving economic and social

progress in the developing countries.

Total contributions to the funds and programmes of the UN and specialized agencies for development activities amounted to \$2,400m. (not including contributions to the World Bank group) in 1983. The highest total contributions went to the UN Development Programme (UNDP - \$714m.) the UN Children's Fund (UNICEF - \$297m.) and the UN Fund for Population Activities (UNFPA -\$130m.). The World Food Programme, which provides food aid to support development projects and emergency relief operations, provided aid worth \$900m. in 1983, making it the largest single source of development assistance in the UN system, apart from the World Bank.

The United Nations Development Programme (UNDP) is the world's largest agency for multilateral technical and pre-investment co-operation. It is the funding source for most of the technical assistance provided by the United Nations system, and UNDP is active in almost 150 countries and territories and in virtually every economic and social sector. UNDP assistance is provided only at the request of Governments and in response to their priority needs, integrated into over-all national and regional plans.

There are more than 5,000 UNDP-supported projects currently in operation at the national, regional, inter-regional and global levels, all aimed at helping developing countries make better use of their assets, improve living standards and

expand productivity. The volume of such work was \$1,200m. in 1983.

UNICEF, established in 1946 to deliver post-war relief to children, now concentrates its assistance on development activities aimed at improving the quality of life for children and mothers in developing countries. During 1983, UNICEF was working in over 110 countries with a child population of some 1,300m, concentrating on basic services for children and maternal health care, nutrition, water supply and sanitation and education. The State of the World's Children Report 1984, published by UNICEF, has helped to spread acceptance by local and national leaders of a strategy for child health and nutrition which UNICEF estimates could save the lives of 7m, children UNICEF has focused on popularising four primary health care techniques which are low in cost and produce results in a relatively short time. These include: oral rehydration therapy to fight the effects of diarrhoeal infections, which kill some 4m children each year, expanded immunization against the 6 most common childhood diseases; child growth monitoring, and promotion of breast-feeding. The World Health Organization and UNICEF work closely together, providing training, equipment and the services of health care professionals UNICEF is the world's largest supplier of vaccines and the 'cold chain' equipment needed to deliver them, as well as oral rehydration salts

Executive Director James P Grant (USA)

The UN Fund for Population Activities (UNFPA) carries out programmes in over 130 countries and territories. The Fund's aims are to build up capacity to respond to needs in population and family planning, to promote awareness of population problems in both developed and developing countries and possible strategies to deal with them, to assist developing countries at their request in dealing with population problems. More than 25% of international population assistance to developing countries is channeled through UNFPA.

Executive Director Rafael M Salas (Philippines)

An International Conference on Population was convened by the United Nations in 1984 in Mexico City to review the World Population Plan of Action adopted by the 1974 population conference, and make recommendations for its future implementation.

Humanitarian relief to refugees and victims of natural and man-made disasters is also an important function of the UN system. Among the organizations involved in such relief activities are the Office of the UN Disaster Relief Co-ordinator (UNDRO), the Office of the UN High Commissioner for Refugees (UNHCR) and the UN Relief and Works Agency for Palestine Refugees in the Near East (UNRWA)

UNRWA was created by the General Assembly in 1949 as a temporary, non-political agency to provide relief to the nearly 750,000 people who became refugees as a result of the disturbances during and after the creation of the State of Israel in the former British Mandate territory of Palestine. 'Palestine refugees', as defined by UNRWA's mandate, are persons or descendants of persons whose normal residence was Palestine for at least 2 years prior to the 1948 conflict and who, as a result of the conflict, lost their homes and means of livelihood. UNRWA has also been called upon to assist persons displaced as a result of renewed hostilities in the Middle East in 1967. The situation of Palestine refugees in south Lebanon was of special concern to the Agency in 1984 which has carried out an emergency relief programme in that area for Palestine refugees affected in the aftermath of the Israeli invasion of Lebanon in 1982

Over 2m. refugees are registered with the Agency which provides education, health care, supplementary feeding and relief services. Education and basic health care account for over 80% of the Agency's budget, which is financed by voluntary contributions from Governments. In 1984 its operating budget amounted to \$230m., while cash contributions were expected to total only \$170m

Commissioner-General Giorgio Giacomelli.

The Office of the United Nations High Commissioner for Refugees (UNHCR)

was established by the UN General Assembly with effect from 1 Jan. 1951, originally for three years. Since 1954, its mandate has been renewed for successive five-

year periods.

The work of UNHCR is of a purely humanitarian and non-political character. The main functions of the Office are to provide international protection for refugees and to seek permanent solutions to their problems through voluntary repatriation, local integration into the country of first asylum or resettlement in other countries. UNHCR may also be called upon to provide emergency relief and ongoing material assistance where necessary.

UNHCR concerns itself with refugees who have been determined to come within its mandate under the Statute, and with persons in analogous circumstances whom it assists under the terms of the good offices resolutions adopted by the General

Assembly

The High Commissioner is elected by the General Assembly and follows policy directives given by the General Assembly or the Economic and Social Council

International protection is the primary function of UNHCR. Its main objective is to promote and safeguard the rights and interests of refugees. In so doing UNHCR devotes special attention to promoting a generous policy of asylum on the part of Governments and seeks to improve the status of refugees in their country of residence. It also helps them to cease being refugees through the acquisition of the nationality of their country of residence when voluntary repatriation is not applicable. UNHCR pursues its objectives in the field of protection by encouraging the conclusion of intergovernmental legal instruments in favour of refugees, by supervising the implementation of their provisions and by encouraging Governments to adopt legislation and administrative procedures for the benefit of refugees

UNHCR also provides material assistance to refugees, largely in camps and settlements, and seeks to promote their self-sufficiency leading to the attainment of durable solutions for their plight. Since 1951 UNHCR has assisted and found solu-

tions for an estimated 30 million refugees and displaced persons

In 1985 the imperatives of the emergency situation in Africa dominated UNHCR's work. Special programmes for refugees and drought victims in the Central African Republic, Ethiopia, Somalia and Sudan were launched in an amount of US\$107 7m. over and above UNHCR's normal programme requirements. The strain placed on international humanitarian budgets by the African crisis and the strength of the US\$1 resulted in a severe financial shortfall for UNHCR's annual programmes, which are all funded from voluntary contributions.

In Oct 1985 the Executive Committee of the High Commissioner's Programme approved a revised financial target of US\$309m. for UNHCR general programmes in 1985 and also approved the figure of US\$320m. for projected requirements in

1986

For its work on behalf of refugees around the world, UNHCR was awarded the Nobel Peace Prize in 1955 and again in 1981.

#### SPECIALIZED AGENCIES OF THE UN

#### INTERNATIONAL ATOMIC ENERGY AGENCY (IAEA)

Origin The International Atomic Energy Agency came into existence on 29 July 1957. Its statute had been approved on 26 Oct. 1956, at an international conference held at UN Headquarters, New York A relationship agreement links it with the United Nations The IAEA had 112 member states in 1983

Functions (1) To accelerate and enlarge the contribution of atomic energy to peace, health and prosperity throughout the world, and (2) to ensure that assistance provided by it or at its request or under its supervision or control is not used in such a way as to further any military purpose. In addition, under the terms of the Non-Proliferation Treaty, to verify states' obligation to prevent diversion of nuclear energy from peaceful uses to nuclear weapons or other nuclear explosive devices

The IAEA gives advice and technical assistance to developing countries on nuclear power development (provides a series of training courses on nuclear power project planning, construction and operation), on health and safety, on radioactive waste management, on legal aspects of the use of atomic energy, and on prospecting for and exploiting nuclear raw materials; in addition it promotes the use of radiation and isotopes in agriculture, industry, medicine and hydrology through expert services, training courses and fellowships, grants of equipment and supplies, research contracts, scientific meetings and publications. During this year, 2,086 scientists and technicians received training – primarily in nuclear engineering and nuclear safety (20%), agriculture (19%), medicine (13%) and industrial applications of isotopes and radiation techniques (7%). Fifty-one training courses were attended by 851 participants from developing countries. The IAEA has research laboratories in Austria and Monaco. At Trieste, the International Centre for Theoretical Physics was established in 1964 which is now operated jointly by UNESCO and IAEA.

In Dec 1984, safeguards agreements were in force with 78 non-nuclear-weapon States pursuant to the NPT and/or the Tlatelolco Treaty Other agreements were in force with a further 14 non-nuclear-weapon States. In addition, safeguards agreements were in force with three nuclear-weapon States for the Agency to apply safeguards to nuclear material in certain civil nuclear facilities. Negotiations were concluded with a fourth nuclear-weapon State to finalize a similar agreement. The IAEA applied safeguards at 167 power reactors, 174 research reactors and critical assemblies, 6 conversion plants, 39 fuel fabrication plants, 7 reprocessing plants, 4 enrichment plants, and in 487 other installations, in non-nuclear-weapon States. These figures include facilities safeguarded under the safeguards agreement with the European Atomic Energy Community and its non-nuclear-weapon States.

Organization The Statute provides for an annual General Conference, a Board of Governors of 34 members and a Secretariat headed by a Director-General

#### INTERNATIONAL LABOUR ORGANISATION (ILO)

Origin The ILO, established in 1919 as an autonomous part of the League of Nations, is an intergovernmental agency with a tripartite structure, in which representatives of governments, employers and workers participate. It seeks through international action to improve labour conditions, raise living standards and promote productive employment. In 1946 the ILO was recognized by the United Nations as a specialized agency. In 1969 it was awarded the Nobel Peace Prize. In 1986 it numbered 150 members.

Functions One of the ILO's principal functions is the formulation of international standards in the form of International Labour Conventions and Recommendations. Member countries are required to submit Conventions to their competent national authorities with a view to ratification. If a country ratifies a Convention it agrees to bring its laws into line with its terms and to report periodically how these regulations are being applied. More than 5,200 ratifications of 161 Conventions had been deposited by mid-1985 Machinery is available to ascertain whether Conventions thus ratified are effectively applied

Recommendations do not require ratification, but member states are obliged to consider them with a view to giving effect to their provisions by legislation or other action. By the end of 1985 the International Labour Conference had adopted 171

recommendations.

Organization The ILO consists of the International Labour Conference, the Governing Body and the International Labour Office.

The Conference is the supreme deliberative organ of the ILO; it meets annually at Geneva National delegations are composed of 2 government delegates, I employers' delegate and I workers' delegate

The Governing Body, elected by the Conference, is the executive council It is composed of 28 government members, 14 workers' members and 14 employers'

members

Ten governments hold permanent seats on the Governing Board because of their industrial importance, namely, Brazil, China, Federal Republic of Germany, France, India, Italy, Japan, USA, USSR and UK. The remaining 18 government seats were, at the end of 1985, held by Algeria, Angola, Argentina, Burkina Faso, Canada, Ethiopia, Finland, Ghana, Hungary, Indonesia, Iraq, Jamaica, Mongolia, Nicaragua, Pakistan, Ukraine, Venezuela, Zimbabwe.

The Office serves as secretariat, operational headquarters, research centre and

publishing house

The ILO budget for 1986-87 amounted to US\$253m

Activities In addition to its research and advisory activities, the ILO extends technical co-operation to governments under its regular budget and under the UN Development Programme and Funds-in-Trust in the fields of employment promotion, human resources development (including vocational and management training), development of social institutions, small-scale industries, rural development, social security, industrial safety and hygiene, productivity, etc. Technical co-operation also includes expert missions and a fellowship programme. Some \$84m was spent on technical co-operation in 1984. Projects were in progress in some 115 countries and about 900 experts involved.

Major emphasis is being given to the ILO's World Employment Programme, launched in 1969 with the purpose of stimulating national and international efforts to increase the volume of productive employment, and so to counter the problem of rising unemployment in developing countries Employment strategy missions were carried out under the Programme in Colombia, the Dominican Republic, Egypt, Iran, Kenya, Sri Lanka, Sudan and the Philippines The work of these missions was complemented by an ILO programme of research designed to provide policy-makers with the information to promote employment. A World Employment Conference was held in June 1976

The International Labour Conference (Geneva, June 1985) adopted a Convention and Recommendation on occupational health services, and a Convention and Recommendation on statistics of wages and hours of work. It held a first discussion with a view to adopting standards on safety in the use of asbestos at its 1986 session.

In 1960 the ILO established in Geneva the International Institute for Labour Studies. The Institute specializes in advanced education and research on social and labour policy. It brings together for group study experienced persons from all parts of the world—government administrators, trade-union officials, industrial experts, management, university and other specialists.

A training institution was opened by the ILO in Turin, Italy, in 1965—the International Centre for Advanced Technical and Vocational Training. The Centre

provides opportunities for technical, vocational and management training for individuals who have advanced beyond the facilities available in their own countries. Courses are geared particularly to the needs of developing countries.

Headquarters. International Labour Office, CH-1211 Geneva 22, Switzerland Director-General Francis Blanchard (France).

Chairman of the Governing Body Jean-Jacques Oechslin (France).

London Branch Office 96/98 Marsham St., SW1.

The ILO has regional offices in Addis Ababa (for Africa), Bangkok (for Asia and the Pacific), Lima (for Latin America and the Caribbean) and Beirut (for Arab States).

Publications Regular periodicals in English, French and Spanish include the International Labour Review, Legislative Series, Bulletin of Labour Statistics, Year Book of Labour Statistics, Official Bulletin and Labour Education Women at Work and the Social and Labour Bulletin are issued in English and French

New volumes published in 1984 included Clandestine employment the situation in the industrialised market economy countries, Financing social security the options, Income distribution and economic development an analytical survey, Into the twenty-first century the development of social security, Managing construction projects a guide to processes and procedures, Profession journalist—a study on the working conditions of journalists, The reduction of working time scope and implications in industrialised market economies, Safety in the use of ashestos an ILO code of practice, The trade union situation and industrial relations in Hungary, Voluntary arbitration of interest disputes a practical guide The first volume was published of the new World Labour Report, surveying the main labour issues in the world

## FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS (FAO)

Origin. The UN Conference on Food and Agriculture in May 1943, at Hot Springs, Virginia, set up an Interim Commission in Washington in July 1943 to plan the Organization, which came into being on 16 Oct. 1945.

Aims and Activities The aims of FAO are to raise levels of nutrition and standards of living; to improve the production and distribution of all food and agricultural products from farms, forests and fisheries; to improve the living conditions of rural populations; and, by these means, to eliminate hunger.

In carrying out these aims, FAO promotes investment in agriculture, better soil and water management, improved yields of crops and livestock, and the transfer of technology to, and the development of agricultural research in, developing countries. FAO promotes the conservation of natural resources and the rational use of fertilizers and pesticides. The Organization combats animal diseases, promotes the development of marine and inland fisheries, and encourages the rational use of forest resources. Technical assistance is provided in all these fields and others such as nutrition, agricultural engineering, agrarian reform, development communications, remote sensing for natural resources, and the prevention of food losses.

Special FAO programmes help countries prepare for, and provide relief in the event of, emergency food situations, in particular through the setting up of food reserves. Since the early 1980s, Africa has needed special emphasis and FAO created a special task force for that continent. The Agricultural Rehabitation Plan for Africa, begun in 1985 was achieving results in early 1986. The Global Information and Early Warning System provides current information on the world food situation and identifies countries threatened by shortages to guide potential donors.

The Organization also has a major rôle in the collection, analysis and dissemination of information on natural resources and agricultural production.

FAO sponsors the World Food Programme (WFP) with the UN; WFP uses food commodities, cash and services contributed by member States of the UN to back programmes of social and economic development, as well as for relief in emergency situations.

Finance and Administration. The FAO Conference, composed of all member states, meets every other year to determine the policy and approve the budget and work programme of FAO. The Council, consisting of 49 member nations elected by the Conference, serves as FAO's governing body between Sessions of the Conference.

ence At its 23nd Session in Nov. 1985, the Conference admitted two new member states, Solomon Islands and Cook Islands, raising the total to 158 The Conference also approved a Regular Programme budget for the two years 1986-87 of US\$437m, an increase of 1.1% in real terms over the previous period. The Regular Programme, which is financed by contributions from member governments, covers the cost of the Organization's secretariat, its Technical Co-operation Programme and part of the cost of several Special Action Programmes.

FAO provides advice and assistance in the field through its Field Programmes, funded largely from external sources, such as the UN Development Programme (UNDP) and trust funds provided by governments Funds available from UNDP have declined – from US\$167m. in 1980 to around US\$120m in 1985. The drop has been partially offset by increases in trust funds and in funds available through the Technical Co-operation Programme funded from FAO's own Regular Programme budget. Trust fund delivery in 1985 was expected to be about US\$150m compared with US\$135m. the previous year. Delivery under the Technical Co-operation. Programme in 1985 was expected to reach about US\$30m, compared with US\$21m in 1984. Total Field Programme delivery in 1985 was expected to approach US\$300m., still well below 1981 delivery in real terms.

# UNITED NATIONS EDUCATIONAL, SCIENTIFIC AND CULTURAL ORGANIZATION (UNESCO)

Origin A Conference for the establishment of an Educational, Scientific and Cultural Organization of the United Nations was convened by the Government of the UK in association with the Government of France, and met in London, 1–16 Nov. 1945 UNESCO came into being on 4 Nov 1946

Functions The purpose of UNESCO is to contribute to peace and security by promoting collaboration among the nations through education, science and culture in order to further universal respect for justice, for the rule of law and for the human rights and fundamental freedoms which are affirmed for the peoples of the world, without distinction of race, sex, language or religion, by the Charter of the United Nations

Activities The education programme has four main objectives: the extension of education, the improvement of education, and life-long education for living in a world community

To train teachers specialized in the techniques of fundamental education UNESCO is helping to establish regional and national training centres. A centre for Latin America was opened in Mexico in 1951, one for the Arab States was set up in Egypt in 1953. UNESCO seeks to promote the progressive application of the right to free and compulsory education for all and to improve the quality of education everywhere

In the natural sciences, UNESCO seeks to promote international scientific cooperation, such as the International Hydrological Programme which began in 1966 It encourages scientific research designed to improve the living conditions of mankind. Science co-operation offices have been set up in Montevideo, Cairo, New Delhi, Nairobi and Jakarta.

In the field of communication, livesco-endeavours that deseminating infor-

mation, carrying out research and providing advice, to increase the scope and quality of press, film and radio services throughout the world.

Organization The organs of UNESCO are a General Conference (composed of representatives from each member state), an Executive Board (consisting of 51 government representatives elected by the General Conference) and a Secretariat UNESCO had 158 members in 1986.

National commissions act as liaison groups between UNESCO and the educational, scientific and cultural life of their own countries.

Budget for 1986–87: \$289,338,980.

#### WORLD HEALTH ORGANIZATION (WHO)

Origin An International Conference, convened by the UN Economic and Social Council, to consider a single health organization resulted in the adoption on 22 July 1946 of the constitution of the World Health Organization. This constitution came into force on 7 April 1948

Structure The principal organs of WHO are the World Health Assembly, the Executive Board and the Secretariat Each of the 166 member states and 1 Associate Member (1984) has the right to be represented at the Assembly, which meets annually usually in Geneva, Switzerland The 31-member Executive Board is composed of technically qualified health experts designated by as many member states elected by the Assembly. The Secretariat consists of technical and administrative staff headed by a Director-General. Health activities in member countries are carned out through regional organizations which have been established in Africa (regional office, Brazzaville), South-East Asia (New Delhi), Europe (Copenhagen), Eastern Mediterranean (Alexandria) and Western Pacific (Manila). The Pan American Sanitary Bureau in Washington serves as the Regional Office of WHO for the Americas.

Functions. WHO's objective, as stated in the first article of the Constitution is 'the attainment by all peoples of the highest possible level of health'. As the directing and co-ordinating authority on international health it establishes and maintains collaboration with the UN, specialized agencies, government health administrations, professional and other groups concerned with health. The Constitution also directs WHO to assist governments to strengthen their health services, to stimulate and advance work to eradicate diseases, to promote maternal and child health, mental health, medical research and the prevention of accidents; to improve standards of teaching and training in the health professions, and of nutrition, housing, sanitation, working conditions and other aspects of environment health. The Organization also is empowered to propose conventions, agreements and regulations and make recommendations about international health matters; to revise the international nomenclature of diseases, causes of death and public health practices, to develop, establish and promote international standards concerning foods, biological, pharmaceutical and similar substances.

Methods of work Co-operation in country projects is undertaken only on the request of the government concerned, through the 6 regional offices of the Organization. Worldwide technical services are made available by headquarters. Expert committees whose members are chosen from the 54 advisory panels of experts meet to advise the Director-General on a given subject. Scientific groups and consultative meetings are called for similar purposes. To further the education of health personnel of all gategories, saminars, technical conferences, and training

courses are organized and advisors, consultants and lecturers are provided. WHO awards fellowships for study to nationals of member countries.

Activities The main thrust of WHO's activities in recent years has been towards promoting national, regional and global strategies for the attainment of the main social target of the Member States for the next two decades. 'Health for All by the Year 2000', or the attainment by all citizens of the world of a level-of health that will permit them to lead a socially and economically productive life

Almost all countries indicated a high level of political commitment to this goal, and guiding principles for formulating corresponding strategies and plans of action

were prepared.

The 38th World Health Assembly, meeting in May 1985, appealed to all Member States to concentrate efforts on the attainment of health for all by the year 2000 and keep extraneous political matters out of WHO. The Assembly displayed renewed faith in the potential for people's development and the dynamic strategies for health for all in ensuring it.

As evidence of that faith, the Assembly approved an effective working budget of

US\$543 3m for 1986-87

Regional programme budget policies The Health Assembly endorsed the introduction of regional programme budget policies to ensure that the maximum is squeezed out of these resources, particularly since 70% of the regular budget of WHO is spent on country and regional activities.

Technical and economic co-operation among developing countries. Action to build up a critical mass of health-for-all leaders was supported by the Assembly A comprehensive strategy for leadership development is required and all concerned, including Member States, international organizations, non-governmental and voluntary agencies, were urged to concentrate on activities strengthening technical and economic co-operation among developing countries.

Women, health and development There was general concern about the slow progress in realizing the objectives of the UN Decade for Women, particularly regarding high maternal mortality rates, the frequency and severity of the repercussions on women's health of certain practices, inadequate conditions of domestic work or paid employment, the frequency of nutritional anaemia, and the prevalence of adolescent marriages and pregnancies.

Onchocerciasis an extended programme area The Assembly celebrated the tenth anniversary of the Onchocerciasis Control Programme (OCP) Onchocerciasis, or river blindness, affects several million people in Africa. OCP at present covers seven countries. Benin, Burkina Faso, Ghana, Ivory Coast, Mali, Niger and Togo. It will be extended next year to four more countries. Guinea, Guinea-Bissau, Senegal and Sierra Leone

Malaria control The spread of malaria jeopardizes health and development in many developing countries. To prevent a further deterioration of this situation, the control of malaria is essential, with full and active community participation. It should be integrated into national primary health care programmes. The Assembly urged Member States to (1) undertake an immediate appraisal of the malaria situation and of existing control strategies, (11) plan antimalaria activities, utilizing appropriate technologies, to be integrated into PHC programmes. WHO continues to support research for a malaria vaccine.

Assignment of Israel to the European Region The Assembly decided that Israel shall henceforth form part of the European Region. This Member State was served up to now by WHO's Regional Office for the Eastern Mediterranean.

Health for All and Sports for All Mr Juan Antonio Samaranch, President of the International Olympic Committee (IOC), told the Assembly that the IOC and WHO had initiated a collaboration to make the year 2000 a year of victory for health and well-being everywhere.

Technical Discussions The topic of the 1985 Technical Discussions was Collaboration with non-governmental organizations in implementing the Global Strategy

for Health for All. There were 566 participants, many representing national nongovernmental organizations. The overriding conclusion was that a growing partnership between governments and non-governmental organizations was an inescapable necessity for the attainment of health for all by the year 2000.

World Health Day World Health Day, 7 April 1985, was devoted to the theme Healthy Youth - Our Best Resource. The theme chosen for World Health Day 1986 is Healthy Living - Everyone a Winner.

#### INTERNATIONAL MONETARY FUND (IMF)

The International Monetary Fund was established on 27 Dec. 1945 as an independent international organization and began operations on 1 March 1947, its relationship with the UN is defined in an agreement of mutual co-operation which came into force on 15 Nov. 1947. The first amendment to the Fund's articles creating the special drawing right (SDR) took effect on 28 July 1969 and the second amendment took effect on 1 April 1978.

The capital resources of the Fund come from SDRs and currencies that the members pay under quotas calculated for them when they join the Fund. Members' quotas in the Fund, in 1985, amounted to SDR 89,300m. and are closely related to (i) subscription to the Fund, (ii) their drawing rights on the Fund under both regular and special facilities, (111) their voting power, and (112) their share of any allocations of SDRs. Every Fund member is required to subscribe to the Fund an amount equal to its quota. An amount not exceeding 25% of the quota has to be paid in reserve assets, the balance in the member's own currency.

The Fund is authorized under its Articles of Agreement to supplement its resources by borrowing. In Jan. 1962, a 4-year agreement was concluded with 10 industrial members (Belgium, Canada, France, Federal Republic of Germany,

Italy, Japan, Netherlands, Sweden, UK, USA) who undertook to lend the Fund up to \$6,000m. In their own currencies, if this should be needed to forestall or cope with an impairment of the international monetary system. Switzerland subsequently joined the group as an associate. These arrangements, known as the General Arrangements to Borrow (GAB), have been extended several times and the most recent 5-year renewal was to end in Oct. 1985. In early 1983 agreement was reached to increase the credit arrangements under the GAB to SDR 17,000m.; to permit use of GAB resources in transactions with Fund members that are not GAB participants, to authorize Swiss participation, and to permit borrowing arrangements with nonparticipating members to be associated with the GAB Saudi Arabia and the Fund have entered into such an arrangement under which the Fund will be able to borrow up to SDR 1,500m. to assist in financing purchases by any member for the same purpose and under the same circumstances as in the GAB The changes became effective by 26 Dec. 1983. The GAB have been used to finance drawings made by the UK in 1964, 1965, 1968, 1969, and 1977, by France in 1969 and 1970, and by USA in 1978. The Fund has also borrowed from member countries and official institutions for a supplementary financing facility and, more recently, from the Saudi Arabian Monetary Agency (SAMA).

Purposes To promote international monetary co-operation, the expansion of international trade and exchange rate stability, to assist in the removal of exchange restrictions and the establishment of a multilateral system of payments, and to alleviate any serious disequilibrium in members' international balance of payments by making the financial resources of the Fund available to them, usually subject to conditions to ensure the revolving nature of Fund resources.

Activities Each member of the Fund undertakes a broad obligation to collaborate with the Fund and other members to ensure the existence of orderly exchange arrangements and to promote a system of stable exchange rates. In addition, members are subject to certain obligations relating to domestic and external policies that can affect the balance of payments and the exchange rate. The Fund makes its resources available, under proper safeguards, to its members to meet short-term or medium-term payments difficulties. The first allocation of special drawing rights was made on 1 Jan. 1970 with five SDR allocations since then. SDRs in existence now total SDR 21,400m. To further enhance its balance of payments assistance to its members the Fund established a compensatory financing facility on 27 Feb. 1963, temporary oil facilities in 1974 and 1975, a trust fund in 1976, and an extended facility for medium-term assistance to members with special balance of payments problems on 13 Sept. 1974 with additional financing now provided through a policy of enlarged access.

The Committee on Reform of the International Monetary System and Related Issues, generally known as the Committee of Twenty, held its first session at the 1972 annual meeting, with the mandate to advise and report to the Board on all aspects of the international monetary system, including proposals for any amendments of the Articles of Agreement. The Committee of Twenty disbanded after submitting its final report in 1974. An Interim Committee of the Board of Governors on the International Monetary System and a Joint Ministerial Committee of the Boards of Governors of the World Bank and the Fund on the Transfer of Real Resources to Developing Countries (Development Committee) were established and held their initial meetings in Jan 1975 and since then have met on a semi-annual basis. Details of the reform of the international monetary system were incorporated in the second amendment of the Fund's Articles of Agreement, effective April 1978.

Organization The highest authority in the Fund is exercised by the Board of Governors on which each member government is represented. Normally the Governors meet once a year, although the Governors may take votes by mail or other means between annual meetings. The Board of Governors has delegated many of its powers to the executive directors in Washington, of whom there are 22, of which 6 are appointed by individual members and the other 16 elected by groups of countries. Each appointed director has voting power proportionate to the quota of the government he represents, while each elected director casts all the votes of

the countries which elected him. The 6 appointed executive directors represent the US, UK, France, Federal Republic of Germany, Japan and Saudi Arabia.

The managing director is selected by the executive directors; he presides as chairman at their meetings, but may not vote except in case of a tie. His term is for 5 years, but may be extended or terminated at the discretion of the executive directors. He is responsible for the ordinary business of the Fund, under general control of the executive directors, and supervises a staff of about 1,700

## INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT (IBRD)

Conceived at the Bretton Woods Conference, July 1944, the 'World Bank' began operations in June 1946. Its purpose is to provide funds and technical assistance to facilitate economic development in its poorer member countries.

The Bank obtains its funds from the following sources. Capital subscribed by member countries; sales of its own securities; sales of parts of its loans; repayments; and net earnings. The subscribed capital of the Bank amounted to \$58,846m at 30 June 1985. On 4 Jan. 1980, the Board of Governors adopted a resolution that increased the authorized capital stock of the Bank by 331,500 shares. This represented an increase of approximately \$40,000m. The resolution provides that the paid-in portion of the shares authorized to be subscribed under it will be 7.5%, compared with the 10% paid-in portion of existing capital stock. Borrowing in the market had reached more than \$90,000m. by 30 June 1985, of which \$50,298m. was outstanding. The Bank is self-supporting. Its net earnings for year ending 30 June 1985 amounted to \$1,137m.; in addition, the Bank had reserves of \$4,019m.

By 30 June 1985 the Bank had made 2,506 loans totalling \$114,656m. in 105 of its 149 member countries. Lending was for the following purposes. Agriculture and development, \$22,411 2m., Development Finance Companies, \$10,431 lm.; education, \$4,204m.; energy, \$25,578m., industry, \$7,801 4m, non-project, \$4,124m.; population, health and nutrition, \$542 2m.; small-scale enterprises, \$770.5m.; telecommunications, \$1,828 2m.; tourism, \$364m., transportation, \$20,580.9m.; urban development, \$2,901 6m; water supply and sewerage, \$5,420.8m., and technical assistance, \$200.5m. In order to eliminate wasteful overlapping of development assistance and to ensure that the funds available are used to the best possible effect, the Bank has organized consortia or consultative groups of aidgiving nations for the following countries: Bangladesh, Bolivia, Burma, Colombia, Egypt, Ethiopia, Ghana, Guinea, Guinea-Bissau, India, Ivory Coast, Kenya, Korea, Madagascar, Malawi, Mauritania, Mauritius, Morocco, Nepál, Nigeria, Pakistan, Peru, the Philippines, Senegal, Somalia, Sri Lanka, Sudan, Tanzania, Thailand, Togo, Tunisia, Uganda, Zaire, Zambia and the Caribbean Group for Co-operation in Economic Development. The Bank furnishes a wide variety of technical assistance. It acts as executing agency for a number of preinvestment surveys financed by the UN Development Programme. Resident missions have been established in 33 developing member countries as well as 3 regional missions in East and West Africa and Thailand primarily to assist in the preparation of projects. The Bank helps member countries to identify and prepare projects for the development of agriculture, education and water supply by drawing on the

expertise of the FAO, WHO, UNIDO and UNESCO through its co-operative agreements with these organizations. The Bank maintains a staff college, the Economic Development Institute in Washington, D.C., for senior officials of the member countries

#### INTERNATIONAL DEVELOPMENT ASSOCIATION (IDA)

A lending agency which came into existence on 24 Sept 1960 Administered

by the World Bank, IDA is open to all members of the Bank

IDA concentrates its assistance on those countries with an annual per capital gross national product of less than \$520 (1975 rate). Its resources consist mostly of subscriptions, general replenishments from its more industrialized and developed members, special contributions, and transfers from the net earnings of the Bank IDA credits are made to Governments only. It had committed over \$33,654m for 1,389 development projects in 83 countries, by 30 June 1984.

#### INTERNATIONAL FINANCE CORPORATION (IFC)

The Corporation, an affiliate of the World Bank, was established in July 1956 Paid-in capital at 30 June 1985 was \$545 8m., subscribed by 125 member countries. In addition, it has accumulated earnings of \$258 4m. IFC supplements the activities of the World Bank by encouraging the growth of productive private enterprises in less developed member countries. Chiefly, IFC makes investments in the form of subscriptions to the share capital of privately owned companies, or long-term loans, or both. The Corporation will help finance new ventures, and it will also assist established enterprises to expand, improve or diversify their operations.

At 30 June 1985 IFC had approved investments amounting to \$7,153m, in 84 countries. The total amount of loans and equity which IFC had sold or agreed to sell to other investors as of that date was \$3,125m.

#### INTERNATIONAL CIVIL AVIATION ORGANIZATION (ICAO)

Origin The Convention providing for the establishment of the International Civil Aviation Organization was drawn up by the International Civil Aviation Conference held in Chicago from 1 Nov to 7 Dec 1944 A Provisional International Civil Aviation Organization (PICAO) operated for 20 months until the formal establishment of ICAO on 4 April 1947

The Convention on International Civil Aviation superseded the provisions of the Paris Convention of 1919, which established the International Commission for Air Navigation (ICAN), and the Pan American Convention on Air Navigation drawn up at Havana in 1928

Functions. It assists international civil aviation by establishing technical standards for safety and efficiency of air navigation and promoting simpler procedures at borders; develops regional plans for ground facilities and services needed for international flying; disseminates air-transport statistics and prepares studies on aviation economics, fosters the development of air law conventions. As part of the UN Development Programme it provides technical assistance to States in developing civil aviation programmes.

Organization The principal organs of ICAO are an Assembly, consisting of all

members of the Organization, and a Council, which is composed of 33 states elected by the Assembly, for 3 years, and meets in virtually continuous session. In electing these states, the Assembly must give adequate representation to. (1) states of major importance in air transport; (2) states which make the largest contribution to the provision of facilities for the international civil air navigation; (3) those states not otherwise included whose election will ensure that all major geographical areas of the world are represented. The main subsidiary bodies are: the Air Navigation Commission, composed of 15 members appointed by the Council, Air Transport Committee, open to council members, and the Legal Committee, on which all members of ICAO may be represented. There are 156 members. Budget for 1985 US\$38,294,000.

#### UNIVERSAL POSTAL UNION (UPU)

Origin The UPU was established on 1 July 1875, when the Universal Postal Convention adopted by the Postal Congress of Berne on 9 Oct 1874 came into force The UPU was known at first as the General Postal Union, its name being changed at the Congress of Paris in 1878. In 1980 there were 158 member countries

Functions The aim of the UPU is to assure the organization and perfection of the various postal services and to promote, in this field, the development of international collaboration. To this end, the members of UPU are united in a single postal territory for the reciprocal exchange of correspondence.

Organization The UPU is composed of a Universal Postal Congress which usually meets every 5 years, a permanent Executive Council consisting of 40 members, a consultative Committee, which consists of 35 members elected on a geographical basis by each Congress, and an International Bureau, which functions as the permanent secretariat.

Since I July 1948 the Union has been governed by the revised Convention adopted by the twelfth Congress in Paris on 5 July 1947

#### INTERNATIONAL TELECOMMUNICATION UNION (ITU)

Origin The International Telegraph Union, founded in Paris in 1865, and the International Radiotelegraph Union, founded in Berlin in 1906, were merged by the Madrid Convention of 1932 to form the International Telecommunication Union. ITU came into being on 1 Jan. 1934. The ITU has been governed since 1 Jan. 1975 by the revised International Telecommunication Convention adopted on 23 Oct. 1973.

Functions. The ITU: (1) allocates radio frequencies and registers radio-frequency assignments; (2) seeks to establish the lowest rates possible, consistent with efficient service and taking into account the necessity for keeping the independent financial administration of telecommunication on a sound basis; (3) promotes the adoption of measures for ensuring the safety of life through telecommunication; and (4) makes studies and recommendations and collects and publishes information for the benefit of its members.

Organization The ITU consists of the Plenipotentiary Conference, Administrative Conferences, the Administrative Council of 36 members, the General Secretariat, the International Frequency Registration Board, and 2 international consultative committees (radio, telephone and telegraph).

#### WORLD METEOROLOGICAL ORGANIZATION (WMO)

Origin A Conference of Directors of the International Meteorological Organization (set up in 1873), meeting in Washington in 1947, adopted a Convention creating the World Meteorological Organization. The WMO Convention became effective on 23 March 1950, and WMO was formally established on 19 March 1951, when the first session of its Congress was convened in Paris. An agreement to bring WMO into relationship with the United Nations was approved by this Congress and came into force on 21 Dec. 1951 with its approval by the General Assembly of the United Nations.

Functions (1) To facilitate world-wide co-operation in the establishment of networks of stations for the making of meteorological observations as well as hydrological or other geophysical observations related to meteorology, and to promote the establishment and maintenance of meteorological centres charged with the provision of meteorological and related services, (2) to promote the establishment and maintenance of systems for the rapid exchange of meteorological and related information, (3) to promote standardization of meteorological and related observations and to ensure the uniform publication of observations and statistics, (4) to further the application of meteorology to aviation, shipping, water problems, agriculture and other human activities, (5) to promote activities in operational hydrology and to further close co-operation between meteorological and hydrological services, and (6) to encourage research and training in meteorology and, as appropriate, to assist in co-ordinating the international aspects of such research and training

Organization WMO is an inter-governmental organization of 154 member states and 5 member territories responsible for the operation of their own meteorological services. Constituent bodies of WMO are the World Meteorological Congress which meets every 4 years, the executive council composed of 36 members elected in their personal capacity and including the President and 3 Vice-Presidents of the Organization, 6 regional associations of members and 8 technical commissions established by the Congress. #### INTERNATIONAL MARITIME ORGANIZATION (IMO)

Origin The International Maritime Organization, until 1982 known as Inter-Governmental Maritime Consultative Organization (IMCO), was established as a specialized agency of the UN by a convention drawn up at the UN Maritime Conference held at Geneva in Feb / March 1948. The Convention became effective on 17 March 1958 when it had been ratified by 21 countries, including 7 with at least 1m gross tons of shipping each The International Maritime Organization started operations in Jan. 1959

Functions To facilitate co-operation among governments on technical matters affecting merchant shipping, especially concerning safety at sea; to prevent and control marine pollution caused by ships, to facilitate international maritime traffic. The International Maritime Organization is responsible for convening international maritime conferences and for drafting international maritime conventions It also provides technical assistance to countries wishing to develop their maritime activities.

Organization The International Maritime Organization had 127 members (and 1 associate member) in 1985. The Assembly, composed of all member states, normally meets every 2 years. The Council of 32 member states acts as governing body between Assembly sessions. The Maritime Safety Committee deals with all technical questions. It can establish specialized sub-committees to deal with specific problems and like the Marine Environment Protection Committee, Legal Committee, Facilitation Committee and Committee on Technical Co-operation is open to all International Maritime Organization members. The Secretariat is composed of international civil servants.

The International Maritime Organization is depositary authority for the International Convention for the Safety of Life at Sea, 1960, and the Regulations for Preventing Collisions at Sea, 1948 and 1960, the International Convention for the Prevention of Pollution of the Sea by Oil, 1954, as amended in 1962 and 1969, the Convention on Facilitation of International Maritime Traffic, 1965, the International Convention on Load Lines, 1966, the International Convention on Tonnage Measurement of Ships, 1969; the International Convention relating to Intervention on the High Seas in cases of Oil Pollution Casualties, 1969, the International Convention on Civil Liability for Oil Pollution Damage, 1969; Convention on International Compensation Fund for Oil Pollution Damage, 1971, Special Trade Passenger Ships Agreement, 1971, Convention on International Regulations for Preventing Collisions at Sea, 1972, the International Convention for Safe Containers, 1972, the International Convention on Prevention of Pollution from Ships, 1973, the International Convention for the Safety of Life at Sea, 1974, Athens Convention relating to the Carriage of Passengers and their Luggage by Sea. 1974, Convention on the International Maritime Satellite Organization, 1976, Convention on Limitation of Maritime Claims, 1976, Torremolinos International Convention for the Safety of Fishing Vessels, 1977, International Convention on Standards of Training, Certification and Watchkeeping for Seafarers, 1978, International Convention on Maritime Search and Rescue, 1979

#### GENERAL AGREEMENT ON TARIFFS AND TRADE (GATT)

Origin The General Agreement on Tariffs and Trade was negotiated in 1947 and entered into force on 1 Jan 1948 Its 23 original signatories were members of a Preparatory Committee appointed by the UN Economic and Social Council to draft the charter for a proposed International Trade Organization Since this charter was never ratified, the General Agreement, intended as an interim arrangement, has instead remained as the only international instrument laying down trade rules accepted by countries responsible for most of the world's trade. In Nov. 1985 there were 90 contracting parties, with a further 31 countries participating under special arrangements.

Functions. GATT functions both as a multilateral treaty that lays down a common code of conduct in international trade and trade relations and as a forum for negotiation and consultation to overcome trade problems and reduce trade barriers Key provisions of the Agreement guarantee most-favoured-nation treatment (exceptions being granted to customs unions and free trade areas, and for certain preferences in favour of developing countries); require that protection be given to domestic industry only through taniffs (apart from specified exceptions); provide

for negotiations to reduce tariffs (which are then 'bound' against subsequent increase) and other trade distortions; and lay down principles (particularly in Part IV of the Agreement, added in 1965) to assist the trade of developing countries. The Agreement also provides for consultation on, and settlement of, disputes, for 'waivers' (the grant of authorization, when warranted, to derogate from specific GATT obligations) and for emergency action in defined circumstances.

Seven 'rounds' of multilateral trade negotiations, including the Kennedy Round of 1964-67, took place in GATT up to 1979. The latest in this series, the Tökyö Round, although held in Geneva, was so called because it was launched at a Minis-

terial meeting in the Japanese capital in Sept 1973

Ninety-nine countries participated in the Tökyö Round In Nov 1979, the negotiations were concluded with agreements covering an improved legal framework for the conduct of world trade (which includes recognition of tariff and nontariff treatment in favour of and among developing countries as a permanent legal feature of the world trading system), non-tariff measures (subsidies and countervailing duties, technical barriers to trade, government procurement, customs valuation, import licensing procedures, and a revision of the 1967 GATT antidumping code), bovine meat, dairy products, tropical products, and an agreement on free trade in civil aircraft The agreements contain provisions for special and more favourable treatment for developing countries

Participating countries also agreed to reduce tariffs on thousands of industrial and agricultural products, for the most part over a period of 7 years beginning on 1 Jan 1980. As a result of these concessions, industrialized countries will reduce the average level of their import duties on manufactures by about 34%, a cut compar-

able to that achieved in the Kennedy Round

The agreements providing an improved framework for the conduct of world trade took effect in Nov. 1979 The other agreements took effect on 1 Jan. 1980, except for those covering government procurement and customs valuation, which took effect on 1 Jan 1981, and the concessions on tropical products which began as early as 1977. Committees were established to supervise implemention of each of the Tökyö Round agreements Negotiations continued on the one major unresolved Tökyö Round issue of whether to revise GATT rules on

emergency safeguard action against imports.

GATT's member governments met in Geneva 24–29 Nov 1982. The purpose of the meeting was to 'examine the functioning of the multilateral trading system, and to reinforce the common efforts of the contracting parties to support and improve the system for the benefit of all nations' They adopted by consensus a joint Ministerial declaration which included (1) An agreement on the problems facing the world economy and international trade, (ii) reaffirmation of the member governments' commitment to the GATT rules and to the multilateral trading system, (iii) an undertaking to refrain from taking or maintaining any trade measures inconsistent with GATT, (iv) an undertaking to ensure the effective implementation of GATT rules and provisions concerning developing countries, thereby furthering the dynamic role of these countries in international trade; (v) an undertaking to bring agriculture more fully into the multilateral trading system; to this end a Committee on Trade in Agriculture was established to carry out a major two-year work programme in this area, (vi) an undertaking to bring into effect quickly a comprehensive understanding on safeguards to be based on the principles of the General Agreement

The Ministerial declaration also included decisions to improve the GATT procedures for settling trade disputes between members, to study such issues as trade in certain natural resource products, and to exchange information through GATT on international trade in services.

To assist the trade of developing countries, GATT established in 1964 the International Trade Centre (since 1968 operated jointly with the UN Conference on Trade and Development) to provide information and training on export markets and marketing techniques. Other GATT action in favour of developing countries includes training courses on trade policy questions

#### WORLD INTELLECTUAL PROPERTY ORGANIZATION (WIPO)

Origin The Convention establishing WIPO was signed at Stockholm in 1967 by 51 countries, and entered into force in April 1970. In Dec. 1974 WIPO became a specialized agency of the UN

Functions To promote the protection of intellectual property throughout the world through co-operation among States and, where appropriate, in collaboration with any other international organization, and to ensure administrative cooperation among the Unions established by various treaties for the protection of intellectual property The WIPO Convention provides expressly for the encouragement of the conclusion of international agreements designed to promote the protection of intellectual property, and for the provision of legal-technical assistance at the request of States

Intellectual property means the legal rights which result from intellectual activity in the industrial, scientific, literary or artistic fields. The main examples are industrial property (patents and other rights in inventions, rights in trademarks and industrial designs etc.) and copyright and neighbouring rights (chiefly in literary, musical and artistic works, in films, records and broadcasts etc.) in all fields of human endeavour, scientific discoveries, industrial designs, trade-marks, service marks and commercial names and designations, protection against unfair competition and all other rights resulting from intellectual activity in the industrial, scientific, literary or artistic fields

Membership in WIPO is open to any State which is a member of at least one of the Unions and to other States which are members of the organizations of the United Nations system, are party to the Statute of the International Court of Justice, or are invited to join by the General Assembly of WIPO Membership of the Unions is open to any State. The total combined membership of WIPO and of the Unions on 31 Dec. 1984, was 124 states.

Organization The bodies of WIPO are: The General Assembly consisting of all States members of WIPO which are members of any of the Unions Among its other functions, the General Assembly appoints and gives instructions to the Director General, reviews and approves his reports and adopts the biennial budget of expenses common to the Unions. The Conference, consisting of all States members of WIPO whether or not they are members of any of the Unions Among its other functions, the Conference adopts its biennial budget and establishes the biennial programme of legal-technical assistance The Co-ordination Committee, consisting of the States members of WIPO which are members of the Executive Committees of the Paris or Berne Unions.

In addition, the Paris and Berne Unions have Assemblies and Executive Committees, with functions similar to those of the WIPO bodies in respect of the biennial and annual budgets and programmes of the Unions.

The WIPO Permanent Committees for Development Co-operation Related to Industrial Property and Related to Copyright and Neighbouring Rights plan and review activities in the said fields; the WIPO Permanent Committee on Patent Information is responsible for intergovernmental co-operation in patent search systems and in such matters as the classification, standardization and exchange of patent documents

#### THE COMMONWEALTH

The Commonwealth is a free association of sovereign independent states, numbering 49 at the beginning of 1986. There is no charter, treaty or constitution, the association is expressed in co-operation, consultation and mutual assistance for which the Commonwealth Secretariat is the central co-ordinating body.

The Commonwealth was first defined by the Imperial Conference of 1926 as a group of 'autonomous communities within the British Empire, equal in status, in no way subordinate one to another in any aspect of their domestic or foreign affairs, though united by a common allegiance to the Crown, and freely associated as members of the British Commonwealth of Nations' The basis of the association changed from one owing allegiance to a common Crown, and the modern Commonwealth was born in 1949 when the member countries accepted India's intention of becoming a republic at the same time continuing 'her full membership of the Commonwealth of Nations and her acceptance of the King as the symbol of the free association of its independent member nations and as such the Head of the Commonwealth'. There are now (1986) 18 Queen's realms, 26 republics, and 5 indigenous monarchies in the Commonwealth. All acknowledge the Queen symbolically as Head of the Commonwealth.

The Queen's legal title rests on the statute of 12 and 13 Will, III, c. 3, by which

the succession to the Crown of Great Britain and Ireland was settled on the Princess Sophia of Hanover and the 'heirs of her body being Protestants'. By proclamation of 17 July 1917 the royal family became known as the House and Family of Windsor On 8 Feb 1960 the Queen issued a declaration varying her confirmatory declaration of 9 April 1952 to the effect that while the Queen and her children should continue to be known as the House of Windsor, her descendants, other than descendants entitled to the style of Royal Highness and the title of Prince or Princess, and female descendants who marry and their descendants should bear the name of Mountbatten-Windsor. The Royal Style and Titles of Queen Elizabeth are. In Antigua and Barbuda 'Elizabeth the Second, by the Grace of God, Queen of Antigua and Barbuda and of Her other Realms and Territories, Head of the Commonwealth'. In Australia: 'Elizabeth the Second, by the Grace of God Queen of Australia and Her other Realms and Territories, Head of the Commonwealth' In the Bahamas: 'Elizabeth the Second, by the Grace of God, Queen of the Commonwealth of the Bahamas and of Her other Realms and Territories, Head of the Commonwealth'. In Barbados 'Elizabeth the Second, by the Grace of God, Queen of Barbados and of Her other Realms and Territories, Head of the Commonwealth'. In Belize, 'Elizabeth the Second, by the Grace of God, Queen of Belize and of Her Other Realms and Territories, Head of the Commonwealth' In Canada 'Elizabeth the Second, by the Grace of God of the United Kingdom, Canada and Her other Realms and Territories Queen, Head of the Commonwealth, Defender of the Faith' In Fig. 'Elizabeth the Second, by the Grace of God, Queen of Fig. and of Her other Realms and Territories, Head of the Commonwealth'. In Grenada 'Elizabeth the Second, by the Grace of God, Queen of the United Kingdom of Great Britain and Northern Ireland and of Grenada and Her other Realms and Territories, Head of the Commonwealth'. In Jamaica. 'Elizabeth the Second, by the Grace of God of Jamaica and of Her other Realms and Territories Queen, Head of the Commonwealth'. In Mauritius 'Elizabeth the Second, Queen of Mauritius and of Her other Realms and Territories, Head of the Commonwealth' In New Zealand 'Elizabeth the Second, by the Grace of God Queen of New Zealand and Her Other Realms and Territories, Head of the Commonwealth, Defender of the Faith' In Papua New Guinea: 'Elizabeth the Second, Queen of Papua New Guinea and Her other Realms and Territories, Head of the Commonwealth'. In Saint Christopher and Nevis 'Elizabeth the Second, by the Grace of God, Queen of Saint Christopher and Nevis and Her other Realms and Territories, Head of the Commonwealth' In Saint Lucia. 'Elizabeth the Second, by the Grace of God, Queen of Saint Lucia and of Her other Realms and Territories, Head of Commonwealth' In Saint Vincent and the Grenadines. 'Elizabeth the Second, by the Grace of God, Queen of Saint Vincent and the Grenadines and of Her other Realms and Territories, Head of the Commonwealth' In Solomon Islands 'Elizabeth the Second by the Grace of God Queen of Solomon Islands and of Her other Realms and Territories, Head of the Commonwealth'. In Tuvalu 'Elizabeth the Second by the Grace of God Queen of Tuvalu and of Her other Realms and Territories, Head of the Commonwealth'. In the United Kingdom: 'Elizabeth the Second, by the Grace of God of the United Kingdom of Great Britain and Northern Ireland and of Her other Realms and Territories Queen, Head of the Commonwealth, Defender of the Faith'.

A number of territories, formerly under British jurisdiction or mandate did not join the Commonwealth: Egypt, Iraq, Transjordan, Burma, Palestine, Sudan, British Somaliland, South Cameroons, and Aden. Two countries, the Republic of South Africa in 1961 and Pakistan in 1972, have left the Commonwealth.

Nauru and Tuvalu are special members, with the right to participate in all functional Commonwealth meetings and activities but not to attend meetings of Commonwealth Heads of Government.

<sup>&</sup>lt;sup>1</sup> These are the effective dates of independence, given legal effect by the Statute of Westminster 1931

Brunei was a sovereign state in treaty relationship with Britain, whereby Britain was responsible for the conduct of external affairs and had a consultative responsibility for defence it had never been a dependent territory, and in 1971 had ceased to be a protected state A Treaty of Friendship and Co-operation was signed on 7 Jan 1979, becoming effective on 1 Jan 1984 when Brunei assumed her full international responsibilities and Britain gave up her consultative commitment over defence matters

British Government Department. With effect from 17 Oct. 1968, the Secretary of State for Foreign and Commonwealth Affairs is responsible for the conduct of relations with members of the Commonwealth as well as with foreign countries, and for the administration of British dependent territories.

Commonwealth Secretariat The Commonwealth Secretariat is an international body at the service of all 49 member countries. It provides the central organization for joint consultation and co-operation in many fields. It was established in 1965 by Commonwealth Heads of Government and has observer status at the UN General Assembly

The Secretariat disseminates information on matters of common concern, organizes and services meetings and conferences, co-ordinates many Commonwealth activities, and provides expert technical assistance for economic and social development through the multilateral Commonwealth Fund for Technical Co-operation. The Secretariat is organized in divisions and sections which correspond to its main areas of operation: International affairs, economic affairs, food production and rural development, youth, education, information, applied studies in government, science and technology, law and health. Within this structure the Secretariat organizes the biennial meetings of Commonwealth Heads of Government, annual meetings of Finance Ministers of member countries, and regular meetings of Ministers of Education, Law, Health, and others as appropriate.

To emphasize the multilateral nature of the association, meetings are held in different cities and regions within the Commonwealth Heads of Government decided that the Secretariat should work from London as it has the widest range of communications of any Commonwealth city, as well as the largest assembly of diplomatic missions.

The Commonwealth Secretary-General, who has access to Heads of Government, is the head of the Secretariat which is staffed by officers from member countries and financed by contributions from member governments.

Commonwealth Day is observed throughout the Commonwealth on the second Monday in March.

#### WORLD COUNCIL OF CHURCHES

The World Council of Churches was formally constituted on 23 Aug 1948, at Amsterdam, by an assembly representing 147 churches from 44 countries By 1985 the member churches numbered over 300, from more than 100 countries.

The basis of membership (1975) states 'The World Council of Churches is a fellowship of Churches which confess the Lord Jesus Christ as God and Saviour according to the Scriptures and therefore seek to fulfil together their common calling to the glory of the one God, Father, Son and Holy Spirit.' Membership is open to Churches which express their agreement with this basis and satisfy such criteria as the Assembly or Central Committee may prescribe Today 303 Churches of Protestant, Anglican, Orthodox, Old Catholic and Pentecostal confessions belong to this fellowship

The World Council was founded by the coming together of several diverse Christian movements. These included the overseas mission groups gathered from 1921 in the International Missionary Council, the Faith and Order Movement founded by American Episcopal Bishop Charles Brent, and the Life and Work

Movement led by Swedish Lutheran Archbishop Nathan Soderblom.

On 13 May 1938 at Utrecht a provisional committee was appointed to prepare for the formation of a World Council of Churches It was under the chairmanship of William Temple, then Archbishop of York

Assembly. The governing body of the World Council, consisting of delegates specially appointed by the member Churches It meets every 7 or 8 years to frame policy and to consider some main theme. The Assembly has no legislative powers and depends for the implementation of its decisions upon the action of the member Churches Assemblies have been held in Amsterdam (1948), Evanston (1954), New Delhi (1961), Uppsala (1968), and Nairobi (1975) and most recently in Vancouver, Canada in 1983 under the theme 'Jesus Christ – the Life of the World' In between assemblies, a 150-member Central Committee meets annually to carry out the assembly mandate, with a smaller 22-member Executive Committee meeting twice a year.

Presidents Dr Marga Buhrig (Switzerland), Most Rev W P K Makhulu (Botswana), Dame R. Nita Barrow (Barbados), Bishop Johannes Hempel (German Democratic Republic), Dr Lois Wilson (Canada), Metropolitan Paulos Mar Gregorios (India), Patriarch Ignatios IV (Syria)

WCC programmes are organized from headquarters in Geneva, Switzerland, by a staff of 300 and a range of supervisory committees drawn from member churches

The 3 programme units are

(1) Faith and Witness includes the Commission on Faith and Order, World Mission and Evangelism, Church and Society and the sub-unit on Dialogue with People of Living Faiths

(11) Justice and Service which includes Inter-Church Aid, Refugee and World Service (channelling over \$35m. from member churches to areas of need), the Commission on the Churches' Participation in Development; the Commission of the Churches on International Affairs, the Programme to Combat Racism and the Christian Medical Commission

(111) Education and Renewal includes sections dealing with renewal and congregational life, women, youth, church-related education, biblical studies, family ministry and the Programme on Theological Education.

A General Secretariat with a Communication Department, finance and central services co-ordinates the work of these 3 units.

Since 1975 the WCC has held several major world conferences on such diverse themes as 'Faith, Science and the Future', 'Your Kingdom Come', 'Family Power

and Social Change', 'Strategies for Churches Combating Racism in the 1980's', 'The Community of Women and Men in the Church' and 'Giving an Account of the Hope that is in Us'.

#### INTERNATIONAL TRADE UNIONISM

There are three main international trade union confederations (1) the International Confederation of Free Trade Unions (ICFTU) which has in membership most of the national trade union confederations in the Western industrialized countries as well as democratic organizations in Asia, Africa, and Latin America, (11) the World Federation of Trade Unions (WFTU) which draws its support mainly from Eastern Europe, but which also has affiliates in France and in several developing countries, and (111) the World Confederation of Labour (WCL) which has affiliates in Western Europe, Latin America and a small number of African and Asian countries. In addition, national trade unions are frequently members of international trade union federations, set up to protect the interests of working people in particular industries or trades, which are associated with the international confederations. The International Trade Secretariats (ITS) are associated with the ICFTU, Trade Union Internationals (TUI) with the WFTU, and the International Trade Federations (ITF) with the WCL

Coldnek, A. P., and Jones, P., International Directory of the Trade Union Movement London, 1979

History The international trade union structure in 1983 was shaped mainly by developments since 1945. In that year the WFTU was set up with world-wide membership. Attempts by trade unions in Eastern Europe to turn the WFTU into an organization voicing unquestioning support for the policies of the USSR led most of the affiliates in the Western European countries to break away from the WFTU and to form the ICFTU in 1949.

EUROPEAN TRADE UNION CONFEDERATION. In Feb. 1973 the European Trade Union Confederation was formed by trade unionists in 15 Wes-

tern European countries to deal with questions of interest to European working people arising inside and outside the EEC. All the founding organizations were ICFTU affiliates but subsequently they accepted into membership European WCL affiliates, the Irish Congress of Trade Unions and the Italian Communist trade union centre (CGIL) and other national organizations. The ETUC Congress meets every 3 years and the Executive Committee 6 times a year The membership is now about 43m from 34 centres in 20 countries

General Secretary Mathias Hinterscheid Headquarters Rue Montagne aux Herbes Potagèies 37, 1000 Brussels

INTERNATIONAL CONFEDERATION OF FREE TRADE UNIONS. The first congress of ICFTU was held in London in Dec 1949. The constitution as amended provides for co-operation with the United Nations and the International Labour Organization and for regional organizations to promote free trade unionism, especially in less-developed countries

Organization The Congress meets every 4 years It elects the Executive Board of 37 members nominated on an area basis for a 4-year period, the Board meets at least twice a year Various committees cover policy vis-à-vis such problems as those connected with Atomic Energy and also the administration of the International Solidarity Fund There are joint ICFTU-ITS committees for co-ordinating activities and also for women workers' problems

Headquarters 37-41, rue Montagne aux Herbes Potagères, Brussels 1000, Belgium

General Secretary John Vanderveken.

Regional organizations exist in America, offices in Mexico City and Caracas, Asia, offices in New Delhi and Singapore; and Africa.

Membership The ICFTU has 134 affiliated organizations in 94 countries, which together represent about 85m workers The biggest groups were the American Federation of Labor and Congress of Industrial Organizations (13 6m), the British Trades Union Congress (10 5m), the Federal German Deutschei Gewerkschaftsbund (8m.), the Confederazione Italiana Sindacati Lavoratori (2 1m), the Swedish Landsorganisationen (2 1m), the Canadian Labour Congress (1 3m), the Osterreichischer Gewerkschaftsbund (1 7m), the Belgian General Federation of Labour (925,000), the Indian National Trade Union Congress (3 6m). Australian Council of Trade Unions (1 8m), Japanese Confederation of Labour, Domei (1 4m)

Publications (in 4 languages) Free Labour World (bi-monthly), International Trade Union News (fortnightly), Economic and Social Bulletin (bi-monthly)

THE WORLD FEDERATION OF TRADE UNIONS. The WFTU formally came into existence on 3 Oct. 1945, representing trade-union organizations in more than 50 countries of the world, both Communist and non-Communist, excluding Federal Republic of Germany and Japan, as well as a number of lesser and colonial territories Representation from the USA was limited to the Congress of Industrial Organizations, as the American Federation of Labor declined to participate.

In Jan. 1949 the British, USA and Netherlands trade unions withdrew from WFTU, which had come under complete Communist control, and by June 1951 all non-Communist trade-unions, and the Yugoslavian Federation, had left WFTU

Organization The Congress meets every 4 years. In between, the General Council, of 134 members (including deputies), is the governing body, meeting (in theory) at least once a year. The Bureau controls the activities of WFTU between meetings of the General Council, it consists of the President, the General Secretary and members from different continents, the total number being decided at each Congress. The Bureau is elected by the General Council.

General Secretary I Zakaria (Sudan).

Membership A total membership of 206m. from 90 national centres is claimed The biggest groups are the Soviet All-Union Central Council of Trade Unions (107m.), the German Democratic Republic Free German Trade Union Federation (8m), the Czechoslovak Central Council of Trade Unions (6m.), the Romanian General Confederation of Labour (6 4m), the Hungarian Central Council of Trade Unions (4.5m.) and the French Confederation of Labour (CGT, 2m.)

Publications World Trade Union Movement (monthly, in 9 languages), Trade Union Press (fortnightly, in 6 languages)

WORLD CONFEDERATION OF LABOUR. The first congress of the International Federation of Christian Trade Unions (IFCTU), as the WCL was then called, met in 1920, but a large proportion of its 3 4m members were in Italy and Germany, where affiliated unions were suppressed by the Fascist and Nazi régimes, and in 1940 IFCTU went out of existence. It was reconstituted in 1945, and declined to merge with WFTU and, later, with ICFTU. The policy of IFCTU was based on the papal encyclicals Rerum novarum (1891) and Quadragesimo anno (1931), but in 1968, when the Federation became the WCL, it was broadened to include other concepts. The WCL now has Protestant, Buddhist and Moslem members as well as its mainly Roman Catholic members.

Organization The WCL is organized on a federative basis which leaves wide discretion to its autonomous constituent unions. Its governing body is the Congress, which meets every 4 years. The Congress appoints (or re-appoints) the Secretary-General at each 4-yearly meeting. The General Council which meets at least once a year, is composed of the members of the Confederal Board (at least 22 members, elected by the Congress) and representatives of national confederations, international trade federations, and trade union organizations where there is no confederation affiliated to the WCL. The Confederal Board is responsible for the general leadership of the WCL, in accordance with the decisions and directives of the Council and Congress. Headquarters. 71 rue Joseph II, Brussels 1040, Belgium.

Secretary-General Jan Kulakowski

There are regional organizations in Latin America (office in Caracas), Africa (office in Banjul, Gambia) and Asia (office in Manila) There is also a liaison centre in Montreal

Membership A total membership of 14m in about 90 countries is claimed The biggest group is the Confederation of Christian Trade Unions of Belgium (1 1m)

# ORGANISATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT (OECD)

History and Membership On 30 Sept 1961 the Organisation for European Economic Co-operation (OEEC), after a history of 14 years (see The Statesman's Year-Book, 1961, p 32), was replaced by the Organisation for Economic Co-operation and Development. The change of title marks the Organisation's altered status and functions with the accession of Canada and USA as full members it ceased to be a purely European body; while at the same time it added development aid to the list of its other activities. The member countries are now Australia, Austria, Belgium, Canada, Denmark, Federal Republic of Germany, Finland, France, Greece, Iceland, Ireland, Italy, Japan, Luxembourg, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, UK and USA. Yugoslavia participates in the Organisation's activities with a special status. The Commission of the European Communities generally takes part in OECD's work.

Objectives To promote economic and social welfare throughout the OECD area by assisting its member governments in the formulation of policies designed to this end and by co-ordinating these policies; and to stimulate and harmonize its members' efforts in favour of developing countries.

Organs. The supreme body of the Organisation is the Council composed of one representative for each member country. It meets either at Heads of Delegations level (about once a week) under the Chairmanship of the Secretary-General, or at Ministerial level (usually once a year) under the Chairmanship of a Minister elected annually. Decisions and Recommendations are adopted by mutual agreement of all members of the Council.

The Council is assisted by an Executive Committee composed of 14 members of the Council designated annually by the latter. The major part of the Organisation's work is, however, prepared and carried out in numerous specialized committees and working parties and sub-groups, of which there exist over 200. Thus, the Organisation comprises Committees for Economic Policy; Economic and Development Review; Development Assistance (DAC); North-South Economics Issues; Commodities; Trade; Capital Movements and Invisible Transactions, Financial Markets; Fiscal Affairs; Restrictive Business Practices; Consumer Policy, Maritime Transport; Road Transport Research, International Investment and Multinational Enterprises, Tourism, Energy Policy, Industry, Steel, Scientific and Technological Policy, Information, Computer and Communications Policy, Education, Manpower and Social Affairs, Environment, Urban Affairs, Control of Chemicals, Agriculture; Fisheries, etc.

Four autonomous or semi-autonomous bodies also belong to the Organisation the International Energy Agency (IEA); the Nuclear Energy Agency (NEA), the Development Centre and the Centre for Educational Research and Innovation (CERI) Each one of these bodies has its own governing committee

The Council, the committees and the other bodies are serviced by an international Secretariat headed by the Secretary-General of the Organisation

All member countries have established permanent Delegations to OECD, each headed by an Ambassador.

#### NORTH ATLANTIC TREATY **ORGANIZATION (NATO)**

Western perceptions of the political situation in Europe following World War II gave rise, in 1947, to 2 major US initiatives - the Truman Doctrine and the Marshall Plan. These policies were designed to increase the ability of Western European countries to resist outside pressure and to assist them in bringing about their economic recovery By 1948, on the initiative of the Foreign Secretary of the UK Ernest Bevin, 5 Western European nations had also entered into a treaty of mutual assistance in which they pledged themselves to come to each other's aid in the event of armed aggression against them (Brussels Treaty, 17 March 1948) The idea of a single mutual defence system involving North America as well as the European signatories of the Brussels Treaty was put forward by the Canadian Secretary of State for External Affairs in April 1948 It led, via the Vandenberg Resolution which enabled the US constitutionally to participate, to the creation of the Atlantic Alliance

On 4 April 1949 the foreign ministers of Belgium, Canada, Denmark, France, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, the UK and the USA met in Washington and signed a treaty, the main clauses of which read as follows

- Article 1 The parties undertake, as set forth in the Charter of the United Nations, to settle any international disputes in which they may be involved by peaceful means in such a manner that international peace and security and justice are not endangered, and to refrain in their international relations from the threat or use of force in any manner inconsistent with the purposes of the United Nations
- 11ticle 2 The parties will contribute toward the further development of peaceful and friendly international relations by strengthening their free institutions, by bringing about a better understanding of the principles upon which these institutions are founded, and by promoting conditions of stability and well-being. They will seek to eliminate conflict in their international economic policies and will encourage economic collaboration between any or all of them.
- tricle 3 In order more effectively to achieve the objectives of this treaty, the parties, separately and jointly by means of continuous and effective self-help and mutual aid, will maintain and develop their individual and collective capacity to resist armed attack
- Article 4 The parties will consult together whenever, in the opinion of any of them, the territorial integrity, political independence or security of any of the parties is threatened
- Arricle 5. The parties agree that an armed attack against one or more of them in Europe or North America shall be considered an attack against them all and consequently they agree that, if such an aimed attack occurs, each of them, in exercise of the right of individual or collective self-defence recognized by article 51 of the Charter of the United Nations, will assist the party or parties so attacked by taking forthwith, individually and in concert with the other parties, such action as it deems necessary, including the use of armed force, to restore and maintain the security of the North Atlantic area. Any such armed attack and all measures taken as a result thereof shall immediately be reported to the Security Council. Such measures shall be terminated when the Security Council has taken the measures necessary to restore and maintain international peace and security.
- titule 6. For the purpose of Article 5 an armed attack on one of more of the parties is deemed to include an armed attack (1) on the territory of any of the parties in Europe or North America, on the Algerian Departments of France, on the territory of Turkey of on the islands under the jurisdiction of any of the parties in the North Atlantic area north of the Tropic of Cancer, (11) on the forces, vessels or aircraft of any of the parties, when in or over these territories or any other area in Europe in which occupation forces of any of the parties were stationed on the date when the treaty entered into force or the Mediterranean Sea of the North Atlantic area north of the Tropic of Cancer
- Irticle 8 Each party declares that none of the international engagements now in force between it and any other of the parties or any third state is in conflict with the provisions of this treaty, and undertakes not to enter into any international engagement in conflict with this treaty
- Article 10 The parties may, by unanimous agreement, invite any other Furopean state in a position to further the principles of this treaty and to contribute to the security of the North Atlantic area to accede to this treaty. Any state so invited may become a party to the treaty by depositing its instrument of accession with the government of the United States of America. The government of the United States of America will inform each of the parties of the deposit of each such instrument of accession.
- Article 12 After the treaty has been in force for 10 years, or at any time thereafter, the parties shall, if any of them so requests, consult together for the purpose of reviewing the treaty having regard for the factors then affecting peace and security in the North Atlantic area, including the development of universal as well as regional arrangements under the Charter of the United Nations for the maintenance of international peace and security

Article 13 After the treaty has been in force for 20 years, any party may cease to be a party one year after its notice of denunciation has been given to the government of the United States of America, which will inform the governments of the other parties of the deposit of each notice of denunciation

The treaty came into force on 24 Aug 1949 Greece and Turkey were admitted as parties to the treaty in 1952, the Federal Republic of Germany in 1955 and Spain in 1982

NATO is an organization of sovereign states equal in status. Decisions taken are expressions of the collective will of member governments arrived at by common consent.

The North Atlantic Council is composed of representatives of the 16 member countries. At Ministerial Meetings of the Council, member nations are represented by Ministers of Foreign Affairs. These meetings are held twice a year. The Council also meets on occasion at the level of Heads of State and Government. In permanent session, at the level of Ambassadors, the Council meets at least once a week.

The Defence Planning Committee is composed of representatives of the member countries taking part in NATO's integrated military structure. Like the Council, it meets both in permanent session at the level of Ambassadors and twice a year at Ministerial level. At Ministerial Meetings member nations are represented by Defence Ministers.

The Council and Defence Planning Committee are chaired by the Secretary General of NATO at whatever level they meet Opening sessions of Ministerial Meetings of the Council are presided over by the President, an honorary position held annually by the Foreign Minister of one of the member nations

Nuclear matters are discussed by the Nuclear Planning Group in which 13 countries now participate. It meets regularly at the level of Permanent Representatives (Ambassadors) and twice a year at the level of Ministers of Defence.

The Permanent Representatives of member countries are supported by the National Delegations located at NATO Headquarters. The Delegations are composed of advisors and officials qualified to represent their countries on the various committees created by the Council The Committees are supported by the International Staff responsible to the Secretary General

Headquarters 1110 Brussels, Belgium
Secretary-General Lord Carrington (UK)
Flag Dark blue with a white compass rose of 4 points in the centre

The Military Committee is responsible for making recommendations to the Council and the Defence Planning Committee on military matters and for supplying guidance to the Allied Commanders Composed of the Chiefs-of-Staff of all member countries except France and Iceland (which has no military forces), the Committee is assisted by an International Military Staff. It meets at Chiefs-of-Staff level at least twice a year but remains in permanent session at the level of national military representatives. Liaison between the Military Committee and the French High Command is effected through the French Mission to the Military Committee The permanent chairman of the Military Committee is elected by the Chiefs-of-Staff for a period of 2-3 years. The present chairman is Gen. Cornelis De Jager (Netherlands), appointed July 1983

The area covered by the North Atlantic Treaty is divided among three commands. The Atlantic Ocean Command, the European Command and the Channel Command. Defence plans for the North American area are developed by the Canada-US Regional Planning Group.

The NATO commanders are responsible for the development of defence plans for their respective areas, for the determination of force requirements and for the deployment and exercise of the forces under their command.

The Allied Command Europe (ACE) covers the area extending from the North Cape to the Mediterranean and from the Atlantic to the eastern border of Turkey, excluding the UK and Portugal, the defence of which does not fall under any one major NATO Command. The European area, which is subdivided into a number of subordinate commands, is under the Supreme Allied Commander Europe

(SACEUR) whose Headquarters, near Mons in Belgium, are known as SHAPE

(Supreme Headquarters Allied Powers Europe).

SACEUR has also under his orders the ACE Mobile Force, composed of both land and air force units from different member countries, which can be ready for action at very short notice in any threatened area. The present SACEUR is Gen

Bernard W. Rogers (USA).

Under the Supreme Allied Commander Atlantic (SACLANT) the Atlantic Command extends from the North Pole to the Tropic of Cancer and from the coastal waters of North America to those of Europe and Africa, but excludes the Channel and the British Isles SACLANT, who would have the primary task in wartime of ensuring the security of the sea lanes in the whole Atlantic area, is an operational rather than an administrative commander. Under his direct command is the Standing Naval Force Atlantic (STANAVFORLANT) which is a permanent international squadron of ships drawn from NATO Navies which normally operate in the Atlantic.

The present SACLANT, whose Headquarters are in Norfolk (USA), is Admiral

Lee Baggett, Jr (US), appointed Nov. 1985.

The Channel Command covers the English Channel and the southern North Sea. Under the Allied Commander-in-Chief Channel (CINCHAN) its mission is to control and protect merchant shipping in the area, co-operating with SACEUR in the air defence of the Channel The forces earmarked to the Command in emergency are predominantly naval but include maritime air forces. CINCHAN has also under his command the NATO Standing Naval Force Channel (STANAVFORCHAN) which is a permanent force comprizing mine countermeasure ships of different NATO countries. The present CINCHAN, with Headquarters at Northwood (UK), is Admiral Sir Nicholas Hunt (UK), appointed June 1985.

The Canada-US Regional Planning Group, which covers the North American area, develops and recommends to the Military Committee plans for the defence of this area. It meets alternately in Washington and Ottawa

# WESTERN EUROPEAN UNION

On 17 March 1948 a 50-year treaty 'for collaboration in economic, social and cultural matters and for collective self-defence' was signed in Brussels by the Foreign Ministers of the UK, France, the Netherlands, Belgium and Luxembourg. (See The Statesman's Year-Book, 1954, pp. 32 f.)

On 20 Dec. 1950 the functions of the Western Union defence organization were transferred to the North Atlantic Treaty command, but it was decided that the reorganization of the military machinery should not affect the right of the Western Union Defence Ministers and the Chiefs of Staff to meet as they please to consider matters of mutual concern to the Brussels Treaty powers.

After the breakdown of the European Defence Community on 30 Aug 1954 a conference was held in London from 28 Sept. to 3 Oct. 1954, attended by Belgium, Canada, France, the Federal Republic of Germany, Italy, Luxembourg, the Netherlands, the UK and the USA, at which it was decided to invite the Federal

Republic of Germany and Italy to accede to the Brussels Treaty, to end the occupation of Western Germany and to invite the latter to accede to the North Atlantic Treaty; the Federal Republic agreed that it would voluntarily limit its arms production, and provision was made for the setting up of an agency to control the armaments of the 7 Brussels Treaty powers; the UK undertook not to withdraw from the Continent her 4 divisions and the Tactical Air Force assigned to the Supreme Allied Commander against the wishes of a majority, i.e., 4 of the Brussels Treaty powers, except in the event of an acute overseas emergency.

At a Conference of Ministers held in Paris from 20 to 23 Oct. 1954 these decisions were embodied in 4 Protocols modifying the Brussels Treaty which were

signed in Paris on 23 Oct. 1954 and came into force on 6 May 1955

The Council of WEU consists of the Foreign Ministers of the 7 powers or their representatives; it is so organized as to be able to exercise its functions continuously. An Assembly, composed of representatives of the Brussels Treaty powers to the Consultative Assembly of the Council of Europe, meets twice a year, usually in Paris. An Agency for the Control of Armaments and a Standing Armaments Committee have been set up in Paris. The social and cultural activities were transferred to the Council of Europe on 1 June 1960.

At a meeting of the Foreign, and Defence, Ministers of Western European Union held in Rome on 26–27 Oct. 1984, the Council adopted the 'Rome Declaration' and a document on the institutional reform of Western European Union. Member Governments support the reactivation of the Organization as a means of strengthening the European contribution to the North Atlantic Alliance and improving defence co-operation among the countries of Western Europe

# COUNCIL OF EUROPE

In 1948 the 'Congress of Europe', bringing together at The Hague nearly 1,000 influential Europeans from 26 countries, called for the creation of a united Europe, including a European Assembly. This proposal, examined first by the Ministerial Council of the Brussels Treaty Organization, then by a conference of ambassadors, was at the origin of the Council of Europe, which is, with its 21 member States, the widest organization bringing together all European democracies. The Statute of the Council was signed at London on 5 May 1949 and came into force 2 months later. The founder members were Belgium, Denmark, France, Ireland, Italy, Luxembourg, the Netherlands, Norway, Sweden and the UK. Turkey and Greece joined in 1949, Iceland in 1950, the Federal Republic of Germany in 1951 (having been an associate since 1950), Austria in 1956, Cyprus in 1961, Switzerland in 1963, Malta in 1965, Portugal in 1976, Spain in 1977 and Liechtenstein in 1978.

Membership is limited to European States which 'accept the principles of the rule of law and of the enjoyment by all persons within [their] jurisdiction of human rights and fundamental freedoms' The Statute provides for both withdrawal (Art. 7) and suspension (Arts. 8 and 9). Greece withdrew from the Council in Dec 1969 and rejoined in Nov 1974.

Structure Under the Statute two organs were set up: an inter-governmental Committee of [Foreign] Ministers with powers of decision and of recommendation to governments, and an inter-parliamentary deliberative body, the Parliamentary Assembly (referred to in the Statute as the Consultative Assembly)—both of which are served by the Secretariat. In addition, a large number of committees of experts have been established, two of them, the Council for Cultural Co-operation and the Committee on Legal Co-operation, having a measure of autonomy; on municipal matters the Committee of Ministers receives recommendations from the Conference of Local and Regional Authorities of Europe.

The Committee of Ministers meets usually twice a year, their deputies 12 times a

The Parliamentary Assembly normally consists of 170 parliamentarians elected or appointed by their national parliaments (Austria 6, Belgium 7, Cyprus 3, Denmark 5, France 18, Federal Republic of Germany 18, Greece 7, Iceland 3, Ireland 4, Italy 18, Liechtenstein 2, Luxembourg 3, Malta 3, Netherlands 7, Norway 5, Portugal 7, Spain 12, Sweden 6, Switzerland 6, Turkey 12, UK 18); it meets 3 times a year for approximately a week. The work of the Assembly is prepared by parliamentary committees

The Joint Committee acts as an organ of co-ordination and liaison between representatives of the Committee of Ministers and members of the Parliamentary Assembly and gives members an opportunity to exchange views on matters of important European interest.

The European Convention on Human Rights, signed in 1950, set up special machinery to guarantee internationally fundamental rights and freedoms A European Commission investigates alleged violations of the Convention submitted to it either by States or, in most cases, by individuals. Its findings can then be examined by the European Court of Human Rights (set up in 1959), whose obligatory jurisdiction has been recognized by 19 States, or by the Committee of Ministers, empowered to take binding decisions by two-thirds majority vote.

In 1956 the Resettlement Fund for National Refugees and Over-Population was created, the Governor of the Fund is responsible to the governments collectively With 19 member countries, the main purpose of the Fund is to give financial aid, particularly in the spheres of housing, vocational training, regional planning and regional development. Since its foundation, the total amount of loans thus granted comes to over US\$2,688m at 31 Dec 1985

In 1970 the Council set up a European Youth Centre at Strasbourg, where young people can discuss their own approach to international co-operation. More recently, a European Youth Foundation was created, and which provides money to subsidize activities by European Youth Organizations in their own countries.

Aims and Achievements Art. 1 of the Statute states that the Council's aim is 'to achieve a greater unity between its members for the purpose of safeguarding and realising the ideals and principles which are their common heritage and facilitating their economic and social progress', 'this aim shall be pursued... by discussion of questions of common concern and by agreements and common action'. The only limitation is provided by Art 1 (d), which excludes 'matters relating to national defence'.

Although without legislative powers, the Assembly acts as the power-house of the Council, initiating European action in key areas by making recommendations to the Committee of Ministers. As the widest parliamentary forum in Western Europe, the Assembly also acts as the conscience of the area by voicing its opinions on important current issues. These are embodied in resolutions. The Ministers' rôle is to translate the Assembly's recommendations into action, particularly as regards lowering the barriers between the European countries, harmonizing their legislation or introducing where possible common European laws, abolishing discrimination on grounds of nationality and undertaking certain tasks on a joint European basis.

In May 1976 the first plan of intergovernmental co-operation to be undertaken by the Council of Europe was adopted by the Committee of Ministers The second one, adopted in Dec. 1980, will run until Dec. 1986, subject to a mid-term revision in 1983. The plan takes account of political developments and progress achieved, and covers 8 key areas: human rights, social and socio-economic questions, education and culture, youth, public health, environment and regional planning, local and regional government, and legal co-operation.

Some 120 Conventions and Agreements have been concluded covering such matters as social security, cultural affairs, conservation of European wild life and natural habitats, protection of achaeological heritage, extradition, medical treatment, equivalence of degrees and diplomas, the protection of television broadcasts,

adoption of children and transportation of animals. Treaties in the legal field, were the adoption of the European Convention on the Suppression of Terrorism, the European Convention on the Legal Status of Migrant Workers and the Transfer of Sentenced Persons In 1980 the Committee of Ministers adopted a European Convention for the protection of individuals with regard to the automatic processing of personal data. A Social Charter which came into force in 1965 sets out the social and economic rights which all member governments agree to guarantee to their citizens.

# **EUROPEAN COMMUNITIES**

In May 1950 Belgium, France, the Federal Republic of Germany, Italy, Luxembourg and the Netherlands started negotiations with the aim of ensuring continual peace by a merging of their essential interests. The negotiations culminated in the signing in 1951 of the Treaty of Paris creating the European Coal and Steel Community (ECSC). After it was found impossible to create European Communities covering Defence and Foreign Affairs, two more communities with the aims of gradually integrating the economies of the 6 nations and of moving towards closer political unity, the European Economic Community (EEC) and the European Atomic Energy Community (EAEC or Euratom) were created in 1957 by the signing of the Treaties of Rome

On 30 June 1970 membership negotiations began between the Six and the UK, Denmark, Ireland and Norway. On 22 Jan 1972 those 4 countries signed a Treaty of Accession, although this was rejected by Norway in a referendum in Nov. 1972. On 1 Jan. 1973 the UK, Denmark and Ireland became full members. On 28 May 1979 the Greek Treaty of Accession was signed, and Greece joined the Community on 1 Jan. 1981 Negotiations with Spain and Portugal culminated in the signature of Treaties of Accession on 12 June 1985; they joined the Community on 1 Jan. 1986, although existing Community Legislation will only apply after a transitional period

The institutional arrangements of the Communities provide an independent executive with powers of proposal (the Commission), various consultative bodies, and a decision-making body drawn from the Governments (the Council). Until 1967 the 3 Communities were completely distinct, although they shared some non-decision-making bodies: from that date the executives were merged in the European Commission, and the decision-taking bodies in the Council. The institutions and organs of the Communities are as follows:

The Commission consists of 17 members appointed by the member states to serve for 4 years; the President and Vice-Presidents are appointed initially for 2 years, but are generally re-appointed for the rest of their term. The Commission acts independently of any country in the interests of the Community as a whole, with as its mandate the implementation and guardianship of the Treaties. In this it has the

right of initiative (putting proposals to the Council for action); and execution (once the Council has decided), and can take the other institutions or individual countries before the Court of Justice (see below) should any of these renege upon its responsibilities.

President Jacques Delors.

Address 200 rue de la Loi, 1049, Brussels, Belgium

The Council of Ministers consists of foreign ministers from the 10 national governments and represents the national as opposed to the Community interests. It is the body which takes decisions under the Treaties Although legally most of its decisions should be made by majority, it has since 1966 sought unanimity wherever possible, using majority votes only rarely Specialist Councils (e g the Agriculture Council) meet to discuss matters related to individual policies. Since 1974 the Heads of State and Government have met 3 times a year as the European Council to discuss Community, and also Foreign Policy, affairs. The Foreign Ministers also meet in Political Co-operation to discuss Foreign Policy matters. The Presidency of the Council is held for a 6-month term in the following order. Belgium, Denmark, Federal Republic of Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, Netherlands, Portugal, UK

Address 170 rue de la Loi, 1048, Brussels

The European Parliament consists of 434 members, elected on 14 and 17 June 1984. France, the Federal Republic of Germany, Italy and the UK returned 81 members each, the Netherlands 25, Belgium and Greece 24, Denmark 16, Ireland 15 and Luxembourg 6. Spain and Portugal will nominate 60 and 24 members respectively, to serve until the next elections Party representation in the unenlarged Parliament was as follows Socialists, 130, European People's Party (Christian Democratic Group), 109, European Democrats (formerly European Conservatives), 50, Communists and Allies, 43, Liberals, 31, European Democratic Alliance, 30; the 'Rainbow' group (a group of mixed tendancies), 19, the European Right, 16, Independants, 6. The Parliament has a right to be consulted on a wide range of legislative proposals, and forms one arm of the Communities' Budgetary Authority

President Pierre Pfimlin.

Address Centre européen du Kirchberg, Luxembourg

The Economic and Social Committee has an advisory role and consists of 189 representatives, employers, trade unions, consumers, etc The Consultative Committee, of 96 members, performs a similar role for the ECSC

President Gert Muhr.
Address 2, rue Ravenstein, 1000 Brussels

The European Court of Justice is composed of 11 judges and 5 advocates-general, is responsible for the adjudication of disputes arising out of the application of the treaties, and its findings are enforceable in all member countries

President: Lord Mackenzie Stuart.

Address Palais de la Cour de Justice, Kirchberg, Luxembourg.

The Court of Auditors was established by a Treaty signed on 22 July 1975 which took effect on 1 June 1977. It consists of 12 members, and replaced the former Audit Board. It audits all income and current and past expenditure of the European Communities.

President Marcel Mart.

Annual Report of the Court of Auditors, from 1977

The European Investment Bank (EIB) was created by the EEC Treaty to which its statute is annexed. Its governing body is the Board of Governors consisting of ministers designated by member states. Its main task is to contribute to the balanced development of the common market in the interest of the Community by financing projects: developing less-developed regions; for modernizing or convert-

ing undertakings, or developing new activities, or those of common interest to several member states

Address 100, Boulevard Konrad Adenauer, Plateau du Kirchberg, Luxembourg Annual Report of the European Investment Bank

Community Law Provisions of the Treaties and secondary legislation may be either directly applicable in Member States or only applicable after Member States have enacted their own implementing legislation. Secondary legislation consists of regulations, which are of general application and binding in their entirety and directly applicable in all member states; directives which are binding upon each Member State as to the result to be achieved within a given time, but leave the national authority the choice of form and method of achieving this result, decisions, which are binding in their entirety on their addressees. In addition the Council and Commission can issue recommendations and opinions, which have no binding force

The Community's Legislative Process starts with a proposal from the Commission (either at the suggestion of its services or in pursuit of its declared political aims) to the Council The Council generally seeks the views of the European Parliament on the proposal, and the Parliament adopts a formal Opinion, after consideration of the matter by its specialist Committees. The Council may also (and in some cases is obliged to) consult the Economic and Social Committee, which similarly delivers an opinion. When these opinions have been received, the Council will decide. Most decisions are taken on a majority basis, but will take account of reserves expressed by individual member states. The text eventually approved may differ substantially from the original Commission proposal

The resources of the Community (the levies and duties mentioned above, and up to a 1 4% VAT charge) have been surrendered to it by Treaty. The Budget is made by the Council and the Parliament acting jointly as the Budgetary Authority. The Parliament has control, within a certain margin, of non-obligatory expenditure (i.e., expenditure where the amount to be spent is not set out in the legislation concerned), and can also reject the Budget totally as in 1980 and 1985. Otherwise, the Council decides. ECSC operations are separately funded by a turnover levy (1985. 0 31%) on the coal and steel industries of the Community. The ECSC operating budget for 1985 was ECU360m.

THE EUROPEAN COAL AND STEEL COMMUNITY. The ECSC was the first of the 3 Communities, coming into existence on 10 Aug. 1952 following the signature of the Treaty of Paris on 18 April 1951. Its aim was to contribute towards economic expansion, growth of employment and a rising standard of living in Member States, through common action in the coal and steel sector, in a Community open to other nations. Since 1957 it has had the same membership as the other Communities.

The Common Market for Coal and Steel This first aim of the ECSC was achieved for coal, iron ore and scrap in Feb. 1953, for steel in May 1953 and for

special steels in Aug. 1954. The Common External Tariff on ECSC products is between 4-8%. Rules for fair competition within the Common Market, based on non-discrimination by nationality and the free movement of goods, have been established The ECSC also gives readaptation and retraining grants to former workers in these industries, and makes capital grants for new industrial investment in former coal and steel areas.

The Commission has to approve take-overs and mergers of coal or steel undertakings, and has the power in the case of crisis (and with the approval of the Council) to set production quotas and minimum prices by product, with fines for non-observance. This power was first used in 1980.

# THE EUROPEAN ECONOMIC COMMUNITY (EEC) or COMMON MARKET

Based on the Treaty of Rome of 25 March 1957 the EEC came into being on 1 Jan 1958 with the same original members as the ECSC. The Treaty guarantees certain rights to the citizens of all Member States (e.g., the outlawing of economic discrimination by nationality, and equal pay for equal work as between men and women) and sets out certain other areas where secondary legislation is to fill in the details. The most important policy areas are as follows.

Freedom of movement for persons, goods and capital Under the Treaty individuals or companies from one Member State may establish themselves in another country (for the purposes of economic activity) or sell goods or services there on the same basis as nationals of that country. With a few exceptions, restrictions on the movement of capital have also been ended.

Customs Union and External Trade Relations Goods or Services originating in one Member State have free circulation within the EEC, which implies common arrangements for trade with the rest of the world Member States can no longer make bilateral trade agreements with third countries, this power has been ceded to the Community. The Customs Union was achieved in July 1968, with the abolition of internal customs tariffs (or equivalents) and quantitative restrictions, and the establishment of the Common External Tariff Denmark, Ireland and the UK adopted these from July 1977, Greece is from Jan. 1986.

Following the 1973 accessions the Community made a series of agreements with the member states of EFTA to form an industrial free trade zone and to start the liberalization of agricultural trade. Association agreements which could lead to accession or customs union have been made with Cyprus, Malta and Turkey, and commercial, industrial, technical and financial aid agreements with Algeria, Egypt, Israel, Jordan, Lebanon, Morocco, Syria and Tunisia. In 1976 Canada signed a framework agreement for co-operation in industrial trade, science and natural resources.

In the Development Aid sector, the Community has an agreement (the Lomé Convention, originally signed in 1975 but renewed and enlarged in 1979 and 1984) with some 60 African, Caribbean and Pacific countries which removes customs duties without reciprocal arrangements for most of their imports to the Community, and under which ECU8,760m of aid was granted between 1986–90 Negotiations for the renewal of the Convention were in progress in 1983 An economic and commercial agreement has also been signed with ASEAN

The Common Agricultural Policy (CAP) The objectives set out in the Treaty are to increase agricultural productivity, to ensure a fair standard of living for the agricultural community, to stabilise markets, to assure supplies, and to ensure reasonable consumer prices. In Dec. 1960 the Council laid down the fundamental principles on which the CAP is based: a single market, which calls for common prices, stable currency parities and the harmonising of health and veterinary legislation, Community preference, which protects the single Community market from imports; common financing, through the European Agricultural Guidance and Guarantee Fund (EAGGF), which seeks to improve agriculture through its Guidance section, and to stabilise markets against world price fluctuations through

market intervention, with levies and refunds on exports. At present common market organizations cover over 95% of EEC agricultural production. Greece is bringing its agricultural prices into line with the Community over a period of up to 7 years.

Following the disappearance of stable currency parities, artificial currency levels have been applied in the CAP. This factor, together with over-production due to high producer prices, means that the CAP consumes about two-thirds of the

Communities' budget.

The European Monetary System (EMS), whose immediate objective is to create a zone of monetary stability in Europe by closer monetary co-operation, began operating in March 1979. All Member States (except Greece and the UK, 1985) limit fluctuations in the exchange rates of their currencies against a central rate denominated in ECU. The Greek drachma will join the EMS by 31 Dec. 1986.

Competition The Competition (anti-trust) law of the Community is based on 2 principles: that businesses should not seek to nullify the creation of the common market by the erection of artificial national (or other) barriers to the free movement of goods, and against the abuse of dominant positions in any market. These two principles have led among other things to the outlawing of prohibitions on exports to other Member States, of price-fixing agreements and of refusal to supply, and to the refusal by the Commission to allow mergers or take-overs by dominant undertakings in specific cases. Increasingly heavy fines are imposed on offenders

# THE EUROPEAN ATOMIC ENERGY COMMUNITY (EURATOM)

Like the EEC, Euratom came into being on 1 Jan. 1958 following a Treaty signed in Rome on 25 March 1957, and it had the same Member States as the EEC. Its task is to promote common efforts between its members in the development of nuclear energy for peaceful purposes, and for this purpose it has monopoly powers of acquisition of fissile materials for civil purposes. It is in no way concerned with military uses of nuclear power, indeed, its members are forbidden under the Treaty to use nuclear materials obtained through Euratom for such purposes.

The execution of the Treaty now rests with the European Commission, which is advised by the Scientific and Technical Committee (28 members). Major decisions rest with the Council. Euratom has I substantial research institute of its own, at Ispra, in Italy, it does other work in co-operation with research institutes in the

Member States, or in joint and international undertakings

A common market for nuclear materials and equipment came into force, and external tariffs were suspended, in Jan 1959. Although the Court of Justice has confirmed that Member States have ceded to Euratom the right to make supply contracts with outside suppliers (e.g. Australia, Canada or the USA), Euratom has generally been growing less effective in recent years, and most major new nuclear energy projects within the Member States have been undertaken outside its framework.

# EUROPEAN FREE TRADE **ASSOCIATION (EFTA)**

The European Free Trade Association has 6 member countries: Austria, Iceland, Norway, Portugal, Sweden and Switzerland. A seventh country, Finland, is an associate member. The Stockholm Convention establishing the Association entered into force on 3 May 1960 and Finland became associated on 27 March 1961. Iceland joined EFTA on 1 March 1970 and was immediately granted dutyfree entry for industrial goods exported to EFTA countries, while being given 10 years to abolish her own existing protective duties. Two founder members of EFTA, the UK and Denmark, left EFTA on 31 Dec 1972 to join the EEC

When the Association was created it had three objectives, to achieve free trade in industrial products between member countries, to assist in the creation of a single market embracing the countries of Western Europe, and to contribute to the expansion of world trade in general.

The first objective was achieved on 31 Dec 1966, when virtually all inter-EFTA taniffs were removed. This was 3 years earlier than originally planned Finland removed her remaining EFTA tariffs a year later on 31 Dec. 1967 and Iceland removed her tariffs on 31 Dec. 1979

The fulfilment of the second aim was secured in 1972. On 22 Jan. 1972 the UK and Denmark signed the Treaty of Accession to the EEC whereby they became members of the enlarged Community from 1 Jan. 1973. On 22 July 1972, 5 other EFTA countries, Austria, Iceland, Portugal, Sweden and Switzerland signed Free Trade Agreements with the enlarged EEC A similar agreement negotiated with Finland was signed on 5 Oct. 1973. Norway, whose intention of joining the EEC was reversed following a referendum, signed a similar agreement on 14 May 1973. Through these agreements virtually complete free trade in industrial goods was achieved in 16 Western European countries from July 1977. The free trade agreements apply also to Greece since its accession to the EEC on 1 Jan. 1981. A multilateral free trade agreement between the EFTA countries and Spain, a candidate for EEC membership, came into force on 1 May 1980 and the first tariff cuts were applied on 1 June 1980.

The third objective was to contribute to the expansion of world trade. In 1959 trade between the countries now in EFTA amounted to US\$759m. and total exports from these countries were US\$6,852m. In 1983 the respective ligures were US\$14,500m and US\$106,400m More than half EFTA trade is with the EEC

EFTA tariff treatment applies to those industrial products which are of EFTA origin, and these are traded freely between member countries Each EFTA country remains free, however, to impose its own rates of duty on products entering from outside EFTA or the EEC

Generally, agricultural products do not come under the provisions for free trade, but bilateral agreements have been negotiated to increase trade in these products

The operation of the Convention is the responsibility of a Council assisted by a small secretariat Each EFTA country holds the chairmanship of the Council for 6 months

# THE WARSAW PACT

On 14 May 1955 the USSR, Albania, Bulgaria, Czechoslovakia, the German Democratic Republic, Hungary, Poland and Romania signed, in Warsaw, a 20-year treaty of friendship and collaboration, after the USSR had (on 7 May) annulled the 20-year treaties of alliance with the UK (1942) and France (1944)

The main provisions of the treaty are as follows

titule 4 In case of armed aggression in Europe against one or several States party to the pact by a State or group of States, each State member of the pact—will afford to the State or States which are the object of such aggression immediate assistance—with all means which appear necessary including the use of armed force. These measures will cease as soon as the Security Council takes measures necessary for establishing and preserving international peace and security.

- litticle 5. The contracting Powers agree to set up a joint command of their armed to ces to be allotted by agreement between the Powers, at the disposal of this command and used on the basis of jointly established principles. They will also take over agreed measures necessary to strengthen their defences.
- titule 9. The present treaty is open to other States, irrespective of their social or Government regime, who declare their readiness to abide by the terms of the treaty in order to safeguard peace and security of the peoples
- 11ticle 11 In the event of a system of collective security being set up in Europe and a pact to this effect being signed—to which each party to this treaty will direct its efforts—the present treaty will lapse from the day such a collective security treaty comes into force

It is estimated (1981) that the armed forces of the Warsaw Pact countries total 4 82m, including 3 71m. Russians, compared with 4 99m NATO forces

Marshal Grechko was from July 1960 to April 1967 C.-in-C of the united Armed Forces, with headquarters in Moscow. He was succeeded by Marshal I. I. Yakubovsky in 1967 and by Marshal V G. Kulikov in Jan. 1977.

In 1962 Albania was no longer invited to the Warsaw Pact meetings without being formally expelled

Two Soviet divisions are stationed in Poland, 20 divisions in German Democratic Republic, 4 divisions in Hungary and 5 in Czechoslovakia

# COLOMBO PLAN

History: Founded in 1950 to promote the development of newly independent Asian member countries, the Colombo Plan has grown from its modest beginning as a group of seven Commonwealth nations into an international organization of 26 countries.

Originally the Plan was conceived for a period of six years. Its life has since been extended from time to time, generally at five-year intervals. The Consultative Committee, the Plan's highest deliberative body, at its meeting in Jakarta in 1980, gave the Plan an indefinite span of life; its need and relevance will henceforth be examined only if considered necessary.

The Plan is multilateral in approach but bilateral in operation: multilateral in that it takes cognizance of the problems of development of member countries in the Asia and Pacific region and endeavours to deal with them in a co-ordinated way, bilateral because negotiations for assistance are made direct between a donor and a recipient country.

Aims: The aims of the Colombo Plan are: (a) to promote interest in and support for the economic and social development in Asia and the Pacific; (b) to keep under review economic and social progress in the region and help accelerate development through co-operative effort; and (c) to facilitate development assistance to and within the region.

Member Countries Afghánistán, Australia, Bangladesh, Bhutan, Burma, Cambodia, Canada, Fiji, India, Indonesia, Iran, Japan, Republic of Korea, Lao People's Democratic Republic, Malaysia, Maldives, Nepal, New Zealand, Pakistan, Papua New Guinea, Philippines, Singapore, Sri Lanka, Thailand, UK and USA.

Development Assistance Colombo Plan aid covers all fields of socio-economic development and amounted to US\$3,753 4m in 1984. It takes two principal forms

(1) Capital Aid including grants and loans for national projects mainly from the six developed member countries to the developing member countries of the Plan

The total amount of capital aid provided by the leading donors under the plan in 1984 was as follows

	しいかりがし
Japan	1,700 9
UŜA	922 0
Australia	473 5
UK	338 7
Canada	306 8
New Zealand	11 5
Total	3.753 4

(11) Technical Co-operation Assistance is provided in the form of services of experts and volunteers, fellowships, and equipment for training and research During 1984, 21,974 trainees and students received training, 8,178 experts and 1,149 volunteers were sent out Total disbursements on technical co-operation in 1984 amounted to \$582 6m.

Structure There are four organs which give focus to the Plan

Consultative Committee The Committee is the highest deliberative body of the Plan and consists of Ministers of member Governments who meet once in two years. The Ministerial meeting is preceded by a meeting of senior officials who are directly concerned with the operation of the Plan in various countries

Colombo Plan Council The Council is also a deliberative body which meets several times a year in Colombo, where most member countries have resident diplomatic missions, to review the economic and social development of the Asia-Pacific region and promote co-operation among member countries

Colombo Plan Bureau This is the only permanent organ of the Colombo Plan with headquarters in Colombo Its functions include servicing the meetings of the Colombo Plan Council and the Consultative Committee, carrying out research, and dissemination of statistical and other information relating to activities under the Plan Since 1973 the Bureau has been operating a Drug Advisory Programme to assist national and regional efforts to eliminate the causes and ameliorate the effects of drug abuse

Colombo Plan Staff College. The Colombo Plan Staff College for Technician Education, located in Singapore, was opened in March 1975 to help member countries in developing their system of technician education. The College conducts training courses for senior technician educators and planners both at the College and in regional member countries

# ASSOCIATION OF SOUTH EAST ASIAN NATIONS (ASEAN)

History and Membership The Association of South East Asian Nations is a regional organization formed by the governments of Indonesia, Malaysia, the Philippines, Singapore and Thailand through the Bangkok Declaration which was signed by the Foreign Ministers of ASEAN countries on 8 Aug. 1967 Brunei joined in 1984

Objectives The main objectives are to accelerate economic growth, social progress and cultural development, to promote active collaboration and mutual assistance in matters of common interest, to ensure the stability of the South East Asian region and to maintain close co-operation with existing international and regional organizations with similar aims. Principal projects concern economic co-operation and development, with the intensification of intra-ASEAN trade and trade between the region and the rest of the world; joint research and technological programmes; co-operation in transportation and communications, promotion of tourism and South East Asian studies, including cultural, scientific, educational and administrative exchanges

Organs The highest authority in ASEAN are the Heads of Government of the Member Countries who meet as and when necessary to give directions to ASEAN The highest policy-making body is the Meeting of Foreign Ministers, commonly known as the Annual Ministerial Meeting, which convenes in each of the ASEAN member countries on a rotational basis in alphabetical order. The Standing Committee, comprising the Foreign Minister of the country hosting the Ministerial Meeting in that particular year and the accredited ambassadors of the other member countries, carries out the work of the Association in between the Ministerial Meetings and handles the routine matters to ensure continuity and to make decisions based on the guidelines or policies set by the Ministerial Meetings and submit for the consideration of the Foreign Ministers all reports and recommendations of the various ASEAN committees. There are five economic committees under the ASEAN Economic Ministers and three non-economic committees that recommend and draw up programmes for ASEAN co-operation. These committees are responsible for the operation and implementation of ASEAN projects in their respective fields. Each ASEAN capital has an ASEAN National Secretariat The central secretariat for ASEAN is located in Jakarta, Indonesia, and is headed by the Secretary General, a post that revolves among the member states in alphabetical order every 2 years Bureau directors and other officers of the ASEAN Secretariat remain in office for 3 years

# ORGANIZATION OF AMERICAN STATES

On 14 April 1890 representatives of the American republics, meeting in Washington at the First International Conference of American States, established an 'International Union of American Republics' and, as its central office, a 'Commercial Bureau of American Republics', which later became the Pan American Union This international organization's object was to foster mutual understanding and

co-operation among the nations of the western hemisphere. Since that time, successive inter-American conferences have greatly broadened the scope of work of the organization.

This led to the adoption on 30 April 1948 by the Ninth International Conference of American States, at Bogotá, Colombia, of the Charter of the Organization of American States. This co-ordinated the work of all the former independent official entities in the inter-American system and defined their mutual relationships. The purposes of the OAS are to achieve an order of peace and justice, promote American solidarity, strengthen collaboration among the member states and defend their sovereignty, territorial integrity and independence The OAS is a regional organization of the United Nations for the maintenance of peace and security.

Membership is on a basis of absolute equality Each country has one vote in the Council of the Organization and its organs The member countries were (1980) Antigua and Barbuda, Argentina, Bahamas, Barbados, Bolivia, Brazil, Chile, Colombia, Costa Rica, Cuba, Commonwealth of Dominica, Dominican Republic, Ecuador, El Salvador, Grenada, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, Paraguay, Peru, Saint Christopher (Kitts) and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Suriname, Trinidad and Tobago, USA. Uruguay, Venezuela

The OAS has been concerned increasingly in recent years with programmes to promote Latin American economic and social development. The OAS provides specialized training for thousands of Latin Americans each year in a wide variety of development-related fields. It also carries out several missions projects each year in response to requests from member governments

On 27 Feb. 1967 the Third Special Inter-American Conference in Buenos Aires approved the Protocol of Amendment to the Charter of the OAS, which contained new standards for inter-American co-operation and a number of structural changes in the Organization

On 14 April 1967 the Declaration of the Presidents of America, signed in Punta del Este, Uruguay, expressed the commitment of the American chiefs of state to promote Latin American economic integration, to join in efforts to increase substantially Latin American foreign-trade earnings, to modernize the living conditions of the rural population and raise agricultural productivity, and to expand programmes in education, science, technology and health.

On 22 Feb. 1968, in the Resolution of Maracay, the Inter-American Cultural Council launched new regional programmes for educational development and for

scientific and technological development.

On 27 Feb 1970, by ratification of more than the mandatory two-thirds of the OAS member states, the Protocol of Buenos Aires, modifying the 1948 Charter, entered into effect.

Under the amended Charter, the OAS accomplishes its purposes by means of:

- (a) The General Assembly, which meets annually in various countries of the member states.
- (b) The Meeting of Consultation of Ministers of Foreign Affairs, held to consider problems of an urgent nature and of common interest.
- (c) Three councils of equal rank, the Permanent Council, which replaces the old OAS Council; the Inter-American Economic and Social Council; and the Inter-American Council for Education, Science and Culture. Functions are to direct and co-ordinate work in the areas of their competence and render the governments such specialized services as they may request Each council is composed of 1 representative from each member state, appointed by his government.
- (d) The Inter-American Juridical Committee which acts as an advisory body to the OAS on juridical matters and promotes the development and codification of international law. Eleven jurists, elected every 4 years by the General Assembly, represent all the American States.
- (e) The Inter-American Commission on Human Rights which oversees the observance and protection of human rights. Seven members represent all the OAS member states.

- (f) The General Secretariat is the central and permanent organ of the OAS.
- (g) The Specialized Conferences, meeting to deal with special technical matters or to develop specific aspects of inter-American co-operation.
- (h) The Specialized Organizations, inter-governmental organizations established by multilateral agreements to discharge specific functions in their respective fields of action, such as women's affairs, agriculture, child welfare, Indian affairs, geography and history, and health

Secretary-General João Clemente Baena Soares

Assistant Secretary-General Valerie McComie (Barbados)

The Secretary-General and the Assistant Secretary-General are elected by the General Assembly for 5-year terms The General Assembly approves the annual budget for the Organization, which is financed by quotas contributed by the member governments.

# LATIN AMERICAN ECONOMIC **GROUPINGS**

The Economic Commission for Latin America, an organ of the United Nations, with headquarters in Santiago, Chile, has facilitated the co-operation of two groups of countries concerning production, tariffs and trade.

Latin American Free Trade Association was concluded in Montevideo on 18 Feb. 1961 by Argentina, Bolivia, Brazil, Chile, Mexico, Paraguay, Peru and Uruguay Colombia (3 Oct 1961), Ecuador (20 Oct 1961) and Venezuela (1 Sept. 1966) have joined the ALALC/LAFTA Treaty. The permanent secretariat is at Montevideo The 11 signatories held the 19th Extraordinary Conference at Acapulco, 16–27 June 1980 A Constitution was drawn up for a new Latin American Integration Association (LAIA) to take over after LAITA expired on 31 Dec 1980

Central American Common Market (ODECA) On 13 Dec. 1960, at Managua, El

Salvador, Guatemala, Honduras and Nicaragua concluded a general treaty on Central American integration; a protocol on the equalization of import duties and charges; and an agreement establishing the Central American Bank for Economic Integration. Costa Rica acceded in 1962 and in Sept. 1963 ratified the charter of the Banco Centroamericano de Integración Económica (in Tegucigalpa), whose capital was thereupon increased to US\$20in.

The San Salvador Charter, signed on 14 Dec 1962, expanded these provisions, envisaging permanent political, economic, educational, defence, etc., councils The permanent secretariat is at Guatemala City

The Andean Group (Grupo Andino) On 26 May 1969 an agreement was signed by Bolivia, Chile, Colombia, Ecuador and Peru creating the Andean Group Venezuela was initially actively involved but did not sign the agreement until 1973. The Group signed a further agreement on 31 Dec. 1970 on common regulations controlling foreign investments. Under the Cartagena Agreement of 1975 the development of an integrated petrochemical industry in each of the member countries was established.

Sistema Económico Latinoamericano (SELA) was created by 25 Latin American and Caribbean countries (Suriname joined in 1979) meeting at Panama, 17 Oct 1975. The System provides member countries with permanent institutional machinery for joint consultation, co-ordination, co-operation and promotion in economic and social matters at both intraregional and extraregional level.

The River Plate Basin Development Group A Treaty for the joint economic development of the River Plate Basin was signed by Argentina, Bolivia, Brazil, Paraguay and Uruguay in Brasilia in 1969. The aim was to jointly carry out development in the region and take steps to facilitate agreement on questions of navigation. An Inter-governmental Co-ordination Committee would meet annually and sub-committees on water resources and funding were established

Chile was admitted as an observer in 1976.

The Amazon Pact Representatives of Bolivia, Brazil, Colombia, Ecuador, Guyana, Peru, Suriname and Venezuela met in Belem on 23 Oct. 1980 to discuss joint policy for development in the region. It was agreed that Peru be responsible for reviewing development projects and the establishment of a fund for the improvement of communications in the region.

Urupabol A tripartite commission for economic co-operation, trade and integration between Bolivia, Paraguay and Uruguay was constituted formally on 29 May 1981. This organization had existed informally since 1963 when the members started rotating a seat on the Inter-American Development Bank among themselves. By late 1981 both Paraguay and Uruguay had ratified membership of the new commission

# THE LEAGUE OF ARAB STATES

Origin The formation of the League of Arab States in 1945 was largely inspired by the Arab awakening of the 19th century. This movement sought to re-create and reintegrate the Arab community which, though for 400 years a part of the Ottoman Empire, had preserved its identity as a separate national group held together by memories of a common past, a common religion and a common language, as well as by the consciousness of being part of a common cultural heritage. The leaders of the Arab movement in the 19th century and of the Arab revolt against Turkey in the First World War sought to achieve these aims through secession from the Ottoman Empire into a united and independent Arab state comprising all the Arab countries in Asia. However the 1919 peace settlement divided the Arab world in Asia (with the exception of Saudi Arabia and the Yemen) into British and French spheres of influence and established in them a number of separate states and administrations (Syria, Lebanon, Iraq, Jordan and Palestine) under temporary mandatory control.

By 1943, however, 7 of these countries had substantially achieved their independence An Arab conference therefore met in Alexandria in the autumn of 1944; it formulated the 'Alexandria Protocol', which delineated the outlines of the Arab League. It was found that neither a unitary state nor a federation could be achieved, but only a league of sovereign states. A covenant, establishing such a league, was signed in Cairo on 22 March 1945 by the representatives of Egypt, Iraq, Saudi Arabia, Syria, Lebanon, Jordan and Yemen. There were (1980) 21 members of the League: Algeria, Bahrain, Djibouti, Iraq, Jordan, Kuwait, Lebanon, Libya, Mauritania, Morocco, Oman, Palestine L.O., Qatar, Saudi Arabia, Somalia, Sudan, Syria, Tunisia, United Arab Emirates, P.D.R. of Yemen and Yemen Arab

Republic.

In the Charter's Special Annex on Palestine, the signatories considered the special circumstances of Palestine and decided that until the country can effectively exercise its independence, the Council of the League should take charge in the selection of an Arab representative from Palestine to take part in its work.

Egypt's membership of the League was suspended, in accordance with a resolution passed at the Baghdad summit, in March 1979, at which time it was also agreed that the League secretariat should be moved from Cairo to Tunis. This action was taken in response to the signing of a bilateral peace treaty between Egypt and Israel.

Organization The machinery of the League consists of a Council, a number of Special Committees and a Permanent Secretariat. On the Council each state has one vote. The Council may meet in any of the Arab capitals. Its functions include mediation in any dispute between any of the League states or a League state and a country outside the League. The Council has a Political Committee consisting of the Foreign Ministers of the Arab states. There are also 22 specialized agencies.

The Permanent Secretariat of the League, under a Secretary-General (who enjoys, along with his senior colleagues, full diplomatic status), has its seat in

Tunisia.

The League considers itself a regional organization within the framework of the United Nations at which its secretary-general is an observer.

Secretary-General. Chedli Klibi (Tunisia).

Arab Common Market. The Arab Common Market came into operation on 1 Jan 1965. The agreement, reached on 13 Aug. 1964 and open to all the Arab League states, has been signed by Iraq, Jordan, Syna and Egypt. The agreement provides for the abolition of customs duties on agricultural products and natural resources within 5 years, by reducing tariffs at an annual rate of 20%. Customs duties on industrial products are to be reduced by 10% annually. The agreement also provides for the free movement of capital and labour between member countries, the establishment of common external tariffs, the co-ordination of economical development and the framing of a common foreign economic policy.

# DANUBE COMMISSION

The Danube Commission was constituted in 1949 based on the Convention regarding the regime of navigation on the Danube, which was signed in Belgrade on 18 Aug. 1948 The Belgrade Convention reaffirmed that navigation on the Danube from Ulm to the Black Sea, with access to the sea through the Sulina arm and the Sulina Canal, is equally free and open to the nationals, merchant shipping and merchandise of all states as to harbour and navigation fees as well as conditions of merchant navigation.

The Danube Commission is composed of representatives from the countries on the Danube (1 for each of these countries), namely, Austria, Bulgaria, Hungary, Romania, Czechoslovakia, USSR and Yugoslavia. Since 1957, representatives of the Ministry of Transport from the Federal Republic of Germany have attended the meetings of the Commission as guests of the Secretariat.

The functions of the Danube Commission are to check that the provisions of the Convention are carried out, to establish a uniform buoying system on all the Danube's navigable waterways and to establish the basic regulations for navigation on the river. The Commission co-ordinates the regulations for river, customs and sanitation control as well as the hydrometeorological service and collects statistical data concerning navigation on the Danube.

The Danube Commission enjoys legal status. It has its own seal and flag The members of the Commission and elected officers enjoy diplomatic immunity. The Commission's official buildings, archives and documents are inviolable. French and Russian are the official languages of the Commission.

Since 1954 the headquarters of the Commission have been in Budapest.

# **ENERGY AND NATURAL RESOURCES**

Electricity. Hydro-electric plants have been constructed at Sarobi, Nangarhár, Naghlu, Mahipár, Pul-1-Khumri and Kandahár, more hydro and thermal plants are projected. Production (1981) 1,035m. kwh.

Natural gas. Production (1984) 2,767m. cu. metres. Natural gas is found in northern Afghánistán around Shiberghan and Sar-i-Pol; over 2,000m. cu. metres, about 90% of production, is piped to the USSR annually.

Minerals. Mineral resources are scattered and little developed. Coal is mined at Karkar in Pul-i-Khumri, Ishpushta near Doshi, north of Kábul and Dar-i-Suf south of Mazar (total production, 1983–84, 145,300 tonnes) Rich, but as yet unexploited, deposits of iron ore exist in the Hajigak hills about 100 miles west of Kábul, beryllium has been found in the Kunar valley and barite in Bamian province. Other deposits include gold; silver (now unexploited, in the Panjshir valley), lapis lazuli (in the Panjshir valley and Badakhshán); asbestos; mica; sulphur (near Maimana); chrome (in the Logar valley and near Herát); and copper (in the north)

Agriculture. Although the greater part of Afghánistán is more or less mountainous and a good deal of the country is too dry and rocky for successful cultivation, there are many fertile plains and valleys, which, with the assistance of irrigation from small rivers or wells, yield very satisfactory crops of fruit, vegetables and cereals. It is estimated that there are 14m. hectares of cultivable land in the country, of which only 6% of the total land was being cultivated in 1982–83 (5·34m. hectares of this being irrigated land). Before 1979 Afghánistán was virtually self-supporting in foodstuffs (including wheat in 1973), apart from sugar. The USSR now provides wheat, sugar and other foodstuffs.

The castor-oil plant, madder and the asafætida plant abound.

Fruit forms a staple food (with bread) of many people throughout the year, both in the fresh and preserved state, and in the latter condition is exported in great quantities. The fat-tailed sheep furnish the principal meat diet, and the grease of the tail is a substitute for butter. Wool and skins provide material for warm apparel and one of the more important articles of export. Persian lambskins (Karakuls) are one of the chief exports.

Cotton production, 1983-84, was estimated at 50,000 tonnes, wheat, 2 93m, barley, 336,000, maize, 806,000, rice, 480,000.

Livestock (1984). Cattle, 3 75m., horses, donkeys and mules, 1.69m.; sheep, 20m; goats, 3m.; chickens, 7m.

#### INDUSTRY AND TRADE

Industry. At Kábul there are factories for the manufacture of cotton and woollen textiles, leather, boots, marble-ware, furniture, glass, bicycles, prefabricated houses and plastics. A large machine shop has been constructed and equipped by the USSR, with a capability of manufacturing motor spares. There is a wool factory and there are several cotton-ginning plants; a small cotton factory at Jabal-us-Seráj and a larger one at Pul-1-Khumri; a cotton-seed oil extraction plant at Lashkargah, a cotton textile factory at Gulbahar, and a cotton plant at Balkh.

An ordnance factory manufactures arms and ammunition, boots and clothing, etc. for the Army. There is a beet sugar plant at Baghlan (equipped with Soviet machinery) and a fruit-canning factory in Kandahár

Industries include cement, coalmining, cotton textiles, small vehicle assembly plants, fruit canning, carpet making, leather tanning, footwear manufacture, sugar manufacture, preparation of hides and skins, and building. Most of these are relatively small and, with the exception of hides and skins, carpets and fruits, do not meet domestic requirements.

Commerce. Trade is supervised by the Government through the Ministries of Commerce and Finance and the Da Afghánistán Bánk. The Association of Afghán Chambers of Commerce works in close liaison with the Ministry of Commerce. The Government monopoly controls the import of petrol and oil, sugar, cigarettes and tobacco, motor vehicles and consignment goods from bilateral trading coun-

tries. The principal surface routes for imports to Afghánistán are via the Soviet rail system and the border posts at Torghundi and Hairatan, and from Karachi via the

border post at Torkham.

In the year ended 20 March 1984 Afghán imports totalled US\$941m. and exports US\$681m. Main export commodities were karakul skins (US\$13 5m.), raw cotton (US\$12.5m.), dried fruit and riuts (US\$141m), fresh fruit (US\$53 3m.) and natural gas (US\$302 4m.). Main items imported were petroleum products (US\$164m.), textiles (US\$122 5m.).

Total trade between Afghánistán and UK (in £1,000 sterling, British Department

or rade returns):	1981	1982	1983	1984	1985
Imports to UK	22,822	20,855	19,837	20,776	52,061
Exports and re-exports from UK	7,725	9,344	10,310	11,892	13,882

Tourism. Owing to internal political instability there has been negligible tourism since 1979

# **COMMUNICATIONS**

Roads. There were in 1978 over 2,812 km of asphalted road and 15,940 km of other roads. The Americans asphalted the Kandahár-Chaman and Kábul-Torkham roads. The Russians constructed a road and tunnel through the Salang pass (over 11,000 ft) which was opened in Sept. 1964 and cut 120 miles off the old road from Kábul to the north; they continued this road to Kunduz and Sherkhan Bandar (Qizil Qala) on the Oxus. In addition, the Americans in 1966 completed the road between Kábul and Kandahár and the Russians constructed a concrete road between Kandahár and Herát. In 1968 the Americans completed an asphalt road from Herát to the Iranian frontier at Islam Qala With Soviet assistance a metalled road from Pul-i-Khumri to Mazár-i-Sharif was completed in 1969 and Mazár-i-Sharif to Shiberghán in 1971. A Soviet-built road and rail bridge across the Oxus (Amu Darya) River was opened in May 1982. In 1978 there were 34,506 cars and 22,100 commercial vehicles.

Railways. There are no railways in the country, but the Oxus bridge opened in 1982, brought Soviet Railways' track into the country. A 200 km line of 1,520 mm gauge has been authorized from Termez to Pul-i-Khumri.

Aviation. On 29 June 1956 Afghánistán signed an agreement with the USA for the development of civil aviation, including the construction of the international airport at Kandahár, comprising a loan of \$5m. and a grant of \$9 56m Kábul airport has been expanded with Russian assistance New runways at Kábul and Kandahár airports have been completed. Provincial all-weather airports have been constructed at Herát, Qunduz, Jalálábád and Mazár-1-Sharif.

Bakhtar Afghan Airlines (the domestic national airline) began operations on 8 Feb. 1968 and regularly serves the main internal airfields, which, from 1985 was merged with Ariana Afghan Airlines (a national airline) operating regular services to New Delhi, Prague, Tashkent and Moscow.

Shipping. There are practically no navigable rivers in Afghánistán, and timber is the only article of commerce conveyed by water, floated down the Kunar and Kábul rivers from Chitral on rafts. A port has been built at Qizil Qala on the Oxus, barge traffic is increasing on the Oxus. Three river ports on the Amu Darya have been built at Sherkhan Bandar, Tashguzar and Hairatan, linked by road to Kábul

Post and Broadcasting. Telephones, installed in most of the large towns, numbered 31,200 in 1978. There is telegraphic communication between all the larger towns and with other parts of the world. Kábul Radio broadcasts in Pushtu, Persian, Urdu, English, French, Russian and German. The first TV colour transmissions in Kábul began in mid-1978. An agreement was signed in 1981 under which the USSR undertook to assist with the development of communications. In 1978 there were 823,000 radio receivers and in 1982 12,000 television receivers

Newspapers. In 1983 there were 3 daily newspapers with a circulation of 67,000.

# JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. A Supreme Court was established in June 1978. If no provision exists in the Constitution or in the general laws of the State, the courts follow the Hanasi jurisprudence of Islamic law.

Religion. The predominant religion is Islam, mostly of the Sunni sect, though there is a minority of about 1 m. Shiah Moslems.

Education. There are elementary schools throughout the country, but secondary schools exist only in Kabul and provincial capitals. Both elementary and secondary education are free. In 1982 there were 1 1m. pupils (35,364 teachers) in primary education and 124,000 pupils (6,170 teachers) in secondary education. There are 3 teacher-training institutions in Kábul and 11 elsewhere, UNESCO is supporting an expansion programme. Technical, art, commercial and medical schools exist for higher education. Kábul University was founded in 1932 and has 9 faculties (medicine, science, agriculture, engineering, law and political science, letters, economics, theology, pharmacology). The University of Nangarhar in Jalálábád was founded in 1963. A Polytechnic in Kábul was completed in 1968. In 1982 there were 13,115 students in higher education, 4,427 in teacher-training schools and 1,230 in technical schools.

Health. In 1982 there were 1,215 doctors and 6,875 hospital beds Two-thirds of the doctors and half the beds were in Kábul.

HISTORY. After the death of Gjergi Kastrioti Skenderbeu (Skanderbeg), Albania's national hero, in 1468 Albania passed under Turkish suzerainty until 1912. Independence was proclaimed at Vlone on 28 Nov 1912, and the London conference of ambassadors decided upon its frontiers and nominated as its ruler Prince William of Wied, who arrived at Durres on 7 March 1914, but on 3 Sept. 1914 left the country, which fell into a state of anarchy. By the secret Pact of London of 26 April 1915 provision was made for the partition of Albania; but this arrangement was repudiated on 3 June 1917, when the Italian C -in-C in Albania proclaimed at Gjirokaster the independence of Albania. In Jan 1925 a republic was proclaimed and on 1 Sept. 1928 a monarchy Ahmed Beg Zogu, President since 31 Jan. 1925, reigned as King Zog till April 1939, when, on the occupation of the country by the Italians, he fled to England. After the liberation he was deposed in absentia on 2 Jan 1946 During the years 1939-44 the country was overrun by Italians and Germans. The official Albanian date of the liberation is 29 Nov 1944

On 10 Nov 1945 the British, US and USSR Governments recognized the Provisional Government under Gen. Enver Hoxha, on the understanding that it would hold free elections. The elections of 2 Dec 1945 resulted in a Communist-controlled assembly, which on 11 Jan 1946 proclaimed Albania a republic

In 1946 Great Britain and the USA broke off relations with Albania and vetoed its admission to the United Nations. Albania was finally admitted on 15 Dec. 1955

Because of Albania's Stalinist and pro-Chinese attitudes diplomatic relations with USSR were broken off in 1961. In 1977 Albania terminated its special relationship with China. In Dec. 1981 the Prime Minister, Mehmet Shehu committed suicide. Later Hoxha alleged that Shehu had been a foreign agent. Hoxha died 11 April 1985. Talks between Great Britain and Albania about the reestablishing of diplomatic relations began early in 1985.

AREA AND POPULATION. Albania is bounded north and east by Yugoslavia, south by Greece and west by the Adriatic The area of the country is 28,748 sq. km (11,101 sq. miles). By the peace treaty Italy restored the island of Sazan (Saseno) to Albania. At the census of Jan. 1979 the population was, 2,590,600 (34% urban; density, 90 per sq. km). Population in 1986, 3m. The capital is Tirana (1980 population (in 1,000), 194); other large towns are Shkoder (Shkodra, Scutari) (66.5), Durres<sup>1</sup> (Durrsi, Durazzo) (65.9), Vlore (Vlona, Vlone, Vlora, Valona) (58), Elbasan (56.5), Korçe (Korça, Koritza) (54.3) Other towns (1975). Berat (30), Fier (28), Gjirokaster (Argyrocastro) (22), Lushnjë (21), Kavajë, 1971 (18), Qytet Stalin (formerly Kuçovë) (14).

There is a Greek minority (1984 estimate, 400,000)

Vital statistics, 1980 (per 1,000): Births, 26.5; deaths, 6.4, marriages, 8 1, divorces, 0.8; natural increase, 20 1 per thousand. Births, 1982. 77,300. Population density, 93 per sq. km. Growth rate, 1945–79, 2.5%. Life expectancy in 1985 was 70 4 years

The country is administratively divided into 26 districts (*rreth*, pl *rrethet*) (see map in The Statesman's Year-Book, 1962. N.B. The district of Erseké has been renamed Kolonjé). Districts are subdivided into *lokaliteteve*

Districts are named after their capitals, exceptions. Tropoje, capital—Bajram Curri; Mat—Burrel; Mirditė—Rrėshen; Skrapar— Çorovodë; Dibrë—Peshkopi, Kolonje—Ersekë.

The Albanian language is divided into two dialects—Gheg, north of the river Shkumbi, and Tosk in the south. Many places therefore have two forms of name Vlone (Gheg), Vlore (Tosk), etc., and many are known also by an Italian name,  $e\,g$ , Valona. Since 1945 the official language has been based on Tosk.

CLIMATE. Mediterranean-type, with rainfall mainly in winter, but thunder-storms are frequent and severe in the great heat of the plains in summer Winters in the highlands can be severe, with much snow Tirana. Jan. 44°F (6 8°C), July 75°F (23 9°C). Annual rainfall 54" (1,353 mm) Shkodër. Jan. 39°F (3 9°C), July 77°F (25°C) Annual rainfall 57" (1,425 mm).

CONSTITUTION AND GOVERNMENT. The political structure derived from the Constitution of 14 March 1946 as amended in 1950, 1955, 1960 and 1963 In Dec. 1976 a new Constitution was adopted, by which Albania became a 'Socialist People's Republic'. The supreme legislative body is the single-chamber People's Assembly of 250 deputies, which meets twice a year, and delegates its day-to-day functions to a Presidium composed of a chairman, 3 deputy chairmen, a secretary and 10 members. Election to the People's Assembly is by universal suffrage (at 18) every 4 years.

In the elections of 14 Nov. 1982 a 100% turnout of the electorate of 1,627,968 was claimed to vote for the 250 candidates on the single list of the Democratic Front. (There were 8 spoiled papers and 1 vote against)

The Government consists of a prime minister (Chairman of the Council of Ministers), 2 deputy prime ministers, 15 ministers and the chairman of the State Planning Commission. Effective rule is exercised by the Albanian Labour (i.e., Communist) Party, founded 8 Nov. 1941, whose governing body is the Politburo.

In 1981 the Party had 122,600 full members and candidates (in 1979 37.5% workers, 29% farmers, 27% women).

Titular Head of State Chairman of the Presidium of the People's Assembly Ramiz Alia, elected Nov. 1982. In March 1986 the chief Party and Government posts were filled as follows: Full members of the Politburo:

First Secretary of the Central Committee of the Party. Ramiz Alia. Adıl Çarçanı (Prime Minister), Hekuran Isai (Minister of the Interior), Pali Miska, Manush Myftiu, Rita Marko. Muho Asllanı; Hajreddin Celiku (Minister of Industry); Simon Stefanı; Ms. Lenka Çuko. Candidate members: Llambi Gegprifti; Qirjako Mihali<sup>1</sup>. Besnik Bekteshi<sup>1</sup>; Foto Çamı; Prokop Murra (Minister of Defence). Ministers not in the Politburo include: Foreign Affairs Reiz Malile. Foreign Trade Shane Korbeci. Agriculture. Ms. Themie Thomai. Chairman, State Planning Commission and Finance Niko Gjyzari. Education Testa Cami. Health. Ajli Alushanı.

struggle).

**DEFENCE.** Albania withdrew from the Warsaw Pact in 1968 in protest against the invasion of Czechoslovakia. The Constitution precludes the stationing of foreign troops in Albania. Conscription is for 2 years

Army. The Army consists of 1 tank brigade, 5 infantry brigades and 4 artillery regiments. Equipment includes 70 T-34, 15 T-54 and 15 T-59 main battle tanks Strength is 30,000 (including 20,000 conscripts) and reserves number 155,000 There are also paramilitary internal security forces (5,000 men) and frontier guards (7,500).

Navy. The Navy consists of 3 submarines, 2 fleet minesweepers, 2 patrol vessels, 4 inshore minesweepers, 32 torpedo boats, 6 fast gunboats, 9 minesweeping boats, 1 degaussing ship, 4 small oilers, 2 diving tenders, 2 torpedo recovery craft, 4 tugs and 12 small auxiliaries and service tenders. Navy personnel in 1986 totalled 3,200 officers and ratings, including 400 coastal frontier guards. Service for ratings is 3 years. There are naval bases at Durres and Vlore.

Air Force. The Air Force, controlled by the Army, has about 8,000 officers and men, and in 1985 operated 80 combat aircraft received before relations with China were broken. The force included 20 Chinese-built F-7s and F-6s, some Il-28 twinget light bombers and 2 ground attack squadrons of F-2s and F-4s Transport and training types include 3 Il-14s, 10 An-2s, Mi-4 helicopters, Yak-18s and MiG-15UTIs. Personnel in 1986 7,200

## INTERNATIONAL RELATIONS

Membership. Albania is a member of UN.

#### **ECONOMY**

Planning. For the first six 5-year plans see THE STATESMAN'S Year-BOOK, 1985-86 The seventh 5-year plan covered 1981-85 Target increases agricultural production, 32%, industrial, 34%. Emphasis is laid on industrial expansion, especially in the oil, mining and chemical industries. It is now stated that economic policy is founded on 'the revolutionary principle of self-reliance'

**Budget.** Budget figures for 1984 Revenue, 9,200m. leks; expenditure, 9,150m leks (economy 5,062m. leks, social, 2,401m. leks, defence, 1,010m. leks, administration 144m leks). Defence expenditure (1986) 998m. leks.

Currency. The monetary unit is the *lek* of 100 qintars. It replaced the gold franc (franc ar) in July 1947. In Aug. 1965 a new *lek* was introduced 10 old *leks* = 1 new *lek*. There are 5, 10, 20 and 50 qintar coins and a 1 *lek* coin, notes are for 1, 3, 5, 10, 25, 50 and 100 *leks*. Exchange rates, March 1986. US\$1 = 6.89 *leks*, £1 = 9.79

Banking. The Albanian State Bank was founded in 1925 with Italian aid. In 1970 savings deposits amounted to 572m. leks. In 1970 the Agricultural Bank was set up as a credit institution for agricultural co-operatives.

Weights and Measures. The metric system is in force.

#### **ENERGY AND NATURAL RESOURCES**

Electricity. Albania is rich in hydro-electric potential Electric power production in 1984 was 3,800m. kwh, of which 53m. was from thermal plants. 2,000m. kwh. were exported in 1984 to Yugoslavia, Bulgaria, Romania and Greece

Oil. The oil industry is being rapidly expanded. Output in 1973: Crude, 2,107,000

tonnes, refined, 1,596,000 tonnes. Refining capacity in 1970 was over 1m. tonnes Oil is produced chiefly at Qytet Stalin which a pipeline connects to the port of Vlorë. Natural gas is extracted.

Minerals. The mineral wealth of Albania is considerable but is only recently being developed. In 1971 there were 8 coal, 7 chromium (1977 output 9,000 tonnes) and 6 copper mines. Ferro-nickel ores are mined and output is increasing. In 1969 extensive coal deposits were discovered at Valias, near Tirana. There is no bituminous coal. Salt is extracted near Vlorë and bitumen mined at Selenice. Production in tonnes (1973). Chrome ore, 611,000; copper ore, 435,000, ferro-nickel ore, 384,000, brown coal, 811,000, phosphate, 110,000, nitrogenous fertilizer, 106,000, bitumen (1964), 242,000; cement (1965), 133,600

Agriculture. The country for the greater part is rugged, wild and mountainous, the exceptions being along the Adriatic littoral and the Korçe (Koritza) Basin, which are fertile. In 1973 a programme of land reclamation and anti-erosion measures was instituted. In 1970 arable land comprised 599,000 hectares and pasture 623,000 hectares. In 1980 366,000 hectares were irrigated.

Land is held by the State (largely forests and non-agricultural), state farms (50 in 1982 averaging 3,000 hectares of arable land) and co-operatives (500 in 1983 averaging 1,100 hectares) Co-operatives are divided into 'advanced' and 'ordinary' There is a pension scheme for collective farmers. In 1982 there were 31 machine and tractor stations. Tractors in 1980 numbered 17,300 (in 15-h.p. units)

The yield of the main crops in 1981 was (in 1,000 tonnes). Wheat, 600; sugarbeet, 320, maize, 400; potatoes, 137; fruit, 165, grapes, 83, oats, 30, sorghum, 35, cotton, 16, barley, 34, sunflower seeds, 53; wine, 23, rice, 13; tobacco, 18

Livestock, 1984. Cattle, 600,000, sheep, 1 2m., goats, 700,000; pigs, 200,000; horses and mules, 65,000, poultry, 5m

Forestry. 47% of the territory of Albania is forest land, of which 38% is oak forest, 26% elm and 18% pine and birch Timber reserves reach 44 5m cu. metres. In 1967 forests covered 1,242,100 hectares, 6,784 hectares were afforested, 10,000 hectares improved in 1967

Fisheries. The catch in 1984 was 4,000 tonnes

#### INDUSTRY AND TRADE

Industry. All industry is nationalized down to the smallest workshop. Output is small, and the principal industries are agricultural product processing, textiles, oil products and cement. Chemical and engineering industries are being built up. The metallurgical combine at Elbasan is being extended.

Labour. In 1978, 583,600 persons worked in the socialist sector of the national economy. In 1976, 46% of wage-earners were women.

Minimum wages may not fall below one-third of maximum. Hours of labour 8-hour day, 6-day week and 12 days yearly paid holiday Retirement age is 60 for men and 55 for women.

Commerce. Yugoslavia is Albania's main trading partner: in Nov 1985 a 5-year agreement provided for a 20% increase in trade. Trade links with China were reestablished in 1983, and a 5-year agreement was signed in Dec. 1985. Trade is conducted with the Comecon countries Bulgaria, Czechoslovakia, North Korea, Poland, and Vietnam; and also with Italy, France and India. The establishment of joint companies with, and the acceptance of credits from, capitalist firms is forbidden.

Exports which in 1983 were (estimate) US\$500m. included crude oil, bitumen, chrome, nickel, copper, tobacco, fruit and vegetables.

Total trade between Albania and UK (British Department of Trade returns, in £1,000 sterling).

	1981	1982	1983	1984	1985
Imports to UK	110	45	60	1,097	212
Exports and re-exports from UK	2,445	4,453	240	4,481	5,252

#### COMMUNICATIONS

Roads. There were, in 1960, 3,100 km of roads suitable for motor traffic. The mountain districts of the north are still mostly inaccessible for wheeled vehicles, and communications are still by means of pack ponies or donkeys. Motor vehicles in 1960: Cars, 1,900; lorries and buses, 3,400. Road traffic carried 8.6m. passengers in 1970; goods carried, 34m. tonnes. There are no private cars.

# JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice is administered by People's Courts. Minor crimes are tried by tribunals. Judges of the Supreme Court are elected by the People's Assembly for 4-year terms. The Office of the Procurator-General oversees the administration of justice. In 1983 an Investigator's Office was set up, separate from the Ministry of the Interior and answerable to the People's Assembly.

Religion. Albania is constitutionally an atheist state. In 1967 the Government closed all mosques and churches. For details of the situation before 1967 see The STATESMAN'S YEAR-BOOK, 1969-70. The population had been 70% Moslem.

Education. Primary education is free and compulsory in 8-year schools from 7 to 15 years. Secondary education is available in 12-year (general), technical-professional or lower vocational schools. Periods of productive work and military service are intermingled with full-time education. There were, in 1979-80, 2,541 kindergartens with 83,697 pupils and 3,920 teachers and in 1973-74 1,470 primary schools with 569,600 pupils and 22,686 teachers; 39 secondary schools with 32,900 pupils; 116 technical-professional schools with 69,700 pupils (the last two categories had 3,990 teachers taken together); and (in 1969-70) 36 institutes of higher education with 36,525 students and 941 teachers, including a university in Tirana (founded 1957), a polytechnic, an agricultural college, a medical school, 5 teachers' training colleges and an institute of science. In 1969-70 there were 382 teachers and 12,783 full-time students at Tirana University. An Albanian Academy was founded in 1973.

Health. Medical services are free, though medicines are charged for. In 1978 there were 763 hospitals and 3,028 outpatient clinics. In 1982 there were 4.476 doctors and dentists, and 70 hospital beds per 1,000 inhabitants. In 1982 there were 730 maternity hospitals or hospital sections.

# Principat d'Andorra

HISTORY AND CONSTITUTION. The political status of Andorra was regulated by the *Paréage* of 1278 which placed Andorra under the joint suzerainty of the Comte de Foix and of the Bishop of Urgel. The rights vested in the house of Foix passed by marriage to that of Bearn and, on the accession of Henri IV, to the French crown. The sovereignty is exercised jointly by the President of the French Republic and the Bishop of Urgel

The co-princes are represented in Andorra by the 'Viguier français' and the 'Viguier Episcopal'. Each co-prince has set up a Permanent Delegation for Andorran affairs, the Prefect of the Eastern Pyrenees is the French Permanent

Delegate.

The valleys pay every second year a due of 960 francs to France and 460 pesetas

to the bishop

A 'General Council of the Valleys' submits motions and proposals to the Permanent Delegations. Its 28 members are elected for 4 years, half of the council is renewed every 2 years.

The council nominates a First Syndic (Syndic Procureur Général) and a Second Syndic from outside its members.

In Jan 1982 an Executive Council was appointed, following elections held in Dec 1981, and legislative and executive powers were separated

HISTORY. Anguilla was probably given its name by the Spaniards because of its eel-like shape. After British settlements in the 17th century, the territory was administered as part of the Leeward Islands. From 1825 it became more closely associated with St Kitts and ultimately incorporated in the colony of St Kitts-Nevis-Anguilla. Opposition to this association grew and finally in 1967 the island seceded unilaterally. Following direct intervention by the UK in 1969 Anguilla became de facto a separate dependency of Britain; and this was formalized on 19 Dec. 1980 under the Anguilla Act 1980. A new Constitution came into effect in April 1982.

AREA AND POPULATION. Anguilla is the most northerly of the Leeward Islands, some 70 miles (112 km) to the north-west of St Kitts and 5 miles (8 km) to the north of St Martin/St Maarten The territory also comprises the island of Sombrero (on which there is an important lighthouse) and several other off-shore islets or cays The total area of the territory is about 60 sq. miles (155 sq. km) Census population (1984) was 7,000. The capital is The Valley

HISTORY. In 1515 Juan Díaz de Solis discovered the Río de La Plata. In 1534 Pedro de Mendoza was sent by the King of Spain to take charge of the 'Gobernación y Capitanía de las tierras del Rio de La Plata', and in Feb. 1536 he founded the city of the 'Puerto de Santa María del Buen Aire'. In 1810 the population rose against Spanish rule, and in 1816 Argentina proclaimed its independence. Civil wars and anarchy followed until, in 1853, stable government was established.

Military leaders supported by the Navy and Air Force staged a coup d'état on 24 March 1976, and The Junta of Commanders in Chief deposed Isobel Perón and her Government elected in 1972. The Commander in Chief of the Army, Lieut-Gen Videla, was appointed President. The previous Constitution remained in force in so far as it was consistent with the statutes and objectives of the Junta Return to civilian rule took place on 10 Dec. 1983. CONSTITUTION AND GOVERNMENT. Presidential, congressional and municipal elections took place on 30 Oct. 1983 and a return to civilian rule took place on 10 Dec 1983. With the return to constitutional rule the Constitution of 1853 (as amended up to 1898) is again in effect. The President and Vice-President are elected by a 600-member electoral college (directly elected by popular vote) for 6-year terms, both must be Roman Catholics of Argentine birth. The President is Commander-in-Chief of the Armed Services, and appoints to all civil and judicial offices.

The following is a list of Presidents from 1973 onwards:

Gen Juan Domingo Perón 12 Oct. 1973-1 July 1974 Maria Estela (Isabel) Martinez Perón 1 July 1974 (a i from 29 June 1974)-23 March 1976. (Deposed) Gen Jorge Rafael Videla 29 March 1976-29 March 1981 Gen Roberto Viola, 29 March-22 Dec 1981

Gen Leopoldo Fortunato Galtieri, 22 Dec 1981-17 June 1982

Gen. Reynaldo Benito Antonio Bignone, 1 July 1982-10 Dec 1983

The National Congress consists of a Senate and a House of Deputies: The Senate comprises 46 members, 2 nominated by each provincial legislature and 2 from the Federal District for 9 years (one-third retiring every 3 years) The House of Deputies comprises 254 members directly elected by universal suffrage (at age 18)

A State of Siege was declared on 25 Oct. 1985 by President Alfonsín and midterm congressional elections were held on 3 Nov. 1985.

President of the Republic. Dr Raúl Alfonsín (sworn in 10 Dec 1983).

Vice-President Dr Victor Martinez.

The Cabinet in Feb. 1986 was composed as follows:

Foreign Affairs. Dante Caputto. Înterior. Dr Antonio Tróccoli Treasury and Finance Juan Sourrouille. Labour. Hugo Barrionuevo. Defence (Vacant). Education and Justice Dr Carlos Alconada Aramburú. Public Health and Environment Aldo Nen. Public Works. Robert Tomassini

#### DEFENCE

Army. The Army is a National Militia, service in which is compulsory for all citizens from their 18th to their 45th year Naturalized citizens are exempt for a period of 10 years. For the first 10 years the men belong to the 'active' Army, or first line. After completing 10 years in the first line the men pass to the National Guard, and serve in it for another 10 years, finishing their service with 5 years in the Territorial Guard; the latter is mobilized only in case of war. The period of continuous service, or training in the ranks with the permanent forces, is for 1 year for the Army or Air Force, and 14 months for the Navy. The reservists can be called out for training periodically.

The territory of the republic is divided into 5 military districts for administrative purposes. The Army is organized in 5 army corps, it consists of 2 armoured, 4 motorized infantry and 1 mechanized, 1 airborne, 3 mountain and 1 jungle brigades, 16 artillery, 1 aviation and 5 air defence battalions. The Army has over 100 fixed-wing aircraft and helicopters.

In 1986 the Army was 55,000 strong, of whom 35,000 were conscripts.

The trained reserve numbers about 250,000, of whom 200,000 belong to the National Guard and 50,000 to the Territorial Guard.

tons, 7 patrol vessels, 40 coastal patrol craft and a training ship.

The Naval Aviation Service, formed on 17 Oct. 1919, has some 140 fixed-wing aircraft and helicopters with 2,000 personnel, in 6 wings. Aircraft include 14 Super Entendard fighters, 30 A-4Q Skyhawk attack bombers, 18 Aermacchi M.B. 326 and 7 M.B.339A light jet armed trainers, 6 Lockheed Electra maritime surveillance aircraft and 6 S-2E ship-based Tracker anti-submarine aircraft, and a dozen types of training, transport and general purpose aircraft, plus 3 types of helicopters. A variable mix of Super Entendards, Skyhawks, Trackers and Sea King and Alouette helicopters operated from the aircraft carrier.

Air Force. The Air Force, founded on 10 Aug. 1912 and autonomous since 4 Jan. 1945, is organized into Air Operations, Air Regions, Materiel and Personnel Commands. Air Operations Command, responsible for all operational flying, is made up of air brigades, each with 1 to 4 squadrons, usually operating from a single base. No. I Air Brigade is a military air transport service, with responsibility also for LADE (state airline) operations into areas of Argentina not served by civilian companies. Its equipment includes 8 C-130E/H Hercules and 10 F.27 Friendship/ Troopship turboprop transports, 2 KC-130H Hercules tanker/transports, 5 twinturbofan F.28 Fellowship freighters, 5 Twin Otters, 15 Guarani IIs, the Presidential Boeing 707-320B and 707-320C, 2 more 707s, 2 VIP Fellowships, and many older or smaller types. No. II Air Brigade has 5 Canberra twin-iet bombers and 2 Canberra trainers; a photographic squadron with Guarani IIs and Learjets. No. III Air Brigade has 2 squadrons of IA 58 Pucara twin-turboprop COIN aircraft. No. IV Air Brigade comprises 2 ground attack squadrons equipped with about 30 Paris light jet combat and liaison aircraft. No. V Air Brigade comprises 2 squadrons with a total of about 30 A-4P Skyhawk strike aircraft. No. VI Air Brigade has 40 Dagger (Israeli-built Mırage III) fighters, equipping 2 squadrons. No. VII Air Brigade has 2 COIN, general-purpose, and search and rescue squadrons with 12 armed Hughes 500M, 5 Lama, 5 Sikorsky S-58T/S-61, 8 Bell 212 and 9 Bell UH-1 helicopters. No. VIII Air Brigade has 1 squadron with 14 Mirage IIIE fighter-bombers and 2 Mirage IIID trainers. No. X Air Brigade has 2 squadrons of Mirage IIIC fighters. There is a flying school at Córdoba, equipped with piston-engined T-34 Mentors and Paris jets. There are about 17,000 personnel and 180 combat aircraft.

#### INTERNATIONAL RELATIONS

**Membership.** Argentina is a member of UN, OAS and LAIA (formerly LAFTA).

#### **ECONOMY**

**Budget.** The financial year commences on 1 Nov. Budget receipts in 1985 6,517m. australes and expenditure 8,811m. australes.

Currency. The monetary system is on a gold-exchange standard, the unit for foreign transactions being, nominally, the *peso oro* (gold peso) and for domestic transactions, the *Austral* (paper peso), legal tender for all domestic debts.

The gold peso weighs 1.6129 grammes of gold 0.990 fine; it is divided into 100 centavos, but gold is not in circulation. Circulation consists chiefly of paper notes (issued since 1897) ranging from 10 australes down to 10 cents. The coins actually circulating, 1985, were steel-nickel, 5, 1 and  $\frac{1}{2}$  cents. In March 1986, US\$1 = 0.801 austral; £1 = 1.149 austral. Inflation reached 776% in Feb. 1985.

Banking. A law promulgated 25 March 1946 nationalized the Central Bank (established in 1935), as an autonomous institution. Six decree-laws of Oct. 1957 have brought back a greater elasticity to the structure.

In 1984 there were 35 government banks, 141 private banks and 33 foreign banks. There are 6 Stock Exchanges.

The total foreign debt at 31 Dec. 1984 was US\$48m.

Weights and Measures. Since 1 Jan. 1887 the use of the metric system has been compulsory.

# **ENERGY AND NATURAL RESOURCES**

Electricity. Electric power production (1984) was 38,890 kwh.

Oil. Crude oil production (1984) 44m. cu. metres from 1,013 oil wells. Investment of US\$10,000m. is envisaged by 1985 in the oil industry with the aim of achieving self-sufficiency.

Gas. Natural gas production (1983) 13,500,000m. cu. metres

Minerals. Argentina produced 600,000 tonnes of washed coal in 1983. Gold, silver and copper are worked in Catamarca, where there are also 2 tin-mines, and gold and copper in San Juan, La Rioja and the south-western territories. Iron ore (90,000 tonnes in 1983), tungsten, beryllium, mica, uranium (30 tonnes in 1983), lead (32,000 tonnes in 1983), barites, zinc (43,500 tonnes in 1972), tin (1 8m tonnes in 1972), manganese and limestone are produced.

Agriculture. Argentina has an area of about 670,251,000 acres, of which about 41% is pasture land, 32% woodland and 11% (73 73m. acres) cultivated.

Livestock (1984). Cattle 53 5m., sheep, 30m., pigs, 3 8m, horses, 3,050,000. The Province of Buenos Aires has 38% of the cattle. Wool production, 1983, was 126,000 tonnes.

Total grain harvest (1984) 42 5m tonnes. Wheat production (1984) 9.5m. tonnes from 5 7m, hectares

Argentina's meat exports are calculated in terms of actual weight; not 'carcase weight', as is the international practice. In 1983, 84 16m. tons of meat were exported

Cotton, potatoes, vine, tobacco, citrus fruit, olives, rice, soya, and yerba maté (Paraguayan tea) are also cultivated There are 36 cane-sugar mills and 1 beet-sugar factory, cane-sugar production, 1984, 15,468,000 tonnes. Potato harvest, 1984, amounted to 1,986,000 tonnes. The area under tobacco, 1984, was 61,000 hectares; output 75,000 tonnes

Sunflower seed, first grown by Russian immigrants in 1900, now furnishes the country's most popular edible oil. There are more than 10m olive trees, of which 48% are in Mendoza 329,000 tonnes of groundnuts were produced in 1984 (mainly in Córdoba) Argentina is the world's largest source of tannin

Fisheries. Fish landings in 1983 amounted to 550,000 tonnes

#### INDUSTRY AND TRADE

Industry. Production (1983 in tonnes) Paper, 873,000, steel, 2 95m, sulphuric acid (1979), 279,066, cement (1979), 6 7m Motor vehicles produced (1981) totalled, 172,350; television receivers, 262,000

Commerce. Import values include charges for carriage, insurance and freight, export values are on a f o.b. basis. Real values of foreign trade (in US\$1 m.), exclusive of coin and bullion.

#### COMMUNICATIONS

Roads. In 1978 there were 207,630 km of national and provincial highways. The 4 main roads constituting Argentina's portion of the Pan-American Highway were opened to traffic in 1942. In 1985 there were 5.08m. cars and commercial vehicles.

Railways. The system based on the 1949 amalgamation of 18 government, British and French-owned railways, comprises 7 railways with a total route-km in 1983 of 33,807 km (164 km electrified) on metre, 1,435 mm and 1,676 mm gauges In 1984 railways carried 17.6m. tonnes of freight and 345m. passengers

Aviation. There were (1980) 10 international airports. Commercial airlines flew a total of 94m. km in 1980, with 11,104 tonne-km and 10,469 passenger-km

Shipping. The merchant fleet, 31 Dec. 1976 (registered with Lloyd's), consisted of 1,869,662 GRT; traffic during 1971: vessels of 13.27m GRT entered ports; 14m tonnes of goods were unloaded and 10.6m tonnes were loaded

Post and Broadcasting. In 1949 the telephone service was nationalized; instruments numbered 3,250,000 in 1984. There were (1984) 122 radio stations and 4 television channels in Buenos Aires. In 1984 there were 8m. radio receivers and 6 5m. television receivers.

Cinemas (1972). Cinemas numbered 1,650, with seating capacity of 611,400

Newspapers (1984). Daily newspapers numbered 297 Buenos Aires had (1984) 11 daily newspapers with a circulation of 2 5m

# JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Justice is administered by federal and provincial courts. The former deal only with cases of a national character, or in which different provinces or inhabitants of different provinces are parties. The chief federal court is the Supreme Court, with 5 judges at Buenos Aires Other federal courts are the appeal courts, at Buenos Aires, Bahía Blanca, La Plata, Córdoba, Mendoza, Tucumán and Resistencia. Each province has its own judicial system, with a Supreme Court (generally so designated) and several minor chambers. Trial by jury is established by the Constitution for criminal cases, but never practised, except occasionally in the provinces of Buenos Aires and Córdoba

The death penalty was re-introduced in 1976 for the killing of government, military police and judicial officials, and for participation in terrorist activities

The police force is centralized under the Federal Security Council.

Religion. The Roman Catholic religion is supported by the State and membership was 23 67m. in 1976. There are several Protestant denominations with a total congregation (1983) of 500,000. The Jewish congregation numbered 300,000 in 1983.

Education. In 1981 the primary schools had 218,294 teachers and 4,218,992 pupils; secondary schools had 191,096 teachers and 1,366,444 pupils.

There are National Universities at Buenos Aires (2), Córdoba (2), La Plata, Tucumán, Santa Fé (Litoral), Rosario, Corrientes (Nordeste,), Mendoza (Cuyo), Bahía Blanca (Sur), Catamarca, Tandil, Neuquén (Comahue), San Salvador de Jujuy, Salta, Santa Rosa (La Pampa), Mar del Plata, Comodoro Rivadavia (Patagonia), Río Cuarto, Entre Ríos, Resistencia, San Juan and Santiago del Estero. There are also private universities in Buenos Aires (6), Mendoza (3), Córdoba, Comodoro Rivadavia, La Plata, Morón, Tucumán, Salta, Santa Fé and Santiago del Estero. In 1981 universities had 525,688 students and 54,039 lecturers.

Health. Free medical attention is obtainable from public hospitals. Many trade unions provide medical, dental and maternity services for their members and dependants. A Ministry of Social Welfare was set up in 1966. In 1971 there were 2,864 hospitals with 133,847 beds and in 1975 there were 48,693 doctors.

HISTORY. On 1 Jan. 1901 New South Wales, Victoria, Queensland, South Australia, Western Australia and Tasmania were federated under the name of the 'Commonwealth of Australia', the designation of 'colonies' being at the same time changed into that of 'states'—except in the case of Northern Territory, which was transferred from South Australia to the Commonwealth as a 'territory' on 1 Jan 1911

In 1911 the Commonwealth acquired from the State of New South Wales the Canberra site for the Australian capital. Building operations were begun in 1923 and Parliament was opened at Canberra on 9 May 1927 by HRH the Duke of York (afterwards King George VI). A further area at Jervis Bay was acquired in 1915.

Territories under the administration of Australia in Jan. 1977, but not included in it, comprise Norfolk Island, the territory of Ashmore and Cartier Islands, and the Australian Antarctic Territory (24 Aug. 1936), comprising all the islands and territory other than Adélie Land, situated south of 60° S lat. and between 160° and 45° E. long.

The British Government transferred sovereignty in the Heard Island and McDonald Islands to the Australian Government on 26 Dec. 1947. Cocos (Keeling) Islands on 23 Nov 1955 and Christmas Island on 1 Oct. 1958 were also transferred to Australian jurisdiction

CLIMATE. Over most of the continent, four seasons may be recognised. Spring is from Sept. to Nov., Summer from Dec. to Feb., Autumn from March to May and Winter from June to Aug., but because of its great size there are climates that range from tropical monsoon to cool temperate, with large areas of desert as well. In Northern Australia there are only two seasons, the wet one lasting from Nov. to March, but rainfall amounts diminish markedly from the coast to the interior Central and southern Queensland are subtropical, north and central New South Wales are warm temperate, as are parts of Victoria, Western Australia and Tasmania, where most rain falls in winter. Canberra. Jan. 68°F (20°C), July 42°F (5.6°C). Annual rainfall 23" (629 mm). Adelaide. Jan. 73°F (22.8°C), July 52°F (11 1°C). Annual rainfall 45" (1,153 mm). Jan. 62°F (19 4°C), July 49°F (9 4°C). Annual rainfall 26" (659 mm). Perth. Jan. 74°F (23 3°C), July 55°F (12 8°C). Annual rainfall 35" (873 mm) Sydney. Jan. 71°F (21 7°C), July 53°F (11.7°C). Annual rainfall 47" (1,215 mm).

CONSTITUTION AND GOVERNMENT. Federal Government. Under the Australian Constitution legislative power in Australia is vested in a Federal Parliament, consisting of the Queen, represented by a Governor-General, a Senate and a House of Representatives. Under the terms of the constitution there must be a session of parliament at least once a year.

The Senate comprises 64 Senators (10 for each State voting as one electorate and as from Aug. 1974, 2 Senators respectively for the Australian Capital Territory and the Northern Territory). Senators representing the States are chosen for 6 years. The terms of Senators representing the Territories expire at the close of the day next preceding the polling day for the general elections of the House of Representatives. In general, the Senate is renewed to the extent of one-half every 3 years, but in case of disagreement with the House of Representatives, it, together with the House of Representatives, may be dissolved, and an entirely new Senate elected. The House of Representatives consists, as nearly as practicable, of twice as many

Members as there are Senators, the numbers chosen in the several States being in proportion to population as shown by the latest statistics, but not less than 5 for any original State. The numerical size of the House after the election in 1980 was 125, including the Members for Northern Territory and the Australian Capital Territory. The Northern Territory has been represented by I Member in the House of Representatives since 1922, and the Australian Capital Territory by I Member since 1949 and 2 Members since May 1974. The Member for the Australian Capital Territory was given full voting rights as from the Parliament elected in Nov 1966. The Member for the Northern Territory was given full voting rights in 1968. The House of Representatives continues for 3 years from the date of its first meeting, unless sooner dissolved. Every Senator or Member of the House of Representatives must be a British subject, be of full age, possess electoral qualifications and have resided for 3 years within Australia. The franchise for both Houses is the same and is based on universal (males and females aged 18 years) suffrage. Compulsory voting was introduced in 1925. If a Member of a State Parliament wishes to be a candidate in a federal election, he must first resign his State seat.

Executive power in Australia is vested in the Governor-General, who is advised by an Executive Council. This is presided over by the Governor-General, and its members hold office at his pleasure. All Ministers of State, who are members of the party or parties commanding a majority in the lower House, are members of the Executive Council under summons. A record of proceedings of meetings is kept by the Secretary to the Council. At Executive Council meetings the decisions of the Cabinet are (where necessary) given legal form, appointments made, resignations

accepted, proclamations, regulations and the like made.

The policy of a ministry is, in practice, determined by the Ministers of State meeting without the Governor-General under the chairmanship of the Prime Minister. This group is known as the Cabinet. The Cabinet of the Liberal-National Country Party Coalition Government comprises the 14 senior Ministers. Other Ministers attend meetings of Cabinet only when required. Meetings of the full Ministry are held when necessary. There are 11 Standing Committees of the Cabinet comprising varying numbers of Cabinet and non-Cabinet Ministers. In Labour Governments all Ministers have been members of Cabinet. Cabinet meetings are private and deliberative and records of meetings are not made public. The Cabinet does not form part of the legal mechanisms of Government; the decisions it takes have, in themselves, no legal effect. The Cabinet substantially controls, in ordinary circumstances, not only the general legislative programme of Parliament but the whole course of Parliamentary proceedings. In effect, though not in form, the Cabinet, by reason of the fact that all Ministers are members of the Executive Council, is also the dominant element in the executive government of the country.

The legislative powers of the Federal Parliament embrace trade and commerce, shipping, etc.; taxation, finance, banking, currency, bills of exchange, bankruptcy, insurance; defence; external affairs, naturalization and aliens, quarantine, immigration and emigration; the people of any race for whom it is deeined necessary to make special laws; postal, telegraph and like services; census and statistics; weights and measures; astronomical and meteorological observations, copyrights; railways; conciliation and arbitration in disputes extending beyond the limits of any one State; social services; marriage, divorce etc.; service and execution of the civil and criminal process; recognition of the laws, Acts and records, and judicial proceedings of the States. The Senate may not originate or amend money bills; and disagreement with the House of Representatives may result in dissolution and, in the last resort, a joint sitting of the two Houses. No religion may be established by the Commonwealth. The Federal Parliament has limited and enumerated powers, the several State parliaments retaining the residuary power of government over their respective territories. If a State law is inconsistent with a Commonwealth law, the latter prevails.

The Constitution also provides for the admission or creation of new States. Proposed laws for the alteration of the Constitution must be submitted to the electors, and they can be enacted only if approved by a majority of the States and by a majority of all the electors voting.

The 34th Parliament was elected in Dec. 1984.

House of Representatives (following 1 Dec. 1984 elections) Australian Labor Party, 82 seats; Liberal Party, 45; National Party, 21.

State Government In each of the 6 States (New South Wales, Victoria, Queensland, South Australia, Western Australia, Tasmania) there is a State government whose constitution, powers and laws continue, subject to changes embodied in the Australian Constitution and subsequent alterations and agreements, as they were before federation. The system of government is basically the same as that described above for the Commonwealth—*i.e*, the Sovereign, her representative (in this case a Governor), an upper and lower house of Parliament (except in Queensland, where the upper house was abolished in 1922), a cabinet led by the Premier and an Executive Council Among the more important functions of the State governments are those relating to education, health, hospitals and charities, law, order and public safety, business undertakings such as railways and tramways, and public utilities such as water supply and sewerage In the domains of education, hospitals, justice, the police, penal establishments, and railway and tramway operation, State government activity predominates Care of the public health and recreative activities are shared with local government authorities and the Federal Government, social services other than those referred to above are now primarily the concern of the Federal Government, and the operation of public utilities is shared with local and semi-government authorities.

Administration of Territories Since 1911, responsibility for administration and development of the Australian Capital Territory has been vested in Federal Ministers and Departments. In 1930, the ACT Advisory Council was established, with both elected and appointed Members, to advise the Minister on administration of the Territory.

Late in 1974 the Government replaced the ACT Advisory Council with a Legislative Assembly of eighteen Members all of whom are elected and on 29 June 1979 the Legislative Assembly became the House of Assembly. While the Assembly has been accorded the forms of a legislature, it continues to perform an advisory function for the Minister for the Capital Territory.

On I July 1978 the Northern Territory of Australia became a self-governing Territory with expenditure responsibilities and revenue-raising powers broadly approximating those of a State, although the Territory is not a State under the Constitution.

Under self-government the Legislative Assembly and Ministers of the Northern Territory have responsibility in the areas of insurance, banking, taxation, provision of credit and assistance; Public Service of the Territory; maintenance of law and order and the administration of Justice etc., civil liberties; markets and marketing, inquiries and administrative reviews; consumer affairs; sales and leases of goods and supply of services etc.; prices and rent control; industry and regulation of businesses and professions; tourism; printing and publishing; labour relations and industrial safety; mining and minerals; land and land use; transport, environment protection and conservation; fire prevention; water resources, energy planning, public utilities and public works; local government; housing, education, health, welfare etc.; censorship; Supreme Court, agreements between the Territory and the Commonwealth, State or States.

Local Government. The system of municipal government is broadly the same throughout Australia, although local government legislation is a State matter.

Each State is sub-divided into areas known variously as municipalities, cities, boroughs, towns, shires or district councils, totalling about 900. Within these areas the management of road, street and bridge construction, health, sanitary and garbage services, water supply and sewerage, and electric light and gas undertakings,

hospitals, fire brigades, tramways and omnibus services and harbours is generally part of the functions of elected aldermen and councillors. The scope of their duties, however, differs considerably, for in all States the State Government, either directly or through semi-government authorities, also carries out some or all of these types of services

In some instances, e.g., in New South Wales, a number of local government authorities combine to conduct a public undertaking such as the supply of water or

electricity.

DEFENCE. The Minister for Defence has responsibility under legislation for the control and administration of the Defence Force. The Chief of Defence Force Staff is vested with command of the Defence Force. He is the principal military adviser to the Minister. The Secretary, Department of Defence is the Permanent Head of the Department. He is the principal civilian adviser to the Minister and has statutory responsibility for financial administration of the Defence outlay. The Chief of Defence Force Staff and the Secretary are jointly responsible for the administration of the Defence Force except with respect to matters falling within the command of the Defence Force or any other matter specified by the Minister

The Chief of Naval Staff, the Chief of the General Staff and the Chief of the Air Staff command the Navy, Army and Air Force respectively. They have delegated authority from the Chief of Defence Force Staff and the Secretary to administer

matters relating to their particular Service

The structure of Defence is characterized by 3 organizational types: (1) A Central Office comprising 5 groups of functional orientated Divisions: Strategic Policy and Force Development, Supply and Support; Manpower and Financial Services; Management and Infrastructure Services; and, Defence Science and Technology, (11) the 3 Armed Services of the Defence Force, each having a Service Office element in addition to the command structure; and (111) a small number of outrider organizations concerned with such specialist fields as intelligence and natural disasters.

Defence Support Working within overall defence, industry and employment policies, the Department of Defence Support has as its goals the provision of optimum support for the nation's defence effort, the attainment of an appropriate technological and industrial infrastructure, and increased national self-reliance in defence support capacity.

Its specialist functions include defence purchasing and procurement, munitions and aircraft production, shipbuilding and other dockyard services and defence

industry development.

In responding to the manifold needs of Australian defence, the Department Undertakes the purchase of goods and services for defence purposes; provides technical expertise and other forms of assistance to encourage defence industry initiatives and the acquisition of modern industrial techniques and technologies; fosters participation by Australian industry in the procurement and support of defence equipment to the maximum practical extent; administers the Australian Offsets Program so as to stimulate technological advancement and broaden the capabilities of Australian industries of significance to this country's strategic and overall manufacturing needs; within overall defence policies develops proposals and provides advice in connection with the capacity, efficiency and capability of Australian industry particularly in so far as it is concerned with the design, export of defence materiel; manages the Government's munitions and aircraft factories, and dockyards; and consistent with the Government's defence and foreign affairs policies, markets defence and allied products and services to help maintain industrial capabilities of strategic significance.

These activities are carried out in pursuit of the Department's all-encompassing goal of providing, within defence policy, optimum support for the nation's defence

effort in peace and war.

The Department employs approximately 15,000 people (under the Public Service Act, the Supply and Development Act and the Naval Desence Act) who are located in establishments and offices in five states. This workforce in-

cludes some 2,100 professional and technical staff, 4,200 tradesmen and 1,500 apprentices.

Army. Overall organization and financial control of the Australian Army is vested in the Chief of General Staff. Under the Defence Force Re-organisation Act, which received the Royal Assent on 9 Sept. 1975, the Military Board, which was previously the controlling body of the Army, was abolished. The Act became effective on 1 Feb. 1976. A functional command structure, Headquarters Field Force Command, Headquarters Logistic Command, and Headquarters Training Command, with Headquarters in military districts, was introduced in 1973.

The strength of the Army was 32,029 as at 30 June 1985. There is emphasis in the field force organization on the combat element and high-priority logistic units to meet the requirements for limited war and tropical warfare with light airportable formations. The Field Force is organized on the divisional structure, on the basis of 6 battalions organized in 3 brigades each with combat and logistic support. The Army Aviation Corps has 13 N22 Nomad and 19 Turbo-Porter transports, and 50 JetRanger helicopters.

The effective strength of the Army Reserve at 30 June 1984 was 30,058.

Staff and command training is carried out at the Command and Staff College, Queenscliff, Victoria, and the Land Warfare Centre, Canungra, Queensland.

In Jan. 1986 the Australian Defence Force Academy, Canberra, will accept its first officer cadets for the 3 Services. Cadets will study at the academy for degrees in arts, science and engineering. During semester breaks they will carry out military training with their particular Services.

At the end of 3 years at the academy, army officer cadets will undertake a year of military training at the Royal Military College, Duntroon This will culminate with commissioning as a lieutenant

In 1986 the Royal Military College will also take officer cadets for commissioning who previously would have attended the Officer Cadet School, Portsea, and the Women's Officer Cadet School, Sydney.

Navy. The overall control of the Royal Australian Navy is vested in the Chief of Naval Staff assisted by the Deputy Chief of Naval Staff with the Chief of Naval Personnel, the Chief of Naval Technical Services and the Chief of Naval Material Under the Defence Re-organisation Act effective from 1 Feb 1976 the Naval Board was abolished. The command, operation and administration of the Fleet is the responsibility of the Flag Officer Commanding HM Australian Fleet. The materiel support of the fleet is the responsibility of the Flag Officer Naval Support Command.

In 1986 the RAN had 6 UK-built Oberon class submarines, Onslow, Otway, Ovens and Oxley (commissioned 1967-69) and Orion and Otama (commissioned in 1977-78); 3 US-built guided missile destroyers, Brisbane, Hobart and Perth (commissioned 1965-67; 4 US-built guided missile frigates, Adelaide, Canberra, Sydney and Darwin (commissioned 1981-84); 6 destroyer escorts; 1 destroyer parent ship, 1 fleet replenishment ship, 2 training ships (ex-liner and ex-destroyer), 3 oceanographic research and survey ships; 1 minehunter; 1 landing ship; 15 'Fremantle' and 2 'Attack' class patrol boats; plus 5 'Attack' class patrol boats (RANR); 6 landing craft; 1 fleet oiler; 100 auxiliaries and service craft, and 7 tugs In addition a prototype inshore minehunter is being built and 2 additional guided missile frigates are scheduled at Williamstown, Victoria.

The Fleet Air Arm lately operated 39 Sea King, Wessex, Iroquois, Squirrel and Bell 206B helicopters and 2 HS748 fixed wing aircraft. Other fixed wing naval aviation ended on 30 June 1984.

The serving strength in 1986 totalled 16,600 personnel including 1,000 WRANS.

The main training establishments are HMAS Cerberus in Victoria; HMAS Watson, HMAS Penguin and HMAS Nirimba at Sydney; HMAS Albatross at Nowra, NSW, and HMAS Creswell (Royal Australian Naval College) at Jervis Bay, ACT. Reserve training is carried out in 7 major seahoard capital cities.

Navy estimates 1983–84, \$A1,172,744,000; 1984–85, \$A1,240,743,000.

Air Force. Command of the Royal Australian Air Force is vested in the Chief of the Air Staff (CAS) assisted by the Deputy Chief of the Air Staff, Chief of Air Force Operations and Plans, Chief of Air Force Materiel, Chief of Air Force Personnel, Chief of Air Force Technical Services, Director-General Supply—Air Force and Assistant Secretary Resources Planning.

The CAS administers and controls RAAF units through two commands. Operational Command and Support Command. Operational Command is responsible to the CAS for the command of operational units and the conduct of their operations within Australia and overseas. Support Command is responsible to the CAS for training of personnel, and the supply and maintenance of service equipment.

Flying establishment comprises 15 squadrons, of which 2 are equipped with 24 F-111 strike/reconnaissance aircraft Of the others, 3 are equipped with missile-armed Mirage III-O Mach 2 fighters, 2 with Orion maritime reconnaissance aircraft. There are eight transport squadrons, 2 with Hercules turboprop transports, 1 with Caribou STOL transports, 1 with a mix of Ecurevil and Iroquois helicopters, 1 with Boeing Vertol CH-47C medium lift helicopters, 1 with Iroquois helicopters, and a special transport squadron equipped with BAC One-Eleven, Mystère 20 and HS 748 aircraft There is also one squadron operating B707 aircraft Training aircraft include piston-engined Airtrainers, built in New Zealand, Aermacchi MB 326H jets for pilot training, and HS 748 aircraft for navigator training A training unit has the first of 75 F-18 Hornets now being delivered

Training for commissioned rank is carried out at the RAAF Academy and Officers' Training School, both located at Point Cook, Victoria. Other major training activities which lead to commissioned rank include basic aircrew training and technical and commercial cadet schemes Basic ground training to tradesman level is conducted at RAAF technical training schools. Higher command and staff training is, in the main, carried out at the RAAF Staff College, Fairbairn, ACT

The authorized service manpower ceiling for the Permanent Air Force is 22,677 for 1984–85. There is also an Australian Air Force Reserve

Membership. Australia is a member of the UN, the Commonwealth, OECD, Colombo Plan, the South Pacific Commission and the South Pacific Bureau for Economic Co-operation.

#### **ECONOMY**

Financial relations with the States. Since 1942 the Federal Government alone has levied taxes on incomes. In return for vacating this field of taxation, the State Governments are reimbursed by grants from the Federal Government out of revenue received. Payments to the States represent about one-third of Federal Government outlays, and in turn the payments State Governments receive from the Federal Government account for nearly half of their revenues.

The Financial Agreement of 1927 established the Australian Loan Council which consists of representatives of the Federal and six State Governments, and has the task of co-ordinating domestic and overseas borrowings by these governments including, *inter alia*, and setting of annual borrowing programmes. The Federal Government acts as a central borrowing agency in raising loans to finance the major part of those programmes. The Loan Council in 1984 agreed upon arrangements for the co-ordination of borrowings by semi-government and local authorities and government-owned companies.

Budget. In 1929, under a financial agreement between the Federal Government and States, approved by a referendum, the Federal Government took over all State debts existing on 30 June 1927 and agreed to pay \$A15 17m. a year for 58 years towards the interest charges thereon, and to make substantial contributions towards a sinking fund on State debt. The Sinking Fund arrangements were revised under an amendment to the agreement in 1976

Currency. On 14 Feb. 1966 Australia adopted a system of decimal currency. The currency unit, the dollar (\$) is divided into 100 cents. The transition period ended on 31 July 1967. Decimal notes are issued in denominations of \$2, 5, 10, 20, 50 and 100. Coins are issued in denominations of 1, 2, 5, 10, 20 and 50 cents and \$1.

Australian notes, issued by the note-issue department of the Reserve Bank, are legal tender throughout Australia. The total value of notes in circulation on 30 June 1984 was A7,205m, of which A6,418m was held by the public. In Feb. 1986, US1=1 41 dollars; £1=2 03 dollars.

Banking. The banking system in Australia comprises:

(a) The Reserve Bank of Australia. This is the central bank which in addition to its central banking business (including the note-issue department) provides special financing facilities through the rural credits department for the processing, manufacture and marketing of primary produce.

(b) Four major trading banks: (i) The Commonwealth Bank of Australia; (11) 3 private trading banks: The Australia and New Zealand Banking Group Ltd, Westpac Banking Corporation and the National Commercial Banking Corporation of

Australia Ltd.

(c) Other trading banks. (1) 3 State Government banks—The State Bank of New South Wales, The State Bank of South Australia, and the Rural and Industries Bank of Western Australia; (11) one joint stock bank—The Bank of Queensland Ltd, formerly The Brisbane Permanent Building and Banking Co Ltd, which has specialized business in one district only; (111) The Australian Bank Ltd; (112) branches of 2 overseas banks—the Bank of New Zealand and the Banque Nationale de Paris, which are mainly concerned with financing trade, etc., between Australia and overseas countries.

(d) The Commonwealth Development Bank of Australia

- (e) The Australian Resources Development Bank Ltd opened on 29 March 1968. Its main objective is to assist Australian enterprises in the development of Australia's natural resources, through direct loans and equity investment or by refinancing loans made by trading banks. The bank is jointly owned by the 4 major Australian trading banks.
- (f) The Primary Industry Bank of Australia Ltd commenced operations on 22 Sept. 1978. The equity capital of the bank consists of eight shares. Seven shares are held by the Australian Government and the major trading banks while the eighth share is held equally by the 4 State banks. The main objective of the bank is to facilitate the provision of loans to primary producers on longer terms than are otherwise generally available. The role of the bank is restricted to re-financing loans made by banks and other financial institutions

(g) Savings Banks.

The Reserve Bank's functions and responsibilities derive from the Reserve Bank Act 1959 and the Banking Act 1959, which came into effect in 1960 They had their origins, however, in the development of the central banking role of the Commonwealth Bank, which was established in 1911 as a Government savings and trading bank.

Control of the Australian note issue was transferred from the Commonwealth Treasury to a Notes Board in 1920 and, in 1924, to the Bank The Commonwealth Bank Act 1945 formally constituted the Bank as a central bank, and these powers were carried through into the 1959 Act establishing the Reserve Bank

The Acts of 1959 provided for. (1) the separation of the central bank from the Commonwealth group of banking institutions and its reconstitution as the Reserve Bank of Australia; (11) the establishment of an entirely separate Commonwealth Banking Corporation, with responsibilities for the non-central-banking elements that had developed from within the original Commonwealth Bank—namely the Commonwealth Trading Bank, the Commonwealth Savings Bank and the Commonwealth Development Bank, the latter being basically an amalgamation of the Mortgage Bank and Industrial Finance Department of the Commonwealth Bank.

At 30 June 1984 the capital of the Reserve Bank totalled \$A49 4m. and reserve funds (including a special reserve for IMF special drawing rights) \$A4,521m. The capital was distributed as follows: Central banking business, \$A40m.; rural credits department, \$A9m. Reserve funds held were: Central banking business, \$A2,025m.; rural credits department, \$A100m.; note issue department, \$A2,396m. Profits for the year ended 30 June 1984 (including all departments) amounted to \$A1,029m.

Particulars as at 30 June 1983 for the banks under the control of the Common-wealth Banking Corporation: Commonwealth Bank of Australia, capital, \$A15m,

reserve fund, \$A200m.; profits for the year, \$A46m. Commonwealth Development Bank, capital, \$A62m.; reserve fund, \$A179m.; profits for the year, \$A23m. Commonwealth Savings Bank, reserve fund, \$A404m., profits for the year, **\$A68m** 

At 30 June 1984 the 11 trading banks operating in Australia provided full bank-

ing facilities at 5,032 branches and 1,087 agencies all over Australia. The weekly average of deposits in Australia with all trading banks (under (b) and (c) above) during June 1984 amounted to \$A38,385m.; the average of advances owing to the banks was \$A31,743m.; the average of total assets was **\$A62,627m.** 

At 30 June 1984, 11 savings banks were operating in Australia. These are the 4 major savings banks being wholly owned subsidiaries of the trading banks; the Bank of New Zealand Saving Bank Ltd; the Bank of Queensland Saving Bank Ltd, the State Bank of Victoria and the Savings Bank of South Australia, the Rural and Industries Bank of Western Australia, and 2 Trustee Savings Banks in Tasmania. At 30 June 1984 these savings banks provided savings facilities at 5,592 branches and 10,533 agencies throughout Australia At end of June 1984 they held deposits in Australia amounting to \$A34,328m.

Labour. The majority of wage and salary earners in Australia have their minimum wages and conditions of work prescribed in awards of industrial arbitration authorities established under federal and State legislation. However, in some

States, some conditions of work (e.g., normal weekly hours of work, long-service leave, annual leave) are set down in State legislation. Practically all employees in Australia have a standard working week of 40 hours or less, paid annual leave of at least 4 weeks; and paid long-service leave (i.e., leave granted to workers who remain with one employer over an extended period of time and in certain other areas) of at least 13 weeks after 15 years' continuous service. For most occupations equal pay for males and females has been granted

In addition to the minimum rates of pay for a standard working week prescribed in awards of industrial arbitration authorities, many wage-earners are in receipt of over-award pay and payments for overtime. In Nov. 1983 it was estimated that the average weekly earnings of adult males (other than managerial, professional and higher supervisory staff) in full-time private and government employment was \$A374 and average weekly hours 40.

Employees in all States are covered by workers' compensation legislation and by certain industrial award provisions relating to work injuries.

During 1983 industrial disputes involving stoppages of work of 10 man-days or more accounted for 1,641,400 working days lost. In these disputes 470,500 workers were involved.

The following table shows estimates (in 1,000) of the civilian population, by labour force status. The estimates are derived by the ABS from the population survey which is based on a sample of dwellings, carried out by personal interview, covering about two-thirds of 1% of the population of Australia. Prior to Feb. 1978, when monthly surveys were introduced, the surveys were conducted quarterly. The labour force estimates for Feb. 1978 and subsequent months are based on population estimates derived from the 1976 Population Census, adjusted for underenumeration and were obtained using a new sample and revised questionnaire. Estimates for earlier periods have been revised to make them comparable with

Trade Unions. At the end of 1983 there were 319 trade unions reporting in Australia with an estimated membership of 2,985,200 About 55% of wage and salary earners were estimated to be members of unions. In 1983 there were 41 unions with fewer than 100 members and 9 unions with 80,000 or more members. Many of the larger trade unions are affiliated with central labour organizations, the oldest and by far the largest being the Australian Council of Trade Unions formed in 1927.

The Australian customs tariff provides for preferences to goods produced in and shipped from certain specified countries such as UK, Canada, New Zealand and Ireland. Preferences occur as a result of reciprocal trade agreements between Australia and these countries.

Australia also has bilateral agreements with a number of other countries guaranteeing reciprocal treatment in matters of trade

The Australia-New Zealand free-trade agreement came into force on 1 Jan 1966 in certain scheduled goods.

In addition, Australia is a signatory to the multilateral General Agreement on Tariffs and Trade (GATT).

Under various Commonwealth-State standardization agreements, all the State capitals are now linked by 1,435 mm gauge track. The Central Australia railway extends as far north as Alice Springs (now standard gauge on new alignment from Tarcoola to Alice Springs).

Aviation. All civil flying in Australia and its Territories is subject to legislative control by the Australian Government. In some cases intrastate air services are also subject to legislative control by the relevant State Government. The administration of the Air Navigation Act and Regulations and other Commonwealth aviation legislation is a function of the Commonwealth Department of Aviation under the Minister for Aviation.

All Australian-owned airlines, except Qantas Airways, operate regular internal air services. During 1982 hours flown numbered 259,388; the total distance flown was 134m. km; paying passengers carried numbered 11,005,796; weight of goods carried was 142,516 tonnes, and gross weight of mail was 17,005 tonnes.

During 1983 hours flown by Australian regular overseas services which are operated by or on behalf of Qantas numbered 81,684; km flown, 64m.; paying passengers, 2,073,438; freight, 81,340 tonnes; mail, 4,263 tonnes.

Expenditure by the Aviation Portfolio on air transport for the year 1983-84 was \$A448 8m. Aviation related expenditure by other Australian Government Departments for the same period was \$A71.6m.

At 30 June 1984 there were 441 licensed aerodromes and 71 governmental aerodromes in Australia.

Shipping. As at 30 June 1983 the Australian merchant marine (vessels of 150 tons gross and over) consisted of 74 coastal vessels of 1,146,505 tons gross and 30 overseas vessels of 924,037 tons gross

At 30 June 1983, there were 5,591,667 telephone services, 70,191 data services,

39,388 telex services and 5,353 telephone exchanges.

Radio broadcasting stations are in operation in all State capitals and in other areas throughout Australia. The National Broadcasting and Television Service is provided by the Australian Broadcasting Corporation, which at 30 June 1983 operated 95 medium-wave, 25 frequency modulation and 6 high-frequency radio stations, and 10 high-frequency radio stations for overseas services. In addition, 130 medium-wave, and 7 frequency modulation, commercial broadcasting stations plus 38 public radio stations (both MW and FM) were operating.

Television services are provided in each State, the Northern Territory and the Australian Capital Territory by the ABC and by commercial television stations. There were 272 national stations (including translators) and 50 commercial televi-

sion stations in 1983.

The Overseas Telecommunications Commission (OTC), established by the Overseas Telecommunications Act 1946, is responsible for the establishment, maintenance, operation and development of all public telecommunications' services between Australia and other countries, between Australia and its external territories and with ships at sea. In co-operation with Telecom and communications carriers in other countries, OTC provides ISD, other international telephone, telegram, facsimile, phototelegram, telex, leased circuit, audio broadcast and data transmission services to countries throughout the world by means of submarine cables, communications satellites and, in a decreasing number of cases, short wave radio. Television relay is provided to and from countries with access to satellite communications' facilities.

Cinemas (1971). There were 976 cinemas including 241 drive-in cinemas, with a total seating capacity of about 478,000.

Newspapers (1981). There was 1 national newspaper (average daily circulation 126,000) and 14 metropolitan daily newspapers in Australia with a combined daily

circulation of 3.6m. Of these, 3 papers published in Melbourne accounted for 1.3m. and 4 published in Sydney for 1.2m.

## JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The judicial power of the Commonwealth of Australia is vested in the High Court of Australia (the Federal Supreme Court), in the Federal courts created by the Federal Parliament (the Federal Court of Australia and the Family Court of Australia and in the State courts invested by Parliament with Federal jurisdiction.

High Court The High Court consists of a Chief Justice and 6 other Justices, appointed by the Governor-General in Council. The Constitution confers on the High Court original jurisdiction, inter alia, in all matters arising under treaties or affecting consuls or other foreign representatives, matters between the States of the Commonwealth, matters to which the Commonwealth is a party and matters between residents of different States. Federal Parliament may make laws conferring original jurisdiction on the High Court, inter alia, in matters arising under the Constitution or under any laws made by the Parliament. It has in fact conferred jurisdiction on the High Court in matters arising under the Constitution and in matters arising under certain laws made by Parliament.

The High Court may hear and determine appeals from its own Justices exercising original jurisdiction, from any other Federal Court, from a Court exercising Federal jurisdiction and from the Supreme Courts of the States. It also has jurisdiction to hear and determine appeals from the Supreme Courts of the Territories. No appeal from the High Court to the Privy Council is permitted on questions as to the limits inter se of the constitutional powers of the States or the Commonwealth and the States except on the certificate of the High Court. No appeal to the Privy Council, whether special or otherwise, is permitted from a decision of Federal Courts (not being the High Court) or of the Supreme Court of a Territory. Appeal from the High Court to the Privy Council by special leave of the Privy Council is possible only in a matter in which the decision of the High Court was a decision that (a) was given on appeal from a decision of a Supreme Court of a State given otherwise than in the exercise of Federal jurisdiction and (b) did not involve the interpretation of the Constitution, a law made by the Federal Parliament or an instrument (including an ordinance, rule, regulation or by-law) made under a law made by the Parliament

Other Federal Courts Since 1924, 4 other Federal courts have been created to exercise special Federal jurisdiction, ie the Federal Court of Australia, the Family Court of Australia, the Australian Industrial Court and the Federal Court of Bankruptcy. The Federal Court of Australia was created by the Federal Court of Australia Act 1976 and commenced to exercise jurisdiction on 1 Feb. 1977. It exercises such original jurisdiction as is invested in it by laws made by the Federal Parliament including jurisdiction formerly exercised by the Australian Industrial Court and the Federal Court of Bankruptcy, and in some matters previously invested in either the High Court or State and Territory Supreme Courts. The Federal Court also acts as a court of appeal from State and Territory courts in relation to Federal matters. Appeal from the Federal Court to the High Court will be by way of special leave only. The State Supreme Courts have also been invested with Federal jurisdiction in bankruptcy.

State Courts The general Federal jurisdiction of the State courts extends, subject to certain restrictions and exceptions, to all matters in which the High Court has jurisdiction or in which jurisdiction may be conferred upon it. In matters of non-Federal jurisdiction a right of appeal is still possible, depending upon the nature of the matter involved, from the State courts direct to the Privy Council.

Industrial Tribunals The major Federal industrial tribunal in Australia is the Australian Conciliation and Arbitration Commission, constituted by presidential members (with the status of judges) and commissioners. The Commission's functions include settling industrial disputes, making awards, determining the standard

hours of work, wage fixation, etc. Questions of law, the judicial interpretation of awards, imposition of penalties, etc., in relation to industrial matters, are now dealt with by the Federal Court.

Religion. Under the Constitution the Commonwealth cannot make any law to establish any religion, to impose any religious observance or to prohibit the free exercise of any religion, nor can it require a religious test as qualification for office or public trust under the Commonwealth The figures in the table refer to those religions with the largest number of adherents at the census of 1981. The census question on religion was not obligatory, however

Education. The Governments of the Australian States and the Northern Territory have the major responsibility for education, including the administration and substantial funding of primary, secondary and technical and further education. In most States, a single Education Department is responsible for these three levels of education, but in New South Wales and South Australia there is a separate department responsible solely for technical and further education and in Victoria, a Technical and Further Education Board. Furthermore, in New South Wales an Education Commission advises the Minister on primary, secondary and postsecondary education.

The Australian Government is directly responsible for education services in the Australian Capital Territory, administered through an education authority, and for services to Norfolk Island, Christmas Island and the Cocos (Keeling) Islands. The Australian Government provides supplementary finance to the States and is responsible for the total funding of universities and colleges of advanced education. It also has special responsibilities for student assistance, education programmes for Aboriginal people and children from non-English-speaking backgrounds, and for international relations in education.

The Australian Constitution empowers the Australian Government to make grants to the States and to place conditions upon such grants. This power has been used to provide financial assistance to the States specifically for educational purposes. There are two national Education Commissions which advise the Australian Government on the needs of educational institutions throughout Australia for the purpose of financial assistance. The Commonwealth Schools Commission, established in 1973, advises on the provision of financial assistance to the States for government and non-government schools. The Commonwealth Tertiary Education Commission, which was established in 1977 to replace three former commissions (the Universities Commission, the Commission on Advanced Education and the Technical and Further Education Commission), advises on the provision to the States of total funding for universities and colleges of advanced education and of supplementary financial assistance for their institutions of technical and further education.

In 1984 legislation was passed to reactivate the national Curriculum Development Centre (CDC) within the framework of the Commonwealth Schools Commission. The CDC's functions are to concentrate on co-ordination and dissemination and on sponsoring the development of materials through contract arrangements with other agencies.

School attendance is compulsory throughout Australia between the ages of 6 and 15 years (16 years in Tasmania), at either a government school or a recognized non-government educational institution. Many Australian children attend pre-schools for a year before entering school (usually in sessions of 2-3 hours, for 2-5 days per week). Government schools are usually co-educational and comprehensive. Non-government schools have been traditionally single-sex, particularly in secondary schools, but there is a developing trend towards co-education. Tuition is free at government schools, but fees are normally charged at non-government schools.

The following is a summary at July 1983 of primary and secondary school

Opportunities to pursue post-secondary education are available in universities, colleges of advanced education, technical and further education institutions and some more specialized post-school institutions. Tuition fees were abolished in 1974 and student allowances are provided for full-time students subject to a means test. Universities are autonomous institutions, as are the substantial majority of colleges of advanced education. While both offer degree courses, colleges also offer diploma and associate diploma courses and in general their courses have a more applied emphasis and are more vocationally oriented.

Advanced education courses are conducted mainly at colleges of advanced education

Technical and Further Education (TAFE) institutions offer a wide variety of courses of study which are classified into the following six streams professional, para-professional, trades, other skilled, preparatory and adult or further education. The majority of TAFE courses are part-time, concurrent with employment, but there is also provision for full-time and external study. A network of over 900 government-run institutions facilitates access to these courses. Enrolments in 1982 numbered 1,027,052 of which 297,761 were classified as Stream 6, Adult Education (i.e. courses in home handicrafts, hobbies, self-expression and cultural appreciation). There were 959,934 internal enrolments, 55,665 external and 11,453 multimodal (i.e. a mixture of internal and external conditions) enrolments 63,223 of the enrolled students undertook full-time courses (i.e. those involving 540 or more contact hours).

Teacher education usually takes place in colleges of advanced education, though a substantial number of secondary teachers and a few primary teachers receive their pre-service education in a university. Government school teachers are recruited by the State and Northern Territory departments of education, and in the Australian Capital Territory by the ACT Schools Authority and the Public Service

Board. Non-government schools recruit their own teachers.

The Australian Government provides a number of schemes of assistance for students to facilitate access to education. The Secondary Allowances Scheme aims to help parents with a limited income to keep their children at school for the final 2 years of secondary education. The Assistance for Isolated Children Scheme provides special support to families whose children are isolated from schooling or are handicapped. The Adult Secondary Education Assistance Scheme provides assistance for mature-age students undertaking a full-time one-year matriculation level programme or a two-year programme if studies beyond the tenth year in the Australian secondary school system have not previously been undertaken. The Tertiary Education Assistance Scheme is a means-tested scheme to assist students enrolled for full-time study in approved courses at post-secondary institutions. Allowances are also available for post-graduate study and overseas study. Aboriginal students are eligible for assistance under the Aboriginal Secondary Grants Scheme and the Aboriginal Study Grants Scheme. The States also offer various schemes of assistance, principally at the primary and secondary levels.

There are a number of bodies at the national level which have an important coordinating, planning or funding rôle. These include: the Australian Education Council, comprising the Federal and State Ministers of Education, the Conference of Directors-General of Education and an advisory body, the National

Total expenditure on education in Australia in 1981-82 was estimated at \$A8.684m.

Social Security and Welfare. All Commonwealth Government social security pensions, benefits and allowances are financed from the Commonwealth Government's general revenue. In addition, assistance is provided for a wide range of welfare services. Total expenditure during 1983-84 was \$A16,438.1m

The following summarizes the rates and conditions of the major benefits provided at June 1984.

Age and invalid pensions—age pensions are payable to men 65 years of age or more and women 60 years of age or more who have lived in Australia for a specified period and, unless permanently blind, also satisfy an income test. Persons over 16 years of age who are permanently blind or permanently incapacitated for work to the extent of at least 85% may receive an invalid pension. There is no residence qualification for an invalid pension if the permanent incapacity or blindness occurred within Australia or during temporary absence from Australia. An income test must be satisfied for an invalid pension unless permanently blind. The maximum rates are \$A89.40 a week in the case of the 'standard' rate pension, and in the case of the 'married' rate pension, \$A149 10 a week (\$A74.55 each). Additional amounts are paid to pensioners with dependent children. Supplementary assistance of up to \$A10 a week for 'standard' rate pension and \$A5 for each 'married' rate person may be paid to a pensioner paying rent or private lodging subject to an income test. Remote area allowance is payable to pensioners living in income tax zone A, except for those aged 70 or more receiving the special rate of age pension. Supplementary assistance, additional pension for children, mother's/guardian's allowance and remote area allowance are not taxable.

Wife's pension—payable to the wife of an age or invalid pensioner if she is not eligible for a pension in her own right. The maximum rate and the income test are identical to those for age and invalid pensioners.

Spouse carer's pension—payable to the husband of an age or invalid pensioner who is providing constant care and attention at home for his wife if he is not eligible for pension in his own right. The maximum rate and the income test are identical to those for age and invalid pensions.

Widow's pension—widows, divorcees, certain deserted wives, women who have been the dependant of a man for 3 years immediately prior to his death and women whose husbands have been convicted of an offence and have been imprisoned for not less than 6 months may, if they satisfy a residence requirement and an income test, receive a widow's pension. Such women may be paid a pension of up to \$A89.40 a week If they have any dependent children they also receive a mother's/guardian's allowance of \$A8 a week plus an additional allowance of \$A12 for each child. Persons who pay private rent may also receive supplementary assistance of up to \$A10 a week subject to an income test. Pensions are subject to income tax, but not mother's allowances, additional pension for children, supplementary assistance, or remote area allowance.

Supporting parents benefit—sole parents who have custody, care and control of any dependent children may, if they satisfy a residence requirement and an income test, receive supporting parents benefit. It is payable at the same rate as the widow's pension and is subject to the same income test. Mother's/guardian's allowance, additional pension for each dependent child, supplementary assistance and remote area allowance are also payable.

Sheltered employment allowance—is payable to disabled persons under age pen-

sion age engaged in approved sheltered employment who are qualified to receive invalid pension. The rates of payment and allowances and income test are the same as invalid pension.

Rehabilitation allowance—persons undertaking a rehabilitation programme with the Commonwealth Rehabilitation Service who are eligible for a social security pension or benefit are eligible to receive a non taxable rehabilitation allowance during treatment or training and for up to 6 months thereafter. The allowance is equivalent to the invalid pension and is subject to the same income test.

Family Allowance—is paid without income test to assist families with children under 16 years or dependent full-time students aged 16 years to under 25 years. It is not subject to income tax. Monthly rates payable are: first child, \$A22.80, second child, \$A32.55; third child, \$A39; fourth child, \$A39 and \$A45.55 for each subsequent child. For each child or eligible student in an approved institution, the rate is \$A39 per month.

Family income supplement—payable subject to an income test to families with one or more children eligible for family allowances so long as they are not in receipt of any Commonwealth pension, benefit or allowance which provides additional payment for dependent children. The maximum rate per child is \$A12 a week and this is not taxable.

Handicapped child's allowance—payable to parents or guardians of severely physically or mentally handicapped children in the family home and needing constant care and attention. The allowance is \$A85 per month and is free of an income test but is subject to a residence qualification similar to that for family allowance It may also be paid, subject to an income test, in cases where the child is handicapped but not severely, and requires marginally less care and attention.

Double orphan's pension—the guardian of a child under 16 years of age or of a fultime student under 25, both of whose parents are dead, or one of whose parents is dead and the whereabouts of the other parent unknown, and for refugee children where both parents are outside Australia, may receive double orphan's pension of \$A55.70 a month per child. The payment is not subject to an income test nor is it taxable.

Unemployment and sickness benefits—are paid, subject to an income test, to persons between the ages of 16 and age pension age who are unemployed, able and willing to work and making efforts to obtain work, or temporarily unable to work because of sickness or injury. The maximum weekly rates of benefit are for unemployment benefits \$A45 (single, under 18 years), \$A78.60 (single 18 and over without dependents), \$A89.40 (single, 18 and over with dependents), \$A149.10 (married); and for sickness benefits \$A45 (single, under 18), \$A89.40 (single, 18 and over), \$A149.10 (married). To be granted benefit a person must have resided in Australia for at least 12 months preceding his claim or intend to remain in Australia permanently. For unemployment benefit purposes unemployment must not be due to industrial action by that person or by members of a union to which that person is a member.

Service Pension is a Social-Welfare type payment paid by the Department of Veterans' Affairs, similar to the age and invalid pensions provided by the Department of Social Security. Male Veterans who have reached the age of 60 years or are permanently unemployable, and who served in a theatre of war, are eligible for service pension subject to an income test. Female Veterans who served abroad or embarked for service abroad, and who have reached the age of 55 or are permanently unemployable, are also eligible. Wives of service pensioners are also eligible provided that they do not receive a pension from the Department of Social Security.

Disability pension is a compensatory payment in respect of incapacity attributable to war service. It is paid at a rate commensurate with the degree of incapacity suffered from service-related disabilities and is free of any income test. A separate allowance may be paid to dependents.

In addition to cash benefits, assistance is provided either directly or through State and Local government authorities and voluntary agencies, for a wide range of welfare services for people with special needs. Among the major areas involved were the provision of accommodation and home care for aged or disabled persons, the Commonwealth Rehabilitation Service and other welfare programmes for handicapped persons, assistance to homeless persons and the provision of children's services such as pre-schools, childcare and vacation care and assistance for Aboriginals and migrants

Medicare On 1 Feb. 1984 the Commonwealth Government introduced the new universal health scheme known as Medicare. The financing arrangements under the Medicare programme feature the following major elements: Automatic entitlement under a single public health fund to medical and optometrical benefits of 85% of the Medical Benefits Schedule fee, with a maximum patient payment for any service of \$A10 where the Schedule fee is charged; access without direct charge to public hospital accommodation and to inpatient and outpatient treatment by doctors appointed by the hospital, the restoration of funds for community health to approximately the same real level as 1975; the reduction in charges for private treatment in shared wards of public hospitals to \$A80 per day, and increases in the daily bed subsidy payable to private hospital to an average of \$A30.

The Medicare programme is financed in part by a 1% levy on taxable incomes, with low income cut-off points. The tax rebate formerly paid for basic health insurance contributions ceased from 30 June 1983 In addition, the Commonwealth's annual contribution to the Health Benefits Reinsurance Trust Fund was reduced from \$A100m to \$A20m from 1 July 1983 Under the provisions of the National Health Act, the Commonwealth Government subsidises registered health insurance organizations by contributing to the Reinsurance Trust Fund for payments of

benefits to patients with hospital treatment in excess of 35 days

Eligibility for Medicare Benefits Medicare benefits are available to all persons ordinarily resident in Australia with the exception of members of foreign diplomatic missions and their dependants.

Eligible persons include. All permanent Australian residents (including Repatriation beneficiaries and Defence Force Personnel), persons visiting Australia who obtain approval to stay for more than 6months – with eligibility to date from arrival in Australia; persons visiting Australia who originally obtain approval to stay less than 6 months, but are granted an extension which makes the total approved stay more than 6 months – with eligibility to date from when the extension was granted; foreign students who are undertaking courses in Australia for 6 months or less, persons visiting Australia who are residents of countries with whom Australia has a reciprocal health care agreement, Australian residents receiving medical services while travelling overseas.

Short-term visitors to Australia (i.e. for 6 months or less) are responsible for the full cost of their medical and hospital treatment. Such persons should therefore make some form of private insurance arrangements to cover such costs.

Medical Benefits The Health Insurance Act provides for a Medical Benefits Schedule which lists medical services and the Schedule (standard) fee applicable in each State in respect of each medical service. The Schedule covers services attracting Medicare Benefits rendered by legally qualified medical practitioners, certain prescribed medical services rendered by approved dentists in the operating theatres of approved hospitals, and optometrical consultations by participating optometrists. Schedule fees are set and updated by an independent fees tribunal which is appointed by the Government The fees so determined are to apply for Medicare benefits purposes. Medical services in Australia are generally delivered either by private medical practitioners on a fee-for-service basis, or by medical practitioners employed in hospitals.

Where a medical service is provided by a private medical practitioner on a feefor-service basis, Medicare refunds 85% of the Medical Benefits Schedule fee cost or, the Schedule fee less \$A10, whichever is the greater. It is not possible to insure with private, health insurance organizations to cover the 15% 'gap'. However, should an individual accumulate 'gap' payments in excess of \$A150 in a year, Medicare will pay benefits at 100% of the Schedule fee for each service for the remainder of the year.

Under Medicare, medical practitioners are able to direct bill for any patient. In such cases, they receive the Medicare benefit as full payment. Previously, direct billing was limited to services rendered to eligible Pensioner Health Benefit and Health Care Cardholders, and their dependants.

Medicare medical benefits are administered by the Health Insurance Commission.

Hospital Care. From 1 Feb. 1984, through Medicare grants to the States, the cost of public hospital out-patient treatment, and inpatient accommodation in a shared ward with treatment by a doctor employed by a hospital, are covered. The scheme does not cover hospital charges raised for treatment as a private patient in a public hospital, where patients elect to be treated by their own doctor, nor does it cover private hospital charges. It is possible however for persons to take out insurance with private health funds to cover these situations.

Long Term Nursing Home Type Patients in Hospital. Patients who are accommodated in either private or public hospitals for extended periods and who are, in essence, nursing home type patients are required to make a non-insurable patient contribution in the same way that a patient in a nursing home does. For a long-term private patient in a public hospital, hospital charges and private health fund benefits are reduced to the level of the standard nursing home benefit. In a private hospital the fund benefits are reduced by the amount of the patient contribution.

Pharmaceutical Benefits A comprehensive range of drugs and medicinal preparations is available. In general, a fee of \$A4 is charged for each prescription.

Statistical Information The Australian Bureau of Statistics (Cameron Offices, Belconnen, A.C. T., 2616) was established in 1906. All the activities of the Bureau are covered by the Census and Statistics Act, which confers authority to collect information and contains secrecy provisions to ensure that individual particulars obtained are not divulged. Under the provisions of the Statistics (Arrangements with States) Act which became law on 12 May 1956, the statistical services of all the States have been integrated with the Australian Bureau. An outline of the development of statistics in Australia is published in the Official Year Book, No. 51, 1965. Australian Statistician Dr R. J. Cameron.

# AUSTRALIAN TERRITORIES

# AUSTRALIAN CAPITAL TERRITORY

HISTORY. The area, now the Australian Capital Territory, was first visited by white men in 1820 and settlement commenced in 1824. Until its selection as the seat of government it was a quiet pastoral and agricultural community.

AREA AND POPULATION. The area of the Australian Capital Territory is 2,432 sq. km (including Jervis Bay area). The population (estimate) at 30 June 1984 was 244,500 Previous census population:

	Males	<i>Females</i>	Total		Males	Females	Total
1911	992	722	1,714	1961	30,858	27,970	58,828

1933	4,805	4,142	8,947	1971	73,589	70,474	144,063
1947	9,092	7,813	16,905	1976	100,103	95,519	197,622
1954	16.229	14.086	30.315	1981	110,415	111,194	221,609

(Figures before 1961 exclude particulars of full-blood Aborigines )

CONSTITUTION AND GOVERNMENT. The Constitution of Australia provided (Sec. 125) that the seat of government should be selected by parliament and that it should be within New South Wales, distance not less than 160 km from Sydney. The present area was surrendered by New South Wales and accepted by the Australian Government from 1 Jan. 1911. In 1915 an additional 73 sq. km at Jervis Bay was transferred from New South Wales to the Commonwealth In 1911 an international competition was held for the city plan. The plan chosen was that of W. Burley Griffin, of Chicago. Construction was delayed by the First World War, and it was not until 1927 that, with the transfer of parliament and certain departments, Canberra became in fact the seat of government Most Australian Government departments now have their headquarters in Canberra.

The general administration of the Territory lies with the Department of Territories and Local Government, but certain specific services are undertaken by other Federal Government Departments and Authorities. Since June 1979 the Minister has been advised on matters of local concern by the ACT House of Assembly consisting of 18 elected members. Prior to that date this function was performed by the ACT Legislative Assembly (from 1974), replacing the ACT Advisory Council which had been in existence since 1930 and consisted of both nominated and elected members

The Australian Capital Territory Representation (House of Representatives) Act, 1973, provided for the representation of residents of the Territory by 2 elected members in the House of Representatives. The Senate (Representation of Territories) Act 1973 provided for the election of 2 Senators from the Territory Elections took place on 1 Dec 1984.

FINANCE. The receipts and outlay of the Australian Capital Territory cover the transactions of the Australian Government in the Consolidated Revenue and other funds. They also include details of the ACT public corporations

Receipts and outlay (\$A1,000) for years ended 30 June

1983	152,500	84,100	392,800	476,900

The chief sources of receipts in 1982-83 were taxes, fees and fines, \$A90 3m, and interest and rent, \$A38.2m. Capital outlay comprised gross capital formation, \$A80.9m., and net transfers and advances to other sectors, \$A3 2m.

PRODUCTION. Outside Canberra the Territory is predominantly pastoral Livestock, 31 March 1984: 9,944 cattle, 108,696 sheep and lambs. A considerable amount of reafforestation (mostly pine) has been undertaken, the total area of commercial plantations at 30 June 1981 being 15,600 hectares. There is no secondary industry of any importance.

EDUCATION. In 1974 education in government schools became the direct responsibility of the Commonwealth Government. A Schools Authority was established to administer the Australian Capital Territory government school system. In July 1984 there were 95 government schools comprising 64 primary schools, 25 secondary schools and colleges and 6 special schools. Non-government schools numbered 35 in total of which there were 22 primary schools, 5 secondary schools and 8 schools with both primary and secondary enrolments. Students enrolled full-time in government schools in 1984 numbered 22,428 and 17,094 in primary and

secondary school levels respectively. Enrolments at non-government schools comprised 10,311 primary school students and 8,758 secondary school students. Preschool education is provided at 73 centres with a total enrolment of 4,670 (1984) The Canberra, Woden and Bruce Colleges of Technical and Further Education with a total enrolment of about 25,300 in 1983 provide trade, post-trade certificate, associate diploma, craft and leisure courses.

The Canberra School of Music, opened in 1965, had 736 students in 1983. The Canberra School of Arts had 1,161 students in 1983. The Canberra College of Advanced Education commenced operation in 1970. Enrolments (1984) 5,129

The Australian National University is situated in Canberra. Enrolments (1984) 6,194

# NORTHERN TERRITORY

HISTORY. The Northern Territory, after forming part of New South Wales, was annexed on 6 July 1863 to South Australia and in 1901 entered the Commonwealth as a corporate part of South Australia. The Commonwealth Constitution Act of 1900 made provision for the surrender to the Commonwealth of any territory by any state, and under this provision an agreement was entered into on 7 Dec 1907 for the transfer of the Northern Territory to the Commonwealth, and it formally passed under the control of the Commonwealth Government on 1 Jan. 1911 For details of Constitutional development until 1978 see The Statesman's Year-Book 1980–81 pp. 123–24. The Commonwealth Government retained responsibility until Self-Government was granted on 1 July 1978.

AREA AND POPULATION. The Northern Territory is bounded by the 26th parallel of S. lat. and 129° and 138° E. long. Its total area is 1,346, 200 sq. km. The coastline is about 6,200 km in length, the principal port being Darwin. The greater part of the interior consists of a tableland rising gradually from the coast to a height of about 700 metres. On this tableland there are large areas of excellent pasturage. The southern part of the Territory is generally sandy and has a small rainfall, but water may be obtained by means of sub-artesian bores.

The total population of the Territory (1984) is about 139,000. The capital and seat of Government, Darwin, is situated on the north coast. Darwin had a population of 63,900 in June 1984. Other main centres include Katherine (4,300), 330 km south of Darwin, Alice Springs (22,000), in Central Australia; Tennant Creek (3,200), a rich mining centre 500 km north of Alice Springs; Nhulunbuy (3,900), a bauxite mining centre on the Gove Peninsula in eastern Arnhem Land; and Jabiru, a model town being built to serve the rich Uranium Province in eastern Arnhem Land with a planned population of 6,000. There also are a number of large self-contained Aboriginal communities. Aboriginals were 29,087 of the 1981 Census population (123,324). On 31 July 1984, 26,692,400 hectares were designated Aboriginal Land under the Aboriginal Land Rights (N.T.) Act 1976.

Vital statistics for 1983 Births, 3,127, deaths, 727; marriages, 776, divorces, 371.

CONSTITUTION AND GOVERNMENT. The Northern Territory (Self-Government) Act 1978 established the Northern Territory as a body politic as from 1 July 1978, with Ministers having control over and responsibility for Territory finances and the administration of the functions of government as specified by the Federal Government by regulations made pursuant to the Act. Regulations have been made conferring executive authority for the bulk of administrative functions. Proposed laws passed by the Legislative Assembly in relation to a transferred function require the assent of the Administrator. Proposed laws in all other cases

may be assented to by the Administrator or reserved by the Administrator for the Governor-General's pleasure. The Governor-General may disallow any law assented to by the Administrator within 6 months of the Administrator's assent

The Northern Territory has federal representation, electing 1 member to the House of Representatives and 2 members to the Senate.

FINANCE. Budgets since the introduction of self-government in 1978 in \$A1m

The revenue available in 1984-85 comprised \$A945 7m in payments to the Northern Territory from the Commonwealth, as established by agreement at the time of self-government, together with \$A150m raised by the Northern Territory which included \$A52 9m through state-like taxes.

Expenditure during 1984-85 included \$A189m for education, \$A86m for lands and housing, \$A116 2m for health, \$A71 9m. for law, order and public safety, \$A38 8m for local government and \$A371 9m. for economic services.

#### ENERGY AND NATURAL RESOURCES

Oil and Gas. Significant oil and gas reserves have been discovered in the Amadeus Basin In 1981 the Territory's first petroleum leases were granted at Mereenie There are estimated recoverable reserves of 28m bbls of oil Estimated gas reserves at Mereenie are 23,000m. cu. metres A pipeline has been constructed from Palm Valley to carry natural gas 150 km to Alice Springs where it is providing fuel for the local power station. Proven reserves are 1,400m. cu. metres of gas.

Minerals. The Northern Territory's most important natural resources are minerals. In the financial year 1983-84 the mining industry, by far the largest commercial industry in the Northern Territory, produced a value added of \$A454m Gross value of output, \$A716m in 1983

At present there are five major mining organizations extracting bauxite, manganese, uranium, gold and copper; in addition, one firm is producing uranium oxide from stockpiled ore. There are also several smaller mining operations recovering tin, tantalum, gold, lead and silver. Significant amounts of rock, sand and gravel are also being produced for construction materials

Gove Peninsula bauxite reserves are estimated at 250m tonnes with an average alumina content of 50%. Over 4m tonnes of bauxite were mined in 1982. Alumina is exported to Europe, the USA, Africa and Asia. More than half the bauxite goes to Japan.

One of the world's largest high-grade manganese mines is located on Groote Eylandt, which is Australia's largest known manganese deposit In 1982 there were 1m. tonnes of manganese ore processed, much of which was shipped to Japan

Copper, gold and bismuth are mined in the Tennant Creek area Warrego Mine has a proven copper/gold ore resource of 4.8m. tonnes and Gecko Mine has a proven ore resource of 3 3m. tonnes. Nobles Nob has been producing gold since 1938 and currently mills 8,000 tonnes of ore per month. Gold bullion and concentrates with a total value of more than \$A32m. were produced in the Territory in 1982.

The Alligator Rivers region is possibly the most prospective area in the world for high-grade uranium deposits. Four world-class deposits have been located to date. Of these, Ranger and Nabarlek are producing uranium oxide. The combined output from these two mines in 1981 was 2,622 tonnes, with a value of about \$A175m.

Agriculture. Cattle production, valued at \$A65m. in 1983-84, constitutes the largest primary industry in the Northern Territory Buffalo are also produced (\$A5m.), many exported live to Indonesia.

There are 283 pastoral stations in the Northern Territory which produce cattle

for Australian and overseas markets. They vary from small stations of 383 sq km to huge properties like Wave Hill Station which runs cattle over 12,380 sq. km

In 1982, five export abattoirs in the Territory supplied 13,728 tonnes of beef, veal and fancy meats to more than 20 countries. The USA is the largest importer of Territory beef, followed by Japan, Taiwan, Saudi Arabia and Hong Kong Total value of export beef was more than \$A28m in 1983-84.

Processed buffalo meat for human consumption overseas is supplied by two export abattors in the Territory's Top End. In 1982 their combined exports of

buffalo meat products was more than 2,800 tonnes.

General agriculture is conducted on a small scale. Fruit, vegetables, eggs, dairy produce, poultry and cereals are produced Properties in the Katherine and Douglas-Daly districts produce the Territory's four main crops – sorghum, maize, mung beans and peanuts. Value of grain production, 1983–84, \$A1 2m, of horticultural produce, \$A3m

Forestry. A forest development programme which commenced in 1970 has continued the multiple use management of Northern Territory forested areas, this included a softwood programme of 400 hectares per year, the introduction of additional suitable tree species in both and and higher rainfall areas, conservation and management of native forests for production and recreational purposes, survey and assessment of resources, fire control activities and the creation of training opportunities for Aboriginals in forestry and allied saw-milling activities.

Local production of sawn timber, mainly Cypress pine, amounted to 870 cu. metres of pine in 1975-76. This was supplemented by 35,500 cu. metres of timber

imported from interstate and overseas

Local production of treated poles and rails amounted to 115 cu metres. Only 280 hectares of plantation were established during the year because of complications arising from cyclone 'Tracy'

During 1975-76 the Forestry Section of the Department of the Northern Territory redeveloped parks and open-space areas on behalf of the Darwin Reconstruction Commission

Fisheries. The fishing industry is second only to beef cattle in Northern Territory primary industries. The total value (ex-vessel) of commercial fish products landed in the Northern Territory in 1983–84 was \$A20.65m. Of this, prawns contributed \$A17 58m. and barramundi \$A1 62m Threadfin salmon, spanish mackerel, mud ciabs, reef fish, squid and bay lobsters made up most of the remainder.

Prawns and barramundi provide an employment base for a large number of Ternitorians – not just in fishing, but in processing, distribution and ancillary services Almost all products undergo some processing by land-based establishments before reaching the consumer Some 95% of prawns landed in the Northern Territory are exported to Japan. The value of prawn exports in 1981–82 exceeded \$A14.5m., mainly headless uncooked prawns The bulk of barramundi and threadfin salmon is consigned in frozen packs to southern Australian markets.

INDUSTRY AND TRADE. In 1983-84 value added in the manufacturing industry, from 113 factories (with 4 or more persons employed) was \$A108m. 2,402 persons were employed in these factories. In 1984, 75 trade unions had 20,300 members

Tourism. Tourism is the second most important industry (after mining), contributing about \$A172m. to the economy in 1983–84.

National Parks and Reserves. About 43,000 sq. km have been set aside as wildlife sanctuaries under the Wildlife Conservation and Control Ordinance. They are controlled by the Chief Inspector of Wildlife who is an officer of the Department of the Northern Territory. 236,000 sq. km of Aboriginal reserves are also wild-life protected areas.

The Conservation Commission of the Northern Territory administers some 53 national parks and reserves covering an area of over 5,800 sq. km. The Commission is responsible under the National Parks and Gardens Ordinance for the care, control and management of these reserves, and its functions include the preserva-

tion and protection of natural and historical features and the encouragement of public use and enjoyment of land set aside in such reserves.

#### COMMUNICATIONS

Roads. There are now (1985) 5,289 km of sealed road and 5,350 km of gravel and crushed stone road within the Northern Territory They include three major interstate links: the Stuart Highway from Darwin to the South Australian border, the Barkly Highway, Tennant Creek to Mt. Isa, 444 km of which is in the Northern Territory, and the Victoria Highway, Katherine to the Western Australian border, a distance of 468 km. In addition to this there are 4,814 km of formed roads and 4,627 km of unformed roads or tracks, totalling approximately 20,080 km of roads within the Northern Territory. In 1984–85 registrations of new motor vehicles included 4,504 cars, 2,248 utilities etc., 294 trucks, 82 buses and 1,092 motor cycles.

Railways. Alice Springs is linked to the Trans-continental network by a new standard (1,435 mm) gauge railway to Tarcoola (831 km), opened in 1980 This replaced the largely narrow gauge line to Port Augusta The standard gauge railway is to be extended to Darwin, providing Australia with its first north-south rail link.

Aviation. Darwin is the first port of arrival in Australia for some aircraft from Europe and Asia. In 1983, 335,112 passengers were carried and 2,908 tonnes of freight. There are regular inland services connecting Darwin with all the State capitals and many inland towns.

Shipping. Regular freight shipping services connect Darwin with Western Australia, the eastern States and overseas Passenger vessels also call at Darwin at irregular intervals.

The ports of Melville Bay (Gove) and Milner Bay (Groote Eylandt) are connected with Darwin, the eastern States and overseas by regular shipping freight services

The inland and coastal communities around the coast are provided with regular freight barge services from Darwin. Some of these communities also receive a barge freight-transhipment service out of a Brisbane vessel which calls at Melville and Milner Bays, where the transhipment is effected.

Radio and Television. In 1984 there were 8,658 radio-communication stations, 8 radio broadcasting stations and 5 television stations.

### **EDUCATION AND WELFARE**

Education. In June 1984 there were 139 government schools Teachers totalled 1,788 and pupils 28,091. There were 18 private schools with 269 teachers and 5,078 pupils.

Health. In 1984 there were 5 hospitals with 650 beds. Community health services are provided from 9 urban Health Centres and 62 rural Health Centres including mobile units.

# AUSTRALIAN EXTERNAL TERRITORIES

AUSTRALIAN ANTARCTIC TERRITORY. An Imperial Order in Council of 7 Feb. 1933 placed under Australian authority all the islands and territories other than Adélie Land situated south of 60° S lat and lying between 160° E long and 45° E. long The Order came into force with a Proclamation issued by the Governor-General on 24 Aug 1936 after the passage of the Australian Antarctic Territory Acceptance Act 1933 The boundaries of Adélie Land were definitively fixed by a French Decree of 1 April 1938 as the islands and territories south of 60° S lat lying between 136° E. long and 142° E long The Australian Antarctic Territory Act 1954 declared that the laws in force in the Australian Capital Territory are, so far as they are applicable and are not inconsistent with any ordinance made under the Act, in force in the Australian Antarctic Territory

In 1968 responsibility for the administration of this Act was transferred from the Minister for External Affairs to the Minister for Supply, in 1972 responsibility was

transferred to the Minister for Science

On 13 Feb 1954 the Australian National Antarctic Research Expeditions (ANARE) established a station on Mac Robertson Land at lat 67° 37′ S. and long 62° 52′ E. The station was named Mawson in honour of the late Sir Douglas Mawson Meteorological and other scientific research is conducted at Mawson, which is the centre for coastal and inland survey expeditions

A second Australian scientific research station was established on the coast of Princess Elizabeth Land on 13 Jan. 1957 at lat 68° 34′ S and long 77° 58′ E. The station was named Davis in honour of Capt John King Davis, Mawson's second-in-command on 2 expeditions. The station was temporarily closed down in

Jan 1965 and re-opened in Feb. 1969

In Feb. 1959 the Australian Government accepted from the US Government custody of Wilkes Station, which was established by the US on 16 Jan. 1957 on the Budd Coast of Wilkes Land, at lat 66° 15′ S. and long 110° 32′ E. The station was named in honour of Lieut. Charles Wilkes, who commanded the 1838–40 US expedition to the area, and was closed in Feb. 1969. Operations were then transferred to the new station, Casey. Construction commenced on Casey station in Jan. 1965 and was continued, mainly during summer visits, until Feb. 1969, when it was opened. The station, specially designed to withstand blizzard winds and prevent inundation by snow, is situated 2.4 km south of Wilkes at lat 66° 17′ S. and long 110° 32′ E. The Antarctic Division has also operated a station, since March 1948, at Macquarie Island, about 1,370 km south-east of Hobart. Macquarie Island is a dependency of the State of Tasmania.

On 1 Dec 1959 Australia signed the Antarctic Treaty with Argentina, Belgium, Chile, France, Japan, New Zealand, Norway, South Africa, the USSR, the UK and the USA. Poland, Czechoslovakia, German Democratic Republic, Netherlands, Romania, Brazil, Denmark, Bulgaria, Federal Republic of Germany, Italy, India, People's Republic of China, Spain, Papua New Guinea, Peru, Hungary and Uruguay have subsequently acceded to the Treaty. Poland became a full member of the Antarctic Treaty in 1977 and the Federal Republic of Germany in 1981 and India and Brazil in 1983. The Treaty reserves the Antarctic area south of 60° S lat for peaceful purposes, provides for international co-operation in scientific investigation and research, and preserves, for the duration of the Treaty, the status quo with regard to territorial sovereignty, rights and claims. The Treaty entered into force on 23 June 1961. Since then the Antarctic Treaty powers have held 12 consultative meetings. The 13th is scheduled to be held in Brussels, Belgium, in 1985.

COCOS (KEELING) ISLANDS. The Cocos (Keeling) Islands are 2 separate atolls comprising some 27 small coral islands with a total area of about 14.2 sq. km, and are situated in the Indian Ocean at 12° 05′ S. lat. and 96° 53′ E long They lie 2,768 km north-west of Perth and 3,685 km west of Darwin, while Colombo is 2,255 km to the north-west of the group.

The main islands in this Australian Territory are West Island (the largest, about 10 km from north to south) on which is an airport and an animal quarantine sta-

tion, and most of the European community; Home Island, occupied by the Cocos Malay community; Direction, South and Horsburgh Islands, and North Keeling

Island, 24 km to the north of the group.

Although the islands were discovered in 1609 by Capt. William Keeling of the East India Company, they remained uninhabited until 1826, when the first settlement was established on the main atoll by an Englishman, Alexander Hare, with a group of followers, predominantly of Malay origin Hare left the islands in 1831, by which time a second settlement had been formed on the main atoll by John Clunies-Ross, a Scottish seaman and adventurer, who began commercial development of the islands' coconut palms.

In 1857 the islands were annexed to the Crown, in 1878 responsibility was transferred from the Colonial Office to the Government of Ceylon, and in 1886 to the Government of the Straits Settlement. By indenture in 1886 Queen Victoria granted all land in the islands to George Clunies-Ross and his heirs in perpetuity (with certain rights reserved to the Crown). In 1903 the islands were incorporated in the Settlement of Singapore and in 1942–46 temporarily placed under the Governor of Ceylon. In 1946 a Resident Administrator, responsible to the Governor of Singapore, was appointed.

On 23 Nov. 1955 the Cocos Islands were placed under the authority of the Australian Government as the Territory of Cocos (Keeling) Islands. An Administrator, appointed by the Governor-General, is the Government's representative in the Territory and is responsible to the Minister for Territories and Local Government The Cocos (Keeling) Islands Council, established as the elected body of the Cocos Malay community in July 1979, advises the Administrator on all issues affecting

the Territory.

In 1978 the Australian Government purchased the Clunies-Ross family's entire interests in the islands, except for the family residence. A Cocos Malay cooperative has been established to take over the running of the Clunies-Ross copra plantation (160 tonnes of copra were exported in 1983–84) and to engage in other business with the Commonwealth in the Territory, including construction projects

The population of the Territory at 30 June 1984 was 584, distributed between

Home Island (376) and West Island (208)

The islands are low-lying, flat and thickly covered by coconut palms, and surround a lagoon in which ships drawing up to 7 metres may be anchored, but which is extremely difficult for navigation.

An equable and pleasant climate, affected for much of the year by the south-east trade winds. Temperatures range over the year from 68° F (20° C) to 88° F (31 1° C)

and rainfall averages 80" (2,000 mm) a year

The Cocos (Keeling) Islands Act 1955 is the basis of the Territory's administrative, legislative and judicial systems. Under section 8 of this Act, those laws which were in force in the Territory immediately before the transfer continued in force there.

The Singapore Ordinances Application Ordinance 1979 repealed all those contained Ordinances and re-applied the provisions of 95 Ordinances of Singapore These Ordinances can be amended, repealed or substituted by Ordinances made by the Governor-General.

Administrator E. H. Hanfield.

CHRISTMAS ISLAND is in the Indian Ocean, lat. 10° 25′ 22″ S., long. 105° 39′ 59″ E. It lies 360 km S., 8° E. of Java Head, and 417 km N. 79° E from Cocos Islands, 1,310 km from Singapore and 2,623 km from Fremantle. Area about 135 sq. km. The climate is pleasant and healthy with temperatures varying little over the year at 74–79° F (23–26° C). The wet season lasts from Nov. to April with an annual total of about 81″ (2,040 mm). The island was formally annexed by the UK on 6 June 1888, placed under the administration of the Governor of the Straits Settlements in 1889, and incorporated with the Settlement of Singapore in 1900 Sovereignty was transferred to the Australian Government on 1 Oct 1958 The population (estimate, 1983), 3,000 (Europeans, 350; Chinese, 1,820; Malays, 750 and 90 others).

The legislative, judicial and administrative systems are regulated by the Christ-mas Island Act, 1958–73, which is administered by the Minister for Territories and Local Government with an Administrator, responsible for the local administration. The laws of Singapore which were in force before the transfer have been continued but can be amended, repealed or substituted by ordinances made by the Governor-General.

Extraction and export of rock phosphate dust is the island's only industry In Dec. 1948 Australia and New Zealand bought the lease rights of the Christmas Island Phosphate Co. and set up the Christmas Island Phosphate Commission (CIPC), which conducted the mining operation until mid-1981 The Phosphate Mining Co. of Christmas Island Ltd (PMCI) acted as managing agents for the CIPC until the Commission was wound up and now mines in its own right. The export of phosphate rock during 1983–84 was 1,112,800 tonnes, which is shipped to Australia and New Zealand and other Asian nations.

There is direct radio communication with Australia and Singapore. Regular air

charter flights commenced in 1974 to South-east Asia.

At 31 May 1983 there were 621 primary and secondary pupils at the Christmas Island Area School. There is a technical school which provides commercial, apprenticeship and adult education courses, with (1979) some 701 students.

Medical, dental and hospital services are provided free of charge by the Phos-

phate Mining Co. of Christmas Island Ltd.

Administrator T F. Paterson.

NORFOLK ISLAND. 29° 04′ S. lat. 167° 57′ E. long., area 3,455 hectares, population, approximately 1,800. The island was formerly part of the colony of New South Wales and then of Van Diemen's Land. It has been a distinct settlement since 1856, under the jurisdiction of the state of New South Wales; and finally by the passage of the Norfolk Island Act 1913, it was accepted as a Territory of the Australian Government. The Norfolk Island Act 1957 is the basis of the Territory's legislative, administrative and judicial systems. An Administrator, appointed by the Governor-General and responsible to the Minister for Territories and Local Government, is the senior government representative in the Territory.

The Norfolk Island Act 1979 equips Norfolk Island with responsible legislative and executive government to enable it to run its own affairs to the greatest practicable extent. Wide powers are exercised by the Norfolk Island Legislative Assembly and by an Executive Council, comprising the executive members of the Legislative Assembly who have ministerial-type responsibilities. The Act preserves the Commonwealth's responsibility for Norfolk Island as a Territory under its authority, with the Minister for Territories and Local Government being the responsible Minister, and indicates the Parliament's intention that consideration will be given to an extension of the powers of the Legislative Assembly and the political and administrative institutions of Norfolk Island within 5 years.

The Executive Council has executive authority over a prescribed range of

The island's Supreme Court sits as required and a Court of Petty Sessions exercises both civil and criminal jurisdiction.

The Territory Administration is financed from local revenue which for 1983-84 totalled \$A3,846,000, expenditure, \$A3,617,000.

Public revenue is derived mainly from tourism, the sale of postage stamps, customs duties, liquor sales and company registration and licence fees. Residents are not liable for income tax on earnings within the Territory, nor are death and personal stamp duties levied. In 1983–84 imports totalled \$A15.1m. and exports \$A2.1m.

An estimated 16,220 visitors travelled to Norfolk during 1982-83. Descendants of the *Bounty* mutineer families constitute the 'original' settlers and are known locally as 'Islanders', while later settlers, mostly from Australia, New Zealand and UK, are identified as 'mainlanders' Over the years the Islanders have preserved their own lifestyle and customs, and their language remains a mixture of West Country English and Tahitian.

The Administration subsidises a public hospital and dispensary, and health services, together with free dental services for children, are provided by qualified government officers.

Norfolk Island's public school is staffed by the New South Wales Department of Education and follows the State's education system. A bursary scheme is available

to provide students with secondary education on the mainland.

A radio telephone service between the island and Sydney is maintained by the Overseas Telecommunications Commission, and there is a local automatic telephone service. Number of telephones (1982) 987.

Administrator Air Vice-Marshal R. E. Trebilico, DFC

HEARD AND McDONALD ISLANDS. These islands, about 2,500 miles south-west of Fremantle, were transferred from UK to Australian control as from 26 Dec. 1947. Heard Island is about 43 km long and 21 km wide, Shag Island is about 8 km north of Heard. The total area is 412 sq. km (159 sq. miles) The McDonald Islands are 42 km to the west of Heard.

TERRITORY OF ASHMORE AND CARTIER ISLANDS. By Imperial Order in Council of 23 July 1931, Ashmore Islands (known as Middle, East and West Islands) and Cartier Island, situated in the Indian Ocean, some 320 km off the north-west coast of Australia (area, 5 sq. km), were placed under the authority of the Commonwealth

Under the Ashmore and Cartier Islands Acceptance Act, 1933, the islands were accepted by the Commonwealth under the name of the Territory of Ashmore and Cartier Islands, and the effective date was proclaimed by the Governor-General to be 10 May 1934. It was the intention that the Territory should be administered by the State of Western Australia, but owing to administrative difficulties the Territory was annexed to and deemed to form part of the Northern Territory of Australia (by amendment to the Act in 1938) with relevant laws of the Northern Territory, applying to the Territory of Ashmore and Cartier Islands Responsibility for the administration of Ashmore and Cartier Islands rests with the Minister for Territories and Local Government.

On 16 Aug. 1983 a national nature reserve was declared over Ashmore Reef and the area so declared is now known as Ashmore Reef National Nature Reserve

The islands are uninhabited but Indonesian fishing boats, which have traditionally plied the area, fish within the Territory and land to collect water in accordance with an agreement between the governments of Australia and Indonesia

Periodic visits are made to the islands by ships of the Royal Australian Navy, and aircraft of the Royal Australian Air Force make aerial surveys of the islands and neighbouring waters.

TERRITORY OF CORAL SEA ISLANDS. The Coral Sea Islands became a Territory of the Commonwealth of Australia under the Coral Sea Islands Act 1969. It comprises scattered reefs and islands over a sea area of about 1 m sq km. The Territory is uninhabited apart from a manned meteorological station on Willis Island

# **NEW SOUTH WALES**

HISTORY. New South Wales became a British possession in 1770, the first settlement was established at Port Jackson in 1788, a partially elective Council was established in 1843, and responsible government in 1856 New South Wales federated with the other Australian states to form the Commonwealth of Australia in 1901.

AREA AND POPULATION. New South Wales is situated between the 28th and 38th parallels of S. lat. and 141st and 154th meridians of E. long., and com-

prises 309,433 sq. miles (801,428 sq. km), inclusive of Lord Howe Island, 6 sq miles (17 sq. km), but exclusive of the Australian Capital Territory (911 sq. miles, 2,359 sq km) and 28 sq. miles (73 sq. km) at Jervis Bay.

Lord Howe Island, 31° 33′ 4″ S., 159° 4′ 26″ E., which is part of New South Wales, is situated about 702 km north-east of Sydney; area, 1,654 hectares, of which only about 120 hectares are arable, resident population, estimate (30 June 1984), 300 The Island, which was discovered in 1788, is of volcanic origin Mount Gower, the highest point, reaches a height of 866 metres

The Lord Howe Island Board manages the affairs of the Island and

supervises the Kentia palm-seed industry

CONSTITUTION AND GOVERNMENT. Within the State there are three levels of government, the Commonwealth Government, with authority derived from a written constitution, the State Government with residual powers, the local government authorities with powers based upon a State Act of Parliament, operating within incorporated areas extending over almost 90% of the State.

The Constitution of New South Wales is drawn from several diverse sources, certain Imperial statutes such as the Colonial Laws Validity Act (1865) and the Commonwealth of Australia Constitution Act (1900); the Australian States Constitution Act (1907); the Letters Patent and the Instructions to the Governor; an element of inherited English law; amendments to the Commonwealth of Australia Constitution Act; the (State) Constitution Act and certain other State Statutes, numerous legal decisions; and a large amount of English and local convention.

The Parliament of New South Wales may legislate for the peace, welfare and good government of the State in all matters not specifically reserved to the Commonwealth Government.

The State Legislature consists of the Sovereign, represented by the Governor, and two Houses of Parliament, the Legislative Council (upper house) and the Legislative Assembly (lower house).

Australian citizens, and other British subjects who were enrolled at 25 Jan. 1984, men and women aged 18 years and over, are entitled to the franchise. Voting is

compulsory

The Legislative Council has 45 members elected by popular vote for a term of office equivalent to three terms of the Legislative Assembly, with 15 members retiring at the same time as the Legislative Assembly elections. In Oct. 1985, the Council consisted of the following parties. Labor, 24, Liberal, 11, National Party, 6,

Australian Democrats, 1, Independents, 3.

The President of the Legislative Council has an annual salary (1985) of \$A66,560, the Leader of the Opposition members, the Chairman of Committees and the Deputy Leader of the Government members (if not a Minister), \$A49,490 each, the Deputy Leader of the Opposition members and Government and Opposition Whips, \$A45,596 each. The President is paid an annual expense allowance of \$A9,963, the Leader of the Opposition members, the Chairman of Committees, the Deputy Leader of the Government members (if not a Minister) and the Deputy Leader of the Opposition members (when a leader of a party), \$A5,476 each; the Deputy Leader of the Opposition members (when not a leader of a party) and Government and Opposition Whips, \$A2,197 each Other members who are not Ministers receive an annual salary of \$A40,587. All members receive an annual electoral allowance of \$A13,273. Special expenses allowances (\$A5,410, \$A6,741 or \$A8,136) are paid to members who are not Ministers and reside in outlying electorates.

The Legislative Assembly has 99 members elected by popular vote for a maximum period of 4 years. The Legislative Assembly, elected on 24 March 1984, consisted in Oct. 1985 of the following parties: Labor, 58; Liberal, 21, National

Party, 15; Independents, 5.

The Speaker of the Legislative Assembly and the Leader of the Opposition members receive a salary of (1985) \$A66,560 each, the Chairman of Committees, Deputy Leader of the Opposition members and Leader of the National Party, \$A49,490 each; Government and Opposition Whips, \$A46,480 each. The Speaker and the Leader of the Opposition members also receive an expense allowance of \$A9,963 each; the Chairman of Committees, Deputy Leader of the Opposition members and Leader of the National Party, \$A5,476 each, Government and Opposition Whips, and Deputy Leader of the National Party, \$A2,585 each Members who are not Ministers receive an annual salary of \$A40,587. All members receive an annual electoral allowance ranging from \$A13,273 to \$A23,690 according to the location of their constituencies. Special expenses allowances (\$A5,410, \$A6,741 or \$A8,136) are paid to members who are not Ministers and represent outlying electorates.

Executive power is vested in the Governor, who is appointed by the Crown, and an Executive Council consisting of members of the Cabinet. Ministers receive the following annual salaries (1985): Premier, \$A83,406, Deputy Premier, \$A75,089, the Leader of the Government members in the Legislative Council, \$A75,935, Deputy Leader of Government members in the Legislative Council, \$A72,328; other Ministers, \$A70,899. Ministers also receive an expense allowance (Premier, \$A21,325; Deputy Premier, \$A10,662; other Ministers, \$A9,963 each). Ministers also receive an electoral allowance ranging from \$A13,273 to \$A23,690 to members of the Legislative Assembly, according to the location of their electorate; and \$A13,273 to each member of the Legislative Council. A special expenses allowance of \$A8,136 is paid to Ministers who represent or reside in outlying electorates.

Governor. Air Marshal Sir James Anthony Rowland, KBE, DFC, AFC (sworn in 20 Jan. 1981).

Local Government A system of local government extends over most of the State, including the whole of the Eastern and Central land divisions and almost three-quarters of the sparsely populated Western division. At 1 Jan 1985 there were 62 municipalities, and 113 corporate bodies called shires. A number of the municipalities and shires have combined to form 42 county councils, which administer electricity or water supply undertakings or render other services of common benefit

State Government receipts (in \$A1m.) for 1984-85 included receipts from loan raisings, 337; Commonwealth general revenue grant, 2,699; and state taxation, 3,285 Expenditure included capital works and services, 491, education, 2,310; health, 967; and public debt charges, 677.

Public Debt. In terms of the financial agreement between the Commonwealth and State Governments, the Commonwealth Government has assumed responsibility for debts of the Australian States, and contributes towards the interest thereon and sinking funds established for redemption of the debts. Loans for the States are

raised by the Commonwealth Government in accordance with decisions of the Australian Loan Council.

The public debt of New South Wales at 30 June 1985 was \$A5,774m. with less than 1% domiciled overseas. Interest liability for 1984–85 amounted to \$A643m Contributions to the sinking fund for New South Wales debt, \$A82m., includes \$A16m. contributed by the Commonwealth Government. The net cost of securities redeemed in the year was \$A82m.

Banking. There were 9 trading banks operating in New South Wales at 30 June 1985, including the Commonwealth Bank of Australia and State Bank of New South Wales (Government banks) and 1 New Zealand bank. The trading bank business is transacted chiefly by the Commonwealth Bank of Australia, the State Bank of New South Wales and 3 private banks, all of which have their head offices in Australia. At 30 June 1985 the 9 banks operated 1,814 branches and 323 agencies in New South Wales

The weekly average amount of deposits held in New South Wales by the 9 banks was \$A20,447.7m in June 1985, consisting of \$A15,732 1m bearing interest and \$A4,715 6m. not bearing interest Bank advances, overdrafts, bills discounted, etc., amounted to \$A16,231 7m. A statement of other assets and liabilities of the banks in New South Wales is of little significance, as banking business is conducted on an Australia-wide basis.

Savings bank deposits at the end of June 1985 amounted to \$A12,242m, representing \$A2,250 per head of population.

#### **ENERGY AND NATURAL RESOURCES**

Minerals. New South Wales contains extensive mineral deposits. The most important minerals mined are: Coal (which accounts for 74% of the value of the State's mineral production), silver-lead-zinc (11%); construction materials (sand, gravel, stone, etc., 10%); and mineral sands (rutile, zircon, etc., 1%) At 30 June 1984, there were 563 mining establishments with an average employment of 27,094. During 1983-84, wages and salaries paid were \$A782m, and value added was \$A1,640m Mine production of coal and metallic minerals (gross content) is shown below:

In 1983-84, 15,182 hectares of sugar-cane were cut for crushing, the production being 1,468,392 tonnes. The total area under grapes was 12,849 (including 695 not bearing) hectares, the production of table grapes was 4,811 tonnes, of wine, 115,960 tonnes, of dried vine fruits, 11,307 tonnes

In 1983-84, 5,592 hectares of banana plantations; production from 5,090 hectares, 67,953 tonnes; there were 28,488 hectares of orchard fruit

At 31 March 1984 the State had 51m sheep and lambs, 5,035,549 cattle and 799,211 pigs. The production of wool in 1983-84 was 230 6m. kg (greasy) In the year ended 30 June 1985 production of butter was 2,639 tonnes, cheese, 13,773 tonnes, and bacon and ham, 18,581 tonnes.

Forestry. The estimated area of Crown and private lands is 16 2m hectares. The total area of State forests amounts to 3 4m hectares, and 245,000 hectares have been set apart as timber reserves.

In 1983-84, 3,244,000 cu. metres of timber (excluding firewood) were produced, including 1,168,000 cu. metres of forest hardwoood and 1,193,000 cu. metres of pulpwoods

## INDUSTRY AND TRADE

Industry. Approximately 20% of employed persons in New South Wales are employed in manufacturing industries

A very wide range of manufacturing activities is undertaken in the Sydney area, and there are large iron and steel works and associated metal fabrication works in operation in proximity to the coalfields at Newcastle and Port Kembla

The following table shows a summary of manufacturing industries statistics for

During 1984-85 the value of all building jobs commenced in New South Wales was \$A4,400m. (of which jobs valued at \$A745m were being built for government ownership), jobs completed were valued at \$A3,946m. (\$A625m for government ownership), and jobs under construction at the end of the period were valued at \$A4,111m. (\$A1,347m. for government ownership)

Labour. Two systems of industrial arbitration and conciliation for the adjustment of industrial relations between employers and employees are in operation—the State system which operates within the territorial limits of the State, and the Commonwealth system, which applies to industrial disputes extending beyond State borders.

The industrial tribunals are authorized to fix minimum rates of wages and other conditions of employment. Their awards may be enforced by law, as may be industrial agreements between employers and organizations of employees, when registered.

The principal State tribunal is the Industrial Commission of New South Wales The Commission is empowered to exercise all the arbitration and conciliation powers conferred on subsidiary tribunals, and has in addition authority to determine any widely defined 'industrial matter', to adjudicate in case of illegal strikes and lockouts, etc., to investigate union ballots when irregularities are alleged and to hear appeals from subsidiary tribunals. Subsidiary tribunals are Conciliation Committees for various industries, each having an equal number representing employers and employees and a Conciliation Commissioner as chairman.

The chief industrial tribunals of the Commonwealth are the Industrial Division of the Federal Court of Australia, composed of judges, and the Australian Conciliation and Arbitration Commission, composed of presidential members, and commissioners.

Most State awards and agreements prescribe a basic wage. However, since 1974, the State Industrial Commission has also specified a minimum wage in line with Commonwealth awards. In Sept. 1985, the minimum wage payable in Sydney for a full week's work by an adult male or female was \$A162.70 under both State and Commonwealth awards. For the June quarter 1985, average weekly earnings were \$A446.80 for full-time adult males and \$A339.80 for full-time adult females

The standard working week is still regarded as 40 hours for employees under both Commonwealth and State awards. However, some awards prescribe less than 40 hours per week and, since early 1981, a campaign by trade unions has resulted in the extension of shorter working hours to more industries. Overtime is permitted under prescribed conditions

Trade Unions. Registration of trade unions is effected under the New South Wales Trade Union Act, 1881, which follows substantially the Trade Union Acts of 1871 and 1876 of England. Registration confers a quasi-corporate existence with power to hold property, to sue and be sued, etc., and the various classes of employees covered by the union are required to be prescribed by the constitution of the union. For the purpose of bringing an industry under the review of the State industrial tribunals, or participating in proceedings relating to disputes before Commonwealth tribunals, employees and employers must be registered as industrial unions, under State or Commonwealth industrial legislation respectively. At 31 Dec. 1984, there were 190 trade unions with a total membership of 1,114,500. Approximately 58% (estimate) of wage and salary earners were members of trade unions.

Commerce. The external commerce of New South Wales, exclusive of interstate trade, is included in the statement of the commerce of Australia (see pp. 108-10). The overseas commerce of New South Wales is given in \$A1,000 ending 30 June.

1981-82	9,235,716	4,188,394	1984-85	12,707,157	6.717.850

The main exports from New South Wales of Australian produce in 1984-85 were coal (28 2%), cereals (14.8%), wool (8 7%), petroleum (4 5%), iron and steel (3 9%), meat (3 1%), metalliferous ores and metal scraps (2 3%). Principal imports were office machines (10 9%), chemicals (9 2%), road vehicles (6.7%), electrical machinery, apparatus and appliances (5 4%), petroleum and petroleum products (5 2%), telecommunications equipment (4 8%), paper and paperboard products (2 8%).

Principal destinations of all exports from New South Wales in 1984-85 were Japan (27 1%), EEC countries (11 5%), New Zealand (7 4%), Republic of Korea (6 9%), ASEAN countries (6%), USA (5.6%), Hong Kong (4%). Major sources of supply were USA (24 2%), Japan (22 5%), EEC countries (20 9%), New Zealand (4 1%), Taiwan (3 5%) and Hong Kong (2 3%)

### **COMMUNICATIONS**

Roads. At 31 Dec. 1983 there were 195,548 km of roads and streets open for general traffic in New South Wales (excluding unincorporated and Lord Howe Island), comprising 73,674 km bitumen or concrete, 64,877 km gravel, crushed stone or other improved surface, 36,670 km earth formed and 20,300 km natural surface

The principal bus services in Sydney and Newcastle are operated by the State Government.

The number of registered motor vehicles (excluding tractors and trailers) at 30 June 1985 was 2,967,177, including 1,852,463 cars, 365,358 station wagons, 174,325 utilities, 204,424 panel vans, 199,229 trucks, 40,486 buses and 130,892 motor cycles

Railways. At 30 June 1984, 9,884 km of government railway were open. The revenue (including supplements) in 1983-84 was \$A1,391m.; the expenditure from revenue, \$A1,391m., the number of passengers carried, 202 3m. Also open for traffic are 325 km of Victorian Government railways which extend over the border, 68 km of private railways (mainly in mining districts), 53 km of Commonwealth Government-owned track and 46m. tonnes of freight carried.

Aviation. Sydney is the major airport in New South Wales and Australia's principal international air terminal During the year ended 30 June 1984 scheduled aircraft movements at Sydney totalled 91,253. Passengers totalled 5,501,492 on domestic services and 2,401,210 on international services. Freight handled on domestic and international services was 60,469 tonnes and 111,087 tonnes respectively.

Shipping. Arrivals of vessels engaged in overseas trade in the ports of New South Wales in 1983-84 numbered 2,607 and clearances numbered 2,599. The revenue tonnage of cargo discharged and loaded was 8 4m. and 37 8m respectively Sydney Harbour is the principal port of Australia. The number of overseas vessels which entered in 1983-84 was 1,278.

# JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Legal processes may be carried on in Local Courts presided over by magistrates, or in Higher Courts presided over by judges. There is also an appellate jurisdiction. Persons charged with the more serious crimes must be tried before the Higher Courts.

Children's Courts have been established with the object of removing children as far as possible from the atmosphere of a public court. There are also a number of tribunals exercising special jurisdiction, e.g., the Industrial Commission and the Compensation Court.

In 1983 there were 4,463 distinct persons convicted at the Higher Criminal Courts. At 30 June 1984 there were 2,706 persons (including 112 females) held under sentence in prison.

Religion. There is no established church in New South Wales, and freedom of worship is accorded to all

The following table shows the statistics of the religious denominations in New South Wales at the census in 1981, and of ministers of religion registered for the celebration of marriages in 1984

Denomination	Ministers	1dherents	Denomination	Ministers	Adherents

Forestry. A considerable area consists of natural forest, eucalyptus, pine and cabinet woods being the timbers mostly in evidence, a large quantity of ornamental woods is utilized by cabinet makers. The amount of timber processed, including plantation and imported, in 1983–84 was (in cumetres): Conifers, 484,076; hardwoods, structural timbers and cabinet woods, 703,099

#### INDUSTRY AND TRADE

Industry. The 1970s created a milestone in the State's industrial progress when the value added in production by the manufacturing sector exceeded the value of production in the agriculture, forestry, fishing and hunting sector. In 1983–84, there were 3,451 establishments, with four or more workers, employing 88,760 males and 21,678 females, and producing goods and services worth \$A11,706m. The value added was \$A3,701m. The manufacturing establishments contributing most to the overall production during 1983–84 were those predominantly engaged in the processing of food, beverages and tobacco.

The gross value of Queensland agricultural commodity production (in \$A1,000) during 1983-84, amounted to 3,111,825, which included crops, 1,743,833; livestock disposals, 993,982; livestock products, 374,010.

Labour. Of the total population of 2.5m., 1,045,400 were in employment in Aug. 1985, 128,900 in manufacturing. Industrial wages and conditions are controlled

<sup>&</sup>lt;sup>2</sup> Excluding lucerne and other pastures

partly by Federal and partly by State authorities. A State Industrial Commission is empowered to determine all industrial matters in relation to employers and employees, to fix minimum wage-rates and other conditions of employment. An Industrial Court hears appeals and decides points of industrial law. The Federal Court of Australia and the Conciliation and Arbitration Commission are superior within their jurisdictions. In Queensland most employees (67%) work under State awards; 25% under Federal awards

Rates of wages for each occupation are prescribed by these courts. The minimum weighted average award rate of pay for adult male wage and salary earners was \$A321 40 and for adult females \$A293 50, at 30 June 1985, while for the June quarter 1985, average weekly earnings were \$A411 10 for full-time adult males and \$A334 50 for full-time adult females (Average earnings include award, overaward and overtime payments) A standard working week of either 38 or 40 hours is prescribed for most awards.

Trade Unions. Unions both of employees and employers must be registered with the State or Australian Commission. There were 71 employees' and 39 employers' unions registered with the State Commission at 31 Dec 1983, the former comprising 386,787 and the latter 37,356 members.

Commerce. The overseas commerce of Queensland is included in the statement of the commerce of Australia (see pp 108–10)

Total value of the direct overseas imports and exports of Queensland (in \$A1,000) fo b port of shipment for both imports and exports:

# SOUTH AUSTRALIA

AREA AND POPULATION. The total area of South Australia is 380,070 sq miles (984,377 sq km) The settled part is divided into counties and hundreds. There are 49 counties proclaimed, covering 23m hectares, of which 19m hectares are occupied. Outside this area there are extensive pastoral districts, covering 76m. hectares, 43m of which are under pastoral leases.

The infant mortality rate in 1984 was 8 30 per 1,000 live births.

The Adelaide Statistical Division had 978,940 inhabitants at 30 June 1984 in 21 cities and 12 municipalities and other districts. Cities outside this area (with populations at the 1981 Census) are Whyalla (31,820), Mount Gambier (18,880), Port Augusta (15,880), Port Pirie (15,970) and Port Lincoln (11,670).

CONSTITUTION AND GOVERNMENT. South Australia was formed into a British province by letters patent of Feb. 1836, and a partially elective Legislative Council was established in 1851. The present Constitution bears date 24 Oct. 1856. It vests the legislative power in an elected Parliament, consisting of a Legislative Council and a House of Assembly. The former is composed of 22 members. Every 3 years half the members retire, and the resulting vacancies are filled at a general election on the basis of proportional representation with the State as one multi-member electorate. The qualifications of an elector are, to be an Australian citizen, or a British subject who on 25 Jan. 1984 was enrolled on a Commonwealth electoral roll and/or at some time between 26 Oct. 1983 and 25 Jan. 1984 inclusive was enrolled on an electoral roll for a South Australian Assembly district or a Commonwealth electoral roll in any State. The person must be of at least 18 years of age and to have lived continuously in Australia for at least 6 months, in South Australia for at least 3 months and in the sub-division for which he is enrolled for at

least 1 month War service may substitute for residential qualifications in some cases. By the Constitution Act Amendment Act, 1894, the franchise was extended to women, who voted for the first time at the general election of 25 April 1896 The qualifications for election as a member of both Houses are the same as for an elector. Certain persons are ineligible for election to either House.

The House of Assembly consists of 47 members elected for 3 years, representing single electorates Election of members of both Houses takes place by preferential

secret ballot. Voting is compulsory for those on the Electoral Roll.

The House of Assembly, elected on 6 Nov. 1982, consists of the following members: Liberal Party of Australia, 22; Australian Labor Party, 23; National Party of Australia, 1; Independent, 1 The Legislative Council consists of 11 Liberal Party of Australia, 9 Labor and 2 Australian Democrat members

Each member of Parliament receives \$A37,500 per annum with allowances of \$A7,785-28,800 according to location of electorate, a free pass over government railways and superannuation rights. Electors curolled (July 1985) numbered

910,189.

The executive power is vested in a Governor appointed by the Crown and an Executive Council, consisting of the Governor and the Ministers of the Crown The Governor has the power to dissolve the House of Assembly but not the Legislative Council unless that Chamber has twice consecutively with an election intervening defeated the same or substantially the same Bill passed in the House of Assembly by an absolute majority

Local Government The closely settled part of the State (mainly near the sea-coast and the River Murray) is incorporated into local government areas, and subdivided into district councils (rural areas only), municipal corporations (mainly metropolitan, but including larger country towns) and cities (more densely populated areas with a qualification of 15,000 residents in the Adelaide metropolitan area, and 10,000 in the country). The main functions of councils are the construction and maintenance of roads and bridges, sport and recreational facilities and garbage collection and disposal.

The number and area of the sub-divisions, together with expenditure (in

\$A1,000) for the year ended 30 June 1984, were:

Labour. Two systems of industrial arbitration and conciliation for the adjustment of industrial relations between employers and employees are in operation—the State system, which operates when industrial disputes are confined to the territorial limits of the State, and the Federal system, which applies when disputes involve other parts of Australia as well as South Australia.

The industrial tribunals are authorized to fix minimum rates of wages and other conditions of employment, and their awards may be enforced by law. Industrial agreements between employers and organizations of employees, when registered, may be enforced in the same manner as awards. In Aug. 1985 the minimum wage under State awards was \$A162.30

Commerce. The commerce of South Australia, exclusive of inter-state trade, is comprised in the statement of the commerce of Australia given under the heading of the Commonwealth, see pp 108-10

**Tourism.** In March 1985 there were 290 hotels and motels with 7,865 rooms, 155 caravan parks had a total of 18,208 sites.

#### COMMUNICATIONS

Roads. At 30 June 1984, of the roads customarily used by the public, there were 2,540 km of national roads, 10,873 km of arterial roads and 89,473 km of local roads, totalling 102,886 km. Lengths of road classified by surface were as follows: Sealed, 22,322 km; unsealed, 80,564 km. Costs of construction and maintenance are shared by the State and Commonwealth governments and by the councils of the local areas Motor vehicles registered at 30 June 1985 included 530,285 cars, 104,462 station wagons, 144,947 commercial vehicles and 37,199 cycles.

Railways. At June 1984, there were more than 5,700 km of railway, including the South Australian portion of the Transcontinental Railway from Port Pirie in South Australia to Kalgoorlie in Western Australia, which, in connexion with various State lines, completes a through rail connexion between Brisbane on the north-east coast and Fremantle on the west coast. The above figure includes the South Australian portion of the Australian National Railways from Tarcoola to the Northern Territory and private railways from Iron Knob to Whyalla and Coffin Bay to Port Lincoln and 152 km of railway which is operated by the State Transport Authority in the metropolitan area of Adelaide.

Aviation. For the year ended 30 June 1984 there were 1,688,557 passengers and 15,894 tonnes of freight handled at Adelaide, South Australia's principal airport On 30 June 1984 there were 7 government and 27 licensed aerodromes.

Shipping. There are several good harbours, of which Port Adelaide is the principal one. In 1983-84, 866 vessels entered South Australia with 2,317,627 import tonnes of cargo and left with 5,629,026 export tonnes.

Post and Broadcasting. At 30 June 1984, there were 590 post offices Telephone services connected totalled 558,380 on 30 June 1984. There were 27 radio and 32 television stations (including 13 translator and 4 satellite fed) at 1 Jan 1985.

# JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. There is a Supreme Court, which incorporates admiralty, civil, criminal, land and valuation, and testamentary jurisdiction; district criminal courts, which have jurisdiction in many indictable offences; local courts and courts of summary jurisdiction. Circuit courts are held at several places. In the year ended 30 June 1982, 1,541 cases were heard in higher courts and 185,784 cases in courts of summary jurisdiction. During the year ending 30 June 1984 there were 817 sequestrations and schemes under the Bankruptcy Act. There were 3,768 prisoners received under sentence in 1983–84 with an average prison population of 700

Religion. At the Census of 1981 the religious distribution of the population (as reported on Census schedules) was as follows: Anglican, 260,919, Roman Catholic and Catholic (so described), 255,332, Uniting Church, 108,857, Methodist, 85,935, Lutheran, 63,860, Baptist, 22,287, Presbyterian, 21,725, other Christians, 138,350; non-Christian, 7,128, indefinite, 6,529, no religion, 178,136, no reply, 135,970

Education. Education is secular and is compulsory for children 6–15 years of age. Primary and secondary education at government schools is free. In 1984 there were 708 government schools, comprising 518 primary, 67 primary and secondary, 101 secondary schools and 22 special schools. There were 201,220 full-time students. The Department of Technical and Further Education is responsible for technical, adult and vocational education. In 1984 there were 22 colleges of technical and further education, among the facilities are an adult migrant education service, a centre for performing arts and schools of rural, maritime and external studies. Tertiary education, including teacher education, is provided by the 2 universities and 3 colleges of advanced education. There were 174 non-government schools and colleges, most of which are associated with religious denominations (49,349 students). In 1983 there were 509 day care and pre-school centres with a total enrolment of 33,847 pre-school children.

Social Welfare. Age, invalidity, war, etc., pensions are paid by the Commonwealth Government. The number of pensioners in South Australia at 30 June 1984 was. Disability and service, 76,686, age, 135,427; invalid, 25,402 There are schemes for family allowances, widows, supporting parents, unemployment and sickness and hospital and pharmaceutical benefits.

# **TASMANIA**

HISTORY. Abel Janzoon Tasman discovered Van Diemen's Land (Tasmania) on 24 Nov. 1642 The island became a British settlement in 1803 as a dependency of New South Wales; in 1825 its connexion with New South Wales was terminated, in 1851 a partially elective Legislative Council was established, and in 1856 responsible government came into operation. On 1 Jan. 1901 Tasmania was federated with the other Australian states into the Commonwealth of Australia.

AREA AND POPULATION. Tasmania is an island separated from the mainland by the Bass Strait with an area (including islands) of 68,331 sq. km, or 683m. hectares, of which 6,441,000 hectares form the area of the main island. The population at 10 consecutive censuses was:

	Population	Increase % per annum		Population	Increase % per annum
1911	191,211	1 04	1961	350,340	1 82

The state's largest cities and towns (with populations at the 1981 Census) are Hobart (128,603), Launceston (64,555), Devonport (21,424) and Burnie (20,368)

CONSTITUTION AND GOVERNMENT. Parliament consists of the Governor, the Legislative Council and the House of Assembly. The Council has 19 members, elected by adults with 6 months' residence. Members sit for 6 years, 3 retiring annually and 4 every sixth year. There is no power to dissolve the Council. Vacancies are filled by by-elections. The House of Assembly has 35 members; the maximum term for the House of Assembly is 4 years. Members of both Houses are paid a basic salary of \$A34,630 (Jan. 1984), plus an electorate allowance, according to the division represented. The annual allowance payable is calculated as a

<sup>&</sup>lt;sup>2</sup> Not comparable with previous censuses

percentage of basic salary. The amounts vary from \$A3,809 (11%) to \$A12,120 (35%). Women received the right to vote in 1903. Proportional representation was adopted in 1907, the method now being the single transferable vote in 7-member constituencies. Casual vacancies in the House of Assembly are determined by a transfer of the preference of the vacating member's ballot papers to consenting candidates who were unsuccessful at the last general election.

A Minister must have a seat in one of the two Houses, all present

Ministers are members of the House of Assembly

In addition to the salary paid to Ministers as members of either House, the following allowances are payable: Premier, in conjunction with a ministerial office, \$A43,287; Deputy Premier, in conjunction with a ministerial office, \$A29,435, other Ministers, \$A24,241. The Leader of the Opposition in the House of Assembly receives an allowance of \$A24,241. The holders of some other offices receive allowances ranging from \$A2,077 to \$A11,542.

An election, precipitated by the House of Assembly wanting vote of confidence in the minority Labor Government, in May 1982 resulted in the Liberal Party forming a government in its own right. The composition of the new House of Assembly was Liberal, 19 seats, Labor, 14, Australian Democrats, 1 and 1 Independent

The Legislative Council is predominantly independent without formal party allegiance; I member is Labor-endorsed

Governor Sir James Plimsoll, AC, CBE

Local Government For the purposes of local government, the State is divided into 47 municipal areas comprising the cities of Hobart, Launceston, Glenorchy and Devonport and 43 municipalities. The number of municipalities was reduced from 45 in May 1985 because of the amalgamation of 2 municipalities with the City of Launceston. The cities and municipalities are managed by elected aldermen and councillors, respectively, with reference to local matters such as sanitation and health services, domestic water supplies and roads and bridges within each particular area. The chief source of revenue is rates (based on assessed annual value) levied on owners of property

Tasmanian Islands Three inhabited Tasmanian islands (Bruny, King and Flinders) are organized as municipalities. Nearly 1,600 km south-east lies Macquarie Island, part of the State, and used only as an Australian research base and meteorological station.

# **ECONOMY**

Budget. The revenue is derived chiefly from taxation (pay-roll, motor, lottery and land tax, business franchises and stamp duties), and from grants and reimbursements from the Commonwealth Government. Customs, excise, sales and income tax are levied by the Commonwealth Government, which makes grants to Tasmania for both revenue and capital purposes. Commonwealth Government grants to Tasmania in 1984–85 totalled \$A820m. These included General Purpose Revenue Funds, \$A417m.; Specific Purpose Grants, \$A307m; Capital Grants, \$A37m.; and Health Grants, \$A59m.

Specific Purpose Grants are mainly used to provide essential services such as hospitals, housing, roads and educational services, while General Purpose Revenue Funds have been paid since 1942 to compensate the State for the loss of income tax to the federal government

Consolidated Revenue Fund receipts and expenditure, in \$A1,000, for financial years ending 30 June:

The public debt at current exchange rates amounted to \$A1,201m. at 30 June 1985.

In 1984-85 State taxation revenue amounted to \$A211m., of which pay-roll tax provided \$A68.4m.; motor tax, \$A18 2m.; stamp duties, \$A48.4m.; business franchises, \$A27.8m., and lottery tax, \$A6.2m

Banking. Trading bank activity in Tasmania is divided between 3 private banks and the Commonwealth Trading Bank. For the month of June 1985 liabilities represented by depositors' balances averaged \$A692m, and assets represented by advances, \$A552m The 6 savings banks operating in Tasmania are the Commonwealth Savings Bank, 2 trustee savings banks and 3 private savings banks operated by trading banks. At 30 June 1985 total savings bank deposits were \$A1,214m.

#### **ENERGY AND NATURAL RESOURCES**

Electricity. Tasmania has good supplies of hydro-electric power because of assured rainfall and high level water storages (natural and artificial). The Hydro-Electric Commission, Tasmania's sole commercial supplier of electricity, has been surveying water power resources of the State for many years and it is estimated that about 3m. kw. can be economically developed. By 31 Dec. 1983, 1,940,200 kw. of generating plant was in commission. In 1983 the peak loading was 1,297,100 kw. One project is currently in progress, the Pieman River Power Development, comprising 3 stations, scheduled for completion in 1986. The Gordon River Power Development Stage 2 (the Gordon-below-Franklin scheme) was halted by a High Court decision.

Minerals. The assayed content of principal metallic minerals contained in locally produced concentrates for 1983–84 was (in tonnes): Zinc, 75,476; iron, 1,443,406, copper, 26,748; lead, 30,907, tin, 4,855; gold, 1,853 kg; silver, 91,079 kg. Coal production, 453,288 tonnes.

Primary Industries. The estimated gross value of recorded production from agriculture in 1983–84 was (in \$A1m.). Livestock products, 126.9; livestock slaughterings and other disposals, 95 6, crops, 134, total gross value, 356 4. Estimated gross value of fisheries was \$A39 1m.

Agriculture. The area occupied by the 5,728 holdings in 1983-84 totalled 2,161,700 hectares, of which 1,006,600 were devoted to crops and sown pasture. The following table shows the area and production, in tonnes, of the principal crops:

Livestock at 31 March 1984: Sheep, 4.6m.; cattle, 542,100; pigs, 47,700.

Wool produced during 1983-84 was 22m. kg, valued at \$A65m. In 1984-85 butter production was 7,693 tonnes; cheese, 12,602 tonnes.

Forestry. Indigenous forests cover a considerable part of the State, and the saw-

milling and woodchipping industries are very important. Production of sawn timber in 1983-84 was 281,600 cu. metres. 768,000 cu. metres of logs were used for milling in 1983-84 and a further 3 5m. cu. metres were used for chipping, grinding or flaking. Newsprint and paper are produced from native hardwoods, principally eucalypts.

#### INDUSTRY AND TRADE

Industry. The most important manufactures for export are refined metals, newsprint and other paper manufactures, pigments, woollen goods, fruit pulp, confectionery, butter, cheese, preserved and dried vegetables, sawn timber, and processed fish products. The electrolytic-zinc works at Risdon near Hobart treat large quantities of local and imported ore, and produce zinc, sulphuric acid, superphosphate, sulphate of ammonia, cadmium and other by-products. At George Town, large-scale plants produce refined aluminium and manganese alloys During 1983–84, 3.5m tonnes (green weight) of woodchips were produced. In 1983–84 the average employment in manufacturing establishments employing 4 or more persons was 24,056; wages and salaries (excluding proprietors' drawings), \$A408m, turnover, \$A2,196m., value added, \$A829m; and number operating at 30 June, 556

Labour. The Commonwealth Industrial Court (judicial powers) and Commonwealth Conciliation and Arbitration Commission (arbitral powers) have jurisdiction over federal unions, ie, with interstate membership. Most Tasmanian employees are covered by federal awards

State Industrial Boards, established for the various trades by resolution of Parliament or proclamation of the Governor, cover most of the remaining employees. Each Board consists of a Chairman appointed by the Governor with equal representation of employers and employees. The Boards have authority over minimum rates for wages or piecework, number of working hours for which the wage is payable, conditions of apprenticeship, annual leave and adjustment of wage and piecework rates. Industrial Boards follow to a large extent the wage rates fixed by the Conciliation and Arbitration Commission.

Commerce. Trade by sea and air in \$A1m. for years ending 30 June

	1979-80	1980–81	1981–82	1982-83	1983-84
Imports	1,168 8	1,207 1	1,258 5	1,339 1	1,461 7
Exports	1.451 5	1,540 2	1.574 6	1.728 9	1.907 2

In 1983-84 exports by sea and air totalled \$A1,907m., comprising \$A1,133m to other Australian states and \$A774m to overseas countries. The principal countries of destination (with values in \$A1m) for overseas exports were Japan, 278, USA, 102, Malaysia, 62; Indonesia, 47, and China (excluding Taiwan), 39 Imports totalled \$A1,462m., comprising \$A!,259m. from other Australian states and \$A203m from overseas countries. The principal countries of origin (with values in \$A1m.) for overseas imports were. Japan, 41, USA, 37; New Zealand, 21; Canada, 13, and Taiwan 12

The main commodities by value (with values in \$A1m.) exported during 1983-84 were. Ores and concentrates (mainly iron, copper, lead, tin and tungsten), 197, refined zinc, 201; timber, 85, vegetables, 85; and greasy wool, 46. Other main exports, for which details are not available for separate publication were woodchips, newsprint, printing and writing papers, refined aluminium, ferro-alloys and chocolate confectionery. The main imports (with values in \$A1m.) were. Petro-leum products, 295, ores and concentrates, 135, new motor vehicles, 127, and machinery, clothing and wood-pulp.

Tourism. In 1981 (estimate) 306,671 adult visitors spent at least one night in Tasmania.

# COMMUNICATIONS

Roads. The total road length at 30 June 1983 was 22,210 km, consisting of a classified road system of 3,967 km maintained by the State Department of Main Roads,

and the remainder maintained by local government authorities, the Forestry Commission and the Hydro-Electric Commission Motor vehicles registered at 30 June 1984 comprised 195,000 cars and station wagons, 54,800 other vehicles and 6,100 motor cycles.

Railways. There is an 851-km network of 1,067-mm gauge lines linking Hobart and Launceston with coastal and country areas, formerly operated by Tasmanian Government Railways, but since 1 July 1975 worked by the Australian National Railways Commission. A private railway of 134 km, operated by the Emu Bay Railway Co. Ltd, connects Burnie with the mining settlements on the west coast

Aviation. Regular daily passenger and freight air services connect the south, north and north-west of the State with the mainland of Australia. In 1983 there was a total of 29,159 scheduled aircraft movements at Tasmanian airports; a total of 937,000 passengers and 43,382 tonnes of freight. including mail, was carried.

Shipping. In 1982–83 overseas vessels made a total of 438 calls to Tasmanian ports discharging 362,716 revenue tonnes of cargo, departures numbered 421 with total cargo of 4,815,555 revenue tonnes

Education. Education is controlled by the State and is free, secular and compulsory between the ages of 6 and 16. At 1 July 1984 government schools had a total enrolment of 67,787 pupils, including 28,636 at secondary level, private schools had a total enrolment of 16,464 pupils, including 7,749 at secondary level

Technical and further education is conducted at technical and community colleges in the major centres throughout the state. In 1983 there were 18,815 students enrolled in the Division of Technical and Further Education, 15,831 students in the Division of Adult Education. Teaching staff was made up of 512 full-time and 2,493 part-time teachers.

Tertiary education is offered at the University of Tasmania in Hobart, the Tasmanian State Institute of Technology and the Australian Maritime College, in Launceston. The University (established 1890) had (1984) 3,423 full-time and 2,145 part-time students, and 359 full-time teachers. There were 1,419 full-time and 1,575 part-time students enrolled in advanced education courses in 1984.

Social Welfare. Old Age, Invalid, War Service and Widows' Pensions are paid by the Commonwealth Government. The number of pensioners in Tasmania on 30 June 1984 was: Age, 39,970; invalid, 7,266; war (disability), 16,783; widows, 5,009. Benefit payments totalled \$A254 4m. (including payments to wives)

CONSTITUTION AND GOVERNMENT. Victoria, formerly a portion of New South Wales, was, in 1851, proclaimed a separate colony, with a partially elective Legislative Council. In 1855 responsible government was conferred, the legislative power being vested in a parliament of two Houses, the Legislative Council and the Legislative Assembly. At present the Council consists of 44 members who are elected for 6 years, one-half returing every third year. The Assembly consists of 81 members, elected for 3 years from the date of its first meeting unless sooner dissolved by the Governor. As a result of the Constitution (Electoral Provinces and Districts) Act 1983, from the date of the last election the number of members in the Legislative Assembly has increased to 88. As a result of the Constitution (Duration of Parliament) Act 1984, the term of the Legislative Assembly is a maximum of 4 years and the term of the Legislative Council is two terms of the Legislative Assembly Members and electors of both Houses must be aged 18 years and Australian citizens or those British subjects previously enrolled as electors, according to the Constitution (Qualification of Electors) Act 1982 Women are fully enfranchised. No property qualification is required, but judges, members of the Commonwealth Parliament and undischarged bankrupts may not be members of either House. Single voting (one elector one vote) and compulsory preferential voting apply to Council and Assembly elections Enrolment for Council and Assembly electors is compulsory The Council may not initiate or amend money bills, but may suggest amendments in such bills other than amendments which would increase any charge Any Minister, with the consent of the House of which he is not a member, may sit and speak in that House to explain a bill relating to the department administered by him, but may not vote in that House. A bill shall not become law unless passed by both Houses, except that, in the event of a continued disagreement between the two Houses as to a bill passed by the Assembly, other than certain constitutional bills, the Governor having dissolved the Assembly may subsequently dissolve the Council, and if the disagreement still continues he may convene a joint sitting of the members of the Council and the Assembly; if at such joint sitting the bill in dispute is passed by an absolute majority of all members it shall become law

Private members of both Houses receive salaries of \$A41,302 per annum, additional allowances rising from \$A12,163 to \$A16,240, and a living-away-from-home allowance of \$A57 15 for each day of attendance for each member (not being

a responsible Minister or a metropolitan member)

Members holding the following offices receive the salaries and allowances specified: The President of the Council, \$A72,278 salary and \$A4,543 expense allowance; the Speaker of the Assembly, \$A72,278 salary and \$A4,543 expense allowance; the Chairman of Committees of the Council, \$A54,518 salary and \$A1,652 expense allowance, the Chairman of Committees of the Assembly, \$A54,518 salary and \$A1,652 expense allowance; the Leader of the Opposition in the Assembly, \$A72,278 salary and \$A7,434 expense allowance, the Deputy Leader of the Opposition in the Assembly, \$A54,518 salary and \$A2,478 expense allowance; the Leader of the Third Party, \$A54,518 salary and \$A2,478 expense allowance; a member of either House who is the Parliamentary Secretary of the Cabinet, \$A54,518 salary and \$A2,478 expense allowance; the Government Whip in the Assembly, \$A48,736 salary; the Whip of any recognized Party which consists of at least 12 members of Parliament, of which Party no member is a responsible Minister, \$A45,845 salary. All members have free passes over the Victorian Railways; country members are also entitled to certain allowances for air travel.

The Legislative Assembly, elected on 2 March 1985, and following one byelection is composed as follows. Labor Party, 47, Liberal Party, 31; National Party,

Governor. Dr Davis McCaughey.

In the exercise of the executive power the Governor is advised by a Cabinet of responsible Ministers. Section 50 of the Constitution Act 1975 provides that the number of responsible Ministers shall not at any one time exceed 18, of whom not more than 6 may sit in the Legislative Council No responsible Minister may hold office for more than 3 months unless he is or becomes a member of the Council or the Assembly.

VICTORIA 157

Responsible Ministers receive the following amounts. The Premier, \$A82,604 salary and \$A17,346 expense allowance, the Deputy Premier, \$A76,408 salary and \$A8,673 expense allowance; 16 other responsible Ministers, \$A72,278 salary and \$A7,434 expense allowance. Each responsible Minister also receives an electorate allowance, an electorate office allowance, a residential allowance (where applicable) and, when travelling on business of the State, a travelling allowance. The President, Speaker, Chairman of Committees in the Assembly and in the Council, Parliamentary Secretary of the Cabinet, Leader and Deputy Leader of the Opposition in the Assembly, Leader of the Opposition in the Council and Leader in the Assembly of the Third Party, also receive a travelling allowance when travelling on official business. Members of Committees receive attendance fees and certain travelling expenses when on Committee duties.

#### **ENERGY AND NATURAL RESOURCES**

Electricity. All electricity in this State for public supply is generated by the largest electricity supply authority in Australia, the State Electricity Commission of Victoria. Through its network of 116,000 km of power lines the SEC supplies more than 1,390,000 customers. Another 278,500 customers take SEC power from 11 metropolitan councils which buy in bulk and distribute electricity through their own systems.

Electricity demand has almost doubled in 10 years and is now over 25,000 megawatt/hours a year. Generating capacity at 30 June 1984 was 6,827 megawatts compared with 3,863 in 1973.

About 75% of the power generated for the state system is supplied by base load generating stations, Yallourn, Morwell, Hazelwood and Yallourn W, located in the Latrobe Valley on one of the largest single brown coal deposits in the world 140 to 180 km east of Melbourne in Central Gippsland

These plants and a new 2,000 megawatt brown coal station at Loy Yang, of which the first generating unit commenced commercial service on 30 June 1984, will provide the bulk of Victoria's power requirements until at least the turn of the century

Oil and Natural Gas. Crude oil in commercially recoverable quantities was first discovered by the Esso/BHP partnership in 1967 in 2 large fields offshore in East Gippsland in Bass Strait between 65 and 80 km from land. These fields, Halibut and Kingfish, with 10 other fields since discovered—Marlin, Snapper, Barracouta, Mackerel, Tuna, Cobia, Flounder, Fortescue, Bream and Seahorse have been assessed as containing initial recoverable reserves of more than 2,930m bbls of treated crude oil

Gippsland crude now supplies approximately 72% of Australia's refinery requirements, and during 1983 a total of 137m. bbls were produced. Depletion of production from the 2 major fields, Kingfish and Halibut and the smaller Barracouta field, is now expected to occur in the late-1980s.

Natural gas was discovered offshore in East Gippsland in 1965. The initial recoverable reserves of treated gas are 220,400m. cu. metres. Reserves are sufficient for at least 30 years. Following an extensive development and distribution programme, natural gas was first connected to homes and industry in Victoria in April 1969. All gas consumers in Melbourne, Geelong, Ballarat, Bendigo, Shepparton,

VICTORIA 159

Euroa, Benalla, Wangaratta, Wodonga, Albury and a number of towns near Melbourne, in the Latrobe Valley and in East Gippsland, are now using natural gas. At 30 June 1984 a total of 975,643 consumers were being supplied with it. During the period 1 July 1982 to 30 June 1983 a total volume of 5,646m. cu metres of gas was consumed in Victoria, including commercial sales and plant usage.

Natural gas and crude oil are conveyed from the producing fields to a large treatment plant at Longford in East Gippsland from where both hydrocarbons are distributed by a network of transmission lines to tank farms and city gate distribution points.

The crude oil is then distributed to refineries in Victoria by pipeline and to other States by seagoing tankers. Natural gas is distributed to residential and industrial consumers through a network of approximately 19,572 km of mains

Liquefied petroleum gas is now being produced after extraction of the propane and butane fractions from the untreated oil and gas

Brown Coal. Major deposits of brown coal are located in the Central Gippsland region and comprise approximately 94% of the total resources in Victoria The resource is estimated to be 108,000 megatonnes, of which about 35,000 megatonnes are economically winnable. It is young and soft with a water content of 60% to 70%. In the Latrobe Valley section of the region, the thick brown coal seams underlie an area from 10 to 30 km wide extending over approximately 70 kilometres from Yallourn in the west to the south of Sale in the east. It can be won continuously in large quantities and at low cost by specialized mechanical plant

About 54% of the resources occur in areas where the overburden over the uppermost seam is less than 30 5 metres while 95% is in areas with less than 91 4 metres of overburden. The current primary use of these reserves is to fuel the major base load electricity generating stations located at Morwell and Yalloum.

Land Settlement. Of the total area of Victoria (22 76m hectares), 14,063,683 hectares on 30 June 1982 were either alienated or in process of alienation. The remainder (8,696,317) constituted Crown land as follows. Perpetual leases, grazing and other leases and licences, 2,274,043, reservations including forest and timber reserves, water, catchment and drainage purposes, national parks, wildlife reserves, water frontages and other reserves, plus unoccupied and unreserved including areas set aside for roads, 6,422,274. Establishments with agricultural activity at 31 March 1982 numbered 48,608.

Minerals. The recorded production of certain metals and minerals raised in Victoria for the year 1982-83 was Gold, 115,000 grammes, value \$A1,370,000, coal, brown, 35m tonnes, value \$A150 8m

Agriculture. The following table shows the area under the principal crops and the produce of each for 3 seasons (in 1,000 units)

In 1983-84 there were 20,329 hectares of vines, yielding 82,973 tonnes of grapes for wine-making and 259,160 tonnes of grapes for drying or for table use. The area cut for green feed and silage covered 89,100 hectares, and orchards and vegetables, including potatoes and onions, occupied 45,364 hectares

At March 1984 there were in the State 3.5m. head of cattle, 24,632,399 sheep and 404,085 pigs. In 1983-84, 539,130 tonnes of fresh meat was produced. The wool produced in the season 1983-84 amounted to 142m. kg, valued at \$A382m. The quantity of butter produced in 1983-84 was 88 7m. kg

The gross value of Victorian primary production in (rural and non-rural) 1983-84 was \$A3,437m

# INDUSTRY AND TRADE

Industry. From the 1975-76 Census of Manufacturing Establishments onwards only a limited range of data—employment and wages and salaries—has been collected from single-establishment manufacturing enterprises with less than 4 persons employed. This procedure significantly reduces the statistical reporting obligations of small businesses. Data in respect of the larger manufacturiers provides reliable information for the evaluation of trends in the manufacturing sector of the economy. From the 1977-78 census, the classification of census units to industry is based on the 1978 edition of the Australian Standard Industrial Classification. The following data relates to manufacturing establishments owned by multi-establishment enterprises, and single-establishment manufacturing enterprises with 4 or more persons employed.

The total number of manufacturing establishments in Victoria in 1983–84 (figures for 1982–83 in brackets) was 8,404 (8,392). Persons employed, including working proprietors, on the last pay day in June were males 249,139 (247,629) and females 104,109 (102,050). Salaries and wages paid were \$A6,059m (\$A5,950m), excluding drawings of working proprietors. The cost of purchases, transfers in, and selected expenses was \$A18,405m (\$A17,060m) and sales, transfers out and other

operating revenue were \$A30,081 m. (\$A27,747 m.).

The preceding figures exclude gas and electricity producing and distributing establishments. In terms of persons employed the most important manufacturing activities were: Basic and fabricated metal products including transport equipment, other machinery and equipment, 137,649 (145,900), textiles, clothing and footwear, 49,883 (58,598); food, beverages and tobacco, 60,011 (51,450)

**Trade Unions.** There were 179 trade unions with a total membership of 805,900 operating in Victoria in Dec. 1984.

Commerce. The commerce of Victoria, exclusive of inter-state trade, is included in the statement of the commerce of Australia, see pp 108-10

The total value of the overseas imports and exports of Victoria, including bullion and specie but excluding inter-state trade, was as follows (in \$A1,000)

_	1979-80	1980-81	1981-82	1982-83	1983-84	1984-851

The chief exports in 1984-85 were Petroleum products and gases, textile fibres and their wastes, cereals and cereal preparations; dairy products, meat and meat preparations, road vehicles, and power generating machinery

#### COMMUNICATIONS

Roads. At 30 June 1982 there were 157,201 km of road open for general traffic consisting of 63,926 km of bituminous seal, etc., 47,905 km of waterbound macadam, gravel, etc., 23,503 km formed, but not paved, and 21,867 km not formed The number of registered motor vehicles (other than tractors) at 30 June 1983 was 2,257,700.

Railways. All the railways are the property of the State and are under the management of a 9-member governing board, appointed by, and responsible to, the Victorian Government.

At 30 June 1984, 5,780 km of government railway were open During the year 1982-83 the gross revenue amounted to \$A248,129,365 and the total working expenses to \$A680,409,404. 84,323,000 (estimate) passengers, 8,500,511 tonnes of freight and 69,117 tonnes of livestock were carried.

Aviation. During the year ended 31 Dec 1983 there were 65,259 aircraft movements at Melbourne (Tullamarine) airport. Passengers totalled 4 4m. on domestic flights (international, 919,836). Freight handled, 69,645 tonnes, domestic flights (42,877 international)

VICTORIA 161

# JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. There is a Supreme Court with a Chief Justice and 20 puisne judges. There are magistrates' courts, county courts, a court of licensing, and a bankruptcy court

1 So described on individual census schedules

Education. Education establishments in Victoria consist of 4 universities, established under special Acts and opened in 1855, 1961, 1967 and 1977, Colleges of Advanced Education, government schools (primary, primary-secondary, high and secondary technical, and further education colleges), and non-government schools

The University of Melbourne, founded in 1853, had, in 1984, 15,652 students and 1,546 academic staff

Monash University, founded in 1958 in an eastern suburb of Melbourne, had, in 1984, 13,809 students and 1,230 teaching and research staff

La Trobe University, founded in 1964 in a northern suburb of Melbourne, had 9,147 students and 603 academic staff in 1984

Deakin University (1974) near Melbourne had 6,345 students and 261 academic staff in 1984

Primary education of children of the ages of 6 to 15 years inclusive is free, secular and compulsory On 1 July 1984 there were 1,622 government primary schools, 77 special schools, 19 combined primary-secondary schools and 400 secondary schools (including both junior technical schools and high schools) There were 20,575 teachers with an enrolment of 322,336 pupils in primary and special grades, and 23,576 teachers with an enrolment of 250,277 pupils in secondary grades. In 1983 there were 181,482 students (excluding adult education programmes) enrolled in technical and further education schools and colleges.

Non-government Schools There were at 1 July 1984, 734 non-government schools, excluding commercial colleges, with 16,963 teachers and 241,739 pupils enrolled. Of these schools, 500 were Roman Catholic.

Social Services. Victoria was the first State of Australia to make a statutory provision for the payment of Age Pensions. The Act providing for the payment of such pensions came into operation on 18 Jan 1901, and continued until 1 July 1909, when the Australian Invalid and Old Age Pension Act came into force The Social Services Consolidation Act, which came into operation on 1 July 1947, repealed the various legislative enactments relating to age (previously old-age) and invalid pensions, maternity allowances, child endowment, and unemployment, and sickness benefits and while following in general the Acts repealed, considerably liberalized many of their provisions: it has since been amended. On 29 June 1984 there were 368,493 aged and 86,909 invalid pensioners in Victoria, and the amount paid in pensions, including payments to wives of invalid pensioners, during 1983–84 was \$A1,723.5m.

The number of disability pensions (members of the forces and their dependants) payable in Victoria on 29 June 1984 was 99,079, and the number of service pensions was 92,208 The amount paid in war and service pensions by the Federal Government during 1983-84 was \$A492.5m.

Under the Australian Unemployment and Sickness Benefit Act 1944, there were 106,807 persons receiving benefits at June 1983 (excluding migrants in accommo-

dation centres) and the amount paid in benefits totalled \$A688.9m. in the year ended 30 June 1984.

The number of widows' pensions in force in Victoria at 29 June 1984 was 45,660, and the total amount paid in allowances during the year was \$A230 7m

# WESTERN AUSTRALIA

HISTORY. In 1791 Vancouver, in the *Discovery*, took formal possession of the country about King George Sound. In 1826 the Government of New South Wales sent 20 convicts and a detachment of soldiers to King George Sound and formed a settlement then called Frederickstown. In 1827 Captain (afterwards Sir) James

Stirling surveyed the coast from King George Sound to the Swan River, and in May 1829 Captain (afterwards Sir) Charles Fremantle took possession of the territory. In June 1829 Captain Stirling, newly appointed Lieut.-Governor, founded the colony now known as the State of Western Australia. On 1 Jan 1901 Western Australia became one of the 6 federated States within the Commonwealth of Australia.

AREA AND POPULATION. Western Australia lies between 113° 09′ and 129° E long and 13° 44′ and 35° 08′ S. lat; its area is 2,525,500 sq. km

The population at each census from 1933 was as follows 1

	Males	Females	Total		Males	Females	Total
1933	233,937	204,915	438,852	1966	432,569	415,531	848,100
1947	258,076	244,404	502,480	1971	534,100	509,000	1,043,100

1961	375,452	361,177	736.629	1981	656,400	642,700	1.299.100

<sup>1961</sup> and earlier exclude full-blood Aboriginals, from 1966 figures refer to total population (i e., including Aboriginals)

Of the census population in 1981, 910,666 were born in Australia Married persons numbered 585,465 (285,224 males and 283,241 females), widowers, 10,088, widows, 45,465, divorced, 16,180 males and 19,171 females, never married, 318,273 males and 267,761 females. The number of males under 21 was 240,210 and of females 228,155

Perth, the capital, had an estimated resident population of 983,420 at June 1984 Of this, the area administered by the City of Perth had a population of 82,600 while the population in the area for which the City of Fremantle is responsible (which includes the chief port of the State) was 23,480

Principal urban centres outside the metropolitan area, with population at 30 June 1984 (estimate) Bunbury, 23,940, Geraldton, 19,840, Kalgoorlie-Boulder, 22,200, Albany, 13,990, Northam, 7,040, Narrogin, 5,310

CONSTITUTION AND GOVERNMENT. In 1870 partially representative government was instituted, and in 1890 the administration was vested in the Governor, a Legislative Council and a Legislative Assembly The Legislative Council was, in the first instance, nominated by the Governor, but it was provided that in the event of the population of the colony reaching 60,000, it should be elective in 1893 this limit of population being reached, the Colonial Parliament amended the Constitution accordingly.

The Legislative Council consists of 34 members, 2 members representing each of the 17 electoral provinces. Each member is elected for a term of 6 years, one-half of the members retiring every 3 years.

There are 57 members of the Legislative Assembly, each member representing one of the 57 electoral districts of the State. Members are elected for the duration of the Parliament, normally 3 years. The qualifications applying to candidates and electors are identical for the Legislative Council and the Legislative Assembly. A candidate must have resided in Western Australia for a minimum of 12 months, be at least 18 years of age and free from legal incapacity, be an Australian citizen, and be enrolled, or qualified for enrolment, as an elector. A judge of the Supreme Court, the Sheriff of Western Australia, an undischarged bankrupt or a debtor against whose estate there is a subsisting order in bankruptcy may not be elected to Parliament. No person may hold office as a member of the Legislative Assembly and the Legislative Council at the same time. An elector must be at least 18 years of

age, be an Australian citizen free from legal incapacity, must have resided in the Commonwealth of Australia for 6 and in Western Australia for 3 months continuously and in the electoral district for which he claims enrolment for a continuous period of 1 month immediately preceding the date of his claim. Enrolment is compulsory for all qualified persons except Aboriginal natives of Australia, who are entitled but not required to enrol. Voting at elections is on the preferential system and is compulsory for all enrolled persons.

Ordinary members of the legislature are paid a salary of \$A40,800 a year, with an additional electorate allowance, ranging from \$A10,681 to \$A25,954 according to location of electorate Members are entitled to free travel on Western Australian government railways and on the Metropolitan (Perth) Passenger Transport Trust omnibus and ferry services, and, by arrangement, once every year on government railways in other States All members of Parliament contribute to superannuation

benefits

The Premier receives a salary, including an electorate allowance, of \$A95,830, the Deputy Premier \$A85,228, the Leader of the Government in the Legislative Council \$A82,220, and all other Ministers \$A76,546--91,819 according to location of electorate.

The Legislative Assembly, elected on 19 Feb 1983, is composed as follows Australian Labor Party, 32, Liberal Party, 22, National Party, 2, Independent, I The Legislative Council, one-half of which was elected on the same day, is composed of 18 Liberal Party, 13 Australian Labor Party, 1 National Country Party, I National Party, 1 National Party of Australia.

Local Government The only unincorporated area in mainland Western Australia is King's Park, a public reserve of about 403 hectares in Perth Including the lord-mayoralty of Perth there were 13 cities, 12 towns and 114 shires at 30 June 1985. The executive body in each of these districts is normally an elective council, presided over by a mayor (city and town) or a president (shire), but in certain

circumstances it may be a commissioner appointed by the Governor Their functions include road construction and repair, the provision of parks and recreation grounds, the administration of building controls and local services such as health and library services. Finance is derived largely from rates levied on property owners as well as charges for services and government grants (mainly for road construction)

#### **ECONOMY**

**Budget.** The revenue and expenditure (in \$A) of Western Australia in years ended 30 June, are given as follows

	1982	1983	1984	1985 i
Revenue	2,061,893,781	2,324,874,369	2,660,758,263	2,841,100,000
Expenditure	2,061,893,781	2,339,070,164	2,659,761,394	2,841,100,000
		1 Estimates		

Main items of revenue in 1983-84 Railways (\$A194,201,352), taxation (\$A584,636,328), lands, timber and mining (\$A152,478,798), public utilities other than railways (\$A63,196,611), from Federal funds (\$A1,266,189,749) Western Australia had a net loan liability of \$A1,614,779,554 on 30 June 1984, the charge for the year being \$A187,123,482

Banking. There are 8 trading banks in Western Australia including the Commonwealth Trading Bank and The Rural and Industries Bank of Western Australia. In the June quarter, 1985, the average of customers' balances was \$A3,987.9m and average advances \$A3,669.4m

At 30 June 1985, the 6 savings banks held deposits of \$A2,402 8m, in 2,051,681 accounts.

# **ENERGY AND NATURAL RESOURCES**

Minerals. The mining industry has been for many years of considerable significance in the Western Australian economy. Until the mid-1960s the major mineral produced was gold. However, in recent years gold has been displaced by iron ore in terms of value, and has at various times fallen behind nickel concentrates, bauxite, oil, mineral sands and salt.

The total ex-mine value of minerals from mining and quarrying in the State in 1983-84 was \$A2,584 3m. Principal minerals produced in 1983-84 were: Iron ore, 72 6m. tonnes, value \$A1,166 3m, crude oil, 1 29m kilolitres; gold bullion, 3i 1m grammes, value \$A362 9m, mineral sands, 1 33m tonnes, value, \$A87 9m.; black coal, 3 9m tonnes, value \$A106 3m., salt, 4 5m tonnes, value \$A65 1m; tin concentrates, 654 tonnes, value \$A6 35m, nickel concentrates, 505,947 tonnes, natural gas, 1,010 8m kilolitres, diamonds, 6 9m carats; copper concentrates, 42,440 tonnes and zinc concentrates, 59,387 tonnes

Land Settlement. Up to 31 Dec 1983, of the entire area of the State (252 55m hectares) 17 45m hectares had been alienated, on that date 1 7m hectares were in process of alienation, the area alienated and in process of alienation thus amounting to 19 15m hectares. # INDUSTRY AND TRADE

Industry. Perhaps the most significant change in Western Australian manufacturing came when the basis for an integrated industrial complex was established with the opening of a large oil refinery at Kwinana in 1954. Two of the plants in the Kwinana complex are directly concerned with metals processing. An alumina refinery commenced operations in 1964 and a nickel refinery commenced operations in 1970. Major mineral processing plants outside Kwinana also contribute to Western Australia's manufacturing industry. A plant at Australiand, near Bunbury, which extracts titanium dioxide from ilmenite has been in operation since 1963. A nickel smelter commenced operations at Kalgoorlie in 1973 and another alumina refinery, at Pinjarra, began operating in 1972. In addition, two new alumina refineries are now in operation, one at Wagerup and the other at Worsley.

Besides providing for heavy industry directly associated with minerals processing, the mining development of recent years, especially on the North West Shelf, has also given impetus to other manufacturing activity, particularly to industries associated with the provision of capital equipment and other manufactured goods

for the major mining projects.

The following table shows manufacturing industry statistics for 1983–84 1.

Labour. A Court of Arbitration was established in Western Australia in 1901 under the provisions of the 'Industrial Conciliation and Arbitration Act 1900' The Court of Arbitration was replaced, with effect from 1 Feb 1964, by the Western Australian Industrial Appeal Court and The Western Australian Industrial Commission, authorities constituted in terms of the *Industrial Arbitration Act 1912* These authorities continue to operate under the provisions of the *Industrial Arbitration Act 1979* which was proclaimed on 1 March 1980

The Western Australian Industrial Appeal Court consists of 3 Judges, one of whom is the Presiding Judge. The members are nominated by the Chief Justice of Western Australia. An appeal lies to the Court from decisions of the President of the Western Australian Industrial Commission, the Full Bench or the Commission in Court Session but only on the ground that the decision is erroneous in law or is in excess of jurisdiction.

The Western Australian Industrial Commission consists of a President, a Chief Industrial Commissioner, a Senior Commissioner, and 'such number of other Commissioners as may, from time to time, be necessary'. There were 5 'other Commissioners' at 1 Jan 1985 A person shall not be appointed as President unless he is qualified to be a Judge, and on appointment he is entitled to the status of a Puisne Judge The President or a Commissioner sitting or acting alone constitutes the Commission and may exercise the appropriate powers of the Commission

The Commission can inquire into any industrial matter and make an award, order or declaration relating to such matter 'Industrial matter' means any matter affecting or relating to the work, privileges, rights, or duties of employers or employees in any industry and includes any matter relating to the wages, salaries, allowances, or other remuneration of employees or the prices to be paid in respect of their employment; the hours of employment, sex, age, qualification or status of employees and the mode, terms and conditions of employment including conditions which are to take effect after the termination of employment. The Commission may also make inquiries where industrial action has occurred or is likely to occur

The Commission in Court Session is constituted by not less than 3 Commissioners sitting or acting together, and may make General Orders, hear matters referred by the Commission, and hear appeals from decisions of Boards of Reference

The Full Bench is constituted by not less than 3 members of the Commission, 1 of whom is the President, and may hear matters referred by the Commission on questions of law, and appeals from decisions of the Commission and Industrial Magistrates

The following table shows details of the number of industrial awards, unions and members registered with The Western Australian Industrial Commission

Weights and Measures. The metric system of weights and measures is officially in use.

## **ENERGY AND NATURAL RESOURCES**

Electricity. Production (1983) 1,986m. kwh.

Oil. In 1931 oil was discovered. Operations were conducted by the Bahrain Petroleum Co., registered in Canada but owned by US interests, under a concession granted by the Shaikh. Production of crude oil in 1983 was 15.3m. bbls. A large oil refinery on Bahrain Island, besides treating crude oil produced locally, also processes oil from Saudi Arabia transported by pipeline.

In 1975 the Bahrain Government assumed a direct 60% interest in the Bahrain oilfield and related crude oil facilities of BAPCO. Bahrain's gas reserves are 100% government-owned.

Bahrain's oil reserves will be exhausted by the end of the century.

Gas. There is an abundant supply of natural gas with known reserves of 9,000,000m. cu ft. Production, 1984, 196,000m cu ft

Water. Water is obtained from artesian wells and desalination plants and there is a piped supply to Manama, Muharraq, Isa town, Rifa'a and most villages.

### INDUSTRY AND TRADE

Agriculture. The 6-year agricultural plan, commissioned in 1982, aims to increase food production from 6-16% of total domestic requirements and to improve conservation of natural water and irrigation techniques

There are about 900 farms and small holdings (average 2 5 hectares) operated by about 2,500 farmers who produce a wide variety of fruits and vegetables. The major crop is alfalfa for animal fodder. Ninety tonnes of dates a year are processed and a new processing plant will produce a further 300 tonnes in 1985.

Over 30 poultry farms produced about 2,000 tonnes of domestic poultry in 1984 75% of egg requirements are met by domestic production of 61 2m eggs a year, and 40% of broiler needs.

Livestock (1984) Cattle, 6,000, camels, 1,000; sheep, 7,000, goats, 15,000, poultry 1 m.

Fisheries. In 1982 the government launched a 4-year plan with a budget of approximately BD9m, to revitalize the fishing industry

In 1983 total landings weighed 4,812 tonnes with a value of BD4 3m

Industry. Bahrain is being developed as a major manufacturing state, the first important enterprise being the Aluminium Bahrain (ALBA), a company whose original shareholders included the Bahrain Government and British, Swedish, Federal German and US interests. In 1975, the government acquired a majority shareholding in the enterprise. The aluminium smelter operation is the largest non-oil industry in the Gulf Ancillary industries developed around aluminium smelting include the production of aluminium powder. Other projects at present under consideration include the further development of marine industries. The Arab Shipbuilding and Repair Yard (ASRY), commissioned in 1977, is now in service. The dry dock can handle up to 50 tankers (500,000 DWT each) annually A US\$207m iron ore pelletizing plant was inaugurated in Dec. 1984 and a US\$400m, petrochemical complex will go on-stream in 1985.

In addition to the traditional minor industries such as boat-building, weaving, pottery, etc., other modern industries have developed, which include the manufacture of building materials, furniture, soft drinks, drinking straws, paper bags, woollen garments, plastic and other consumer goods

The pearling industry for which Bahrain used to be famous has considerably declined Only about 10 boats visit the pearl banks each year, as compared with the 600-1,000 that were employed 30 years ago

Employment. Total work force (estimate 1982) 141,110, of which 42% Bahraini

Commerce. In 1984 total imports were BD1,324m and total exports were BD1,179m. Refined petroleum accounted for almost 86% of exports; crude oil accounted for 47% of merchandise imports.

The major non-oil imports in 1984 were machinery and transport, BD288m.; classified manufactured goods, including Alumina, BD143m.; chemicals, BD60m., food and live animals, BD83m., and miscellaneous manufactured articles, BD84m. The chief sources of supply were Japan (18% of total imports); UK (13%); Federal Republic of Germany (13%), and Australia (11%).

The chief non-oil exports in 1984 were classified manufactured goods, including aluminium, BD115m (72% of total exports), and machinery and transport, BD27m. (17%). The main markets were the Arab countries (43% of total exports), Asian countries (39%), and European countries (4%).

Import of arms and ammunition and telecommunication equipment is subject to

special permission; the sale of alcoholic liquor is restricted and the import of cultured pearls is forbidden.

Total trade between Bahrain and UK (British Department of Trade returns, in £1,000 sterling):

<del>-</del> .	1981	1982	1983	1984	1985
Imports to UK	16,713	35,459	37,488	28,240	45,219
Exports and re-exports from UK	102,337	152,272	150,264	138,614	161,560

# Royaume de Belgique-Koninkrijk België

HISTORY. The kingdom of Belgium formed itself into an independent state in 1830, having from 1815 been part of the Netherlands The secession was decreed on 4 Oct. 1830 by a provisional government, established in consequence of a revolution which broke out at Brussels, on 25 Aug. 1830. A National Congress elected Prince Leopold of Saxe-Coburg King of the Belgians on 4 June 1831, he ascended the throne 21 July 1831

By the Treaty of London, 15 Nov 1831, the neutrality of Belgium was guaranteed by Austria, Russia, Great Britain and Prussia. It was not until after the signing of the Treaty of London, 19 April 1839, which established peace between King Leopold I and the King of the Netherlands, that all the states of Europe recognized the kingdom of Belgium. In the Treaty of Versailles (28 June 1919) it is stated that as the treaties of 1839 'no longer conform to the requirements of the situation', these are abrogated and will be replaced by other treaties

AREA AND POPULATION. Belgium is bounded north by the Netherlands, north-west by the North Sea, west and south by France, east by Federal Republic of Germany and Luxembourg Belgium has an area of 30,519 sq km (11,778 sq miles) The Belgian exclave of Baarle-Hertog in the Netherlands has an area of 7 sq km, and a population (1 Jan 1985) of 1,086 males and 1,009 females.

By an agreement, 23 Sept 1956, the frontier with Germany was slightly read-

CONSTITUTION AND GOVERNMENT. According to the constitution of 1831, Belgium is a constitutional, representative and hereditary monarchy. The legislative power is vested in the King, the Senate and the Chamber of Representatives. The royal succession is in direct male line in the order of primogeniture. By marriage without the King's consent, however, the right of succession is forfeited, but may be restored by the King with the consent of the two Chambers. No act of the King can have effect unless countersigned by one of his Ministers, who thus becomes responsible for it. The King convokes, prorogues and dissolves the Chambers. In default of male heirs, the King may nominate his successor with the consent of the Chambers. If the successor be under 18 years of age the two Chambers meet together for the purpose of nominating a regent during the minority.

Those sections of the Belgian Constitution which regulate the organization of the legislative power were revised in Oct 1921 For both Senate and Chamber all elec-

tions are held on the principle of universal suffrage

The Senate consists of members elected for 4 years, partly directly and partly indirectly. The number elected directly is equal to half the number of members of the Chamber of Representatives. The constituent body is similar to that which elects deputies to the Chamber; the minimum age of electors is 18 years, and the minimum length of residence required is 6 months. Women were given the suffrage at parliamentary elections on 24 March 1948. In the direct elections of members of both the Senate and Chamber of Representatives the principle of proportional representation was introduced by law of 29 Dec. 1899.

Senators are elected indirectly by the provincial councils, on the basis of 1 for 200,000 inhabitants. Every addition of 125,000 inhabitants gives the right to 1 senator more. Each provincial council elects at least 3 senators. There are at present 51 provincial senators. No one, during 2 years preceding the election, must have been a member of the council appointing him. Senators are elected by the Senate itself in the proportion of half the preceding category. The senators belonging to these two latter categories are also elected by the method of proportional representation. All senators must be at least 40 years of age. They receive 900,000 francs per annum. Sons of the King, or failing these, Belgian princes of the reigning branch of the royal family, are by right senators at the age of 18, but have no voice in the deliberations till the age of 25 years, this prerogative is hardly ever used.

The members of the Chamber of Representatives are elected by the electoral body. Their number, at present 212 (law of 3 April 1965), is proportional to the population, and cannot exceed one for every 40,000 inhabitants. They sit for 4 years. Deputies must be not less than 25 years of age, and resident in Belgium.

Each deputy has an annual allowance of 900,000 francs Senators and deputies

have also free railway passes

The Senate and Chamber meet annually in October and must sit for at least 40 days, but the King has the power of convoking extraordinary sessions and of dissolving them either simultaneously or separately. In the latter case a new election must take place within 40 days and a meeting of the chambers within 2 months.

An adjournment cannot be made for a period exceeding 1 month without the consent of the Chambers

After the revision of the Constitution by the laws of 24 Dec 1970 and 28 July 1971 establishing three regions and two cultural councils, legislation on 'preparatory regionalization' was enacted in July 1974. Further revisions of the functions of the Cultural Councils took place on 8 and 9 Aug 1980. The Cultural Councils became Community Councils with greater authority and the Regional Councils became competent on economic matters.

Parliament was dissolved on 2 Sept. 1985 and general elections were held on 13 Oct 1986

Local Government The republic is divided into 9 departments, established in Jan 1826, with 98 provinces administered by sub-prefects, and 1,272 cantons administered by corregidores. The supreme authority in each department is vested in a prefect appointed by the President.

**DEFENCE.** Bolivia is divided into 8 military districts, with divisional head-quarters in Viacha, Oruro, Villa Montes, Camiri, Roboré, Riberalta, Santa Cruz, Cochabamba, regional HQ are located at La Paz, Sucre, Tarija, Potosí, Trinidad and Cobija. There is selective conscription for 12 months at the age of 18 years

Army. The Army consists of 13 infantry, 6 cavalry, 2 mechanized, 3 artillery, 2 ranger and 1 parachute regiments, and 2 armoured anti-tank and 6 engineer battalions. Equipment, 24 EE-9 Cascavel armoured cars Strength (1986) 20,000.

Navy. A small Navy exists for river and lake patrol comprising 40 patrol craft operating in Lake Titicaca, Beni river systems and the Bolivia-Paraguay 6,000-mile river systems, 1 transport (a gift from Venezuela for use to and from Bolivian free zones in Argentina and Uruguay) and 2 hospital ships (one a gift from USA). There are two armed T-6 patrol aircraft and a Cessna light transport.

Personnel in 1986 totalled 4,000 officers and men including marines. Most training of officers and petty officers is carried out in Argentina. The junior ratings are almost entirely converted soldiers.

Air Force. The Air Force, established in 1923, has 3 combat-capable squadrons, two equipped with T-33 armed jet trainers, and one with Hughes 500 helicopters, for counter-insurgency operations. A search and rescue helicopter squadron has 6 Brazilian-assembled Gaviãos (Lamas) Other types in service include Brazilian T-23 Uirapuru and American T-41 primary trainers, Italian SF 260M and Swiss turboprop-powered Pilatus PC-7 basic trainers, 1 Electra four-turboprop transport, 6 Fokker F 27 and 4 Israeli-built Arava twin-turboprop light transports, 1 Convair 580 twin-turboprop transport, 5 C-130H/L-100-30 Hercules, 6 C-47 and 5 Convair 440 piston-engined transports with which a military airline service is operated, about 30 Cessna single- and twin-engined light aircraft and helicopters Personnel strength (1986) about 4,000

#### INTERNATIONAL RELATIONS

Membership. Bolivia is a member of UN, OAS, LAIA (formerly LAFTA), the Andean Group and the Amazon Pact

External Debt. The contracted external debt was US\$3,227 1m, Dec 1983

#### **ECONOMY**

**Budget.** Revenue and expenditures in 1m. pesos bolivianos balanced as follows. In 1982 there was a projected budget deficit of \$b 110,959m

Currency. On 1 Jan 1963 the peso boliviano (\$b) was introduced Exchange rates were \$b 1,855,000 = US\$1 and \$b 2,643 785 =£1 in March 1986

Banking. The Banco Central de Bolivia was established in 1911 as Banco de la Nacion Boliviana and re-organized in 1928. The Bank was nationalized in 1939. At 30 Dec. 1982 the Bank's gross gold and foreign exchange reserves amounted to US\$214.1m.

Weights and Measures. The metric system of weights and measures is used by the administration and prescribed by law, but the old Spanish system is also employed

#### ENERGY AND NATURAL RESOURCES

Electricity. Electric power production is expanding Installed capacity was estimated at 428,595 kw at the end of 1978. Estimated production from all sources (1978), 1,340,996 mwh

Oil and Gas. There are petroleum and natural gas deposits in the Santa Cruz-Camiri areas. A pipeline for crude oil connects Caranda (Santa Cruz) with the Pacific coast at Arica (Chile) and a natural gas pipeline to Argentina was inaugurated in May 1972. All production, refining and internal distribution is now in the hands of Yacimientos Petroliferos Fiscales Bolivianos (the State Petroleum Organization). Total production of petroleum and condensates in 1981 was estimated at 8 1m bbls Production of natural gas in 1981 was estimated at 175,478m cu ft

Minerals. Mining is the most important industry, accounting for about 69% of the foreign-exchange earnings. About half the mineral mined is tin. Tin mines are at altitudes of from 12,000 to 18,000 ft, where few except native Indians can stand the conditions, transport is costly. Bolivian tin is extracted by shaft-mining, frequently very deep, the ore yields only 0.7% or less of tin and is very refractory, tin is exported in concentrates called barrilla, through Pacific ports for refining. Smelting capacity was increased in 1980 and it is planned to smelt all the ores from the

State Mining Co. but complex ores still have to be exported for smelting Tin production in 1981 was 27,562 tonnes

The state industry is being run by the Corporación Minera de Bolivia (COMIBOL) employing about 23,000 in mining and administrative capacities.

Alluvial gold deposits in the Alto Beni region are being exploited. Co-operative mines at Tipuani produced 770 kg in 1978

Foreign firms are seeking exploration rights for uranium and a small uranium processing plant was opened in Oct 1980 at Cotaje (Potosí province) Large deposits of salt are found near Lake Poopó and in the south of Bolivia

Agriculture. The extensive and still largely undeveloped region east of the Andes comprises about three-quarters of the entire area of the country, and since the agrarian reform of 1952 sugar-cane, rice and cotton have been grown in this *Oriente* in increasing abundance, reaching self-sufficiency in all these products. Output in tonnes in 1984 was Sugar-cane, 2,195,000, rice, 194,000, coffee, 18,000, maize, 489,000, potatoes, 650,000, wheat, 69,000, cotton (lint), 3,000, cocoa, 3,000

The public lands of the State have an area of about 245,000 sq. miles, of which 104,000 sq. miles are reserved for special colonization.

Livestock: In 1984 there were 4.3m head of cattle, mostly in the Santa Cruz and Beni departments, some are exported to Peru, horses, 420,000, asses 800,000; pigs, 1.7m, sheep, 9.2m, goats, 3.2m, poultry, 10m

Forestry. Tropical forests with woods ranging from the 'iron tree' to the light palo de halsa are beginning to be exploited. In 1962 the Forestry Service announced proved reserves of 46.3m hectares, plus a similar amount available for immediate development.

#### INDUSTRY AND TRADE

Industry. There are few industrial establishments and the country relies on imports for the supply of many consumer goods. However a new investment law passed in 1971 provides incentives and protection for new investment, both foreign and domestic, and for reinvestment in various fields including manufacturing industry, mining, agriculture, construction and tourism.

Labour. The Ministry of Planning estimated economically active population in 1970 at 1 48m, of whom 1m were employed in agriculture, 118,300 in industrial manufacture, 35,100 in construction, 74,000 in commerce and finance, 65,000 in central and local government, 47,800 in mining and 41,900 in transport. The ban on trade unions, imposed in 1974, was lifted in 1978 but re-imposed in 1980.

Commerce. The value of imports and exports in US\$1,000 has been as follows

	1979	1980	1981	1982	1983	1984
Imports	984,000	833,160	917,081	496,084	532,342

**Tourism.** There were 155,000 visitors in 1980

#### **COMMUNICATIONS**

Roads. A highway, in poor condition, 497 km long, runs from Cochabamba to the lowland farming region of Santa Cruz. La Paz and Oruro are also connected by a metalled road Of other main highways (unmetalled) there is one from La Paz through Guaqui into Peru, another from La Paz, via Oruro, Potosí, Tarija and Bermejo, into Argentina, with branches to Cochabamba, Sucre and Camiri, passable throughout the year except at the height of the rainy season, and others from Villazón to Villa Montes via Tarija, passable during the dry season. The total length of the road system is 37,708 km (1977). Motor vehicles in use in 1980, 134,790, including 65,540 cars, 69,250 heavy goods vehicles and buses and 1,133 agricultural tractors.

Railways. In 1964 Bolivian National Railways (ENFE) was formed by the amalgamation of the Bolivian Government Railways, Bolivian Railway Co. and the Bolivian section of the Antofagasta (Chili) & Bolivia Railway. The Guaqui-La Paz Railway, formerly operated by Peru, became part of ENFE in 1973. Access to the Pacific is by 3 routes to Antofagasta and Arica in Chile, and to Mollendo in Peru via Guaqui, the Lake Titicaca train ferry to Puno (Peru), then rail to the coast. Construction began in 1978 of a 150-km line linking. Puno with Desaguadero on the Bolivian border which would by-pass the train ferry, though gauge difference would still prevent through running to Peru. Current network totals 3,538 km of metre gauge, comprising unconnected Eastern (1,386 km) and Western (2,152 km) systems. In 1984 the railways carried 1.5m passengers and 800,000 tonnes of freight.

Aviation. The national airline is Lloyd Aéreo Boliviano. The airline runs regular services between La Paz and Lima, São Paulo, Buenos Aires, Miami, Caracas, Salta and Arica as well as many internal services. Eastern Airways runs regular flights between La Paz, Buenos Aires, Santiago and Asunción linking Bolivia to the USA. Lufthansa links Bolivia with Europe. Other airlines serving Bolivia are Aerolineas Argentinas, Cruzeiro, Aero Peru and Lan Chile.

Shipping. Traffic on Lake Titicaca between Guaqui and Puno is carried on by the steamers of the Peruvian Corporation About 12,000 miles of rivers, in 4 main systems (Beni, Pilcomayo, Titicaca-Desaguadero, Mamoré), are open to navigation by light-draught vessels

Post and Broadcasting. In Bolivia there were, in 1978, 458 post offices, of these, 205 provided telegraph and telephone services together with a further 245 offices for telegraph and telephone service only. There is telephone service in the cities of La Paz, Cochabamba, Oruro, Sucre, Potosí, Santa Cruz, Tarija, Camiri, Tupiza, Villazon, Riberalta and Trinidad with (1983), 204,747 telephones. There are about 119 broadcasting stations, of which 7 are state-owned. There is a commercial government television service. There are 4 private television stations and 1 University station (educational channel) in La Paz.

Newspapers. There were (1984) 7 daily newspapers in La Paz, 2 in Oruro, and 1 in Cochabamba Several other towns have regular newspapers devoted to local news,

but most of them appear only a few times a week. An economic monthly journal Revista Economica and 4 daily newspapers are produced in Santa Cruz.

### JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Justice is administered by the Supreme Court, superior district courts (of 5 or 7 judges) and courts of local justice. The Supreme Court, with headquarters at Sucre, is divided into two sections, civil and criminal, of 5 justices each, with the Chief Justice presiding over both. Members of the Supreme Court are chosen on a two-thirds vote of Congress.

Religion. The Roman Catholic is the recognized religion of the state; the free exercise of other forms of worship is permitted. The Catholic Church is under a cardinal (in Sucre), an archbishop (in La Paz), 6 bishops (Cochabamba, Santa Cruz, Oruro, Potosí, Riberalta and Tarija) and vicars apostolic (titular bishops resident in Cueva, Trinidad, San Ignacio de Velasco, Riberalta and Rurrenabaque)

By a law of 11 Oct 1911 all marriages must be celebrated by the civil authorities Divorce is permitted by a law enacted on 15 April 1932

Education. Primary instruction is free and obligatory between the ages of 6 and 14 years. Estimates for 1974 show that 989,858 children between 6 and 14 years attended school

At Sucre, Oruro, Potosí, Cochabamba, Santa Cruz, Tarija, Trinidad and La Paz are universities; La Paz is the most important of them while the San Francisco Xavier University at Sucre is one of the oldest in America, founded in 1624

Health. In 1972 there were 2,143 doctors

# **BOTSWANA**

Capital Gaborone
Population 1 05m. (1984)
GNP per capita US\$920 (1983)

HISTORY. In 1885 the territory was declared to be within the British sphere, in 1889 it was included in the sphere of the British South Africa Company, but was never administered by the company; in 1890 a Resident Commissioner was appointed, and in 1895, on the annexation of the Crown Colony of British Bechuanaland to the Cape of Good Hope, the British Government was in favour of transferring the Protectorate to the BSA Company, but the three major chiefs of the Bakwena, the Bangwaketse and the Bamangwato went to England to protest against this proposal, and agreement was reached that their country should remain a British Protectorate if they ceded a strip of land on the eastern side of the country for railway construction. This railway was built in 1896–97.

On 30 Sept 1966 the Bechuanaland Protectorate became an independent and sovereign member of the Commonwealth under the name of the Republic of Botswana

AREA AND POPULATION. Botswana comprises the territory lying between the Molopo River on the south and the Zambezi on the north, and extending from the Transvaal Province and Zimbabwe on the east to South-West Africa on the west Area about 222,000 sq miles (582,000 sq km), population, estimate 1984, was 1,050,216 (census, 1981, 941,027)

The main business centres (with estimated population, 1984) are Gaborone (79,400), Francistown (35,960), Selebi-Phikwe (32,480), Serowe (28,980), Kanye (23,400), Lobatse (22,030), Mochudi (21,280), Molepolole (23,810), Mahalapye (25,370), Maun (17,280), Palapye (11,750), Orapa (5,760), Jwaneng (7,410)

The seat of government is at Gaborone.

The official language is English, the national language is Setswana

CLIMATE. Most of the country is sub-tropical, but there are arid areas in the south and west In winter, days are warm and nights cold, with occasional frosts Summer heat is tempered by prevailing north-east winds Rainfall comes mainly in summer, from Oct to April, while the rest of the year is almost completely dry with very high sunshine amounts Gaborone Jan 79°F (26 1°C), July 55°F (12 8°C) Annual rainfall 21" (538 mm)

CONSTITUTION AND GOVERNMENT. The Constitution of the republic is based on the Constitution which came into effect in March 1965, with some minor alterations

The executive rests with the President of the Republic who is responsible to the National Assembly.

The National Assembly consists of 36 members (32 elected by universal suffrage, 4 nominated by the President, the Attorney-General and the Speaker ex-officio) The general election, held in Sept 1984, returned 29 members of the Botswana Democratic Party, 4 Botswana National Front and 1 Botswana People's Party.

The President is an ex-officio member of the Assembly If the President is already a member of the National Assembly, a by-election will be held in the constituency of that member

There is also a House of Chiefs to advise the Government. It consists of the Chiefs of the 8 tribes who were autonomous during the days of the British protectorate, and 4 members elected by and from among the sub-chiefs in 4 districts.

The first President of Botswana, who was re-elected 3 times, was Sir Seretse Khama, KBE, who died 13 July 1980

President of the Republic Dr Quett Ketumile Joni Masire (re-elected 1984) In Sept 1985 the Cabinet was as follows:

National flag Light blue with a horizontal black stripe, edged white, across the centre

Local Government Local government is carried out by 9 district councils and 4 town councils Revenue is obtained mainly from local income tax, levied on all inhabitants in the area, from rates in the towns and from central government subventions in the districts

#### **DEFENCE**

Army. A defence force has been created for border control and comprises 1 infantry battalion, group, strength, total armed forces (1986) 2,850

Air Force. Equipment includes 5 Britten-Norman Defender armed light transports for border patrol, counter-insurgency and casualty evacuation duties, 5 Bulldog piston-engined basic trainers, 2 Skyvan turboprop passenger/cargo transports, 2 Trislander 3-engined transports and 2 Cessna 152 light aircraft. Personnel total about 150.

#### INTERNATIONAL RELATIONS

Membership. Botswana is a member of UN, OAU, SADCC, the Commonwealth and is an ACP state of EEC

#### **ECONOMY**

**Planning.** The Development Plan 1985–91 envisages a total capital expenditure of P1.200m.

**Budget.** Revenue and expenditure (in 1m Pula) for financial years ending 31 March

1981-82

1983-84

Expenditure and net lending	364	414	439

Currency. The currency was formerly the South African Rand but in Aug 1976 a new currency, the *pula*, was introduced (P2 012=£1 sterling and P1 867=US\$1 in Feb 1985)

Banking. The Standard Bank Ltd and Barclays Bank International have branches in Francistown, Lobatse, Mahalapye, Maun and Gaborone and about 46 agencies throughout the country A government-financed National Development Bank was founded in 1964 The Bank of Credit and Commerce (Botswana) Ltd opened in Nov 1982

#### NATURAL RESOURCES

Water. Surface water resources are about 18,000m cu metres a year Nearly all flows into northern districts from Angola through the Okavango and Kwando river systems. The Zambezi, also in the north, provides irrigation in Chobe District. In the south-east, there are dams to exploit the ephemeral flow of the tributaries of the Limpopo. In 80% of the land there is no surface water, and must be served by boreholes.

Electricity. The Botswana Power Corporation has two divisions; Southern supplies

power from a 26 mw power station and a 30 mw transmission line from the Republic of South Africa, Shashe division supplies industry and local consumers from an 80 mw power station and from small diesel power stations.

Minerals. An important part of government revenue comes from the diamond mines at Orapa and Jwaneng and the nickel-copper complex at Selebi-Phikwe An open-pit coalmine has been developed at Morupule Mineral production 1984 Diamonds, 12 9m carats (value P880,745,000), copper-nickel, 51,845 tonnes (P71,661,000), coal, 392,854 tonnes (P5,518,000)

Mineral resources in north-east Botswana are being investigated, including salt and soda ash on the Sua Pan of the Makgadikgadi Salt Pans, nickel-copper at Selkirk and Phoenix, copper south of Maun and close to Ghanzi, and coal at Mmamabula.

Agriculture. Cattle-rearing is the chief industry, and the country is more a pastoral than an agricultural one, crops depending entirely upon the rainfall Increasing numbers of boreholes are being established where underground supply is adequate. However the rural economy is particularly vulnerable to drought and foot and mouth disease. The abattoir at Lobatse, opened in Oct 1954, is of great importance to the country's economy. In 1984 the number of cattle was 2.7m, goats, 889,000, sheep, 167,000, poultry, 1m. Beef exports (1984) P88,853,000, meat sold locally P2,760,000.

LABOUR. At the 1981 census 44% of the labour force were engaged in agriculture, 9% was employed outside Botswana, mainly in the Republic of South Africa in the mining industry and 4 4% was engaged in domestic service

COMMERCE. In 1984 imports totalled P900m and exports P860m. Of imports, 83% come from South Africa, 8% from Zimbabwe Exports are mainly diamonds (to Switzerland), copper—nickel matte (to USA), beef and beef products (to EEC).

Botswana is a member of the South African customs union with Lesotho, the Republic of South Africa and Swaziland

Total trade between Botswana and UK (British Department of Trade returns, in £1,000 sterling)

# República Federativa do Brasil

HISTORY. Brazil was discovered on 22 April 1500 by the Portuguese Admiral Pedro Alvares Cabral, and thus became a Portuguese settlement, in 1815 the colony was declared 'a kingdom', and on 13 May 1822 Dom Pedro, eldest surviving son of King João VI of Portugal, was chosen 'Perpetual Defender' of Brazil by a National Congress. He proclaimed the independence of the country on 7 Sept 1822, and was chosen 'Constitutional Emperor and Perpetual Defender' on 12 Oct 1822 He resigned in 1831 and 9 years later, his 14-year-old son Pedro, became the second Emperor of Brazil

AREA AND POPULATION. Brazil is bounded east by the Atlantic and on its north-west and southern borders by all the South American countries except Chile and Ecuador Population as at 1 Sept 1980 (census) and 1 July 1985 (estimate)

CLIMATE. Because of its latitude, the climate is predominantly tropical, but factors such as altitude, prevailing winds and distance from the sea cause certain variations, though temperatures are not notably extreme. In tropical parts, winters are dry and summers wet, while in Amazonia conditions are constantly warm and humid. The N.E sertao is hot and arid, with frequent droughts. In the south and east, spring and autumn are sunny and warm, summers are hot, but winters can be cold when polar air-masses impinge Brasilia Jan 72°F (22 2°C), July 64°F (17.8°C) Annual rainfall 64" (1,600 mm) Bahia Jan 80°F (26 7°C), July 74°F (23 3°C) Annual rainfall 76" (1,900 mm) Belem. <sup>1</sup> Died 10 Jan 1919 before taking office

On 24 Jan 1967 both houses of Congress in joint session approved the new Constitution and press law which came into force on 15 March. An amendment to the Constitution, which came into force on 30 Oct. 1969, was issued on 17 Oct The present Constitution provides for the indirect election of the President and Vice-President by an electoral college, comprising the members of Congress and delegates from the state legislatures; it grants powers to the President to issue decree-laws on matters connected with the economy and national security, it gives the President authority to intervene in any of the 23 states without consultation with Congress and the right to declare a state of siege and to rule by decree. President and Vice-President are elected for a 6-year term and are not immediately reeligible

Under the 1969 Constitution, Congress consists of a 69-member Senate and a 479-member Chamber of Deputies. The Senate is two-thirds directly elected (50% of these elected for 8 years in rotation) and one-third indirectly elected. The Chamber of Deputies is elected by universal franchise (with a literacy qualification) for 4 years

The name of the country was changed from 'Estados Unidos do Brasil' to 'Brasil' and later to 'República Federativa do Brasil'.

Brazil returned to constitutional rule and a civil President assumed office in 1985. On 20 Dec 1979 the 1965 Political Parties Statute was amended to allow the establishment of new political parties.

The Institutional Act No. 5 issued on 13 Dec. 1968 was incorporated into the new Constitution through an amendment on 17 Oct. 1969. It was repealed by the Constitutional Amendment Number 11 of 13 Oct. 1978. The Congress renewed its session on 22 Oct. 1969 and elections were held on 15 Nov. 1970, 1974, 1978 and 1982

Voting is compulsory for men and women between the ages of 18 and 65 and optional for persons over 65. Enlisted men (who numbered 339,849 at the 1980 census) may not vote. The Constitutional Amendment number 25 of 15 May 1985 granted illiterate population 18 years old and older (who numbered 17,271,362 – 1980 census) the right to vote.

President of the Republic: José Sarney, assumed office 15 March 1985 and became President on 21 April 1985 when President-elect Neves died.

The cabinet was composed as follows in Feb. 1986:

Head of President's Civil Household Marco Antonio de Oliveira Maciel, Head

of President's Military Household Gen. Rubens Bayma Denys. Head of National Information Service Gen Ivan de Souza Mendes Head of General Armed Forces (EMFA): Adm. José Maria do Amaral Oliveira. Local Government Brazil consists of 23 states, 3 federal territories (Roraima, Amapá, Fernando de Noronha) and 1 federal district. Each state has its distinct administrative, legislative and judicial authorities, its own constitution and laws, which must, however, agree with the constitutional principles of the Union. The states may unite or split or form new states. Taxes on interstate commerce, levied by individual states, are prohibited. The governors and members of the legislatures are elected, but magistrates are appointed and are not removable from office save by judicial sentence Rio de Janeiro and Guanabara became one state in 1975.

#### DEFENCE.

Army. The Army is organized in 8 divisions, each with up to 6 armoured, 4 mechanized or motorized infantry brigades, in addition there are 5 light 'jungle' infantry battalions, 2 independent infantry and 1 independent parachute brigades, total strength (1986) 183,000

Navy. The principal ship of the Brazilian Navy.

There are also 7 diesel-powered submarines (3 modern built in Britain and 4 old ex-US), 6 new destroyer leaders (or large frigates), the Constituição, Defensora, Liberal and Niteroi, built in Britain, and the Independencia and Uniao, built in Brazil, 10 old ex-US destroyers, 10 fleet tug type corvettes, 6 coastal minesweepers, 1 river monitor, 5 river patrol ships, 6 coastal gunboats, 1 submarine rescue ship, 2 tank landing ships, 4 transports, 19 local transports, 4 oilers, 1 repair ship, 6 training ships, 9 survey ships (2 carrying a helicopter), 6 survey launches, 35 minor landing craft, 12 tenders, 14 auxiliaries, 17 tugs and 3 floating docks.

Rather a static navy for such a large country which is apparently suffering from financial stringency. A considerable replacement programme is needed but this has

been delayed.

The new construction plan was revised to replace old ex-US submarines and destroyers. A training ship (frigate) and a river support ship were projected

Among the 50 new units planned are a carrier, submarines, guided missile leaders, frigates, minehunters and amphibious ships

Naval bases are at Rio de Janeiro, Aratu (Bahia), Belém, Natal, Recife, Salvador, with a river base at Ladario

The Fleet Air Arm was formed on 26 Jan 1965 Aircraft for service on the carrier include 5 Sikorsky SH-3D helicopters and 8 S-2A/E Tracker anti-submarine aircraft from USA Nine Westland Wasp light helicopters were obtained from Britain, and operated on utility and search and rescue duties with 16 Bell Jet Ranger, 6 Agusta/Sikorsky SH-3D and 9 Esquilo (AS 350) helicopters Nine Westland Lynx helicopters were provided for the destroyer leader/frigates of the 'Niteroi' class

The active personnel in 1986 totalled 50,300 (6,300 officers and 44,000 men). including 14,500 marines and auxiliary corps

Air Force, The Air Force, formed in 1918, has been independent of the Army and Navy since 1941 It is organized in 6 zones, centred on Belém, Recife, Rio de Janeiro, São Paulo, Porto Alegre and Brasília The la ALADA (air defence wing) has 12 Mirage IIIE fighters and 2 Mirage IIID trainers, integrated with Roland mobile short-range surface-to-air missile systems deployed by the Army, and a radar/communications/computer network. One fighter group has 2 squadrons of F-5E Tiger II supersonic fighter-bombers and two-seat F-5Bs, 2 others operate AT-26 (Aermacchi MB 326G) Xavante light jet attack/trainers, licence-built by Embraer in Brazil Counter-insurgency squadrons are equipped with AT-26 Xavantes for reconnaissance and attack, and with Neiva Regente lightplanes, Universal armed piston-engined trainers, Puma transports and UH-1D/H Iroquois and armed JetRanger helicopters for liaison and observation. There is an ASW group of S-2A/E Trackers for shore-based and carrier-based operations, a maritime patrol group (2 squadrons) with 12 EMB-111 (P-95) twin-turboprop aircraft developed from the Embraer Bandeirante transport, and 3 air-sea rescue units with RC-130E Hercules reconnaissance transports and SC-95B Bandeirantes Equipment of transport units includes 1 group of C-130E/H Hercules transports and KC-130H Hercules tankers, 1 group made up of a squadron of HS 748 and a second squadron of Banderrante turboprop transports, 2 troop-carrier groups with DHC-5 Buffaloes, I group with Bandeirantes; and 7 independent squadrons with Banderrantes and Buffaloes Light aircraft for liaison duties include 30 Embraer U-7s (licence-built Piper Senecas) The VIP transport group has 2 Boeing 737s, 11 HS 125 twin-jet light transports, some Bandeirantes, 6 Embraer Xingu (VU-9) twin-turboprop pressurized transports and 4 JetRanger helicopters. Training is performed primarily on locally-built T-25 Universal and turboprop T-27 Tucano (EMB-312) basic trainers, and AT-26 Xavante armed jet basic trainers. Future equipment will include 79 AM-X jet attack aircraft, produced jointly by Embraer and Aeritalia/Aermacchi of Italy

Personnel strength (1986) about 45,000, with more than 600 aircraft of all types

#### INTERNATIONAL RELATIONS

Membership. Brazil is a member of UN, OAS and LAIA (formerly LAFTA).

#### **ECONOMY**

Budget. Receipts and expenditures for the federal government (excluding states, federal district and municipalities) for calendar years have been as follows in 1m, Cr\$.

 1980

Chief items of revenue were in 1983 as follows (in Cr\$1m.): Taxes, 8,836,691; government property, 90,480 Principal items of expenditure. Transport, 969,785;

education and culture, 766,629; army, 453,703, aviation and navy, 807,688, welfare and security, 271,332, finance, 149,369

The foreign debt (including states and municipalities) of Brazil on 31 Dec 1984 amounted to US\$91,091m Internal federal debt, June 1985 was Cr\$205,500,795m Internal states and municipalities (main securities outstanding), June 1985, Cr\$16,379,623m

Currency. The cruzado (Cr\$) is the monetary unit which was introduced in March 1986. 1 cruzado = 1,000 cruzeiros The exchange rate was in March 1986 US\$1 = Cr\$13 86, £1 = Cr\$19 86.

Banking. The Bank of Brazil (founded in 1853 and reorganized in 1906, with an authorized capital of NCr\$60m from 1967) is not a central bank of issue but a closely controlled commercial bank; it had 2,401 branches in 1984 throughout the republic. On 31 Dec 1984 deposits were Cr\$10,524,956m

On 31 Dec 1964 the Banco Central da República do Brasil was founded.

The country's currency held by the public on 31 Dec 1983 was Cr\$1,841,889m Since Sept. 1939 gold and dollar supply has risen from US\$40m to US\$420m., of which the government's gold was US\$288m. in May 1961. All banks had on 31 Dec 1984 deposits of Cr\$49,227,000m.

Weights and Measures. The metric system has been in use in all official departments since 1862. It was made compulsory in 1872.

#### **ENERGY AND NATURAL RESOURCES**

Electricity. Brazil's hydraulic potential capacity for electric power production was estimated at 106,570 mw. in 1980, one of the largest in the world, of which 34% belongs to the Amazon hydrographic basin. Installed electric power in 1983 was 39,618 mw., gross production, 162,233 gwh., consumption, 143,229 gwh.

Oil. There are 13 oil refineries, of which 11 are state owned. Crude oil output was 26,838,637 cu metres in 1984, of which 68% was from the continental shelf Promising results have been obtained with the exploration of that area which in 1974 represented only 9% of all the national oil production.

The country imported substantial amounts of oil in 1984 32,243,757 tonnes (value c.i.f US\$7,327m) representing 48% of total value of all Brazilian imports Imports come mainly from Iraq and Saudi Arabia.

The government created the National Alcohol Program in 1975 with the aim of a gradual replacement of the consumption of petroleum by combustible alcohol specially produced from sugar-cane and cassava. About US\$5,000m. will be invested by 1985. By May 1980, 281 sugar-cane alcohol distillery projects had been approved and their authorized capacity represents 61% of the national aim for 1985 (about 11m cu metres) An agreement between the automotive industry and the government was signed in Sept 1979. In Dec. 1984 a major oil field was reported on the fringes of the existing Campos Basin oil field

Minerals. Brazil is the only source of high-grade quartz crystal in commercial quantities; output, 1983, 83,590 tonnes raw, 80,410 tonnes processed; exports (1983) 9,629 tonnes. It is the first largest western producer of chrome ore (reserves of 9·1m. tonnes, output, 1983, 468,737 tonnes); other minerals are mica (581 tonnes in 1983), zirconium, 15,521; beryllium 18, graphite 442,810, titanium ore 2,367,780 tonnes, and magnesite 486,374 tonnes. Along the coasts of the states of Rio de Janeiro, Espírito Santo and Bahia are found monazite sands containing thorium, output, 1983, 5,930 tonnes; reserves are estimated at 18m. tonnes. Manganese ores of high content are important (reserves in the Amapá region alone are estimated at 5 8m. tonnes); output, 1983, 2,594,105 tonnes. Output of bauxite, 1983, 7,198,671 tonnes; salt, 3,529,291, tungsten ore, 412,326, unrough, 1,842, lead, 371,696; asbestos, 2,090,472; coal, 21,367,472. Deposits of coal exist in Rio

Grande do Sul, Santa Catarina, Paraná and Minas Gerais. Total reserves are estimated at 3,717.8m. tonnes.

Iron is found chiefly in Minas Gerais, notably the Cauê Peak at Itabira. The Government is now opening up what is believed to be one of the richest iron-ore deposits in the world, situated in Carajás, in the northern state of Pará, with estimated reserves of 18,000m, tonnes, representing the largest concentration of highgrade (66%) iron ore in the world. Total output of iron ore, 1983, mainly from the Cia. Vale do Rio Doce mine at Itabira, was 114,190,190 tonnes

Production of tin ore (cassiterite, processed) was 22,769 tonnes in 1983. Output of barytes, 69,341 tonnes Output of phosphate rock, 19 9m. tonnes

Gold in large-scale mining was confined to a single mine in Minas Gerais, the production in 1983 (total), 53,684 kg. Large-scale gold deposits have been discovered at Serra Pelada in Pará; production, 1983, 32,986 kg processed and Minas Gerais, 5,066 kg Silver output (processed), 1983, 15,112 kg. Diamond districts are Minas Gerais, Mato Grosso, Roraima, Bahia and São Paulo; output in 1983 was 120,058 carats (44,168 carats from Minas Gerais, 58,762 carats from Mato Grosso)

Agriculture. 32 41% of Brazil's population is rural Production (in tonnes)

#### COMMUNICATIONS

**Roads.** There were (1983) 1,552,463 km of highways In 1983 Brazil had 12,591,340 motor vehicles, including 9,232,538 passenger cars, 859,904 commercial vehicles, 132,052 buses and minibuses 839,816 motor vehicles of all types were produced in 1984.

Railways. Public railways are operated by two administrations, the Federal Railways (RFFSA) formed in 1957 and São Paulo Railways (FEPASA) formed in 1971, which is confined to the state of São Paulo RFFSA had a route-length of 23,083 km in 1983 and FEPASA 5,072 km Principal gauges are metre and 1,600 mm. The share of the freight market declined to a low of 15% in 1967, but subsequent heavy government investment in reconstruction and new lines, coupled with a policy of forcing bulk commodities on to rail, had raised the share to over 20% in 1974. Continued investment in new wagons, electrification, gauge-conversion, and 'export corridor' routes to the ports will further improve this figure, and some new lines are planned up to the year 2000 Except in the urban areas of Rio de Janeiro and São Paulo, passenger traffic moving by rail is negligible Traffic moved by RFFSA in 1984 amounted to 76 8m. tonnes of freight and 506-6m, passengers. FEPASA carried 21m. tonnes and 84m, passengers

There are several important independent freight railways, including the Vitoria à Minas (811 km and 73m tonnes of freight), the Carajas (890 km, opened in 1985) and the Amapa (194 km) The city of São Paulo has a rapid metropolitan transit railway, and a similar system opened in Rio de Janeiro city in 1979 Commuter railways are also being developed in Recife, Belo Horizonte, Porto Alegre (all opened in 1985), Fortaleza and Salvador

Aviation. There were 32 companies (28 foreign) operating in 1984. The 4 largest Brazilian companies cover the whole territory and in 1984 they carried 12,136,226 passengers (10,252,787 in domestic traffic) and 919m. tonne-kin of freight Their commercial fleet consisted of 248 aircraft on 31 Dec 1984. There were 243 taxiplane companies on 31 Dec. 1985 The chief airline is Viação Aérea Rio Grande do Sul, (VARIG).

Shipping. Inland waterways, mostly rivers, are open to navigation over some 21,944 miles; number of vessels in 1983, 1,169. Rio de Janeiro and Santos are the 2 leading ports; there are 18 other large ports. Bolivia and Paraguay have been given free ports at Santos. During 1983, 39,717 vessels entered and cleared the Brazilian ports.

The Lloyd Brasileiro is owned and operated by the Government; its fleet comprised (1984), 39 vessels of 604,733 DWT. Brazilian shipping, 1984 (registered with Lloyds) amounted to 1,636 vessels of 10,001,356 DWT. Petrobrás, the government oil monopoly, took over the government tanker fleet of 26 vessels in 1958; total tanker fleet in 1984 was 70 vessels of 5,090,494 DWT (private and government-owned).

Post and Broadcasting. Of the telegraph system of the country, about half, including all interstate lines, is under control of the Government. There were 7,177 post and telegraph offices in 1983. There were 10,066,233 telephones in 1983 (São Paulo, 1,952,953, Rio de Janeiro, 1,231,547, Brasilia, 269,234). In 1982 there were 1,448 broadcasting and 123 television stations.

Cinemas (1982). Cinemas numbered 2,293 with a seating capacity of 1,290,062

Newspapers (1982) There were 322 daily newspapers with a total yearly circulation of 1,595,043,000 Foreigners and corporations (except political parties) are not allowed to own or control newspapers or wireless stations.

#### JUSTICE, RELIGION, EDUCATION AND HEALTH

Justice. There is a Supreme Federal Court of Justice at Brasília It has 11 judges; all are appointed by the President with the approval of the Senate. There are also federal courts in each state and the federal district and in the Territories, as well as 'electoral courts' to protect the elections, and labour tribunals. Justice is administered in the states in accordance with state law, by state courts, but in Brasília federal justice is administered. Judges are appointed for life. In Dec. 1977 the Senate approved laws for allowing marriages to be dissolved. Brazilian citizens can apply for one divorce only during their lifetime. In the case of a marriage partner becoming mentally ill, divorce proceedings cannot begin until 5 years after the illness has been proved.

Religion. The population is overwhelmingly Roman Catholic (89% at the census, 1980) In 1889 connexion between Church and State was abolished; it was restored by the 1934 constitution, but again abolished in 1946.

# BRITISH ANTARCTIC TERRITORY

HISTORY. The British Antaictic Territory was established on 8 March 1962, as a consequence of the entry into force of the Antarctic Treaty, to separate those areas of the then Falkland Islands Dependencies which lay within the Treaty area from those which did not

AREA AND POPULATION. The territory encompasses the lands and islands within the area south of 60°S latitude lying between 20°W and 80°W longitude (approximately due south of the Falkland Islands and the Dependencies) It covers an area of some 700,000 square miles, and its principal components are the South Orkney and South Shetland Islands, the Antarctic Peninsula (Palmer Land and Graham Land) and Coats Land.

British Antarctic Territory has no indigenous or permanently resident population. There is however an itinerant population of scientists and logistics staff of about 300, manning a number of research stations

The territory is administered by a High Commissioner Designated personnel of the scientific stations of the British Antarctic Survey are also appointed to exercise certain legal and administrative functions

High Commissioner Gordon W Jewkes, CMG (resides in Port Stanley)

HISTORY. The Sultanate of Brunei was a powerful state in the early 16th century, with authority over the whole of the island of Borneo and some parts of the Sulu Islands and the Philippines At the end of the 16th century its power had begun to decline and various cessions were made to Great Britain, the Rajah of Sarawak and the British North Borneo Company in the 19th century to combat piracy and anarchy. By the middle of the 19th century the State had been reduced to its present limits.

In 1847 the Sultan of Brunei entered into a treaty with Great Britain for the furtherance of commercial relations and the suppression of piracy, and in 1888, by a further treaty, the State was placed under the protection of Great Britain. Brunei was the only former British dependency inhabited by a Malay people that did not join the Federation of Malaysia in 1963.

AREA AND POPULATION. Bruner, on the northwest coast of Borneo, is bounded on all sides by Sarawak territory, which splits the State into two separate parts. Area, about 2,226 sq miles (5,800 sq. km), with a coastline of about 100 miles Population (1981 census) was 191,770 The 4 districts are Bruner/Muara (114,310), Belait (49,590), Tutong (21,640), Temburong (6,230) The capital is Bandar Seri Begawan (census, 1981) 63,868, 9 miles from the mouth of Bruner River; other large towns are Seria (23,511) and Kuala Belait (19,281) 50% of the population speak Malay and 26% Chinese

CLIMATE. The climate is tropical marine, hot and moist, but nights are cool Humidity is high and rainfall heavy, varying from 100" (2,500 mm) on the coast to 200" (5,000 mm) inland. There is no dry season. Bandar Seri Begawan. Jan. 80°F (26.7°C), July 82°F (27.8°C). Annual rainfall 131" (3,275 mm)

CONSTITUTION AND GOVERNMENT. On 29 Sept 1959 the Sultan promulgated a Constitution There is a Privy Council, an Executive and a Legislative Council On 6 Jan. 1965 the constitution was amended to provide for general elections to the Legislative Council, at the same time the Executive Council was renamed Council of Ministers. The Legislative Council consists of 20 members and a Speaker appointed by the Sultan. The Council of Ministers is presided over by the Sultan and consists of 6 ex-officio members and 4 other members, all of whom except one are members of the Legislative Council. The Mentri Besar, who is one of the ex-officio members of the Legislative Council and the Council of Ministers, is responsible to the Sultan for the exercise of executive authority in the State As a result of negotiations in June 1978, the Sultan and the British Government signed a new treaty on 7 Jan. 1979 under which Brunei became a fully sovereign and independent State on 31 Dec. 1983.

The official language is Malay, but English may be used for other purposes.

CONSTITUTION AND GOVERNMENT. A People's Republic was proclaimed by the National Assembly on 15 Sept 1946, and the existing 'Turnovo' Constitution of 1879 was replaced by the 'Dimitrov' Constitution in 1947. This was in turn replaced by a new constitution on 18 May 1971. This provides for a single-chamber National Assembly (Narodno Subranie). The highest permanently operating organ of the state is the Council of State which consists of a chairman, 2 first vice-chairmen, 4 vice-chairmen, a secretary and 17 members, it is elected by the National Assembly from its members. Supreme power is vested in the National Assembly, which consists of 400 deputies elected from areas of equal population by direct, secret and universal suffrage (everybody at age of 18 being eligible to vote and hold office) for a term of 5 years, it is to meet at least three times every year. The National Assembly also elects the Council of State and the ministers who are responsible to it.

A general election was held on 27 Oct. 1946 The Fatherland Front, composed of the Workers (Communist), Agrarian, Socialist and Zveno Parties, and non-party independents, obtained 364 seats (277 of which went to the Communists) and the opposition 101 In Aug. 1947 the oppositional Agrarian Union was dissolved The Socialist Party was merged with the Workers' Party in Aug. 1948, and the Zveno Party dissolved itself.

The Fatherland Front became, in 1948, a unified mass organization with individual memberships. Inside the Fatherland Front, there remain two political parties, the Bulgarian Communist Party and the Bulgarian People's Agrarian Union Petur Tanchev (Ist Vice-Chairman, Council of State) is Secretary of the Agrarian Union and Pencho Kubadinski Chairman of the Fatherland Front's National Council

In 1984 the membership of the Communist Party was 892,000; Young Communist League, (1976) 1 3m; Agrarian Union, 120,000, Fatherland Front, 3,770,080

At the elections of 7 June 1981, 99 96% of the electorate voted, and 99 93% of the votes were cast for the 400 candidates (87 women) of the Fatherland Front, there were no other candidates The list comprised 271 Communists, 99 Agrarians and 30 independents.

Constitutionally there is no office of Head of State, but Todor Zhivkov (Chairman of the Council of State, Secretary-General of the Communist Party), performs some of its functions

Real political power lies with the Bulgarian Communist Party, whose highest policy-making and executive body is its Politburo, elected by and from the Central Committee.

In March 1986 it consisted of Full Members Todor Zhivkov, Grisha Filipov (Chairman, Council of Ministers, i.e. Prime Minister), Stanko Todorov (Chairman, National Assembly), Pencho Kubadinski, Milko Balev, Chudomir Aleksandrov, Gen. Dobri Dzhurov (Defence Minister), Petur Mladenov (Foreign Minister), Ognian Doinov (Chairman, Economic Council), Yordan Yotov. Candidate Members. #### INTERNATIONAL RELATIONS

Membership, Bulgaria is a member of UN, Comecon and the Warsaw Pact.

External Debt. Agreements of 1955 and 1963 settled outstanding financial claims by the UK and USA respectively.

#### **ECONOMY**

Planning. State economic planning started in 1947. After 1964 there was a limited decentralization in planning, culminating in the economic reform of 1 Jan. 1969. A new economic mechanism was introduced on 1 Jan. 1982. This provides for direct linking of production to the market, a shift from extensive to intensive development, the establishment of profit as the sole criterion of success, the widening of enterprises' powers to make their own plans and the election of managerial staff (except the chief) by the workforce.

For the first seven 5-year plans see THE STATESMAN'S YEAR-BOOK for 1980-81 and 1981-82. The eighth 5-year plan (1981-85) envisaged a rise in national income

of 20%, in industrial production of 28% and in agriculture of 18%. The ninth 5-year plan is running from 1986 to 1990. There was a massive increase in consummer prices in Oct. 1985.

**Budget.** The revenue and expenditure of Bulgaria for calendar years were as follows (in 1 m leva)

HISTORY. Tradition recounts the establishment of a Tutsi kingdom under successive Mwamis as early as the 16th century German military occupation in 1890 incorporated the territory into German East Africa. From 1919 Burundi formed part of Ruanda-Urundi administered by the Belgians, first as a League of Nations mandate and then as a United Nations trust territory. Elections supervised by the United Nations in Sept. 1961 resulted in a large majority for the Unité et Progrès National party (UPRONA). Internal self-government was granted on 1 Jan. 1962, followed by independence on 1 July 1962. An agreement, signed with Rwanda under United Nations auspices at Addis Ababa in April 1962, provided for a monetary and customs union. This union and all organizations operated jointly by the two governments were dissolved by 30 Sept. 1964.

On 8 July 1966 Prince Charles Ndizeye deposed his father Mwami Mwambutsa IV, suspended the constitution and made Capt Michel Micombero Prime Minister On 1 Sept Prince Charles was enthroned as Mwami Ntare V On 28 Nov, while the Mwami was attending a Head of States Conference in Kinshasa (Congo),

Micombero declared Burundi a republic with himself as president

On 31 March 1972 Prince Charles returned to Burundi from Uganda and was placed under house ariest. On 29 April 1972 President Micombero dissolved the Council of Ministers and took full power, that night heavy fighting broke out between rebels from both Burundi and neighbouring countries, and the ruling Tutsi, apparently with the intention of destroying the Tutsi hegemony. Prince Charles was killed during the fighting and it was estimated that up to 120,000 were killed. On 14 July 1972 President Micombero reinstated a Government with a Prime Minister. On 1 Nov. 1976 President Micombero was deposed by the Army A Supreme Revolutionary. Council of the Armed Forces was established which appointed Col. Jean-Baptiste Bagaza president.

AREA AND POPULATION. Burundi is bounded north by Rwanda, east and south by Tanzania and west by Zaire, and has an area of 27,834 sq km (10,759 sq miles) It lies astride the main Nile-Congo dividing crest (6,000-7,000 ft) bounded on the west by the narrow plain of the Ruzizi River and Lake Tanganyika (2,534 ft) The interior is a broken plateau at an average height of about 5,000 ft, sloping eastwards down to Tanzania and the valley of the Maragarazi River The southernmost tributary of the Nile system, the Luvironza, rises in the south of the country

The population at the census in 1979 was 4,111,310. There are three ethnic groups—Hutu (Bantu, forming the great majority) Tutsi (Nilotic, less than 15%), Twa (pygmoids, less than 1%). There are some 3,500 Europeans and 1,500 Asians In 1974 some 49,000 Tutsi refugees from Rwanda were living in Burundi

Bujumbura, the capital, had (1979 census) 141,040 inhabitants Kitega (15,943 inhabitants) was formerly the royal residence.

CLIMATE. An equatorial climate, modified by altitude. The eastern plateau is generally cool, the easternmost savanna several degrees hotter. The wet seasons are from March to May and Sept. to Dec. Bujumbura. Jan. 73°F (22 8°C), July 73°F (22 8°C). Annual rainfall 33" (825 mm)

CONSTITUTION AND GOVERNMENT. A new Constitution was promulgated on 21 Nov 1981 and provides for a one-party state. The 65-member National Assembly elected in Oct. 1982 comprised 52 members elected by universal suffrage from a list of 104 candidates nominated by UPRONA (Parti de l'Unité et du Progrès National du Burundi), together with 13 members appointed

**DEFENCE.** The national armed forces total (1986), 5,000 (there are also about 1,500 in paramilitary units) and include a small naval flotilla and air force flight of 3 SF 260, 3 Cessna 150 and 2 Do 27 liaison aircraft, 4 Alouette III and 2 armed Gazelle helicopters The Army comprises 2 infantry battalions, 1 parachute battalion, 1 commando battalion and 1 armoured-car company

# INTERNATIONAL RELATIONS

Membership. Burundi is a member of UN and OAU and is an ACP state of EEC

#### **ECONOMY**

**Planning.** The 1983–87 Plan aims at greater diversification of agriculture with an envisaged investment of 107,400m Burundi francs

**Budget.** The 1984 budget envisaged receipts of 15,171m Burundi francs and expenditure at 17,348m Burundi francs

Currency. The currency is administered by the Bank of the Republic of Burundi The rate was 155 Burundi francs = £1 and 106 7 Burundi francs = US\$1 in March 1986

Weights and Measures. The metric system operates

# **ENERGY AND NATURAL RESOURCES**

Electricity. Electricity generation capacity was (1980) 44 7m kwh

Minerals. Mineral ores such as bastnasite and cassenite were formerly mined but output is now insignificant. Deposits of nickel (280m tonnes) remain to be exploited

Agriculture. The main economic activity and the main source of employment of the country is subsistence agriculture, which accounts for well over half of the gross national product Beans, kassava, maize, sweet potatoes, groundnuts, peas, sorghum and bananas are grown according to the climate and the region

The main cash crop is coffee, of which about 95% is arabica. It accounts for 90% of exports and taxes and levies on coffee constitute a major source of revenue. A coffee board (OCIBU) manages the grading and export of the crop. Production (1982) 24,000 tonnes. The main food crops (production 1982, in 1,000 tonnes) are cassava (1,200), yams (930), bananas (960), beans (181), maize (140), sorghum (98), groundnuts (42) and peas (37) Among cash crops are cotton (3) and tea (2)

Cattle play an important traditional role, and there were about 565,000 head in 1984. The quality is poor, but efforts are being made to improve it. There were (1984) some 770,000 goats, 315,000 sheep and 36,000 pigs.

Fisheries. There is a small commercial fishing industry on Lake Tanganyika which produced 7,941 tonnes in 1973 and which dropped to 4,118 tonnes in 1981

#### INDUSTRY AND TRADE

Industry. Industrial development is rudimentary. In Bujumbura there are plants for the processing of coffee and by-products of cotton, a brewery, cement works, a textile factory, a soap factory, a shoe factory and small metal workshops

BURUNDI 261

Commerce. The total value of exports 1982 was 7,883m Burundi francs, and of imports, 19,159m Burundi francs Main exports in 1981 were coffee, (5,352m Burundi francs), cotton, (188m.), tea, (181m) Main imports, petrol products, food, vehicles and textiles

Exports and re-exports from UK	1,479	1,522	3,155	1,710	1,592

Tourism. Tourism is developing and there were 38,000 visitors in 1982

#### COMMUNICATIONS

Roads. There is a road network of 6,400 km connecting with Rwanda, Congo and Tanzania but in 1982 only 310 km were macadamized. In 1978 there were 5,307 cars and 2,951 commercial vehicles

Aviation. In 1980, 38,441 passengers arrived or departed through Bujumbura International airport, and there are local airports at Gitega, Nyanza-Lac, Kiofi and Nyakagunda.

Shipping. There are lake services from Bujumbura to Kigoma (Tanzania) and Kalémié (Zaire) The main route for exports and imports is via Kigoma, and thence by rail to Dar es Salaam

**Post and Broadcasting.** Number of telephones (1982), 5,601 Radio receivers (1982) 180,000

Newspapers. There was (1984) one daily newspaper (Le Renouveau) with a circulation of 20,000

# JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. There is a Supreme Court, an appeal court and a tribunal de première instance at Buiumbura and provincial tribunals in each arrondissement

**Religion.** About 78% of the population is Roman Catholic, there is a Roman Catholic aichbishop and 3 bishops. The Anglican Missions under a bishop fall within the archdiocese of Uganda.

Education. In 1981 the number of children in primary school was 206,408 and 18,544 pupils were receiving secondary education. The university of Bujumbura had (1981) 1,793 students.

The local language is Kirundi, a Bantu language French is also an official language Kiswahili is spoken in the commercial centres

Health. In 1979 there were about 130 doctors and 21 hospitals.

Since April 1975 the situation in Cambodia has been such that it has been impossible to obtain reliable statistical and other information

HISTORY. The recorded history of Cambodia starts at the beginning of the Christian era with the Kingdom of Fou-Nan, whose territories at one time included parts of Thailand, Malaya, Cochin-China and Laos The religious, cultural and administrative inspirations of this state came from India The Kingdom was absorbed at the end of the 6th century by the Khmers, under whose monarchs was built, between the 9th and 13th centuries, the splendid complex of shrines and temples at Angkor Attacked on either side by the Vietnamese and the Thai from the 15th century on, Cambodia was saved from annihilation by the establishment of a French protectorate in 1863. Thailand eventually recognized the protectorate and renounced all claims to suzerainty in exchange for Cambodia's north-western provinces of Battambang and Siem Reap, which were, however, returned under a Franco-Thai convention of 1907, confirmed in the Franco-Thai treaty of 1937. In 1904, the province of Stung Treng, formerly administered as part of Laos, was attached to Cambodia. For history to 1969 see The Statesman's Year-Book, 1973–74, p. 1112.

Following a period of increasing economic difficulties and growing indirect involvement in the Vietnamese war Prince Sihanouk was deposed in March 1970 and on 9 Oct 1970 the Kingdom of Cambodia became the Khmer Republic From 1970 hostilities extended throughout most of the country involving North and South Vietnamese and US forces as well as Republican and anti-Republican Khmer troops During 1973 direct American and North Vietnamese participation in the fighting came to an end, leaving a civil war situation which continued during 1974 with large-scale fighting between forces of the Khmer Republic supported by American arms and economic aid and the forces of the United National Cambodian Front including 'Khmer Rouge' communists supported by North Vietnam and China

After unsuccessful attempts to capture Phnom Penh in 1973 and 1974, the Khmer Rouge ended the 5-year war in April 1975, when the remnants of the republican forces surrendered the city

From April 1975 the Khmer Rouge instituted a harsh and highly regimented régime. They cut the country off from normal contact with the world and expelled all foreigners. All cities and towns were forcibly evacuated and the population were set to work in the fields.

The régime had difficulties with the Vietnamese from 1975 and this escalated into full-scale fighting in 1977–78 On 7 Jan 1979, Phnom Penh was captured by the Vietnamese, and the Prime Minister, Pol Pot, fled. In Dec 1985 the Khmer Rouge still had 30,000 guernilas fighting the Vietnamese in Kampuchea. Pol Pot formally retired as C.-in-C. of the Khmer Rouge forces on 2 Sept 1985 but retained an advisory role

In June 1982 the Khmer Rouge (who claim to have abandoned their Communist ideology and to have disbanded their Communist Party) entered into a coalition with Son Sann's Kampuchean People's National Liberation Front and Prince Sihanouk's group This government is recognized by the UN

President of the Coalition Government: Prince Norondom Sihanouk. Deputy: President. Khieu Samphan, Prime Minister. Son Sann.

AREA AND POPULATION. Cambodia is bounded north by Laos and Thailand, in the west by Thailand, east by Vietnam and south by the Gulf of Thailand It has an area of about 181,035 sq km (69,898 sq miles).

The total population of 5,756,141 (census, 1981) of whom 93% were Khmer, 4%

Vietnamese and 3% Chinese Estimate (1985) 6,232,000

The capital, Phnom Penh is located at the junction of the Mekong and Tonle Sap rivers Populations of major towns have fluctuated greatly since 1970 by flows of refugees from rural areas and from one town to another Phnom Penh formerly had a population of at least 2.5m. but a 1983 estimate puts it at 500,000. Other cities are Konipong Cham and Battambang Khmer is the official language.

CLIMATE. A tropical climate, with high temperatures all the year Phnom Penh Jan. 78°F (25 6°C), July 84°F (28 9°C). Annual rainfall 52" (1,308 mm)

CONSTITUTION AND GOVERNMENT. Following the ousting of the Khmer Rouge régime, the Vietnamese-backéd Kampuchean National United Front for National Salvation (KNUFNS) on 8 Jan 1979 proclaimed a People's Republic and established a People's Revolutionary Council to administer the country A 117-member National Assembly was elected on 1 May 1981 for a 5-year term, in June 1981 it ratified a new Constitution under which it appointed a 7-member Council of State and a 16-member Council of Ministers, replacing the Revolutionary Council

President of the Council of State Heng Samrin

**DEFENCE.** Since the end of the war in April 1975 there has been no accurate data on defence and the three sections below should be treated with severe reserve. There is conscription into the armed forces.

Army. Strength (1986) 35,000 including 4 infantry divisions and some 50 supporting units. Equipment reported includes T-54/-55 and PT-76 tanks. There are also paramilitary police and militia units.

Navy. The Marine Royale Khmer was established on 1 March 1954 and became Marine Nationale Khmer on 9 Oct 1970. It recently included 1 ex-Soviet fast attack craft, 13 coastal patrol craft, 25 river patrol boats, 3 surveying craft, 1 tug, 2 floating docks and a dozen small craft, converted junks, etc. Less than a third of this force is operational and the residual navy has little fighting value. Two patrol vessels and 2 support (landing) gunboats escaped from Khmer Rouge, and 2 torpedo boats were believed to have sunk. Units since stricken include 7 amphibious vessels, 8 coastal patrol craft and 60 river patrol boats and service craft.

Naval active personnel provided for in 1986 totalled upwards of 4,000. In addition there was a battalion of marines numbering some 4,000.

Air Force. Since the Vietnamese invasion in 1978 there has been no established air force

#### **ECONOMY**

Currency. In 1978 money was officially abolished and no wages or salaries were paid, but in 1980 the use of money was restored. The currency is the *riel*, divided into 100 sen.

Banking. In 1964 all bank functions were taken over by government banks In 1972 legislation permitted the re-opening of foreign banks but by the end of Dec. 1973 only a few representational offices had opened. In 1979 there was no longer anything that could be called a normal banking system

264 CAMBODIA

#### **ENERGY AND NATURAL RESOURCES**

Electricity. Production (1982) 136m. kwh

Minerals. A phosphate factory, jointly controlled by the State and private interests, was set up in 1966 near a deposit of an estimated 350,000 tons. Another deposit of about the same size is earmarked for exploitation. High-grade iron-ore deposits (possibly as much as 2 5m. tons) exist in Northern Khmer, but are not exploited commercially because of transportation difficulties. Some small-scale gold panning (6,687 troy oz in 1963) and gem (mainly zircon) mining is carried out at Pailin where there is potential for considerable expansion.

Agriculture. The overwhelming majority of the population is normally engaged in agriculture, fishing and forestry Of the country's total area of 44m. acres, about 20m. are cultivable and over 20m. are forest land. In 1980, 15m hectares were cultivated. Before the spread of war the high productivity provided for a low, but well-fed standard of living for the peasant farmers, the majority of whom owned the land they worked. A relatively small proportion of the food production entered the cash economy. The war and unwise pricing policies have led to a disastrous reduction in production to a stage in which the country had become a net importer of rice.

A crop of about 900,000 tonnes of paddy were produced in 1982, 200,000 tonnes short of domestic requirements. Rubber production in 1982 amounted to 12,000 tonnes. Other products are maize, and, in usual order of value, livestock, timber, pepper, haricot beans, soybeans and fish.

Livestock (1984) FAO estimate: Cattle, 1,466,000; buffaloes, 600,000; sheep, 1,000, pigs, 1,008,000; horses, 11,000, poultry, 6m

Forestry. Much of Cambodia's surface is covered by potentially valuable forests, 3 8m hectares of which are reserved by the Government to be awarded to concessionaires, and are not at present worked to an appreciable extent. The remainder is available for exploitation by the local residents, and as a result some areas are overexploited and conservation is not practised. There are substantial reserves of pitch pine Roundwood production (1982) 5 1m cu. metres

Fisheries. Cambodia has the greatest freshwater fish resources in South-East Asia Production in 1982 84,700 tonnes.

# INDUSTRY AND TRADE

Industry. Some development of industry had taken place before the spread of open warfare in 1970. Industry established and in operation in Jan. 1970 included a motor-vehicle assembly plant, 3 cigarette manufacturing concerns, a modern factory, several metal fabricating concerns, a distillery, a saw-mill, textile, fish canning, plywood, paper, cement, sugar sack, tyre, pottery and glassware factories and a cotton-ginnery. In the private sector there are about 3,200 manufacturing enterprises, producing a wide range of goods; most of them are small family concerns. An oil refinery at Kompong Som came into production in 1969 but was put out of action by an attack in early 1971. Since April 1975 a programme for repairing factories has been started and some 70 are back in production

Commerce. Principal imports by order of value (1972) were petroleum products, metals and machinery (including vehicles), general foodstuffs and chemicals.

The only recorded export in 1972 was 7,328 tonnes of rubber. Much of the country's trade is with Hong Kong and Singapore

Total trade between Cambodia and UK (British Department of Trade returns, in £1,000 sterling).

#### COMMUNICATIONS

Roads. There were, in 1981, 2,670 km of asphalt roads (including the 'Khmer-American Friendship Highway' from outside Phnom Penh to close to Kompong

Som, built under the US aid programme and opened in July 1959), and 10,680 km of unsurfaced roads.

Railways. A line of 385 km (metre gauge) links Phnom Penh to Poipet (Thai frontier) In 1969 traffic amounted to 170m passenger-km and 76m ton-km Work was completed during 1969 on a line Phnom Penh-Kompong Som via Takeo and Kampot. Total length, 649 km but by 1973 only a short stretch between Battambang and the Thai border remained in operation, the remainder having been closed by military action Passenger and freight trains were running over about 80% of the network in 1980

Aviation. The Pochentong airport is 10 km from Phnom Penh Air Kampuchea has 2 small aircraft

Shipping. The port of Phnom Penh can be reached by the Mekong (through Vietnam) by ships of between 3,000 and 4,000 tons. In 1970, 97 ocean-going vessels imported 51,300 tons of cargo at Phnom Penh and exported 86,400 tons.

A new ocean port has been built under the French aid programme at Kompong Som (formerly Sihanoukville) on the Gulf of Siam and is being increasingly used by long-distance shipping

Post. There were 58 post offices functioning in 1968 but in 1979 it was doubtful if any offices operate. There are telephone exchanges in all the main towns, number of telephones in 1981, 7,315. There is an International Telex network in Phnom Penh and direct telephone and telegraphic links with Singapore.

**RELIGION.** In 1980 the majority of the population practised Theravada Buddhism. The Constitution of 1976 ended Buddhism as the State religion There are small Roman Catholic and Moslem minorities

EDUCATION The primary education system has now substantially recovered from the disruptions of the 1970's In 1982 there were 1,430,000 primary school and 40,000 secondary school pupils

HISTORY. The former German colony of Kamerun was occupied by French and British troops in 1916. The greater portion of the territory (422,673 sq. km) was in 1919 placed under French administration, excluding the territory ceded to Germany in 1911, which reverted to French Equatorial Africa. The portion under French trusteeship was granted full internal autonomy on 1 Jan. 1959 and complete independence was proclaimed on 1 Jan. 1960.

The portion assigned to British trusteeship consisted of 2 parts where separate plebiscites were held in Feb. 1961. The northern part decided in favour of joining Nigeria, while the southern part decided to join the Cameroon Republic This was implemented on 1 Oct 1961 with the formation of a Federal Republic of Cameroon. As a result of a national referendum, Cameroon became a unitary republic on 2 June 1972. Amadou Babatoura Ahidjo, President since independence, resigned on 6 Nov. 1982.

AREA AND POPULATION. Cameroon is bounded west by the Gulf of Guinea, north-west by Nigeria and east by Chad, with Lake Chad at its northern tip, and the Central African Republic, and south by Congo, Gabon and Equatorial Guinea The total area is 465,054 sq km (179,558 sq miles) Population (1976 census) 7,663,246 (28 5% urban) Estimate (1985) 9 77m

The areas, populations and chief towns of the 7 provinces at the 1976 census (now 10 provinces) were

HISTORY. The territories which now constitute Canada came under British power at various times by settlement, conquest or cession. Nova Scotia was occupied in 1628 by settlement at Port Royal, was ceded back to France in 1632 and was finally ceded by France in 1713, by the Treaty of Utrecht; the Hudson's Bay Company's charter, conferring rights over all the territory draining into Hudson Bay, was granted in 1670; Canada, with all its dependencies, including New Brunswick and Prince Edward Island, was formally ceded to Great Britain by France in 1763; Vancouver Island was acknowledged to be British by the Oregon Boundary Treaty of 1846, and British Columbia was established as a separate colony in 1858. As originally constituted, Canada was composed of Upper and Lower Canada (now Ontario and Quebec), Nova Scotia and New Brunswick They were united under an Act of the Imperial Parliament, 'The British North America Act, 1867', which came into operation on 1 July 1867 by royal proclamation The Act provided that the constitution of Canada should be 'similar in principle to that of the United Kingdom', that the executive authority shall be vested in the Sovereign, and carried on in his name by a Governor-General and Privy Council, and that the legislative power shall be exercised by a Parliament of two Houses, called the 'Senate' and the 'House of Commons'.

On 30 June 1931 the British House of Commons approved the enactment of the Statute of Westminster freeing the Provinces as well as the Dominion from the operation of the Colonial Laws Validity Act, and thus removing what legal limitations existed as regards Canada's legislative autonomy. A joint address of the Senate and the House of Commons was sent to the Governor-General for transmission to London on 10 July 1931. The statute received the royal assent on 12 Dec 1931.

Provision was made in the British North America Act for the admission of British Columbia, Prince Edward Island, Newfoundland, Rupert's Land and Northwest Territory into the Union. In 1869 Rupert's Land, or the Northwest Territories, was purchased from the Hudson's Bay Company. On 15 July 1870, Rupert's Land and the Northwest Territory were annexed to Canada and named the Northwest Territories, Canada having agreed to pay the Hudson's Bay Company in cash and land for its relinquishing of claims to the territory. By the same action the Province of Manitoba was created from a small portion of this territory and they were admitted into the Confederation on 15 July 1870. On 20 July 1871 the province of British Columbia was admitted, and Prince Edward Island on 1 July 1873. The provinces of Alberta and Saskatchewan were formed from the provisional districts of Alberta, Athabaska, Assiniboia and Saskatchewan and originally parts of the Northwest Territories and admitted on 1 Sept. 1905. Newfoundland formally joined Canada as its tenth province on 31 March 1949.

land formally joined Canada as its tenth province on 31 March 1949.
In Feb. 1931 Norway formally recognized the Canadian title to the Sverdrup group of Arctic islands. Canada thus holds sovereignty in the whole Arctic sector north of the Canadian mainland.

In Nov. 1981 the Canadian government agreed on the provisions of an amended constitution, to the end that it should replace the British North America Act and that its future amendment should be the prerogative of Canada These proposals were adopted by the Parliament of Canada and were enacted by the UK Parliament as the Canada Act of 1982

The enactment of the Canada Act was the final act of the UK Parliament in Canadian constitutional development. The Act gave to Canada the power to amend the Constitution according to procedures determined by the Constitutional Act 1982, which was proclaimed in force by the Queen on 17 April 1982. The Constitution Act 1982 added to the Canadian Constitution a charter of Rights and Freedoms, and provisions which recognize the nation's multi-cultural heritage, affirm the existing rights of native peoples, confirm the principle of equalization of benefits among the provinces, and strengthen provincial ownership of natural resources.

CLIMATE. The climate ranges from polar conditions in the north to cool temperate in the south, but with considerable differences between east coast, west coast and the interior, affecting temperatures, rainfall amounts and seasonal distribution. Winters are very severe over much of the country, but summers can be very hot inland, See individual provinces for climatic details.

CONSTITUTION AND GOVERNMENT. The members of the Senate are appointed until age 75 by summons of the Governor-General under the Great Seal of Canada. Members appointed before 2 June 1965 may remain in office for life. The Senate consists of 104 senators, namely, 24 from Ontario, 24 from Quebec, 10 from Nova Scotia, 10 from New Brunswick, 4 from Prince Edward Island, 6 from Manitoba, 6 from British Columbia, 6 from Alberta, 6 from Saskatchewan, 6 from Newfoundland, 1 from the Yukon Territory and 1 from the Northwest Territories.

Each senator must be at least 30 years of age, a born or naturalized subject of the Queen and must reside in the province for which he is appointed and his total net worth must be at least \$4,000. The House of Commons is elected by the people, for 5 years, unless sooner dissolved Women have the vote and are eligible From 1867 to the election of 1945 representation was based on Quebec having 65 seats and the other provinces the same proportion of 65 which their population had to the population of Quebec In the General Election of 1949 readjustments were based on the population of all the provinces taken as a whole Generally speaking, this format for representation has prevailed in all subsequent elections with readjustments made after each decennial census. However, on 31 Dec 1974, the law was changed so that it has reverted somewhat to the type of system that had prevailed initially That is to say, Quebec is to be assigned a fixed number of seats in the House of Commons and the representation of the other provinces calculated by a quotient which reflects this fact

The thirty-second Parliament, elected in Sept 1984, comprises 282 members and the provincial and territorial representation are. Ontario, 95; Quebec, 75, Nova Scotia, 11, New Brunswick, 10, Manitoba, 14; British Columbia, 28, Prince Edward Island, 4; Saskatchewan 14, Alberta, 21, Newfoundland, 7, Yukon Territory, 1, Northwest Territories, 2

The salary of a member of the House of Commons is \$54,600 with a tax-free allowance of \$18,200. The salary of a senator is \$54,600 with a tax-free allowance of \$8,800. The salary and allowances of the Prime Minister total \$137,100. The salary of the Speaker of the House of Commons is \$96,300, the salary of the Speaker of the Senate is \$82,200; the salary of the Opposition Leader is \$96,300 and that of the National Democratic Party Leader, \$79,700, all these also have tax-free allowances of from \$12,800-\$22,200

Future increases are to be pegged at 1% less than increases in the consumer price index or industrial composite index, whichever is lower

An Act to provide retiring allowances, on a contributory basis, to members of the House of Commons was given the Royal Assent on 4 July 1952. This Act was amended in July 1963; a member can now opt for a reduced retiring allowance in favour of an additional allowance for the widow, and provision has been made for retiring allowance for former Prime Ministers and their surviving spouses.

DEFENCE. The Department of National Defence was created by the National Defence, Act, 1922, which established one civil Department of Government in place of the previous Departments of Militia and Defence, Naval Service and the Air Board The Department now operates under authority of RSC 1970, c N1-4 The Minister of National Defence has the control and management of the Canadian Forces and all matters relating to national defence establishments and works for the defence of Canada He is the Minister responsible for presenting before the Cabinet, matters of major defence policy for which Cabinet direction is required He is also responsible for the Canada Emergency Measures Organization which was renamed Emergency Planning Canada in 1976.

In Dec. 1976, the Minister of National Defence was named as minister responsible for all aspects of air Search and Rescue in the areas of Canadian SAR responsibility, and for the overall co-ordination of marine search and rescue including provision of air resources for marine SAR within Canadian territorial waters and in designated oceanic areas off the Pacific and Atlantic Coasts in accordance with agreements made with the United States Coast Guard. A group from Transport Canada, the Department of National Defence and the Department of Fisheries and Oceans was set up at the same time, as a co-ordinating body

Command Structure The Canadian forces are organized on a functional basis to reflect the major commitments assigned by the Government All forces devoted to a primary mission are grouped under a single commander who is assigned sufficient resources to discharge his responsibilities Specifically, the Canadian forces consist of National Defence Headquarters and the following six major commands reporting to the Chief of the Defence Staff

- 1 Mobile Command provides units trained and equipped to support the United Nations or other peacekeeping operations, provides ground forces for the protection of Canadian territory, maintains combat formations in Canada for support of overseas commitments. It is comprised of 3 airportable combat groups in Canada, the United Nations force in Cyprus; the Canadian Airborne Regiment, and I combat training centre. The Militia and Air Reserve components are also controlled by Mobile Command. Strength (1986), 18,036
- 2 Maritime Command All maritime forces are under the Commander, Maritime Command, with headquarters in Halifax, Nova Scotia In addition, he also exercises operational control of aircraft assigned to him by the commander Maritime Air Group for Maritime operations Command of west coast forces is delegated to the Commander Maritime Forces (Pacific), who has his headquarters in Esquimalt, British Columbia. Maritime Command is to defend Canada against attack from the sea, provide anti-submarine defence in support of NATO; provide sea transport in support of Mobile Command Composition of the maritime forces includes 3 submarines, 4 destroyers, 19 smaller destroyer-escorts (of which 3 are in reserve), 3 supply ships, 1 maintenance ship, 6 patrol craft, 7 small support ships, 6 training vessels (ex-coastal minesweepers), 3 research ships and 30 auxiliaries and service craft There are 18 naval reserve personnel units in major Canadian cities which form an essential component of Maritime Command.

Regular force strength of Maritime Command ships in 1985 was 9,446

3. Air Command Air Command's main task is to provide operationally-ready regular and reserve air forces to meet Canada's national, continental and international commitments, with regional commitments in the Prairie Region (Saskatchewan, Alberta, Manitoba and north west Ontario). The Command's head-quarters are at Winnipeg, and it is organized in 6 operational groups:

Fighter group (headquarters at North Bay, Ontario) maintains the sovereignty of Canada's air space, supports Mobile Command and Maritime Command training, and provides combat aircrew to meet Canada's North American Aerospace Defence (NORAD) and NATO commitments. It has command of all fighter aircraft resources in Canada. This includes two CF-5 and one CF-18 operational squadrons, as well as CF-5 and CF-18 training squadrons. As the

CF-18 aircraft are brought in, the CF-5 will be phased out. Fighter Group also has command of two trans-continental radar lines, a space sensor unit and an electronic warfare squadron.

The Air Transport Group (headquarters at Trenton, Ontario) provides airlift resources for Canadian Forces. It also undertakes national and international tasks as directed by the government. The group provides search and rescue service for downed aircraft and marine search and rescue operations. The heavy transport resources consist of 26 C-130 Hercules aircraft and five Boeing 707 aircraft. At Winnipeg, there are four of the Hercules equipped for navigation training A squadron at Ottawa provides medium-range passenger transport with Cosmopolitan, Jet Star, Falcon and Challenger aircraft. Two Dash 7 aircraft in Lahr, Germany, provide passenger transport in Europe but will be replaced by Dash 8s in 1986.

Transport and Rescue squadrons located at Comox, B.C., Edmonton, Trenton and Summerside, P.E I, are equipped with a combination of Fixed Wing Aircraft and Helicopters Either Buffalo of Twin Otter aircraft together with Twin Huey, Voyageur or Labrador helicopters are utilized. Squadrons at Edmonton operate Twin Otters and Hercules. Three helicopters are now based at Gander, Nfld., as 103 Rescue Unit, to enable a quicker response to emergency situations in Newfoundland, Labrador and surrounding waters

Search and rescue activities are co-ordinated from four centres located at Victoria, Edmonton, Trenton and Halifax. Rescue co-ordination centres are manned by Canadian Forces personnel with Canadian Coast Guard officers attached as advisors on liaison duties in all centres except Edmonton

In addition to the dedicated aircraft specially equipped and manned for search and rescue duties, other aircraft at various locations across Canada are also tasked and in some instances kept on standby to augment the SAR capability.

Air Movements Units are located at Ottawa, Trenton, Edmonton and Lahr, Federal Republic of Germany, with detachments at Comox, B.C., Vancouver, Winnipeg, Greenwood, N.S., and Shearwater, N.S. The units provide passenger and cargo-processing services in support of the group's operations

Maritime Air Group, with headquarters at Halifax, N.S., is responsible for management of all air resources engaged in maritime patrol, maritime surveillance and anti-submarine warfare.

The Commander of Maritime Air Group is responsible to the Commander Air Command but provides aircraft and crews to the Commander Maritime Command for the conduct of maritime surveillance patrols and anti-submarine operations. A close working relationship between Maritime Command and Maritime Air Group enables them to utilize a common operations centre

The group conducts surveillance flights over Canada's coastal waters and the Arctic archipelago. It also provides anti-submarine air forces as part of Canada's contribution to NATO.

Mobile Command has operational control over Air Command's 10 Tactical Air Group whose headquarters are co-located at St Hubert, Que The group operates all rotary wing air resources engaged in the close support of land forces This involves helicopter fire-support, reconnaissance and tactical transport over the battle area.

14 Training Group, located in Winnipeg, was formed in 1981 and is responsible to the Commander of Air Command for aircrew selection, aircrew training to wings standard, junior leadership and survival training, and meteorological training. This group develops training policy for Air Command and is responsible for monitoring and evaluating all Air Command training.

On 1 April 1976, a new formation was added to the Air Command family, the Air Reserve Group. Commanded by a reserve officer of Brigadier General rank, the Air Reserve has its headquarters at Winnipeg. The Group was formed in recognition of the growing importance of the air reserves which, in the recent past, have seen developments in their numbers and in the types of aircraft flown.

The Air Reserves comprises two wings from each with two squadrons located in Montreal and Toronto and three other squadrons located in Winnipeg, Edmonton

and Summerside, PEI In addition, Air Reserve Augmentation flights at nine different bases in Canada have been formed to provide a cadre of trained personnel available for war establishment augmentation and for base expansion Other Air Reserve Augmentation flights are being planned

- 4 Canadian Forces Training System The Canadian Forces Training System headquarters is located at CFB Trenton, Ont Its functions include the planning and conduct of all recruit, trades, specialist and other office: classification training common to more than one command The Commander of Canadian Forces Training System also assumes regional commitments in the Central Region (the province of Ontario)
- 5 Canadian Forces Communications Command (CFCC) manages, operates and maintains strategic communications for the Canadian Forces and, in the event of emergencies, for the federal and provincial governments. The Command also provides points for interconnecting strategic and tactical networks and CFCC manages, operates and maintains the major DND automatic data processing centres.
- 6 Canadian Forces Europe The Canadian Forces allocated to support NATO in Europe are part of Canadian Forces Europe The land element is No 4 Canadian Mechanized Brigade Group operationally responsible to the Central Army Group The air element, No 1 Canadian Air Group, consisting of 1 CF-18 Hornet and 2 CF-104 Starfighter squadrons, is operationally assigned to No 4 Allied Tactical Air Force These elements are located in the Baden-Baden area of Federal Republic of Germany and are supported administratively by CFB Europe at Lahr

The Reserves are composed of the Naval Reserve, the Militia and the Air Reserve

Projected National Defence expenditures for 1985–86 were \$9,367m Strength of the Regular Forces in 1985 was about 84,395

Functional Regional Organization Functional Commanders have been assigned a regional as well as a functional responsibility for such actions as representation to provincial governments, aid of the Civil Power, emergency and survival operations, and administration of cadets, as well as regional support services for all units in the region

Canada has been divided into six regions, five of which have been assigned to functional Commanders as follows Atlantic (Newfoundland, Nova Scotia, Prince Edward Island, New Brunswick) – Maritime Command, Eastern (Quebec) – Mobile Command, Ontario, except N W Ontario – Canadian Forces Training System, Prairie (Manitoba, Saskatchewan, Alberta and N.W. Ontario) – Air Command, and Pacific (British Columbia) – Maritime Forces Pacific One region, comprising the Yukon Territory and Northwest Territories, has been assigned to Commander Northern Region with Headquarters in Yellowknife, NWT

Police Forces The police forces of Canada are organized in three groups. (1) the federal force, which is the Royal Canadian Mounted Police, (2) provincial police forces—the Provinces of Ontario and Quebec have their own provincial police forces, but all other provinces engage the services of the Royal Canadian Mounted Police to perform parallel functions within their borders, and (3) municipal police forces—each urban centre of reasonable size maintains its own police force or engages the services of the provincial police, under contract, to attend to police matters

In addition, the Canadian National Railways, the Canadian Pacific Railway Company and the National Harbours Board have their own police forces

Royal Canadian Mounted Police The Royal Canadian Mounted Police is a civil force maintained by the federal government. It was established in 1873, as the North-West Mounted Police for service in what was then the North-West Territor-

ies and, in recognition of its services, was granted the use of the prefix 'Royal' by King Edward VII in 1904. Its sphere of operations was expanded in 1918 to include all of Canada west of Thunder Bay. In 1920 the force absorbed the Dominion Police, and its headquarters was transferred from Regina to Ottawa, and its title was changed to Royal Canadian Mounted Police. The force is responsible to the Solicitor-General of Canada and is controlled and managed by a Commissioner who holds the rank and status of a Deputy Minister. The Commissioner is empowered under the Royal Canadian Mounted Police Act to appoint members to be peace officers in all provinces and territories of Canada.

The responsibilities of the Royal Canadian Mounted Police are national in scope. The administration of justice within the provinces, including the enforcement of the Criminal Code of Canada, is part of the power and duty delegated to the

provincial governments

All provinces except Ontario and Quebec have entered into contracts with the Royal Canadian Mounted Police to enforce criminal and provincial laws under the direction of the respective Attorneys-General In addition, in these 8 provinces the Force is under agreement to provide police services to 187 municipalities, thereby assuming the enforcement responsibility of municipal as well as criminal and provincial laws within these communities. The Royal Canadian Mounted Police is also responsible for all police work in the Yukon and Northwest territories enforcing federal law and territorial ordinances. The 16 Operational Divisions, alphabetically designated, make up the strength of the Force across Canada, they comprise 47 sub-divisions which include 718 detachments. Headquarters Division, as well as the Office of the Commissioner, is in Ottawa. The Force maintains liaison officers in 18 countries and represents Canada in the International Criminal Police Organization which has its headquarters in Paris.

Thorough training is emphasized for members of the Force Recruits receive 6 months of basic training at the Royal Canadian Mounted Police Academy in Regina. This is followed by a further 6 months of supervised on-the-job training The RCMP also operates the Canadian Police College at which its members and selected representatives of other Canadian and foreign police forces may study the latest advances in the fields of crime prevention and detection

Many of these advances have been incorporated into the operation of the Force A teletype system links the widespread divisional headquarters with the administrative centre at Ottawa and a network of fixed and mobile radio units operates within the provinces. The focal point of the criminal investigation work of the Force is the Directorate of Laboratories and Identification; its services, together with those of divisional and sub-divisional units, and of 8 Crime Detection Laboratories, are available to police forces throughout Canada. The Canadian Police Information Centre at RCMP Headquarters, a duplexed computer system, is staffed and operated by the Force. Law Enforcement agencies throughout Canada have access via a series of remote terminals to information on stolen vehicles, licences and wanted persons.

In Sept 1985, the Force had a total strength of 18,694 including regular members, special constables, civilian members and Public Service employees. It maintained 6,300 motor vehicles, 77 police service dogs and 145 horses

The Force has 13 divisions actively engaged in law enforcement, 1 Headquarters Division and 2 training divisions. In addition it maintains Marine Services and Air Services with headquarters at Ottawa The Air Directorate has stations throughout Canada and maintains a fleet of 20 fixed-wing aircraft and 8 helicopters

Currency. The denominations of money in the currency of Canada are dollars and cents. The cent is one-hundredth part of a dollar Subsidiary coins of the denominations of 1, 5, 10, 25 and 50 cents and \$1 are in use. The monetary standard is gold of 900 millesimal fineness (23, 22 grains of pure gold equal to 1 gold dollar). The Currency Act provides for gold coins in the denominations of \$5, \$10 and \$20, which are legal tender. The British and US gold coins are also legal tender, at the par rate of exchange. The legal equivalent of the British sovereign is \$4,86%.

The Bank of Canada has the sole right to issue paper money for circulation in Canada Restrictions introduced by the 1944 revisions of the Bank Act cancelled the right of chartered banks to issue or re-issue notes after 1 Jan. 1945, and in Jan 1950 the chartered banks' liability for such of their notes as then remained outstanding was transferred to the Bank of Canada in return for payment of a like sum to the Bank of Canada On 31 May 1970 the Canadian dollar which was stabilized at 92 50 US cents was allowed to fluctuate The value of the US\$ in Canadian funds was \$1 46 and £1 sterling=Canadian \$2 05 in March 1986

The Bank of Canada issues notes, which are legal tender, in denominations of \$1, \$2, \$5, \$10, \$20, \$50, \$100, \$500 and \$1,000 Under the terms of the Bank of Canada Act, the bank is required to sell gold in bars of 400 oz. to any person tendering legal tender. This obligation is at the present time suspended by Order-in-Council. The exportation of gold from Canada is prohibited except by licence issued by the Minister of Finance to the Bank of Canada or a chartered bank

The Ottawa Mint was established in 1908 as a branch of the Royal Mint, in pursuance of the Ottawa Mint Act, 1901. In Dec 1931 control of the Mint was passed over to the Canadian Government, and since that time it has operated as the Royal Canadian Mint. The Mint issues nickel, bronze and cupronickel coins for circulation in Canada. In 1967, in celebration of Canada's Centennial of Confederation, a \$20 gold piece was minted, the first gold coin struck since 1919. In 1935, on the occasion of His Majesty's Silver Jubilee, the Royal Canadian Mint issued the first Canadian silver dollars. Commemorative dollars were also issued in 1939 on the occasion of the visit of King George VI and Queen Elizabeth to Canada, in 1949, when Newfoundland became the tenth Province of Canada; in 1958, the one-hundredth anniversary of the establishment of the Colony of British Columbia, in 1964, the centennial of the Charlottetown and Quebec Conferences

which paved the way to confederation. The silver dollar bearing the design of the canoe manned by an Indian and a Voyageur has been issued in the years 1935–38, 1945–48, 1950–57, 1959–63, 1965, 1966 and 1972. For centennial year the Canada goose replaced the usual canoe design on the silver dollar. Because of a world-wide shortage of silver, the Government, in Aug. 1967, authorized the Mint to change the metal content of the 25-cent and 10-cent coins. Commencing in Sept 1968, the 10-cent, 50-cent and \$1 coins were minted in pure nickel. Gold refining is one of the principal activities of the Mint. In 1984 the refinery treated over 4 4m troy oz. of gold-containing materials and returned over 3 7m. troy oz of fine gold to its clients. Of this total, 2,062,790 troy oz of rough bullion were received from Canadian gold mines for treatment, containing 1,667,821 troy oz of fine gold and 300,704 troy oz. of fine silver. Coin issued (1983): Gold, \$59,010,600; silver, \$667,784; other metals, \$56,309,560.

Banking. Commercial banks in Canada are known as chartered banks and are incorporated under the terms of the Bank Act, which imposes strict conditions as to capital, returns to the Dominion Government, types of lending operations and other matters. In Oct. 1985 there were 71 chartered banks (14 domestic banks and 57 foreign bank subsidiaries) incorporated under the provisions of the Bank Act; the 14 had 7,200 branches serving 2,000 communities in all provinces in Canada and nearly 300 branches in other countries. There was also one bank incorporated under the Quebec Savings Bank Act. The foreign bank subsidiaries operate 200 offices in Canada including 57 head offices. The Bank Act is subject to revision by Parliament every 10 years. Bank charters expire every 10 years and are renewed at each decennial revision of the Bank Act. The chartered banks make detailed monthly and yearly returns to the Minister of Finance and are subject to periodic inspection by the Inspector-General of Banks, an official appointed by the Government.

There were 14 domestic banks at 31 July 1985 with assets of gold coin and bullion, \$561m., Bank of Canada deposits and notes, \$5,154m.; deposits with banks, \$48,232m., cheques and other items in transit, \$1,261m., loans, \$273,877m. (including mortgage loans, \$41,388m.); total assets, \$393,951m

The Bank of Canada Act, passed on 3 July 1934, provided for the establishment of a central bank for the Dominion. This bank commenced operations on 11 March 1935 with a paid-up capital of \$5m. By reason of certain changes introduced into the composition of stockholders of the bank (for which see The Statesman's Year-Book, 1944 pp. 322-23), the Minister of Finance on behalf of Canada is the sole registered owner of the capital stock of the bank. The revised Bank Act, which came into force on 1 Dec. 1980, requires the chartered banks to maintain a statutory primary reserve of 10% on demand deposits and 4% on other deposits, in the form of reserves with and notes on the Bank of Canada. A secondary reserve of 4% in treasury bills, government bonds, etc., is also required All gold held in Canada by the chartered banks was transferred to the Bank of Canada along with the gold held by the Government as reserve against Dominion notes outstanding at the time of the commencement of operations of the Bank of Canada. The liability of the Dominion notes outstanding at the commencement of business of the Bank of Canada was assumed by the bank.

In the year ending 31 March 1984, the Federal Business Development Bank authorized 2,878 loans for a total of \$327m

Weights and Measures. The legal weights and measures are in transition from the Imperial to the International system of units. The Metric Commission, established in June 1971, co-ordinates Canada's conversion to the metric system.

# **ENERGY AND NATURAL RESOURCES**

Electricity. The net generation of electricity in 1984 was 424,608,078 mwh, of which utilities accounted for 386,988,664 mwh. Of the total, 283,137,662 mwh. was from hydro-electricity, 89,117,702 mwh from conventional steam plants and 49,265,915 mwh from nuclear plants. Demand (1984) was 385,516,066 mwh

Oil and Natural Gas. With the discovery of large oilfields in Alberta and development of the Alberta oil sands, the production of petroleum became a major Canadian industry. The Interprovincial Pipeline, Canada's largest oil pipeline, moves crude oil from Edmonton, Alberta, to Montreal, Quebec. The pipeline serves Canadian refineries from Edmonton to Montreal and since the middle of 1982, Canadian crude has been delivered from Montreal to Atlantic provinces and many in the USA Another pipeline, Trans-Mountain, extends from Edmonton to Vancouver Nine refineries, 5 in Canada and 4 in Washington State, are served by the pipeline. At the end of 1984 Canada's oil pipeline system had 39,400 km of line in operation Net oil deliveries in 1984 were 145,307,751 cu metres The Trans-Canada natural gas pipeline is the longest in the world (10,632 km). It brings natural gas from the Alberta-Saskatchewan border across the prairies, through northern Ontario to Toronto, then eastward to Montreal. Natural gas pipeline mileage totalled 185,000 km in 1984 (preliminary) Total marketable gas received for distribution in 1984, 70.983 3m cu metres, total gas sales 47.573 7m cu metres

Minerals. Alberta, British Columbia, Saskatchewan and Quebec are the chief mining provinces Total value of minerals produced in 1984 (preliminary) was \$43,070,710,000 Principal minerals produced in 1984 (preliminary) were as follows

Agriculture. Though the manufacturing and service industries now predominate, agriculture is still very important to the Canadian economy. It contributed about 2.5% of the net value of production in 1984 and accounted for about 9.8% of the value of commodities exported.

According to the census of 1981 the total land area is 2,278 6m, acres of which 162.8m, acres are agricultural land

Grain growing, dairy farming, fruit farming, ranching and fur farming are all carried on successfully. Total farm receipts (1984) \$20,011 m

Dairving The dairy products industry has shown a marked tendency towards centralization, the number of establishments decreased between 1961 and 1983 from 1,710 to 483 (71 7%), whereas the number of employees has decreased to 20 3% Production, 1984 Creamery butter, 107,795 tonnes, cheddar cheese, 100,888 tonnes, concentrated whole milk products, 176,863 kl, skim milk powder, 128,791 tonnes.

Fruit Farming The value of fruit production (excluding apples) in 1984 was (estimated in \$1,000) Ontario, 75,499, British Columbia, 60,590; Quebec, 17,525, Nova Scotia, 9,975; New Brunswick, 2,761, Prince Edward Island, 1,432 Total apple production in Canada in 1984 was 440,558 tonnes

Tobacco Commercial production of tobacco is confined to Ontario and Quebec. Farm cash receipts in 1984 totalled \$360m

Forestry. As of 1982, the total area of land covered by forests is estimated at about 4,364,000 sq km, of which 2,641,000 sq km are classed as productive forest land. Lumber production (in cu metres) in 1983 was 48,904,372.

Lumber shipments from sawmills and planing mills in 1983 was 44,771,852 cu metres valued at \$4,597 7m Pulp production was 20 2m tonnes in 1983 and 81 5m. tonnes in 1982. In 1983 mill shipments of paper amounted to 13m tonnes valued at \$6,962,077,000.

Fur Trade. In 1983-84 (year ended 30 June), 4,394,361 pelts valued at \$90,983,396, were taken In wild-life pelt production marten led in total value,

followed by beaver, muskrat, lynx and fox. The most important animal raised on fur farms is mink, with 99% of the total production. The value of mink pelts from fur farms in 1983-4 was \$43,357,145. There were, in 1984, 811 fur farms reporting fox and 569 mink.

Fisheries. During 1983, landings in Canadian commercial fisheries reached 1,299,980 tonnes. The landed value was \$831 9m. and the estimated market value was \$1,978 5m. The landed value of principal fish in 1983 was (in \$1,000) Salmon, 115,891, cod, 188,585, lobster, 141,648, herring, 70,045, scallops, 70,844; freshwater fish, 48,464; halibut, 15,607. Exports of fisheries' products, 1983, were valued at \$1,571.5m.

**Labour.** In Oct. 1985 the industrial distribution of the employed was estimated as follows (in 1,000). Service, 3,676, manufacturing, 2,015, trade, 2,010, transport, communication and other utilities, 903; construction, 641; public administration, 792; finance, insurance and real estate, 629, agriculture, 499, non-agriculture, 10,976, other primary industries, 312, total employed, 11,475, unemployed, 1,200

Union returns filed for 1982 in compliance with the Corporations and Returns Act (1962), show 183 labour organizations reporting on 13,598 local union branches in Canada. Union membership in 1982 was 3 05m. 33.3% of the wage and salary workers in major industry groups were members of reporting labour organizations, with about 61.4% of the organized workers members of unions affiliated with the Canada Labour Congress. Over 1 42m. of the union members were in international unions, which have branches both in Canada and the USA and in most cases belong to central labour organizations in both countries.

It is generally established by legislation, both federal and provincial, that a trade union to which the majority of employees in a unit suitable for collective bargaining belong, is given certain rights and duties. An employer is required to meet and negotiate with such a trade union to determine wage rates and other working conditions of his employees. The employer, the trade union and the employees

affected are bound by the resulting agreement. If an impasse is reached in negotiation conciliation services provided by the appropriate government board are available. Generally, work stoppages may not take place until an established conciliation procedure has been carried out and are prohibited while an agreement is in effect. Almost 28% of the workers affected by collective agreements are in the manufacturing industry.

Freedom of association is a civil right in Canada, and under common law workers are at liberty to join unions and participate in their activities. This right has also been guaranteed by statutes which make it an offence to interfere with freedom of association.

Certain specific minimum standards in regard to working conditions are set by law, for the most part by provincial labour legislation. Minimum wages, maximum hours of work or an overtime rate of pay after a specified number of hours, minimum weekly rest periods and annual vacations with pay are established for the majority of workers.

Dept of Labour, Working Conditions in Canadian Industry Annual Ottawa

Commerce. In the past the custom tariff of Canada has been protective, with a preferential tariff in favour of the UK, the Dominions, a number of Crown Colonies, and the Irish and South African Republics. At the Imperial Economic Conference of 1932, held in Ottawa, the UK developed further the policy of preferential tariffs to the Dominions, and on the part of the latter there was a general lowering of the existing tariffs against certain lines of UK manufacturers. Canada is one of the signatories of the General Agreement on Tariffs and Trade (GAIT) and of the Kennedy Round agreements.

Roads. The total length of federal and provincial territorial roads and highways in Canada at the end of March 1982 was 391,792 km Expenditures by these two levels of government on roads and highways during the fiscal year 1981-82 amounted to approximately \$4,139.9m

Federal expenditures were directed largely to the maintenance of national park highways, Indian Reserve roads and designated provincial/territorial highway construction in projects In general highways are controlled and maintained by the province who also have the responsibility of providing assistance to their municipalities and townships.

The Alaska Highway is part of the Canadian highway system. For the Trans-

Canada Highway see map in The STATESMAN'S YEAR-BOOK, 1962

Registered motor vehicles totalled 14,620,648 in 1983 (revised), they included 10,731,520 passenger cars and taxis, 3,365,222 trucks and buses and 466,411 motor cycles

Urban Transit. In 1983 urban transit systems (urban and suburban passenger transport, electrical railway, trolly coach, bus or subway) carried 1,370,897,359 fare passengers 561,981,612 km for an operating revenue of \$1,593,747,381 In 1983, intercity and rural bus operations carried 29,646,285 fare passengers 192,876,890 km, earning revenues of \$340,240,726

Railways. The total length of track operated during 1983 in Canada was 99,444 km. Mainline track, 38,272 km, branch line, 34,274 km, industrial and siding track, 26,898 km

Canada has 2 great trans-continental systems. the Canadian National Railway system (CN), a government-owned body which operates 53,605 km (1983) of track, and the Canadian Pacific Railway, a joint-stock corporation operating 34,529 km (1983) From 1 April 1978, a government funded organization known as Via Rail took over passenger services formerly operated by CP and CN

Selected statistics of Canadian railways for 1983 Passenger revenue \$210.4m, freight revenue, \$5,286 6m, total railway operating revenues, \$7,027 3m, total operating expenses, \$6,437 5m

Aviation. Civil aviation in Canada is under the jurisdiction of the federal government. The technical and administrative aspects are supervised by the Administrator of Air Transportation, while the economic functions are assigned to the Canadian Transportation Commission.

In 1983 Canadian airports handled 42,974,487 passengers, 148,052,000 kg of mail and 512,360,000 kg of cargo. Operating revenue (1983) was \$4,455 lm.; operating expenditure, \$4,393 3m.

Shipping. The registered shipping on 31 Dec 1984, including vessels for inland navigation, totalled 35,622 with a gross tonnage of 5,515,498 A total of 45,151 vessels (international shipping) visited Canadian ports in 1984, loading and unloading 205m, tonnes of cargo.

The major canals in Canada are those of the St Lawrence-Great Lakes waterway with their 7 locks, providing navigation for vessels of 26-ft draught from Montreal to Lake Ontario; the Welland Canal by-passing the Niagara River between Lake Ontario and Lake Erie with its 8 locks, and the Sault Ste Marie Canal and lock between Lake Huron and Lake Superior. These 16 locks overcome a drop of 582 ft from the head of the lakes to Montreal. The St Lawrence Seaway was opened to navigation on 1 April 1959 (see map in The Statesman's Year-Book, 1957). In 1984, traffic on the Montreal-Lake Ontario Section of the Seaway numbered 3,759 vessels carrying 47 5m. cargo tonnes, on the Welland Canal Section, 4,750 vessels with 53.9m. gross tonnes. Value of fixed assets was \$597,657,000 and investments, \$49,568,000 at 31 March 1985.

Coast Guard. The Canadian Coast Guard (formed in 1962) is responsible to the Minister of Transport In 1985 it comprised 7 heavy icebreakers; a heavy icebreaker/cable repair vessel; 7 medium icebreakers, 3 light icebreakers, 25 aid tenders; 3 hydraulic survey and founding vessels, 63 search and rescue vessels (all types and sizes); 4 hovercraft and 34 helicopters.

Post. In May 1984 there were 8,376 postal facilities in operation and 7,310m pieces of mail were processed in 1984-85. Gross revenue (estimate 1984-85) was \$2,500m, gross expenditure, \$2,895m.

There were 919,143 miles (1,479,216 km) of telegraph wire in Canada in 1979 (including external cable landed in Canada) There were 15 5m telephones in Sept 1985

**Broadcasting.** There were 1,016 originating stations operating in Canada at 31 March 1985, of which 107 were Canadian Broadcasting Corporation stations, 112 were CBC affiliates and 372 were privately owned and operated Included were 381 AM radio stations, 142 FM radio stations and 68 television stations Radio and television licence fees were abolished in 1953

Wireless 'beam' stations are operated at Montreal for direct communications with Great Britain and Australia, and a station at Louisburg, N S, provides a long-distance service to ships

Cinemas (1983) There were 899 cinemas with a seating capacity of 577,262 and 260 drive-in theaties with a capacity of 130,809 cars

Newspapers (1984) There were 17 daily newspapers, of which 101 were in English, 11 in French and 5 others

### JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. There is a Supreme Court in Ottawa, having general appellate jurisdiction in civil and criminal cases throughout Canada. There is an Exchequer Court, which is also a Court of Admiralty. There is a Superior Court in each province and county courts, with limited jurisdiction, in most of the provinces, all the judges in these courts being appointed by the Governor-General Police, magistrates and justices of the peace are appointed by the provincial governments.

For the year ended 31 Dec. 1984, 2,147,697 Criminal Code Offences were reported and 397,903 persons were charged

Education. Under the Constitution the various provincial legislatures have power over education. These powers are subject to certain qualifications respecting the

rights of denominational and minority language schools. Newfoundland and Quebec legislations provide for Roman Catholic and Protestant school boards. School Acts in Ontario, Saskatchewan and Alberta provide tax support for both public and separate schools. School board revenues derive from local taxation on real property and government grants from general provincial revenue.

Except in Quebec the number of private elementary and secondary schools is small; their enrolments in 1984-85 were less than 4 8% of the total elementary-secondary enrolment. Indian and Northern Affairs Canada finances schools for

Indian and Inuit children, the enrolment in 1984–85 was 40,036

In 1984-85, 460,810 full-time regular students (graduates and under-graduates) were enrolled in universities. In 1983 some 30,072 took first degrees in social sciences, commerce, economics, law, political science and geography; 15,457 in education, 8,813 in humanities; 7,734 in engineering and applied sciences, 4,811 in agriculture; 6,089 in health subjects; 5,551 in mathematics and physical sciences and 2,845 in fine and applied arts. Health. Constitutional responsibility for personal health care services rests with the ten provinces of Canada. Accordingly, Canada's national health insurance system consists of an interlocking set of provincial hospital and medical insurance plans conforming to certain national standards rather than a single national program. These national standards, which are set out in the Canada Health Act, include Provision of a comprehensive range of hospital and medical benefits, universal population coverage, access to necessary services in uniform terms and conditions, portability of benefits, and public administration of provincial insurance plans.

Provinces satisfying these national standards are eligible for federal financial assistance according to the provisions of the Federal-Provincial Fiscal Arrangements and Federal Post-Secondary Education and Health Contributions Act Under this Act, the provinces are entitled to receive equal-per-capita federal health contributions escalated annually by the three year average increase in nominal Gross National Product. These federal contributions are paid in the form of a combination of tax point and cash transfers, which together account for approximately 50% of provincial expenditures on insured health services. Over and above these health insurance transfers, the federal government also provides unconditional financial support for such provincial extended health care service programmes as nursing home care, certain home care services and adult residential care services. These equal-per-capita cash payments to the provinces are also escalated annually by provincial population increases and increases to nominal Gross National Product.

The health insurance programmes were introduced in stages. The Hospital Insurance and Diagnostic Services Act was passed in 1958, providing prepaid coverage to all Canadians for in-patient and, at the option of each province, outpatient hospital services. The Medical Care Act was introduced in 1968 to extend universal coverage to all medically-required services provided by medical practitioners. The Canada Health Act, which took effect 1 April, 1984, consolidated the

original federal health insurance legislation and further clarified the nationa standards provinces are required to meet in order to qualify for full federal health contributions.

The approach taken by Canada is one of state-sponsored health insurance Accordingly, the advent of insurance programmes produced little change in the ownership of hospitals, almost all of which are owned by non-government non profit corporations, or in the rights and privileges of private medical practice Patients are free to choose their own general practitioners and/or specialists with out losing their insured benefits (there is a minor exception in Quebec involving the non-emergency services of a few physicians). Except for 0.5% of the population whose care is provided for under other legislation (such as serving members of the Canadian Armed Forces), all residents are eligible, regardless of whether they are in the work force. Benefits are available without upper limit so long as they are medically necessary, provided any registration obligations are met. Benefits are also portable during any temporary absence from Canada anywhere in the world—subject to any limitation a province may impose upon treatment electively sought outside the particular province without prior approval Provinces may prescribe limits on benefits payable for out-of-province care

In addition to the benefits qualifying for federal contributions, provinces are free to provide additional benefits at their own discretion. Most provinces provide such benefits, which cover a variety of services (e.g., optometric care, children's dental programme, drug benefits) depending upon the province. Most provinces fund their portion of health insurance costs out of general provincial revenues. Three provinces and one territory levy premiums which meet part of the provincial costs, 2 provinces impose a levy on employers, and 1 province utilizes part of its sales tax revenues for this purpose. Four provinces have nominal co-charges for short-term hospital care. Several provinces have charges for long-term hospital care geared, approximately, to the room and board portion of the OAS-GIS payment mentioned under Social Welfare.

Social Welfare. The social security network provides financial benefits to individuals and their families through a variety of programmes administered by federal, provincial and municipal governments. Federally, the Department of National Health and Welfare is responsible for research into the areas of health and social issues, provision of grants and contributions for various social services, improvement and construction of health facilities and the administration of several of Canada's income security programmes. These programmes are: The Family Allowances programme, introduced in 1945 and amended in 1973, the Old Age Security programme, introduced in 1952 and to which were added the Guaranteed Income Supplement in 1966 and the Spouse's Allowance in 1975, and the Pension Plan which came into being in 1966. Also implemented in 1966 was the Assistance Plan, which provides for federal-provincial cost-sharing of social assistance payments and social service programmes provided by provincial and, in some cases, municipal governments

The 1973 Family Allowances Act provides for the payment of a monthly Family Allowance (\$31.27 in 1985) in respect of a dependent child under the age of 18 who is a resident of Canada, who is wholly or substantially maintained by a parent or guardian At least one parent must be a Canadian citizen, or admitted to Canada as a permanent resident under the Immigration Act, or admitted to Canada for a period of not less than 1 year, if during that time his or her income is subject to Canadian Income Tax. Benefits are also paid under prescribed circumstances to Canadian citizens living abroad. A Special Allowance (\$46.65 monthly in 1985) is paid on behalf of a child under the age of 18 who is maintained by a welfare agency, a government department or an institution. In some cases, payment is made directly to a foster parent. The Special Allowance was paid on behalf of 34,370 children across Canada in March 1985

Family Allowances are considered as income for income-tax purposes for the parent who claims an exemption for the child, Special Allowances are not taxable.

During the month of March 1985, over 3 6m Canadian families (including 6 6m, eligible children) received Family Allowances, the total bill for FA and Special

Allowances in the 1984–85 fiscal year was (estimate) \$2,418m

Family Allowance benefits are increased each year in Jan. in accordance with the Consumer Price Index, for 1983 and 1984, however, indexation for regular benefits, (Special Allowances are excluded from this provision), has been limited to 6% and 5% respectively, in accordance with a federal policy on fiscal restraints announced in late 1982. The Family Allowances Act specifies that a provincial government may request the federal government to vary the allowance rates payable within the province subject to the fulfilment of stipulated conditions. Only the

provinces of Alberta and Quebec have exercised this option.

The Old Age Security (OAS) pension is payable to persons 65 years of age and over who satisfy the residence requirements stipulated in the Old Age Security Act The amount payable, whether full or partial, is also governed by stipulated conditions, as is the payment of an OAS pension to a recipient who absents himself from Canada. OAS pensioners with little or no income apart from OAS may, upon application, receive a full or partial supplement known as the Guaranteed Income Supplement (GIS). Entitlement is normally based on the pensioner's income in the preceding year, calculated in accordance with the Income Tax Act. The spouse of an OAS pensioner, aged 60 to 64, meeting the same residence requirements as those stipulated for OAS, may be eligible for a full or partial Spouse's Allowance (SPA) SPA is payable, on application, the annual combined income of the couple being subject to an income test which does not include the OAS pension or the Guaranteed Income Supplement. In 1979, the SPA program was expanded to include a spouse, who is eligible for SPA in the month the pensioner spouse dies, until the age of 65 or until remarriage (Extended Spouse's Allowance) At Sept, 1985, SPA is available to all eligible widow(er)s aged 60-64

The OAS pension is taxable; GIS and SPA are not taxable. However, they must be included in computing the net income of a dependant for income-tax purposes OAS, GIS and SPA are subject to an increase every Jan, April, July and Oct. to

reflect increases in the Consumer Price Index.

In Oct. 1985, the basic OAS pension was \$282 94 monthly, the maximum Guaranteed Income Supplement was \$336.26 monthly for a single pensioner or a married pensioner whose spouse was not receiving a pension or a Spouse's Allowance, and \$219.00 monthly for each spouse of a married couple where both are pensioners. The maximum Spouse's Allowance for the same quarter was \$501.94 monthly (equal to the basic pension plus the maximum GIS married rate) and \$554.16 for the spouse of a deceased pensioner.

OAS and the Canada Pension Plan authorise reciprocal agreements with other countries to achieve portability of pensions. Such agreements have been made with Italy, France and Portugal, the US, Greece and Jamaica. In general, parallel

provisions apply under QPP.

The Canada Pension Plan (CPP) is designed to provide workers with a basic level of income protection in the event of retirement, disability or death Benefits are determined by the contributor's earnings and contributions made to the Plan, and are adjusted annually to reflect cost of living increases. Contribution is compulsory for most employed and self-employed Canadians 18 to 65 years of age. The Canada Pension Plan does not operate in Quebec, which has exercised its constitutional prerogative to establish a similar plan, the Quebec Pension Plan (QPP), to operate in lieu of CPP; there is reciprocity between the two to ensure coverage for all adult Canadians in the labour force.

CPP/QPP contributions are deductible for income tax purposes, while benefits are taxable. Benefits are adjusted annually to fully reflect increases in the Con-

sumer Price Index.

Both CPP and QPP are funded by equal contributions of 1.8% of pensionable earnings from the employer and 1.8% from the employee (self-employed persons contribute the full 3.6%), in addition to the interest on the investment of excess funds. In 1985, the range of yearly pensionable earnings was from \$2,300 to \$23,400; a person who earned and contributed at less than the maximum level receives monthly benefits at rates lower than the maximum allowable under CPP/OPP.

For CPP, an advisory committee representing employers, employees, selfemployed persons and the public regularly reviews the operation of the plan, the state of investments and the adequacy of coverage and benefits, and reports to the Minister of National Health and Welfare. In March 1985, over 1 6m. Canadians received Canada Pension Plan benefits; an additional 577,700 persons received Quebec Pension Plan benefits. Total expenditures during 1984–85 were just over \$4,223m for CPP and \$1,629m. for QPP.

Under the Canada Assistance Plan, the federal government pays 50% of the cost, to the provinces, of assistance to persons in need, welfare services provided to persons who are in need or likely to become in need if they do not receive such services (welfare services means services having as their object the lessening, removal or prevention of the causes and effects of poverty, child neglect or dependence on public assistance); and work activity projects which are designed to improve the employability of persons who have unusual difficulty in finding or retaining jobs or in undertaking job training.

'Need' is defined by each province and is determined by the 'budget deficit' method, that is, the difference between an applicant's requirements and his income and resources. The rates of assistance payable are also determined by provincial authorities and are non-taxable. Provinces generally adjust social assistance rates once a year in accordance with certain economic indicators.

In addition to persons in need as defined in the Plan, federal contributions may be made towards agency costs of providing welfare services to persons who are likely to become in need, it such services are not provided. The amount of federal subsidy is dependent on the proportion of eligible persons as determined by the use of an income test or a pre-determined income level for different sized families

In March 1984, close to 1 9m Canadians (representing 985,000 households) were in receipt of direct financial assistance from provincial programmes shareable under the Canada Assistance Plan. Total payments to the provinces under the Plan (including General Assistance, Homes for Special Care, Child Welfare, Health Care, Welfare Services and Work Activity) for the 1983-84 financial year were \$3,643m, this amount includes the estimated value of income tax points transferred to the province of Quebec by the Department of Finance under the Interim Arrangements Act

Unemployment Insurance covers about 95% of workers To be insurable, workers must be employed by the same employer for at least 15 hours a week or make at least \$85 00 a week (1984) Neither the self-employed nor workers over 65 may insure their earnings. Benefit rate is 60% of average weekly insurable earnings Maximum weekly benefit (1985) \$276.

Workers' compensation coverage is compulsory for employees in specified trades and industries. Maximum compensation is 75% of gross earnings except in Quebec, Alberta and New Brunswick where it is 90% of net earnings

The New Horizons Program, established in 1972 and administered by the Department of National Health and Welfare, is designed to encourage the self-determination and community involvement of retired Canadians From inception late in 1972 until July 1983, close to \$119m had been approved for over 19,000 projects

## CANADIAN PROVINCES

The 10 provinces have each a separate parliament and administration, with a Lieut.-Governor, appointed by the Governor-General in Council at the head of the executive. They have full powers to regulate their own local affairs and dispose of their revenues, provided only they do not interfere with the action and policy of the central administration. Among the subjects assigned exclusively to the provincial

legislatures are: the amendment of the provincial constitution, except as regards the office of the Lieut-Governor, property and civil rights; direct taxation for revenue purposes, borrowing; management and sale of Crown lands; provincial hospitals, reformatories, etc; shop, saloon, tavern, auctioneer and other licences for local or provincial purposes; local works and undertakings, except lines of ships, railways, canals, telegraphs, etc., extending beyond the province or connecting with other provinces, and excepting also such works as the Dominion Parliament declares are for the general good, marriages, administration of justice within the province; education.

Local Government Under the terms of the British North America Act the provinces are given full powers over local government. All local government institutions are, therefore, supervised by the provinces, and are incorporated and function

under provincial acts.

The acts under which municipalities operate vary from province to province. A municipal corporation is usually administered by an elected council headed by a mayor or reeve, whose powers to administer affairs and to raise funds by taxation and other methods are set forth in provincial laws, as is the scope of its obligations to, and on behalf of, the citizens Similarly, the types of municipal corporations, their official designations and the requirements for their incorporation vary between provinces. The following table sets out the classifications as at 1 Jan 1977

### **ALBERTA**

HISTORY. The southern half of the province of Alberta was part of Rupert's land which was granted by royal charter in 1670 to the Hudson's Bay Company The intervention by the North West Company in the fur trade after 1783 led to the establishment of trading posts. In 1869 Rupert's land was transferred from the Hudson's Bay Company (which had absorbed its rival in 1821) to the new Dominion, and in the following year this land was combined with the former Crown land of the North Western Territories to form the Northwest Territories

In 1882 'Alberta' first appeared as a provisional 'district', consisting of the southern half of the present province In 1905 the Athabasca district to the north was added when provincial status was granted to Alberta

Four parties have held office the Liberals 1905-21; the United Farmers 1921–35; Social Credit 1935–71, and Progressive Conservative since Sept 1971

AREA AND POPULATION. The area of the province is 661,188 sq. km, 644,392 sq. km being land area and 16,796 sq. km water area. The population (estimate 1 April 1985) was 2,344,600; the urban population (1982), centres of 1,000 or over, was 1,727,545 and the rural 510,179 Population of the cities (30 June 1985): Calgary, 625,143; Edmonton, 560,085 (metropolitan area, 683,000), Lethbridge, 59,901, Red Deer, 52,620, Medicine Hat, 41,717, St Albert, 35,897, Fort McMurray, 36,810; Grande Prairie, 25,056, Camrose, 12,751, Leduc, 12,926, Fort Saskatchewan, 12,474, Airdrie, 10,431, Wetaskiwin, 10,022, Lloydminster (Alberta portion), 10,557, Drumheller, 6,671

CLIMATE. A continental climate long, cold winters and mild summers Rainfall amounts are greatest between May and Sept Edmonton Jan 5°F (-15°C), July 61°F (16 1°C). Annual rainfall 18" (439 mm).

CONSTITUTION AND GOVERNMENT. The constitution of Alberta is contained in the British North America Act of 1867, and amending Acts, also in the Alberta Act of 1905, passed by the Parliament of the Dominion of Canada, which created the province out of the then Northwest Territories. All the provisions of the British North America Act, except those with respect to school lands and the public domain, were made to apply to Alberta as they apply to the older provinces of Canada. On 1 Oct. 1930 the natural resources were transferred from the Dominion to provincial government control. The province is represented by 6 members in the Senate and 21 in the House of Commons of Canada.

The executive is vested nominally in the Lieut -Governor, who is appointed by the federal government, but actually in the Executive Council or the Cabinet of the legislature. Legislative power is vested in the Assembly in the name of the Queen.

Members of the Legislative Assembly are elected by the universal vote of adults

over the age of 18 years.

There are 79 members in the legislature (elected 2 Nov. 1982). 75 Progressive Conservative, 2 New Democratic Party, 2 Independent.

Lieut.-Governor Her Hon. Helen Hunley (sworn in 22 Jan. 1985). Flag. Blue with the shield of the province in the centre.

Local Government The local government units are City, Town, New Town, Village, Summer Village, County, Municipal District and Improvement District

There are 12 cities in Alberta, namely Calgary, Camrose, Drumheller, Edmonton, Fort McMurray, Grande Prairie, Lethbridge, Lloydminster, Medicine Hat, Red Deer, St Albert and Wetaskiwin. These cities operate under the Municipal Government Act. The governing body consists of a mayor and a council of from 6 to 20 members. A city can be incorporated by order of the Lieut-Governor-in-Council A population of 10,000 is required.

There are no limits of area specified in the statutes for any of the different local government units. The population requirement for a Town as specified in the Municipal Government Act is 1,000 people, and the area at incorporation is that of

the original village

A Village must contain 75 separate and occupied dwellings. The Municipal Government Act requires each dwelling to have been occupied continuously for a period of at least 6 months. A Summer Village must contain 50 separate dwellings.

A rural county area is an area incorporated through an order of the Lieut.-Governor-in-Council under the provisions of the County Act. One board of councillors deal with both municipal and school affairs.

A rural Municipal District is an area which has been incorporated under the Municipal Government Act. In Municipal Districts separate boards control

municipal and school affairs.

Areas not incorporated as counties or Municipal Districts are termed improvement Districts or Special Areas. Sparsely populated, such districts are administered and taxed by the Department of Municipal Affairs of the provincial government. There are no requirements as to the minimum number of residents of a County or Municipal District.

### **ENERGY AND NATURAL RESOURCES**

Oil. In 1984, 69,269,000 cu. metres of crude oil and condensate were produced with gross sales value of \$14,927,000,000. Alberta produced 83.5% of Canada's

crude petroleum output in 1984 Production of natural gas by-products was 18,951,000 cu. metres, valued at \$2,717m

The 4 major deposits of oil sands are found in northern and eastern Alberta. The Athabasca, Cold Lake, Peace River and Buffalo Head Hills deposits, total area, 140,800 sq km A limited part of the deposits along the Athabasca River can be exploited through open-pit mining. The rest of the Athabasca, and all the deposits in the other areas, are deeper reserves which must be developed through in situ techniques. These reserves reach depths of 760 metres.

One recovery plant, situated 25 miles north of Fort McMurray, began production in 1967. The deposit being produced is sufficiently close to the surface to permit strip mining. A second plant, to produce 20,000 culmetres per day of synthetic crude oil, began production in 1978.

Gas. Natural gas is found in abundance in numerous localities. In 1984, 64,929,000 cu. metres valued at \$6,981,421,000 were produced

Minerals. In 1984 the ultimate remaining recoverable coal resources of Alberta were estimated at 21,600m tonnes

Value of total mineral production increased from \$24,103,412,000 in 1983 to \$25,963,735,000 in 1984

Agriculture. Total area of farms (1981) 47,218,170 acres, improved land, 30,951,142, under crops, 20,858,765, improved pasture, 3,907,830, summer fallow, 5,449,831, other improved land, 734,716; unimproved land, 16,267,083, woodland, 1,217,420, other unimproved land, 15,049,663

For particulars of agricultural production and livestock, see under Canada, pp 282–83. Farm cash receipts in 1984 totalled \$3,910,416,000, of which crops contributed \$2,078,205,000, livestock and products, \$1,783,323,000, and other sources, \$48,888,000

Forestry. Total woodland (1981) 1 2m acres Alberta has an estimated net merchantable volume of 1,700m cu metres of timber comprised of 700m cu metres of hardwood and 1,000m cu metres of softwood In 1984–85, 5,612,558 cu metres of lumber and plywood were produced

Fisheries. The lakes of the province contain whitefish, pike and tullibee Commercial catches are marketed through the Freshwater Fish Marketing Corporation which was inaugurated in May 1969 as the result of an agreement between the federal government and the provinces for the buying and exporting of freshwater fish Marketed value of commercially caught fish 1984–85 was \$4,480,249. This value includes fish not marketed through the corporation

INDUSTRY. The leading manufacturing industries are food and beverages, petroleum refining, metal fabricating, wood industries, primary metal, chemical and chemical products and non-metallic mineral products industries. There were in 1982 approximately 2,490 manufacturing establishments, in which were employed 79,701 persons, who earned in salaries and wages \$1,925,263,000

Manufacturing shipments had a total value of \$13,855,893,000 in 1984 Chief among these shipments were: Food and beverages, \$3,985,114,000, refined petroleum and coal products, \$3,869,236,000, chemicals and chemical products, \$1,740,356,000, increated metal products, \$550,467,000, primary metals, \$641,427,000; non-metallic mineral products, \$448,262,000, printing, publishing and allied, \$485,485,000, wood, \$395,044,000, paper and allied products, \$391,538,000; machinery, \$470,881,000, furniture and fixtures, \$95,153,000; other, \$100,355,000.

Total retail sales (1984) \$11,833m

Tourism is of increasing importance and in 1984 contributed \$2,014 2m to the economy.

### **COMMUNICATIONS**

**Roads.** In 1984 there were 151,785 km of roads and highways, including 103,587 km gravelled and 15,610 km paved.

At 31 March 1985 there were 2,003,808 motor vehicles registered, including 1,264,339 passenger cars, 400,059 trucks, 247,539 trailers, 7,991 buses and 59,638 motor cycles

Railways. In 1985 the length of main railway lines was 9,031 4 km. In 1985 there was a rail rapid transit network in Edmonton (10 3 km) and Calgary (22-2 km).

Post and Telecommunications. Alberta's modern telephone system is owned and operated by the provincial government, except in the city of Edmonton (owned and operated by Edmonton) and some rural lines. There were 1,075,140 telephones in service in April 1985.

### JUSTICE AND EDUCATION

Justice. The Supreme Judicial authority of the province is the Court of Appeal. Judges of the Court of Appeal and Court of Queen's Bench are appointed by the Dominion Government and hold office until retirement at the age of 75 There are courts of lesser jurisdiction in both civil and criminal matters. The Court of Queen's Bench has full jurisdiction over civil proceedings. A Provincial Court which has jurisdiction in civil matters up to \$1,000 is presided over by provincially appointed judges. Juvenile Courts have power to try boys and girls 16 and under for offences against the Juvenile Delinquents Act.

The jurisdiction of all criminal courts in Alberta is enacted in the provisions of the Criminal Code The system of procedure in civil and criminal cases conforms as nearly as possible to the English system

Education. Schools of all grades are included under the term of public school (including those in the separate school system which are publicly supported). The same board of trustees controls the schools from kindergarten to university entrance. In 1983–84 there were 422,764 pupils enrolled in elementary, junior high schools and high schools. The University of Alberta (in Edmonton), organized in 1907, had, in 1984–85, 23,617 full-time students. The University of Calgary, formerly part of the University of Alberta and autonomous from April 1966, had in 1984–85, 15,173 full-time students. The University of Lethbridge, organized in 1966, had in 1984–85, 2,603 full-time students. The Athabasca University had in 1984–85, 9,200 part-time students. Banff Centre for Continuing Education had in 1984–85, 2,350 part-time students. The full-time enrolment at Alberta's 11 public colleges totalled 16,816 students in 1984–85

## **BRITISH COLUMBIA**

HISTORY. Vancouver Island was organized as a colony in 1849; the mainland as far as the watershed of the Rocky Mountains was organized as a colony following a gold rush on the Fraser River in 1859. The two were united as the colony of British Columbia in 1866; this became a Canadian Province in 1871.

AREA AND POPULATION. British Columbia has an area of 948,596 sq. km. The capital is Victoria. The province is bordered westerly by the Pacific ocean and Alaska Panhandle, northerly by the Yukon and Northwest Territories, easterly by the Province of Alberta and southerly by the USA along the 49th parallel A chain of Islands, the largest of which are Vancouver Island and the Queen Charlotte Islands, affords protection to the mainland coast.

The June 1981 census population was 2,744,467; estimate, 1985, 2,892,000. The principal cities and their populations (1984) are as follows: Greater Vancouver, 1,331,000; Greater Victoria, 242,000, Prince George, 69,293, Kamloops, 64,661, Kelowna, 61,847, Nanaimo, 50,317, Penticton, 24,479, Vernon, 20,991; Port Alberni, 19,351, Prince Rupert, 16,972; Cranbrook, 16,747, Fort St John, 13,818

Vital statistics, see p 272 Religion, see p. 289.

CLIMATE. The climate is cool temperate, but mountain influences affect temperatures and rainfall very considerably Driest months occur in summer Vancouver. Jan. 36°F (2 2°C), July 64°F (17 8°C). Annual rainfall 58" (1,458 mm)

CONSTITUTION AND GOVERNMENT. British Columbia (then known as New Caledonia) originally formed part of the Hudson's Bay Company's concession. In 1849 Vancouver Island and in 1858 British Columbia were constituted Crown Colonies; in 1866 the two colonies amalgamated. The British North America Act of 1867 provided for eventual admission into Canadian Confederation, and on 20 July 1871 British Columbia became the sixth province of the Dominion.

British Columbia has a unicameral legislature of 57 elected members. Government policy is determined by the Executive Council responsible to the Legislature. The Lieut -Governor is appointed by the Governor-General of Canada, usually for a term of 5 years, and is the head of the executive government of the province.

Lieut -Governor The Hon. Robert Gordon Rogers.

Flag. A banner of the arms, ie, blue and white wavy stripes charged with a setting sun in gold, across the top of a Union Flag with a gold coronet in the centre.

The Legislative Assembly is elected for a maximum term of 5 years. Every male or female Canadian citizen 19 years and over, having resided a minimum of 6 months in the province, duly registered, is entitled to vote. Representation of the parties at 8 March 1985. Social Credit Party, 34, New Democratic Party, 22, United Party, 1; total, 57

The province is represented in the Federal Parliament by 28 members in the House of Commons, and 6 Senators

The Executive Council was composed as follows, Dec. 1985:

Premier William Richards Bennett.

Agriculture and Food. Harvey W. Schroeder Attorney-General Brian R D Smith. Consumer and Corporate Affairs James J. Hewitt. Education. John H. Heinrich. Energy, Mines and Petroleum Resources Stephen Rogers. Environment F. C Austin Pelton. Finance Hugh A. Curtis. Forests: Thomas M Waterland. Health. James Nielsen. Agent-General in London Alexander H. Harte, QC (British Columbia House, 1 Regent St., London, SW1Y 4NS).

Local Government Vancouver City was incorporated by statute and operates under the provisions of the Vancouver Charter of 1953 and amendments. This is the only incorporated area in British Columbia not operating under the provisions of the Municipal Act. Under this Act municipalities are divided into the following classes: (a) a village with a population between 500 and 2,500, governed by a council consisting of a mayor and 4 aldermen; (b) a town with a population between 2,500 and 5,000, governed by a council consisting of a mayor and 4 aldermen; (c) a city where the population exceeds 5,000 governed by a council consisting of a mayor and 6 or 8 aldermen depending on population, (d) a district where the area exceeds 810 hectares and the average density is less than 5 persons per hectare, governed by a council consisting of a mayor and 6 or 8 aldermen depending on population

There are two other forms of local government. the regional district covering a number of areas both incorporated and unincorporated, governed by a board of directors, and the improvement district governed by a board of 3 trustees

Revenue for municipal services is derived mainly from real-property taxation, although additional revenue is derived from licence fees, business taxes, fines, public utility projects and grants-in-aid from the provincial government

### **ECONOMY**

**Budget.** Current provincial revenue and expenditure, including all capital expenditures, in Canadian \$1 m for fiscal years ending 31 March

### **ENERGY AND NATURAL RESOURCES**

Flectricity. Generation in 1984 totalled 52,369m. kwh. of which a net 8,313m. kwh were exported Consumption within the province was 45,612m kwh.

Minerals. Copper, coal, natural gas, crude oil, molybdenum and silver are the most important minerals produced. The 1984 total of mineral production was estimated at \$3,285 2m. Total value of mineral fuels produced in 1984 was estimated at Coal, \$912 3m., oil and gas, \$994 4m

Agriculture. Only 2 4m. hectares or 3% of the total land area is arable or potentially arable. Farm cash receipts, in 1984, were \$971 3m.

Forestry. About 55% of British Columbia's land is forest land, with 47 8m. hectares bearing commercial forest. Over 94% of the forest area is owned or administered by the provincial government. The total cut from forests in 1984 was 74.6m. cut metres.

Fisheries. In 1984 the wholesale market value of fish products was estimated at \$466 9m.

### INDUSTRY AND TRADE

Industry. The selling value of factory shipments from all manufacturing industries reached an estimated \$17,647m. in 1984.

Commerce. Exports through British Columbia customs ports during 1984 totalled \$18,253m in value, while imports amounted to \$7,827m. About 40% of exports

through British Columbia customs ports are products from other provinces, primarily grains, potash and fuels from the Prairie Provinces. USA is the largest market for products exported through British Columbia customs ports (\$6.881m. in 1984) followed by Japan (\$4,730m.).

Exports were valued at \$11,659m. in 1984. The leading exports were. Lumber, \$2,667.9m.; pulp, \$1,762 3m.; coal, \$1,537 9m.; newsprint, \$641 2m, natural gas, \$430.3m.; aluminium ingots, \$395.1m, copper ore and ingots, \$381 9m.,

fisheries products, \$370.6m.

### **COMMUNICATIONS**

Roads. At 31 March 1985 there were 43,939 km of provincial roads and rights of way in the province, of which 19,219 km were paved

Railways. The province is served by two transcontinental railways, the Canadian Pacific Railway and the Canadian National Railway. British Columbia is also served by the publicly owned British Columbia Railway, the Railway Freight Service of the BC Hydro and Power Authority, the Northern Alberta Railways Company and the Burlington Northern Inc The combined route-mileage of mainline track operated by the CPR, CNR and BCR totals 7,500 km. The system also includes CPR and CNR railcar barge connections to Vancouver Island, between Prince Rupert and Alaska, and interchanges with American railways at southern border points.

Aviation. International airports are located at Vancouver and Victoria. Daily interprovincial and intraprovincial flights serve all main population centres. Small public and private airstrips are located throughout the province

Shipping. The major ports are Vancouver, New Westminster, Victoria, Nanaimo and Prince Rupert. The volume of domestic and international cargo handled during 1983 was 40m. tonnes and 61m. tonnes respectively.

The British Columbia Ferries connect Vancouver Island with the mainland and also provide service to other coastal points. Service by other ferry systems is also provided between Vancouver Island and the USA. The Alaska State Ferries connect Prince Rupert with centres in Alaska.

Post and Broadcasting. The British Columbia Telephone Company have 1 4m telephones in service. In March 1984 there were 67 AM radio, 19 FM radio and 12 television stations originating in British Columbia In addition there were 575 rebroadcasting stations in the province.

### **EDUCATION AND WELFARE**

Education. Education, free up to Grade XII levels, is financed jointly from municipal and provincial government revenues. Attendance is compulsory from the age of 6 to 15. There were 491,085 pupils enrolled in public schools from kindergarten to Grade XII in Sept. 1984.

The universities had a full-time enrolment of 36,260 for 1984–85 (preliminary). They include University of British Columbia, Vancouver; University of Victoria, Victoria and Simon Fraser University, Burnaby. The regional colleges are Camosun College, Victoria; Capilano College, North Vancouver; Cariboo College, Kamloops; College of New Caledonia, Prince George; Douglas College, New Westminister; East Kootenay Community College, Cranbrook; Fraser Valley College, Chilliwack/Abbotsford; Kwantlen College, Surrey; Malaspina College, Nanaimo; North Island College, Comox; Northern Lights College, Dawson Creek/Fort St John; Northwest Community College, Terrace/Prince Rupert; Okanagan College, Kelowna with branches at Salmon Arm and Vernon; Selkirk College, Castlegar; Vancouver Community College, Vancouver.

There are also the British Columbia Institute of Technology, Burnaby; Emily Carr College of Art and Design, Vancouver; Justice Institute of British Columbia, Vancouver; Open Learning Institute, Richmond; Pacific Marine Training Institute, North Vancouver; Pacific Vocational Institute, Burnaby/Maple Ridge/

Richmond. A televised distance education and special programmes through KNOW, the Knowledge Network of the West is provided.

Health. The Government operates a hospital insurance scheme giving universal coverage after a qualifying period of 3 months' residence in the province. The province has come under a national medicare scheme which is partially subsidized by the provincial government and partially by the federal government

## **MANITOBA**

HISTORY. The Hudson's Bay Company formed a colony on the Red River in 1812, which was part of territory annexed to Canada in 1870. The Metis colonists (part-Indian, mostly French-speaking, Catholic) objected to the arrangements for the purchase of the Company territory by Canada and the province of Manitoba was created to accommodate them. It was extended northwards and westwards in 1881 and to Hudson Bay in 1912.

AREA AND POPULATION. The area of the province is 250,946 sq miles (649,046 sq. km), of which 211,721 sq. miles are land and 39,225 sq miles water From north to south it is 793 km and the widest point is 493 km

The population (census, 1981) was 1.026,241 Estimate (July 1985), 1,070,300 Population of Winnipeg, the capital (June 1984), 603,500, other principal cities (census, 1981): Brandon, 36,242, Thompson, 14,288, Portage la Prairie, 13,086, Selkirk, 10,037, Flin Flon, 7,894.

Vital statistics, see p 272 Religion, see p 289

CLIMATE. The climate is cold continental, with very severe winters but pleasantly warm summers. Rainfall amounts are greatest in the months May to Sept Winnipeg Jan -3°F (-19 3°C), July 67°F (19 6°C) Annual rainfall 21" (539 mm)

CONSTITUTION AND GOVERNMENT. Manitoba was known as the Red River Settlement before its entry into the Dominion in 1870. The provincial government is administered by a Lieut-Governor assisted by an Executive Council (Cabinet) which is appointed from and responsible to a legislative assembly of 57 members elected for 5 years. Women were enfranchised in 1916. The Electoral Division Act, 1955, created 57 single-member constituencies and abolished the transferable vote. The Electoral Divisions Act, 1979, created 27 rural electoral divisions, and 30 urban electoral divisions. The province is represented by 6 members in the Senate and 14 in the House of Commons of Canada.

Environment and Workplace Safety and Health Gerard Lecuyer Northern Affairs, Minister responsible for and charged with the administration of The Communities Economic Development Fund Act, The Manitoba Natural Resources Development Act (with respect to Channel Area Loggers Ltd or to Moose Lake Loggers Ltd).

Local Government. Rural Manitoba is organized into rural municipalities which vary widely in size. Some have only 4 townships (a township is 36 sq. miles), while the largest has 22 townships. The province has 105 rural municipalities, as well as 35 incorporated towns, 40 incorporated villages and 5 incorporated cities.

On 1 Jan. 1972, the cities and towns comprising the metropolitan area of Winnipeg were amalgamated to form the City of Winnipeg. A mayor and council are elected to a central government, but councillors also sit on 'community committees' which represent the areas or wards they serve These committees are advised by non-elected residents of the area on provision of municipal services within the community committee jurisdiction. Taxing powers and overall budgeting rest with the central council. The mayor is elected at the same time as the councillors in a city-wide vote. Revisions to the City of Winnipeg Act came into effect with the municipal elections held in Oct. 1977.

Since Jan. 1945, 17 Local Government Districts have been formed in the less densely populated areas of the province. They are administered by a provincially appointed person, who acts on the advice of locally elected councils.

In the extreme north, many communities have locally elected councils, while others are administered directly by the Department of Northern Affairs. This department provides most of the funding in all these northern settlements.

FINANCE. Provincial revenue and expenditure (current account) for fiscal years ending 31 March (in Canadian \$):

### **ENERGY AND NATURAL RESOURCES**

Electricity. The total generating capacity of Manitoba's power stations is 4.1m.

kw. The Manitoba Hydro system, owned by the province, provides most of this power, while the city-owned Winnipeg Hydro provides about 190,000 kw The systems have about 417,557 customers and consumption was 12 5m kwh. in 1984

Oil. Crude oil production in 1984 was valued at \$180m. for the 800,000 cu. metres produced.

Minerals. Total value of minerals in 1984 was about \$777 7m. Principal minerals mined are nickel, zinc, copper, and small quantities of gold and silver. Manitoba has the world's largest deposits of caesium ore

Agriculture. Rich farmland is the main primary resource, although the area of Manitoba in farms is only about 14% of the total land area. In 1984 the total value of agricultural production in Manitoba was \$2,232m, with \$1,600m. from crops, \$624m from livestock and from the sale of other products including furs, hides and honey

Forestry. About 40% of the land area is wooded, of which 139,000 sq. km is productive forest land. Total sales of wood-using industries (1983–84, estimate) \$476m.

Fur Trade. Value of fur production to the trapper was \$3 7m. in 1984-85.

Fisheries. From 22,000 sq miles of rivers and lakes fisheries production was about \$13 4m. in 1983-84. Whitefish, sauger, pickerel, pike, trout and perch are the principal varieties of fish caught.

### INDUSTRY AND TRADE

Industry. Manufacturing, the largest industry in the province, encompasses almost every major industrial activity in Canada Estimated shipments in 1984 totalled \$5,206m Manufacturing employed about 58,000 persons. Due to the agricultural base of the province, the food and beverage group of industries is by far the largest, valued at \$1,672m. in 1984, accounting for about 32 1% of the total value. The next largest segments are machinery, \$431m. (8.3%), transport equipment, \$346m. (6.7%) and clothing and textiles, \$351m. (6.7%).

Trade. Products grown and manufactured in Manitoba find ready markets in other areas of Canada, in the USA, particularly the upper midwest region, and in other countries Export shipments to foreign countries from Manitoba in 1984 were valued at about \$1,611 3m, with \$1,299m. (80 6%) going to the US Of total exports about 29% are raw materials and about 71% are processed and manufactured products

Tourism. In 1984, non-Manitoban tourists numbered 2.3m. All tourists including Manitobans contributed \$617m to the economy.

### COMMUNICATIONS

Roads. Highways and provincial roads totalled 19,007 km in 1984.

Railways. At 30 June 1985 the province had 6,300 km of track, not including industrial track, yards and sidings.

Aviation. A total of 108 licensed commercial air carriers operate from bases in Manitoba, as well as 8 regularly scheduled major national and international airlines

Post. All of the Manitoba Telephone System's 779,401 (1985) telephones are dialoperated. There are some privately-owned fixtures and extension phones; all service is operated by MTS.

EDUCATION. Education is controlled through locally elected school divisions. There are about 200,000 children enrolled in the province's elementary and secondary schools. Manitoba has 3 universities with an enrolment of about 42,000

during the 1984-85 year; the University of Manitoba, founded in 1877, in Winnipeg, the University of Winnipeg, and Brandon University. Expenditure (estimate) on education in the 1985-86 fiscal year was \$663m.

Three community colleges, in Brandon, The Pas and Winnipeg, offer 2-year diploma courses in a number of fields, as well as specialized training in many trades. They also give a large number and variety of shorter courses, both at their campuses and in many communities throughout the province.

### NEW BRUNSWICK

HISTORY. Touched by Jacques Cartier in 1534, New Brunswick was first explored by Samuel de Champlain in 1604. It was ceded by the French in the Treaty of Utrecht in 1713 and became a permanent British possession in 1763. It was separated from Nova Scotia and became a province in June 1784, as a result of the great influx of United Empire Loyalists. Responsible government came into being in 1848, and consisted of an executive council, a legislative council (later abolished) and a House of Assembly

AREA AND POPULATION. The area of the province is 28,354 sq miles (73,000 sq. km), of which 27,633 sq. miles (71,569 sq. km) are land area. The population (census 1976) was 677,250. Of the total population (1971) about 58% are of British origin, 37% French and the remainder are principally of Netherlands, German and Scandinavian descent, and in 1980 there were about 5,300 Indians Census population of urban centres: Saint John, 85,956, Moncton, 55,934, Fredericton (capital), 45,248; Bathurst, 16,301, Edmundston, 12,710, Campbellton, 9,282.

Vital statistics, see p. 272. Religion, see p. 289.

CLIMATE. A cool temperate climate, with rain at all seasons but temperatures modified by the influence of the Gulf Stream Saint John Jan. 14°F (-10°C), July 63°F (17.2°C). Annual rainfall 51" (1,278 mm)

CONSTITUTION AND GOVERNMENT. The government is vested in a Lieut.-Governor and a Legislative Assembly of 58 members each of whom is individually elected to represent the voters in one constituency or riding. A simultaneous translation system is used in the Assembly. Any Canadian subject of full age and 6 months' residence is entitled to vote. As a result of the provincial election held on 10 Oct. 1982 and subsequent by-elections, the Assembly is composed of 37 Progressive Conservatives, 19 Liberals and 1 New Democratic Party members with 1 vacant seat. The province has 10 members in the Canadian Senate and 10 members in the federal House of Commons.

Education Jean-Pierre Ouellet. Advanced Education and Training Mabel DeWare Municipal Affairs and Environment Robert Jackson. Commerce and Technology Fernand G. Dube, QC Fisheries James Tucker. Tourism, Recreation and Heritage Omer A. Leger. Housing Jean Gauvin Chairman of the New Brunswick Electric Power Commission Leslie I Hull.

Local Government Under the reforms introduced in 1967 the province has assumed complete administrative and financial responsibility for education, health, welfare and administration of justice Local government is now restricted to provision of services of a strictly local nature. Under the new municipal structure, units include existing and new cities, towns and villages Counties have disappeared as municipal units. Areas with limited populations have become local service districts. The former local improvement districts have become towns, villages or local service districts depending on their size.

FINANCE. The ordinary budget (in Canadian \$) is shown as follows (financial years ended 31 March)

	1982	<i>1983</i>	1984	1985
Gross revenue	1,772,232,788	1,945,154,091	2,213,420,941	2,373,350,000
Gross expenditure	1,795,554,444	2,147,955,484	2,344,948,500	2,506,687,800

Funded debt and capital loans outstanding (exclusive of Treasury Bills) as of 31 March 1985 was \$2,714m. Sinking funds held by the province at 31 March 1985, \$697m. The ordinary budget excludes capital spending.

### **ENERGY AND NATURAL RESOURCES**

Electricity. Hydro-electric, thermal and nuclear generating stations of the New Brunswick Electric Power Commission had an installed capacity of 3,190,000 kw at 31 March 1985, consisting of 14 generating stations. The Mactaquac hydro-electric development near Fredericton, has a name plate capacity of 653,400 kw The largest thermal generating station, Coleson Cove, near Saint John, has over 1m. kw. of installed capacity. Atlantic Canada's first nuclear generating station, a 630,000 kw. CANDU plant built on a promontory jutting out in the Bay of Fundy, near Saint John, went into commercial operation in Jan. 1983. New Brunswick is electrically inter-connected with utilities in neighbouring provinces of Quebec, Nova Scotia and Prince Edward Island, as well as the New England States. Electricity export sales accounted for over 40% of revenue in 1984–85; energy purchases, mainly from the large Hydro Quebec system, supplied about 23% of in-province energy requirements.

Minerals. A considerable variety of metals, industrial minerals, fuels and structural materials occur in the province Lead, zinc, copper, cadmium, bismuth, gold, silver, antimony, potash, salt, limestone, dolomite, gypsum, oil, gas, coal, oil shales, sand, gravel, clay, peat and marl are currently in production. 57% of the value of minerals produced in 1984, which totalled \$603m., was attributed to zinc production. In Canada, New Brunswick ranks second in zinc production, second in lead, third in silver and fifth in copper. Antimony is mined at Lake George, and two potash mines are in operation in the Sussex area. Oil and natural gas continue to be produced in the Stoney Creek and Hillsborough area. Gordex Minerals are expected to begin gold production at Cape Spencer early in 1986 using the heap leach process. Coal is strip-mined at Grand Lake, producing some 500,000 tonnes annually. Not all of the province's minerals have been explored sufficiently and research continues in this area.

Agriculture. The total area under crops is estimated at 130,526 hectares, exclusive of improved pasture land (41,479 hectares). Farms numbered 4,063 and averaged 107.8 hectares each (census 1981) Potatoes account for 23% of total farm cash

income. Mixed farming is common throughout the province. Dairy farming is centred around the larger urban areas, and is located mainly along the Saint John River Valley and in the south-eastern sections of the province. Income from dairy operations provides about 22% of farm cash income. New Brunswick is self-sufficient in fluid milk and supplies a processing industry. For particulars of agricultural production and livestock, see under Canada, pp. 282–83. Farm cash receipts in 1984 were approximately \$230m.

Forestry. New Brunswick contains some 62,000 sq km of productive forest lands. The gross value of forest production is over \$1 m and it accounts for almost one-quarter of all goods produced in the province. The pulp and paper and allied industry group is the largest component of the industry contributing about 70% of the value of output. Timber-using plants employ about 16,000 men for all aspects of the forest industry, including harvesting, processing and transportation. Practically all forest products are exported from the province's numerous ports and harbours near which many of the mills are located or sent by road or rail to the USA.

Fisheries. Commercial fishing is one of the most important primary industries of the province, employing 6,665 Nearly 50 commercial species of fish and shellfish are landed, of which scallop, shrimp, crab, herring and cod accounted for 83 3% of landed value Landings in 1984 (79,671 tonnes) amounted to \$72 4m In 1984 there were 168 fish processing plants employing more than 13,662 people in peak periods. The total market value of fish products in 1983 was approximately \$316 1m Estimate (1984) \$345m Exports (1984) \$212 8m

INDUSTRY. In 1985 there were 1,389 manufacturing and processing establishments, employing about 39,100 persons. New Brunswick's location, with deepwater harbours open throughout the year and container facilities at Saint John, makes it ideal for exporting. Industries include food and beverages, paper and allied industries, timber products About 20% of the industrial labour force work in Saint John

**TOURISM.** Tourism is a major industry. During 1984, more than 4m tourists spent approximately \$402m

### **COMMUNICATIONS**

Roads. There are about 2,092 km of arterial highways and 2,548 km of collector roads, over 98% of which are hard-surfaced 12,529 km of local roads provide access to most areas in the province. The main highway system, including 617 km of the Trans-Canada Highway, links the province with the principal roads in Quebec and Nova Scotia, and Prince Edward Island, as well as the Interstate Highway System in the eastern seaboard states of the USA. Passenger vehicles, 31 March 1985, numbered 268,686, commercial vehicles, 118,917, motor cycles, 11,817.

Railways. New Brunswick is served by main lines of both Canadian Pacific and Canadian National railways.

Post and Broadcasting. In 1984 the New Brunswick Telephone Co. Ltd had 439,446 telephones in service. The province is served by 19 radio stations. Sixteen are privately owned and 3 owned by the Canadian Broadcasting Corporation Three stations broadcast in the French language, 3 are bilingual and the CBC International Service broadcasts in several languages from its station at Sackville. The province is served by 3 television stations, 1 of which broadcasts in French

Newspapers. New Brunswick had (1984) 4 daily newspapers, and 23 weekly newspapers, 8 in French or bilingual.

EDUCATION. Public education is free and non-sectarian. There are 4 universities. The University of New Brunswick at Fredericton (founded 13 Dec. 1785 by the Loyalists, elevated to university status in 1823, reorganized as the University of New Brunswick in 1859) had 6,620 full-time students at the Fredericton campus

and 1,003 full-time students at the Saint John campus (1985–86); Mount Allison University at Sackville had 1,780 full-time students, the Université de Moncton at Moncton, 3,420 full-time students; St Thomas University at Fredericton, 1,260 full-time students During the period 1 July 1984 to 30 June 1985, there were 13,048 students enrolled full-time at 10 Community College campuses and at various campus training centres.

There were, in Sept 1984, 142,939 students and 7,464 full-time (equivalent) teachers in the province's 442 schools. There are 41 school boards

## NEWFOUNDLAND AND LABRADOR

HISTORY. Archaeological finds at L'Anse-au-Meadow in northern Newfoundland suggest that the Vikings had established a colony there at about A.D 1000 Newfoundland was discovered by John Cabot 24 June 1497, and was soon frequented in the summer months by the Portuguese, Spanish and French for its fisheries. It was formally occupied in Aug. 1583 by Sir Humphrey Gilbert on behalf of the English Crown, but various attempts to colonize the island remained unsuccessful. Although British sovereignty was recognized in 1713 by the Treaty of Utrecht, disputes over fishing rights with the French were not finally settled till 1904 By the Anglo-French Convention of 1904, France renounced her exclusive fishing rights along part of the coast, granted under the Treaty of Utrecht, but retained sovereignty of the offshore islands of St Pierre and Miquelon.

AREA AND POPULATION. Area, 143,501 sq miles (371,669 sq. km) of which freshwater, 13,139 sq. miles (34,030 sq. km). In March 1927 the Privy Council decided the boundary between Canada and Newfoundland in Labrador This area, now part of the Province of Newfoundland and Labrador, is 102,486 sq. miles The coastline is extremely irregular. Bays, fiords and inlets are numerous and there are many good harbours with deep water close to shore. The coast is rugged with bold rocky cliffs from 200 to 400 ft high; in the Bay of Islands some of the islands rise 500 ft, with the adjacent shore 1,000 ft above tide level. The interior is a plateau of moderate elevation and the chief relief features trend north-east and south-west Long Range, the most notable of these, begins at Cape Ray and extends north-east for 200 miles, the highest peak reaching 2,673 ft. Approximately onethird of the area is covered by water Grand Lake, the largest body of water, has an area of about 200 sq miles. The principal rivers flow towards the north-east On the borders of the lakes and water-courses good land is generally found, particularly in the valleys of the Terra Nova River, the Gander River, the Exploits River and the Humber River, which are also heavily timbered.

Census population, 1981, was 567,681.

The capital of Newfoundland is the City of St John's (154,820, metropolitan area) The only other city is Corner Brook (24,339); important towns are Labrador City (11,538), Gander (10,404), Stephenville (8,876), Grand Falls (8,765), Happy Valley-Goose Bay (7,103), Marystown (6,299), Channel-Port aux Basques (5,988), Windsor (5,747), Carbonear (5,335), Bonavista (4,460), Wabana (4,254), Wabush (3,155).

Vital statistics, see p. 272. Religion, see p. 289.

CLIMATE. The cool temperate climate is marked by heavy precipitation, distributed evenly over the year, a cool and cheerless summer and frequent fogs in winter. St. John's. Jan. 23°F (-5°C), July 59°F (15°C) Annual rainfall 54" (1,367 mm).

CONSTITUTION AND GOVERNMENT. Until 1832 Newfoundland was ruled by the Governor under instructions of the Colonial Office. In that year a Legislature was brought into existence, but the Governor and his Executive Council were not responsible to it. Under the constitution of 1855, which lasted until its suspension in 1934, the government was administered by the Governor appointed by the Crown with an Executive Council responsible to the House of Assembly of 27 elected members and a Legislative Council of 24 members nominated for life by the Governor in Council. Women were enfranchised in 1925. At the Imperial Conference of 1917 Newfoundland was constituted as a Dominion.

In 1933 the financial situation had become so critical that the Government of Newfoundland asked the Government of the UK to appoint a Royal Commission to investigate conditions. On the strength of their recommendations, the parliamentary form of government was suspended and Government by Commission was

inaugurated on 16 Feb. 1934.

A National Convention, elected in 1946, made, in 1948, recommendations to H.M. Government in Great Britain as to the possible forms of future government to be submitted to the people at a national referendum. Two referenda were held In the first referendum (June 1948) the three forms of government submitted to the people were commission of government for 5 years, confederation with Canada and responsible government as it existed in 1933. No one form of government received a clear majority of the votes polled, and commission of government, receiving the fewest votes, was eliminated In the second referendum (July 1948) confederation with Canada received 78,408 and responsible government 71,464 votes.

In the Canadian Senate on 18 Feb 1949 Royal assent was given to the terms of union of Newfoundland and Labrador with Canada, and on 23 March 1949, in the House of Lords, London, Royal assent was given to an amendment to the British North America Act made necessary by the inclusion of Newfoundland and Labrador as the tenth Province of Canada

Under the terms of union of Newfoundland and Labrador with Canada, which was signed at Ottawa on 11 Dec. 1948, the constitution of the Legislature of Newfoundland and Labrador as it existed immediately prior to 16 Feb 1934 shall, subject to the terms of the British North America Acts, 1867 to 1946, continue as the constitution of the Legislature of the Province of Newfoundland and Labrador until altered under the authority of the said Acts

The franchise was in 1965 extended to all male and female residents who have

attained the age of 19 years and are otherwise qualified as electors.

The House of Assembly (Amendment) Act, 1979, established 52 electoral districts and 52 members of the Legislature.

In Oct. 1985 there were 36 Progressive-Conservatives, 15 Liberals and 1 New Democrat.

The province is represented by 6 members in the Senate and by 7 members in the House of Commons of Canada.

Lieut -Governor. Hon. Dr W. A. Paddon (assumed office 10 July 1981)

### ENERGY AND NATURAL RESOURCES

Electricity. The electrical energy requirements of the province are met mainly by hydro-electric power, with petroleum fuels being utilized to provide the balance. The total amount of energy generated in the province in 1984 (preliminary) was 45,303.175 mwh, of which approximately 98% was derived from hydro-electric lacilities. The greater part of the energy produced in 1984 (preliminary) came from Churchill Falls, of which 36,043,494 mwh was sold to Hydro-Quebec under the terms of a long-term contract. Energy consumed in the province during 1984 (preliminary) totalled 9,259,681 mwh, with approximately 8,611,503 mwh, or 93%, coming from hydro-electric facilities.

At 31 Dec 1983 total electrical generating capacity in the province was 6,964 441 kw, with hydro-electric plants accounting for 6,212,705 kw, or 89% A 75 mw hydro project started in 1978 at Hind's Lake in central Newfoundland and was completed in 1981. It is estimated that potential additional hydro-electric generating capacity of up to 4.5m kw can be developed at various sites in the Labrador part of the province.

Oil. In 1981 the province consumed refined petroleum at the rate of 39,000 bbls a day. The refining capacity of the province is 114,000 bbls per day, this refinery was closed in June 1983.

Since 1965, 114 wells have been drilled on the Continental Margin of the Province. In 1985 it is estimated that offshore exploration expenditures would be approximately \$760m.

In Oct 1974, two natural gas finds off the coast of Labrador were announced Tests of these two wells resulted in rates of flow of 13–20m cu ft per day respectively, with some condensate and no water present Additional natural gas finds with flows of 9 8m cu. ft per day and 32m cu ft per day, with significant condensates and no water present, were announced in 1976 and 1978 respectively

In 1979, a discovery of oil was made on the Hibernia geological structure located 164 nautical miles east of Cape Spear The discovery well, Hibernia P-15, tested medium gravity, sweet crude from several intervals with a reported total producing capability in excess of 20,000 bbls of oil per day

Minerals. The mineral resources are vast but only partially documented. Large deposits of iron ore, with an ore reserve of over 5,000m tons at Labrador City, Wabush City and in the Knob Lake area are supplying approximately half of Canada's production Other large deposits of iron ore are known to exist in the Julienne Lake area

There are a variety of other minerals being produced in the province in more limited amounts.

Uranium deposits in the Kaipokak Bay area near Makkovik in Labrador are presently being studied by Brinex. The Central Mineral Belt, which extends from the Smallwood Reservoir to the Atlantic coast near Makkovik, holds uranium,

copper, beryllium and molybdenite potential.

Production in 1984 (preliminary): Iron ore, 21,670,000 tonnes (\$867,622,000); cadmium, 113,000 tonnes (\$553,000); copper, 749 tonnes (\$1,421,000); zinc, 39,910 tonnes (\$56,153,000), asbestos, 47,000 tonnes (\$23.5m.); lead, 3,527 tonnes (\$2,594,000); silver, 6,000 kg (\$1,933,000), gold, 183,000 grammes (\$2,757,000); gypsum, 430,000 tonnes (\$3 61m.); pyrophyllite, soapstone and talc (...), cement (\$9,453,000); clay products (\$1.6m.); sand and gravel, 3,715,000 tonnes (\$16 15m.); stone, 415,000 tonnes (\$1,608,000), quartz (\$2m.)

Agriculture. The estimated value of agricultural products sold, including livestock, 1984, was \$40 9m.

Forestry. The forestry economy in the province is mainly dependent on the operation of 3 newsprint mills. In 1984 the value of newsprint exported from these 3 mills totalled \$295 6m. Lumber mills, saw-log operations produced 38m. f b.m. in 1983-84.

Fisheries. The principal fish landings are cod, flounder, redfish, Queen crabs (in shell), lobster, salmon and herring. In 1984 a yearly average of some 7,900 persons were employed by the fish-processing industry and there were 27,617 licensed full-, part-time and casual fishermen engaged in harvesting operations. Approximately 218 processing operations were licensed in 1984. The production of fresh and frozen fish products was \$455 9m. in 1983.

The total catch in 1984 (preliminary) was 397,610 tonnes valued at \$141,691,000, which comprised. Cod, 236,255 tonnes (\$81,769,000); flounder, 49,537 (\$13,265,000); herring, 6,768 tonnes (\$1,462,000), redfish, 18,476 (\$3,384,000), lobster, 2,118 (\$11,880,000), salmon, 721 (\$2,585,000), capelin, 41,062 (\$9,033,000); crab, 10,240 (\$7,328,000), other, 32,433 (\$10,985,000).

The seal fishery in 1984 had 41 small licensed vessels with 152 men who landed

3,883 pelts. The number of pelts landed by landsmen totalled 24,468.

INDUSTRY. The total value of manufacturing shipments in 1984 was \$1,178.6m. This consists largely of first-stage processing of primary resource products with two of the largest components being paper and fish products.

**TRADE UNIONS.** There were (1982) 408 unions representing 73,929 members of international and national unions and government employee associations.

#### COMMUNICATIONS

Roads. In 1984 there were 8,713 km, of which 5,533 were paved.

Railways. In 1981 there were 1,457.8 km of railway, of which the Canadian National Railways operated 1,130.6 (3 ft 6 in.), the Quebec North Shore and Labrador Railway 324.8 (4 ft 8½ in.) and there were 2 4 km of private line. Car and passenger ferries operate from Port aux Basques and Argentia to North Sydney, Nova Scotia. On the island of Newfoundland, the Canadian National Railways operates a trans-island bus and rail freight service in addition to a coastal service for both passengers and freight. In the months that the Labrador coast is ice-free, usually from June to Nov., the Canadian National Railways operates a scheduled coastal steamer service every week.

Aviation. The province is linked to the rest of Canada by regular air services provided by Air Canada, Eastern Provincial Airways, Quebecair and a number of smaller air carriers.

Shipping. At 31 Dec. 1984 there were 1,586 ships registered in Newfoundland.

Post. There were 481 post offices open in 1984, and 2 telegraph offices in the

Newfoundland and Labrador postal district. Telephone connexions in the province numbered 276,212 in 1983

EDUCATION. The number of schools in 1984-85 was 618. The enrolment was 145,116; teachers numbered 8,159. The Memorial University, offering courses in arts, science, engineering, education, nursing and medicine, had approximately 13,941 full- and part-time students in 1984-85. Total expenditure for education by the Government in 1984-85 was \$522.9m.

CONSTITUTION AND GOVERNMENT. Under the British North America Act of 1867 the legislature of Nova Scotia may exclusively make laws in relation to local matters, including direct taxation within the province, education and the administration of justice. The legislature of Nova Scotia consists of a Lieut-Governor, appointed and paid by the federal government, and holding office for 5 years, and a House of Assembly of 52 members, chosen by popular vote not more than every 5 years. The province is represented in the Canadian Senate by 10 members, and in the House of Commons by 11

The franchise and eligibility to the legislature are granted to every person, male or female, if of age (19 years), a British subject or Canadian citizen, and a resident in the province for 1 year and 2 months before the date of the writ of election in the county or electoral district of which the polling district forms part, and if not by law otherwise disqualified. Local Government The main divisions of the province for governmental purposes are the 3 cities, the 39 towns and the 24 rural municipalities, each governed by a council and a mayor or warden The cities have independent charters, and the various towns take their powers from and are limited by The Towns Act, and the various municipalities take their powers from and are limited by The Municipal Act as revised in 1967. The majority of municipalities comprise I county, but 6 counties are divided into 2 municipalities each In no case do the boundaries of any municipality overlap county lines. The 18 counties as such have no administrative functions.

Any city (of which there are 3) or incorporated town (of which there are 39) that lies within the boundaries of a municipality is excluded from any jurisdiction by the municipal council and has its own government.

FINANCE. Revenue is derived from provincial sources, payments from the federal government under the Federal-Provincial Fiscal Arrangements and Established Programs Financing Act Recoveries consist generally of amounts received under various federal cost-shared programmes Main sources of provincial revenues include income and sales taxes

### NATURAL RESOURCES

Minerals. Principal minerals in 1984 were: Coal, 3 lm tonnes, valued at \$162 6m.; gypsum, 6 5m. tonnes, valued at \$43.7m, salt, valued at \$27.5m, sand and gravel, 7 6m tonnes, valued at \$21 6m Total value of mineral production in 1984 was about \$293m.

Agriculture. Dairying, poultry and egg production, livestock and fruit growing are the most important branches. Farm cash receipts for 1984 were estimated at \$261.2m, with an additional \$6.2m going to persons on farms as income in kind.

Cash receipts from sale of dairy products were \$74m, with total milk production of 178,082,000 litres.

The production of poultry meat in 1984 was 18,119 tonnes, of which 16,512 tonnes were chickens and fowls and 1,607 tonnes were turkeys Egg production was 17 8m dozen.

The main 1984 fruit crops were apples, 58,105 tonnes, blueberries, 7,012 tonnes, and strawberries, 2,835 tonnes.

Forestry. The estimated forest area of Nova Scotia is 15,555 sq. miles (40,298 sq km), of which about 25% is owned by the province. The principal trees are spruce, balsam fir, hemlock, pine, larch, birch, oak, maple, poplar and ash. 3,226,532 cu. metres of round forest products were produced in 1984.

Fisheries. The fisheries of the province in 1984 had a landed value of \$259 5m. of sea fish including scallop fishery, \$44m, and lobster fishery, \$79m In 1982 there were about 6,693 employees in the fish processing industry; the value of shipment of goods was \$431.5m

INDUSTRY. The number of manufacturing establishments was 805 in 1983; the number of employees was 34,223, wages and salaries, \$710m; value of shipments was \$3,891 5m. The value of shipments in 1984, was \$4,747 3m., and the leading industries were petroleum and coal products, food and beverages, paper and allied industries and transportation equipment

TRADE UNIONS. Total union membership during 1984 was 103,694 belonging to 103 unions comprised of 618 individual branches. The largest percentage of the total union membership was in the service sector followed by public administration and defence sector. An estimated 48,916 members in 366 branches were affiliated with the Canadian Labour Congress.

### COMMUNICATIONS

Roads. In March 1984 there were 25,582 km of highways; 2,622 km of paved arterial highways; 4,683 km of collector highways (of which 4,419 km are paved); 18,277 km of local highways (of which 4,556 km are paved).

Railways. The province is covered with a network of railways, 1,432 km in extent.

Aviation. There is a direct air service to major Canadian and USA cities, London, Bermuda and the Caribbean.

<sup>1</sup> Estimate.

Shipping. Ferry services connect Nova Scotia with Newfoundland, Prince Edward Island, New Brunswick and Maine Direct service by container vessels is provided from the Port of Halifax to ports in Europe, Asia and the Caribbean

### JUSTICE AND EDUCATION

Justice. There is a Supreme Court which is a Court of common law and equity possessing original and appellate jurisdiction in civil and in criminal cases. The Supreme Court consists of an appeal division of 7 judges and a trial division of 9 judges. There are also county courts, family courts, probate courts, magistrates' courts, small claims courts, municipal and justices' courts. Bodies, sometimes referred to as courts, are established for the revision of assessment rolls, voters' lists and like purposes.

Young offenders under 16 years are now tried by Youth Courts The Courts were established in April 1984 In 1985, the Youth Courts have the jurisdiction to

adjudicate charges against 16- and 17- year-old offenders

For the year ending 31 Dec 1983 there were 4,855 admissions to provincial jails, of these, 3,523 were sentenced. There were 3,123 admissions to probationary supervision.

Education. Public education in Nova Scotia is free, compulsory and undenominational through elementary and high school. Attendance is compulsory to the age of 16 In addition to 582 public schools there are the Atlantic Provinces Resource Centres for the Hearing Handicapped and for the Visually Impaired, the Shelburne Youth Centre for young offenders and the Nova Scotia Residential Centre for delinquent children, and the Nova Scotia Youth Training Centre for mentally handicapped children The province has 14 universities and colleges of which the largest is Dalhousie University in Halifax The Nova Scotia Agricultural College and the Nova Scotia Teachers' College are located at Truro The Technical University of Nova Scotia at Halifax grants degrees in engineering and architecture

The Vocational and Technical Training Section of the Nova Scotia Department of Education administers 2 institutes of technology and a nautical institute. It also provides in-school training for the Department of Labour Apprenticeship programme.

The Department of Education offers financial support and organizational assistance to local school boards for provision of weekend and evening courses in academic and avocational subjects, and citizenship for new Canadians. It also provides local authorities with specialist support services to assist them in providing community workshops and it operates a correspondence study service for children and adults.

Occupational courses at the high school level are provided by 14 regional vocational schools under the jurisdiction (except in 3 school areas) of the Department of Education

Total estimated expenditure on education for the year 1984-85 was \$1,014 3m, of which 73% was borne by the provincial government. In 1984-85, classrooms operated in 585 school houses, with 10,375 teachers and 176,760 pupils

## **ONTARIO**

HISTORY. The French explorer Samuel de Champlain explored the Ottawa River from 1613. The area was governed by the French, first under a joint stock company and then as a royal province, from 1627 and was ceded to Great Britain in 1763. A constitutional act of 1791 created there the province of Upper Canada, largely to accommodate loyalists of English descent who had immigrated after the United States war of independence. Upper Canada entered the Confederation as Ontario in 1867.

AREA AND POPULATION. The total area is about 412,582 sq miles (1,068,630 sq. km), of which some 344,100 sq miles (891,200 sq km) are land area and some 64,490 sq miles (189,196 sq km) are lakes and fresh water rivers

The province extends 1,050 miles (1,690 km) from east to west and 1,075 miles (1,730 km) from north to south

Ontario is bounded on the north by the waters of Hudson and James Bay, on the cast by Quebec, on the west by Manitoba, and on the south by the states of New York, Pennsylvania, Ohio, Michigan, Wisconsin and Minnesota

The population of the province (census, 1 June 1981) was 8,625,107 Population of the principal cities (1982) Hamilton, 308,102 (city), 542,095 (census metropolitan area), Kitchener, 141,438 (city), 287,801 (census metropolitan area), London, 266,319 (city), Ottawa (federal capital), 303,144 (city), 562,782 (census metropolitan area), Sudbury, 91,388 (city), 159,779 (regional municipality), Toronto (provincial capital), 614,763 (city), 2,998,947 (census metropolitan area), Windsor, 192,546 (city)

Local Government Local government in Ontario is divided into two branches, one covering municipal institutions and the other education

The present municipal system dates from The Municipal Corporations Act enacted by The Province of Canada in 1849. It has been considerably modified in recent years with the creation of the Municipality of Metropolitan Toronto in 1954 and the launching of the Government of Ontario's local government restructuring programme in 1968. Generally, there are two levels of municipal government in Ontario. The upper level consists of 27 counties plus 12 restructured regional municipalities. The local level comprises more than 800 cities, towns and townships. Cities in the traditional county system function independently of the county in which they lie, as do 4 towns which have been separated for municipal purposes. There are no separated municipal units in regional governments.

Ontario's local municipalities are governed by councils elected by popular vote A city council usually consists of a mayor, aldermen and, sometimes, an executive committee known as a board of control.

Councils of towns, villages and townships usually consist of a mayor, reeve, deputy reeve, councillors and, in the case of the newer regional municipalities, one or more regional councillors who represent the area municipalities on the regional council

County and regional government councils are federated assemblies

A county council consists of the reeves and deputy reeves of the towns, villages and townships. The head of the county council is the warden, who is elected by the council from among its own members.

A regional council consists of the heads of council of the local municipalities, as well as a varying number of regional councillors, who are elected on the basis of representation, either directly or indirectly. The head of the regional council is the chairman who is elected by council but who, unlike a county warden, need not have been a council member

No municipality in Ontario may incur long-term debts without the sanction of the tribunal created by the Provincial Legislature and known as the Ontario Municipal Board. Debenture obligations incurred by municipalities for utility undertakings (water-works and electric light and power systems) are discharged ordinarily out of revenues derived from the sale of utility services and do not fall upon the ratepayers.

Municipal councils have no jurisdiction for education beyond the collection of taxes for school purposes. Responsibility for providing, operating and maintaining school facilities, and for the supply of teachers, rests with local education authorities known as Boards of Education or School Boards. These Boards are now generally organized on a county or regional basis. Apart from some of the larger cities, local municipal school boards no longer exist.

Municipal institutions come under the jurisdiction of the Piovincial Ministry of Intergovernmental Affairs. One of the principal functions of the Ministry is to advise and assist municipalities on such matters as accounting, reporting, auditing, budgeting and planning. Educational support and guidance at the provincial level is the responsibility of the Ministry of Education, which deals with the training of teachers and the formulation of curriculum. (At the university and community college level, education support services are provided by the Ministry of Colleges and Universities.)

There are considerable areas in the northernmost parts of Ontario where as yet there is little or no settlement of population. In such areas no municipal organization exists, and control for all purposes over such areas remains in the hands of the Provincial Government.

Net cash requirement	803	1,503	2,548	2,289	2,039

Gross revenue and expenditure figures include all non-budgetary transactions, i.e., the lending and investment activity of the Government to Crown corporations, agencies and municipalities as well as the repayment of these loans or recovery of investments. Transactions on behalf of Ontario Hydro are excluded.

### **ENERGY AND NATURAL RESOURCES**

Electricity (1984). Ontario Hydro recorded for the calendar year an installed generating capacity of 27,350m. kw and a net energy output generated and purchased of 122.920m kwh

Minerals (1983, preliminary). The total value of shipments (in \$1 m.) in the mineral products industry were Nickel, 595; copper, 412; iron ore, 181, gold, 363. The total value of mineral production was \$3,533m in 1983. The mining industry employed about 24,600 people in 1983.

Agriculture. In 1984, 3 5m hectares were under field crops with total farm receipts of \$5,600m.

Forestry. According to the most recent inventory (1984) the total area of productive forest is 34 7m hectares, comprising Softwoods, 22 9m, hardwoods, 11,837,000 The growing stock equals 4,431m cu metres The estimated value of shipments by the forest products industry (including logging) was (1983) \$7,408m

#### INDUSTRY AND TRADE

Industry (1983). Ontario is Canada's most highly industrialized province About 73% of value added in commodity-producing industries is accounted for by manufacturing Construction is next with 10%

In 1984, the labour force was 4 7m Total labour income was \$95,634 3m The Gross Provincial Product (GPP) was \$162,098m

The leading manufacturing industries are motor vehicles and parts, iron and steel, meat and meat preparations, dairy products, paper and paperboard, chemical products, petroleum and coal products, machinery and equipment, metal stamping and pressing and communications equipment

Trade. In 1984 Ontario exported 49% (\$55,200m.) of Canada's total foreign trade

### COMMUNICATIONS

Roads. There were, in 1984, 153,613 km of roads Motor licences numbered (1984) approximately 8 2m, of which 5 7m, were passenger cars, 1 2m, trucks and tractors, 28,646 buses, 853,398 trailers, 219,093 motor cycles and 169,273 snow vehicles.

Railways. The provincially-owned Ontario Northland Railway has about 550 miles of track and the Algoma Central Railway 325 miles. The Canadian National and Canadian Pacific Railways operate a total of about 9,500 miles in Ontario. There is a metro and tramway network in Toronto.

Post (1984). Telephone service is provided by 30 independent systems (282,947 telephones) and Bell Canada (9.8m. telephones).

EDUCATION. There is a complete provincial system of elementary and secondary schools as well as private schools. In 1984 publicly financed elementary and secondary schools had a total enrolment of 1,763,967 pupils.

In 1965 Ontario established Colleges of Applied Arts and Technology (CAATS).

There are now 22 of these publicly owned colleges with full-time enrolment (1984) of 98,966 in academic courses.

The University of Toronto, founded in 1827 (full-time enrolment, 1984, 35,148), and 14 other major universities (total full-time enrolment, 1983, 185,576), all receive provincial grants. The net general expenditure of the provincial ministries of education and colleges and universities for the fiscal year ending 31 March 1984 was \$5,469m.

### **ENERGY AND NATURAL RESOURCES**

Electricity. Electric power is supplied to 100% of the population. The province's net generated and purchased consumption of electricity during 1984 was 555m. kwh In 1984, peak demand for electricity was 106 6 mw. In 1977 the province completed the laying of an undersea power cable which links the island with New Brunswick and the Maritime Power Grid In 1980, 30 miles of additional 138 ky transmission line was added to the PEI system. In 1984, about 99% of power requirements were supplied through this system.

Agriculture. Total area of farms occupied approximately 699,367 acres in 1981 out of the total land area of 1,399,040 acres. Farm cash receipts in 1984 were \$188 4m with cash receipts from potatoes accounting for 37% of the total. Cash receipts from dairy products, cattle and hogs followed in importance. The land in forest covered 683,679 acres in 1984 and total value of forest products sold in 1980 was \$363,221. For particulars of agricultural production and livestock, see under Canada, pp. 282-83.

Fisheries. The fishery in 1984 had a landed value of \$37 8m Lobsters accounted for 60% of the total. Value of groundfish landings accounted for 12%, pelagic and estuarial, 8 7%, shellfish, other than lobster, 13%, Irish mess, 4 5%.

### INDUSTRY AND TRADE

Industry. Value of manufacturing shipments for all industries in 1984 was \$266m

Commerce. Average personal income rose from \$8,943 in 1982 to \$10,056 in 1983. The average weekly wage rose from \$295.45 in 1983 to \$299.79 in 1984. The labour force averaged 55,000 in 1983, while employment averaged 48,000.

In 1984, provincial GDP for manufacturing was \$78 9m.; construction, \$56m In 1984, total value of retail trade was \$520,721,000

**Tourism.** The value of the tourist industry was estimated at \$54 2m. in 1984 with 208,476 tourist parties

#### COMMUNICATIONS

Roads. The province has a total of 5,278 km of road, including 3,687 km of paved highway.

Railways. Rail service is provided over 274 miles of track within the province and connects with the national railways system via the New Brunswick-Prince Edward Island ferry service.

Aviation. Air service for passengers, mail and cargo is scheduled to provide 9 flights daily in each direction between the province and various points in eastern Canada. A daily bus service operates between various centres in the province as well as to the mainland.

Shipping. A ferry service provides rail and highway communication with New Brunswick by means of 4 large ferries, 2 of which are powerful ice-breakers. Another ferry service employing 2 ferries plus an additional 2 for summertime operates between the province and Nova Scotia throughout the season of open navigation. A third ferry service employing 1 ferry operates between the province and Magdalen Islands, Quebec, during the open navigation season.

Post. In 1984 there were approximately 74,594 telephones.

EDUCATION (1984-85). Under the regional school boards there are 66 public

schools, 1,369 teaching positions, 25,048 students. There is one undergraduate university (1,720 full-time students), and a college of applied arts and technology (837 full-time post-secondary students), both in Charlottetown. Total expenditure in education in the year ending 31 March 1986 is forecast to be \$105,672,900

# QUEBEC—QUÉBEC

HISTORY. Quebec was formerly known as New France or Canada from 1534 to 1763, as the province of Quebec from 1763 to 1790, as Lower Canada from 1791 to 1846, as Canada East from 1846 to 1867, and when, by the union of the four original provinces, the Confederation of the Dominion of Canada was formed, it again became known as the province of Quebec (Québec)

The Quebec Act, passed by the British Parliament in 1774, guaranteed to the people of the newly conquered French territory in North America security in their religion and language, their customs and tenures, under their own civil laws

In the referendum held 20 May 1980, 59 5% voted against and 40 5% for 'separatism'.

AREA AND POPULATION. The area of Quebec (as amended by the Labrador Boundary Award) is 1,667,926 sq km (594,860 sq miles), of which 1,315,134 sq. km is land area and 352,792 sq km water Of this extent, 911,106 sq km represent the Territory of Ungava, annexed in 1912 under the Quebec Boundaries Extension Act. The population (estimated 1 June 1984) was 6,553,492

Principal cities (1984) Quebec (capital), 164,000, Montreal, 1,001,300, Laval, 278,280, Sherbrooke, 72,000, Verdun, 58,400, Hull, 55,000, Trois-Rivieres, 50,000

Vital statistics, see p 272. Religion, see p 289

CLIMATE. Cool temperate in the south, but conditions are more extreme towards the north Winters are severe and snowfall considerable, but summer temperatures are quite warm Rain occurs at all seasons Quebec Jan. 10°F (-12 2°C) July 66°F (18 9°C) Annual rainfall 40" (1,008 mm) Montreal Jan 11°F (-11 7°C), July 67°F (19 4°C) Annual rainfall 41" (1,025 mm).

CONSTITUTION AND GOVERNMENT. There is a Legislative Assembly consisting of 122 members, elected in 122 electoral districts for 4 years. At the provincial general elections held 2 Dec. 1985, Liberals won 99 seats and *Parti Québecois*, 23. The Liberal Party was led by Robert Bourassa who failed to win a seat but did so at a subsequent by-election on 20 Jan. 1986.

### **ECONOMY**

**Budget.** Ordinary revenue and expenditure (in Canadian \$1,000) for fiscal years ending 31 March.

	1979–80	1980-81	1981–82	1982-83	1983-84
Revenue	13,306,680	14,718,305	17,471,594	19,210,266	21,410,969
Expenditure	15,123,200	17,596,659	20,359,807	22,259,296	24,523,514

The total net debt at 31 March 1984 was \$16,924,572,000

### ENERGY AND NATURAL RESOURCES

Electricity. Water power is one of the most important natural resources of the province of Quebec. Its turbine installation represents about 40% of the aggregate of Canada At the end of 1984 the installed generating capacity was 31,661 mw Production, 1984, was 122,067 gwh

Minerals (1984) The estimated value of the mineral production (metal mines only) was \$1,161,137,000 Chief minerals: Iron ore, \$362,448,000, copper, \$121,036,000, gold, \$443,631,000; zinc, \$69,438,000.

The second major iron-ore development in northern Quebec is, like the one at Knob Lake which gave birth to Schefferville, based on the Quebec-Labrador Trough which extends from Lac Jeannine to the northern tip of Ungava peninsula The port of Sept-Iles and the railway connecting it with Schefferville allow easy shipment to the furnaces and steel mills of Canada, the USA and Europe. The setting-up of a steel industry is being explored

Non-metallic minerals produced include: Asbestos (\$301,118,000, about 87% of Canadian production), titane-dioxide (\$137,000,000), industrial lime, dolomite and brucite, quartz and pyrite. Among the building materials produced were Stone, \$124,581,000, cement, \$146,634,000, sand and gravel, \$56,161,000, lime, \$24.162.000

Agriculture. In 1984 the total area (estimate) of the principal field crops was 2,148,400 hectares. The yield of the principal crops was (in 1,000 tonnes)

Crops	\ reld	Crops	\ reld
Tame hay	5,300	Fodder corn	3,000
Oats for grain	360	Maize for grain	1,350
Potatoes	410	Barley	360
Mixed grains	150	Buckwheat	11

The farm cash receipts from farming operations estimated in 1984 amounted to \$3,073,173,000. The principal items being: Livestock and products, \$2,291,947,000, crops, \$469,078,000, dairy supplements payments, \$136,985,000, forest and maple products, \$51,243,000.

Forestry. Forests cover an area of 764,279 sq. km. About 556,044 sq. km are classified as productive forests, of which 652,956 sq. km are provincial crown land and 108,992 sq. km are privately owned. Quebec leads the Canadian provinces in pulpwood production, having nearly half of the Canadian estimated total.

In 1982 production of lumber was softwood and hardwood, 6,516,857 cu. metres; woodpulp, 6,282,713 tonnes, paper and paperboard, 5,480,898 tonnes.

Fisheries. The principal fish are cod, herring, red fish, lobster and salmon. Total catch of sea fish, 1984, 74,701 tonnes, valued at \$56,024,502.

## **SASKATCHEWAN**

HISTORY. Saskatchewan derives its name from its major river system, which the Cree Indians called 'Kis-is-ska-tche-wan', meaning 'swift flowing' It officially became a province when it joined the Confederation on 1 Sept 1905

In 1670 King Charles II granted to Prince Rupert and his friends a charter covering exclusive trading rights in 'all the land drained by streams finding their outlet in the Hudson Bay' This included what is now Saskatchewan. The trading company was first known as The Governor and Company of Adventurers of England; later as the Hudson's Bay Company. In 1869 the Northwest Territories was formed, and this included Saskatchewan. In 1882 the District of Saskatchewan was formed. By 1885 the North-West Mounted Police had been inaugurated, with headquarters in Regina (now the capital), and the Canadian Pacific Railway's transcontinental line had been completed, bringing a stream of immigrants to southern Saskatchewan. The Hudson's Bay Company surrendered its claim to territory in return for cash and land around the existing trading posts. Legislative government was introduced.

AREA AND POPULATION. Saskatchewan is bounded on the west by Alberta, on the east by Manitoba, to the north by the Northwest Territories, to the south it is bordered by the US states of Montana and North Dakota. The area of the province is 251,700 sq. miles (570,113 sq. km), of which 220,182 sq. miles is land area and 31,518 sq. miles is water. The population, 1981 census, was 968,313 (1985, estimate, 1,019,500). Population of cities, 1981 census (1985 estimate). Regina (capital), 162,984 (175,159), Saskatoon, 154,210 (175,859), Moose Jaw, 33,941 (35,525), Prince Albert, 31,380 (33,540), Yorkton, 15,339 (16,055), Swift Current, 14,747 (16,049); North Battleford, 14,030 (15,021), Estevan, 9,174 (10,214), Weyburn, 9,523 (10,238), Lloydminster, 6,034 (6,972), Melfort, 6,010 (6,542), Melville, 5,092 (5,287).

Budgetary expenditure	2.821.554	2.983.151	3.211.304	3.396.230

<sup>1</sup> Estimate.

ENERGY AND NATURAL RESOURCES. Agriculture used to dominate the history and economics of Saskatchewan, but the 'prairie province' is now a rapidly developing mining and manufacturing area. It is a major supplier of oil, has the world's largest deposits of potash, and net value of non-agricultural production account for (1984 estimate) 81% of the provincial economy

Electricity. The Saskatchewan Power Corporation generated 11,525m. kwh in 1984.

Minerals. The 1984 mineral production was valued at \$3,344,300,000, including (in \$1,000): Petroleum 1,870,000, natural gas, 88,400, coal and others, 104,600, gold, 2,498; silver, 1,709; copper, 7,094; zinc, 7,767; potash, 829,446, salt and others, 17,300; uranium, 353,723, sodium sulphate, 34,234

Agriculture. Saskatchewan produces normally about two-thirds of Canada's wheat Wheat production in 1984 (in 1,000 tonnes), was 11,485 from 20m acres, oats, 478 from 850,000 acres; barley, 2,460 from 3 2m. acres, rye, 230 from 390,000 acres; rapeseed, 1,406 from 3 2m. acres, flax, 224 from 650,000 acres Livestock (1 July 1985). Cattle and calves, 2 08m; swine, 690,000, sheep and lambs, 60,000. Poultry in 1984: Chickens, 4,731,000, turkeys 443,000 Cash income from the sale of farm products in 1984 was \$4,316m. At the June 1981 census there were 67,318 commercial farms in the province, each being a holding of 1 acre or more with sales of agricultural products during the previous 12 months of \$50 or more.

The South Saskatchewan River irrigation project, whose main feature is the Gardiner Dam, was completed in 1967. It will ultimately provide for an area of 200,000 acres of irrigated cultivation in Central Saskatchewan In 1984, 92,000 acres were irrigated. Total irrigated land in the province, 280,000 acres.

Forestry. Half of Saskatchewan's area is forested, but only 115,000 sq. km are of commercial value at present. Forest products valued at \$166m, were produced in 1984. The province's first pulp-mill, at Prince Albert, went into production in 1968; its daily capacity is 1,000 tons of high-grade kraft pulp.

Fur Production. In 1984-85 wild fur production was estimated at \$3,960,468. Ranch-raised fur production amounted to \$126,486.

<sup>&</sup>lt;sup>2</sup> Excludes Consolidated Fund, Community Capital Fund, Saskatchewan Hentage Fund, Energy and Resource Development Fund and The Marketing Development Fund

Fisheries. The lakeside value of the 1984-85 commercial fish catch of 2 48m kg was \$3 28m.

INDUSTRY. In 1983 Saskatchewan had 740 manufacturing establishments, employing 18,866 persons Manufacturing contributed \$933m., construction \$778m to the total gross domestic product at factor cost of \$15,564m. in 1984

**TOURISM.** An estimated 1,468,000 out of province tourists spent \$232m in 1984

### **COMMUNICATIONS**

**Roads.** In 1985 there were 23,200 km of provincial highways, 184,300 km of municipal roads (including prairie trails) Motor vehicles registered totalled (1984) 699,510. Bus services are provided by 2 major lines

Railways. There were (1984) approximately 11,800 km of main railway track in operation.

Aviation. Saskatchewan had 2 major airports, 176 airports and landing strips in 1983

Post and Broadcasting. There were (1985) 720 post offices (excluding sub-post offices), 87 TV and 1e-broadcasting stations and 52 AM and FM radio stations 711,465 telephones were connected to the Saskatchewan Telecommunications system

EDUCATION. The University of Saskatchewan was established at Saskatoon on 3 April 1907. In 1985–86 it had 12,936 full-time students, 15,041 part-time and 1,200 full-time teaching staff. The University of Regina was established 1 July 1974, in 1985–86 it had 5,484 full-time and 4,060 part-time students and 350 full-time faculty members.

The Saskatchewan education system in 1985–86 consisted of 121 school units and districts, of which 22 are Roman Catholic separate school divisions, serving 142,555 elementary pupils, 57,630 high-school students and 3,300 students enrolled in special classes. In addition, provincial technical and vocational schools had 7,813 students enrolled in autumn 1985. There are also 22 Roman Catholic separate school districts and 2 separate high-school districts. In addition there are 16 community colleges with an enrolment of approximately 100,000 per year.

## THE NORTHWEST TERRITORIES

HISTORY. The Territory was developed by the Hudson's Bay Company and the North West Company (of Montreal) from the 17th century The Canadian Government bought out the Hudson's Bay Company in 1869 and the Territory was annexed to Canada in 1870 The Arctic Islands lying north of the Canadian mainland were annexed to Canada in 1880 by Queen Victoria

AREA AND POPULATION. The total area of the Territories is 1,304,903 sq. miles (3,379,700 sq. km), divided into 5 districts, namely, Inuvik, Fort Smith, Keewatin, Baffin and Kitikmeot The population in Dec 1984 was 50,454 29,254 of whom were Indians or Inuit and Metis (Eskimo). Main centres (Dec. 1984) Inuvik (3,421), Fort Smith (2,408), Hay River (3,112), Frobisher Bay (2,904), Fort

Simpson (1,054) When the transfer of governmental responsibility from Ottawa to the Territorial capital at Yellowknife took place in 1967, the population of Yellowknife increased by the influx of civil servants from 3,741 in 1966 to 10,884 in 1984.

CLIMATE. Conditions range from cold continental to polar, with long hard winters and short cool summers Precipitation is low Yellowknife. Jan -15°F (-26°C), July 61°F (16 1°C) Annual rainfall 10" (256 mm).

CONSTITUTION AND GOVERNMENT. The Northwest Territories comprises all that portion of Canada lying north of the 60th parallel of N lat except those portions within the Yukon Territory and the Provinces of Quebec and Newfoundland: it also includes the islands in Hudson Bay, James Bay and Ungava Bay except those within the Provinces of Manitoba, Ontario and Quebec.

The Northwest Territories is governed by a Commissioner and a Legislative Assembly. The Assembly is composed of 24 members elected for a 4-year term of office. The seat of government was transferred from Ottawa to Yellowknife when it

was named territorial capital on 18 Jan 1967

Commissioner J H. Parker

Deputy Commissioner Agnes Semmler

Flag Vertically, blue, white, blue, with the white of double width and bearing the shield of the Territory

Legislative powers are exercised by the Executive Council on such matters as taxation within the Territories in order to raise revenue, maintenance of justice, licences, solemnization of marriages, education, public health, property, civil

rights and generally all matters of a local nature.

The Territorial Government has assumed most of the responsibility for the administration of the Northwest Territories but political control of Crown lands and non-renewable resources still rests with the Federal Government. In a Territory-wide plebiscite in April 1982, a majority of residents voted in favour of dividing the Northwest Territories into two jurisdictions, east and west. Two forums for each jurisdiction have been created to develop constitutions for the proposed new territories and to negotiate a dividing boundary.

#### **ENERGY AND NATURAL RESOURCES**

Oil and Gas. As of March 1985, 1,459 permits for oil and gas exploration were held for 39,805 hectares, of which 107 were for the mainland, 1,110 were for the arctic islands and 242 for the marine coast

Crude oil is produced at Norman Wells, where a pipeline running to Alberta was officially opened in 1985. In 1982, oil production was 173,294 cum etres

Minerals. Mineral production for the year 1983, from 11 producing mines, was valued at \$532m. The Northwest Territories produces 96.9% of Canada's tungsten, 26.5% of its lead, 23% of zinc, 12.9% of gold and 4.6% of Canadian silver.

Trapping and Game. The 207,990 pelts, furs and hides sold by Northwest Territories hunters and trappers in the 1983-84 season were valued at \$2,666,000 The pelts of highest value are those of the muskrat, white fox, lynx and marten. A herd of some 6,500 buffalo is protected in Wood Buffalo National Park Barren ground caribou are plentiful

Forestry. The principal trees are white and black spruce, jack-pine, balsam, poplar and birch. In 1983-84, 31,400 cu. metres of lumber, valued at \$1 6m, was produced.

Fisheries. Commercial fishing, principally on Great Slave Lake, in 1982-83 produced fish valued at \$1.4m., principally trout, char and whitefish.

CO-OPERATIVES. There are 36 active co-operatives in the Northwest Territories. They are active in handicrafts, furs, fisheries, retail stores and print shops. There are also 3 housing co-operatives. Total sales in 1984 were \$22,857,175

#### COMMUNICATIONS

Roads. The Mackenzie Route connects Grimshaw, Alberta, with Hay River, Pine Point, Fort Smith, Fort Providence, Rae-Edzo and Yellowknife. The Mackenzie Highway extension to Fort Simpson and a road between Pine Point and Fort Resolution have both been opened.

Highway service to Inuvik in the Mackenzie Delta was opened in spring 1980, extending north from Dawson, Yukon as the Dempster Highway. The Liard Highway connecting the communities of the Liard River valley to British Columbia opened in 1984.

Railways. There is one small railway system in the north which runs from Pine Point and Hay River, on the south shore of Great Slave Lake, 435 miles south to Grimshaw, Alberta, where it connects with the CN Rail's main system. The railway primarily serves to transport concentrate from Pine Point's lead-zinc mine

Aviation (1979) Fourteen licensed and 1 unlicensed airports are operated by the federal Ministry of Transport and there are 17 licensed and 18 unlicensed airports operated by the Government of the Northwest Territories. Two licensed and 10 unlicensed airports are operated by private owners. Regular mail, passenger and express services are maintained throughout the Territories. A seaplane base is operated by the Ministry of Transport and there are 17 private seaplane bases. Scheduled services join major points with centres in southern Canada.

Shipping. A direct inland-water transportation route for about 1,700 miles is provided by the Mackenzie River and its tributaries, the Athabasca and Slave rivers Subsidiary routes on Lake Athabasca, Great Slave Lake and Great Bear River and Lake total more than 800 miles

Post and Broadcasting (1983). There were 79 post offices. The CBC northern service operated radio stations at Yellowknife, Inuvik, Frobisher Bay and Rankin Inlet Virtually all communities of 150 or over were receiving television in 1985 via satellite. Telephone service is provided by common carriers to nearly all communities in the Northwest Territories. Those few communities without service have high frequency or very high frequency radios for emergency use.

#### **EDUCATION AND WELFARE**

Education. In 1984–85 the Government of the Northwest Territories operated 71 schools with 743 teachers. In addition, one public school district operated at Yellowknife, one Roman Catholic separate school district at Yellowknife, and one school society operated a school at Rae-Edzo. The total enrolment in grades kindergarten to 12 was 13,224 in 1984–85. Three large and 4 small residences accommodate 400 students. Free correspondence courses are available to any pupil in a settlement where appropriate instruction is not available. There is a full range of courses available in the school system: academic, industrial arts, home economics, commercial, technical and occupational training. The continuing and special education programme provides courses and financial assistance to residents who have left the school system or are taking post high school training.

Health. In 1980 there were 7 hospitals in the Territories, 4 operated by the territorial government (Yellowknife, Hay River, Frobisher Bay and Fort Smith) and 3 operated by the federal government. Thirty-nine nursing stations, 6 health stations and 8 health centres were in operation

Welfare. Welfare services are provided by professional social workers. Facilities included (1978) 5 children's receiving homes, 2 homes for the aged and 1 transient centre.

## YUKON TERRITORY

HISTORY. Formerly part of the North-West Territory, Yukon was joined to the Dominion as a separate territory in 1898.

AREA AND POPULATION. The Yukon Territory is situated in the extreme north-western section of Canada and comprises 482,515 sq km The census population in 1981 was 23,153, 1985 (estimate), 22,900 Principal centres are Whitehorse (capital), 17,742, Watson Lake, 1,559, Dawson City, 1,530, Mayo-Elsa, 872; Faro, 489

Vital statistics, see p 272 Religion, see p 289

CLIMATE. A cold climate, with considerable annual range of temperature and moderate rainfall. Whitehorse Jan. 5°F (-15°C), July 56°F (13 3°C) Annual rainfall 10" (250 mm). Dawson City Jan -22°F (-30°C), July 57°F (13 9°C) Annual rainfall 13" (320 mm).

CONSTITUTION AND GOVERNMENT. The Yukon Territory was constituted a separate territory in June 1898. It is governed by a 5-member Executive Council (Cabinet) appointed from among the 16-member elected Legislative Assembly. The members are elected for a 4-year term. The seat of government is at Whitehorse. A federally appointed Commissioner has the final signing authority for all legislation passed by the Assembly.

Commissioner Douglas Bell (appointed 13 Dec. 1980)

Flag Vertically green, white, blue, in the proportions 2 3 · 2, charged in the centre with the arms of the Territory

The legislative authority of the Assembly includes direct taxation, education, property and civil rights, territorial civil service, municipalities and generally all matters of local or private nature. All other major administration including Crown lands, income tax, natural resources and particularly that which requires the spending of large sums of money, is federally controlled.

## **ECONOMY**

Planning. The three main sectors of the Yukon economy are government, tourism and mining. Government expenditures will exceed \$300m in 1985-86 The tourism industry remains strong. Activity in the mining industry will likely continue to focus on gold and silver. In 1984 gold production from Yukon's placer mines was approximately \$45m., silver production, mostly from the United Keno Hill mine, was \$15m and exploration expenditures were \$23m. One modest gold mine is due to commence production in 1986 Unemployment remains high in Yukon

Finance. The territorial revenue and expenditure (in Canadian \$1,000) for fiscal years ended 31 March was

	1981–82	1982–83	1983-84	1984-85
Revenue	145,021	173,559	184,749	199,536
Expenditure	142,047	161,682	173,864	192,636

#### **ENERGY AND NATURAL RESOURCES**

Minerals. Mining remains the main industry. Lead, zinc, silver and gold are the chief minerals. Production figures for year ending 31 Dec. 1983 (provisional) in tonnes were: Lead, 11,139, silver, 44, gold, 2,697 kg. The value of mining production sales in 1984 was approximately \$56.6m.

Forestry. The forests are part of the great Boreal forest region of Canada which stretches from the east coast of Canada into Alaska and north well above the Arctic Circle. Vast areas are covered by coniferous stands in the southern portion of Yukon with white spruce and lodgepole pine forming pure stands on wet sites and in northern aspects Deciduous species form pure stands or occur mixed with conifers throughout forest areas.

The forestry industry increased activity in 1984.

Game and Furs. The country abounds with big game, such as moose, goat, caribou, mountain sheep and bear (grizzly and black). In 1984, 42,280 pelts were taken for a market value of \$721,678 Lynx was the most valuable fur and made up 53 8% of the total harvest bringing in \$388,455 in revenues.

TOURISM. In 1984, 422,094 tourists visited Yukon and spent \$84m

#### **COMMUNICATIONS**

Roads. The Alaska Highway and its side roads connect Yukon's main communities with Alaska and the provinces and with adjacent mining centres. Interior roads connect the mining communities of Elsa (silver-lead), Faro (lead-zinc-silver) Tungsten (tungsten) and mineral exploration properties (lead-zinc and tungsten) north of Ross River The Dempster Highway north of Dawson City connects with Inuvik, on the Arctic coast; this highway, the first public road to be built to the Arctic ocean, was opened in Aug 1979. The Carcross-Skagway road was opened in May 1979, providing a new access to the Pacific Ocean. There are 4,695 km of roads in the Territory, of which about 250 km are paved. The rest are all-weather gravel of which 1,364 km are accessible during the summer months only.

Railways. The 176-km White Pass and Yukon Railway connected Whitehorse with year-round ocean shipping at Skagway, Alaska, but was suspended in 1982

Aviation. Commercial airlines provide regular services between Whitehorse, Watson Lake, Edmonton and Vancouver Regularly scheduled air services extend from Whitehorse to interior communities of Faro, Mayo, Dawson City, Old Crow, Ross River, Watson Lake, MacMillan Pass, Juneau with connecting service to Anchorage. Seattle, Fairbanks and other points in Alaska There are several commercial bush plane operations for charter service

Shipping. Most goods are shipped into the Territory by truck over the Alaska and Stewart-Cassiar Highways. A recent development has been the shipment of foodstuffs via container ship to Skagway, Alaska, and then by truck to Whitehorse Some goods are transported within the Territory by air. Although navigable, the rivers are no longer used for shipping

Post and Broadcasting. There are 2 radio stations in Whitehorse and 13 low-power relay radio transmitters operated by CBC There are also 12 cable-TV channels in Whitehorse, TV channels in Whitehorse and private cable operations in Faro (provided by Canadian Satellite), Dawson City and Watson Lake Live CBC national television is provided by the Anik satellite to virtually every community in the Territory. All telephone and telecommunications in the Territory are provided by NorthwesTel, a subsidiary of Canadian National Telecommunications Almost all pole lines have been replaced with microwave transmission

Newspapers. In 1985 there were 3 newspapers, 2 published 3 days a week and 1 twice a month, in Whitehorse. Elsa and Dawson City both have newsletters

#### EDUCATION AND WELFARE

Education. In 1983-84, the Territory had 26 schools with 4,453 pupils attending classes from kindergarten to grade 12. Approximately 850 students were involved in full-time programmes at Yukon College, while 900 persons were enrolled in part-time courses in Whitehorse and the rural communities. In addition to the courses given at Yukon College, a number of post-secondary courses through the University of Alberta, University of Victoria and Red Deer College. A Yukon Teacher Education Programme started in 1977 to train local residents to obtain Bachelor of Education degrees in Education and a Teaching Certificate. The course is conducted by the University of British Columbia. The Government provides financial assistance to students requiring further education elsewhere.

Health. The health care system provides all residents with the care demanded by illness or accident. The federal government operates I general hospital at White-

# República de Chile

HISTORY. The Republic of Chile threw off allegiance to the crown of Spain, constituting a national government on 18 Sept 1810, finally freeing itself from Spanish rule in 1818.

AREA AND POPULATION Chile is bounded north by Peru, east by Bolivia and Argentina, and south and west by the Pacific ocean

Many islands to the west and south belong to Chile. the Islas Juan Fernández (179 sq. km with about 1,000 inhabitants) lie about 600 km west of Valparaíso, and the volcanic Isla de Pascua (Easter Island or Rapa Nui, 118 sq. km with about 2,000 inhabitants), discovered in 1722, lies about 3,000 km WNW of Valparaíso Small uninhabited dependencies include Sala y Goméz (400 km east of Easter Is.), San Ambrosio and San Félix (1,000 km northwest of Valparaíso, and 20 km apart) and Islas Diego Ramírez (100 km SW of Cape Horn).

In 1940 Chile declared, and in each subsequent year has reaffirmed, its ownership of the sector of the Antarctic lying between 53° and 90° W long, and asserted that the British claim to the sector between the meridians 20° and 80° W long, overlapped the Chilean by 27° Seven Chilean bases exist in Antarctica A law promulgated 21 July 1955 put the Intendente (now Gobernador) of the Province (now Region) of Magallanes in charge of the 'Chilean Antarctic Territory' which has an area of 1,269,723 sq km and a population (1982) 1,368

The total population at the census in 1970 was 8,884,768 Census (1982) 11,275,440 Estimate (1984) 11 9m

The areas of the 13 regions and their populations (census, 1982) were as follows

Navy. The principal ships of the Chilean Navy are as follows:

The British guided missile armed destroyer Norfolk, 5,440 tons standard, completed in 1970, was purchased in 1982 and re-named Prat on transfer, and her sister-ship Antrim of the same age was purchased in 1984 and re-named Cochrane.

There are 2 new Federal German-built small diesel-electric submarines, 2 modern diesel powered patrol submarines (British 'Oberon' class), 4 other destroyers (2 British built and 2 old ex-US), 2 frigates (modern British 'Leander' class, Condell and Lynch), 2 fast missile craft, 4 torpedo boats, 6 patrol vessels, 26 coastal patrol craft, 1 submarine support vessel, 2 amphibious transports, 3 landing ships, 2 landing craft, 1 survey ship, 4 transports, 2 training ships, 1 antarctic patrol ship, 2 harbour patrol boats, 4 oilers, 4 floating docks and 2 tugs

Naval personnel in 1985 totalled 29,000 all ranks including 5,200 marines and 500 naval aviators

<sup>1</sup> The 50-years-old cruiser O'Higgins (ex-USS Brooklyn), 10,000 tons standard, latterly used as an alongside accommodation ship, is still listed, but her equally ancient sister-ship Prai (ex-USS Nashville) was deleted in 1983. The 40-year-old cruiser Latorre (ex-Swedish Gota Lejon), 8,200 tons was still intact in 1985. See full particulars and notes in the 1984-85 and earlier editions.

Air Force. Approximate strength (1986) is 15,000 personnel, with 110 first-line and 150 second-line aircraft, divided among 12 groups, each comprising I squadron, within 4 combat and support wings Groups 1 and 12 have twin-jet A-37Bs, from a total of 34 acquired for light strike/reconnaissance duties. Group 2 is equipped for photo-reconnaissance with 2 Canberras. Group 4 has 14 Mirage 50 fighters. Group 5 has 14 Twin Otters for light transport and survey duties. Group 7 received 15 F-5E Tiger II fighter-bombers and 3 F-5F trainers Groups 8 and 9 are also fighter-bomber units, with a total of 30 Hunter F.71s, ex-RAF FGA.9s, and T.72s Group 10 is a transport wing, with 2 C-130H Hercules, 2 Boeing 707s, I Boeing 727, 9 Beech 99As and various helicopters. An aerial survey unit has 3 Learjets and 3 Beech twin-engined aircraft Training aircraft include piston-engined Piper Dakota and T-35 Pillan basic trainers and T-37 jets have been replaced. The A-37Bs are being replaced by Spanish-built CASA C-101BB Aviojets.

#### INTERNATIONAL RELATIONS

Membership. Chile is a member of the UN, OAS and LAIA (formerly LAFTA)

#### **ECONOMY**

Budget. In 1983 revenue was US\$3,025 7m. and expenditure, US\$3,485 3m

Currency. In Jan. 1960 a system came into force based on the escudo (equivalent of 1,000 pesos), the centésimo (10 pesos) and the milésimo (1 peso) On 29 Sept. 1975 the currency reverted to pesos with a value of 1,000 escudos to the new peso In March 1986 there were 266 20 pesos = £1 and 184 29 pesos = US\$1.

**Banking.** Notes in circulation and deposits in currency were 300,877m. pesos at 31 Dec. 1983; total deposits in the commercial banks stood at 197,796m. pesos (1983).

Commercial banks, since Feb. 1983, must maintain cash reserves of 60% of all sight deposits and 20% of time deposits over 30 days.

Inflation has fluctuated as follows: 31 2% (1980), 9 5% (1981), 20 7% (1982) and 23.1% (1983).

Weights and Measures. The metric system has been legally established in Chile since 1865, but the old Spanish weights and measures are still in use to some extent.

#### **ENERGY AND NATURAL RESOURCES**

Electricity. In 1983 production of electricity was 12,658.4m kwh.

Oil. Petroleum was discovered in 1945 in the southern area of Magallanes, output, 2,284,000 cu metres of crude oil and 4,803,000 cu, metres of natural gas in 1983

Gas. Production (1983) 4,803 m. cu metres

Minerals. The wealth of the country consists chiefly in its minerals, especially in the northern provinces of Atacama and Tarapacá

Copper is the most important source of foreign exchange (about 48% of exports) and government revenues (over 30%). The copper industry's output in 1983 was 1,257,200 tonnes Exports during 1983 were valued at US\$1,871m

Nitrate of soda is found in the Atacama deserts Exports were US\$84m in 1983 Production was 622,513 tonnes in 1983 Iodine is a by-product. 1983 production totalled 2,793 tonnes The use of solar evaporation as a means of reducing costs has developed the production of potassium salts as an additional byproduct.

Iron ore, of which high-grade deposits estimated at over 1,000m, tons exist in the provinces of Atacama and Coquimbo, has overtaken nitrate as Chile's second mineral. Production in 1983 was 5,973,674 tonnes, of which 3,071,900 were in pellet form

Coal reserves exceed 2,000m, tons, partially low in thermal unit. Net 1983 production was 1.095,230 tonnes.

In 1983 other minerals include molybdenum (15,264 tonnes, pure), zinc (5,993 tonnes), manganese (26,050 tonnes), lead (1,679 tonnes)

Agriculture. Agriculture and forestry contribute one-twelfth of the national product, although one-third of the population take part in it Total area of land being exploited (census of 1968) was 52.4m hectares, 14.9% for agriculture, 26.7% for pasture, 28 8% for forest, 29 6% is desert or unproductive

Some principal crops were as follows

	4rea sown,	Production,		Area sown,	Production,
	1,000 hectares	1,000 quintals		1,000 hectares	1,000 quintals
Crop	1983-84	1983-84	C'rop	1983-84	1983-84
Wheat	471	5,860	Potatoes	81	6,836
Oats	96	1,463	Beans	85	844
Barley	33	732	Lentils	24	138
Maize	138	5,116	Peas	10	57
Rice	40	1,156	Sugar-beet	48	16,428

There were in 1955 over 300 large farms, each with more than 12,250 acres, while 500,000 peasants live on less than 4 acres per family. The military government has opted in most cases to increase the number of settlements with access to individual property. The process was completed in early 1979 with some 24,000 property titles issued, a large proportion of which were in co-operative schemes.

Production of animal products in 1983 was (in 1,000 tonnes). Cattle, 208 1,

sheep, 13 3; pork, 59 2, poultry, 79 Eggs, 1,184m.; milk, 900m. litres.

Livestock (1984): Cattle, 3.87m., horses, 460,000; asses, 28,000; sheep, 6 3m., goats, 600,000; pigs, 1 15m.; poultry, 18m.

Forestry. According to the Forestry Institute, by late 1982, there were 825,000 hectares of artificial forests from Maule to Magallanes, the most important species being the pine (pinus radiata) which covers 640,000 hectares. Eucalyptus and poplar cover some 72,000 hectares. Native species of importance amounted to 9m. hectares in 1978.

Production during 1983 amounted to about 173m. in. of sawn timber. Exports of forestry products in 1983 were valued at US\$116m.

**Fisheries.** Chile has 4,200 km of coastline and exclusive fishing rights to 1.6 m sq. km. There are 220 species of edible fish. Catch of fish and shellfish in 1982 was 3.8m. tonnes; shellfish, 269,000 tonnes. Exports of seafood in 1982 were US\$352m., of which fishmeal accounted for US\$307m. The industry employs 55,000 (1.5% of the working population).

#### INDUSTRY AND TRADE

Industry. A nationally-owned steel plant operates from Huachipato, near Concepción. Output, 1983, 593,000 tonnes of steel ingots. Cellulose and wood-pulp are two industries which are rapidly developing, in 1983, 637,800 tonnes of cellulose were produced Cement (1 25m tonnes) and fishmeal (520,700 tonnes) are also important.

Labour. In Feb 1984 the 'economically active' numbered 3 1m Professional and 'white-collar' workers numbered 1,336,000, agriculture employed 487,600, manufacturing, 396,000; mining, 58,300, construction, 399,200, and transport 191,200 Trade unions began in the middle 1880s

Commerce. Imports and exports in US\$1 m

	1978	1979	1980	1981	1982	1983

Exports	2,480	3,800	4,818	4,000	3,798	3,835

In 1983 imports (in US\$1m) from USA, were valued at 764, Venezuela, 225. Brazil, 190; Japan, 161, Federal Republic of Germany, 185, Argentina, 201, Spain, 64, France, 83, UK, 61, Italy, 51

In 1983 the principal imports were (in US\$1m): Fuels, 572, chemicals, 434, industrial equipment, 257, transport equipment, 73, spares, 174, and live animals and foodstuffs, 120. The principal exports in 1982 were (in US\$1m). Copper, 1,836, paper and pulp, 208, iron ore, 112, timber, 116, nitrate, 84.

Total trade between Chile and UK for 5 years (British Department of Trade returns, in £1,000 sterling)

_	1981	1982	1983	I 984	1985
Imports to UK	87,939	111,206	107,644	108,420	134 750
Exports and re-exports from UK	62,227	56.897	43,520	74.997	73.914

**Tourism.** There were 295,406 foreign visitors in 1983

#### COMMUNICATIONS

Roads. In 1981 there were in Chile 78,025 km of highways. There were in 1982 (estimate), 850,000 automobiles, 185,000 goods vehicles and 22,500 buses.

Railways. The total length of state railway lines was (1984) 7,441 km, including 1,654 km electrified, of broad- and metre-gauge In 1984 the railways carried 12.9m, tonnes and 8 7m passengers. Further electrification is in progress between Concepción and Puerto Montt (600 km) An underground railway in Santiago was opened in Sept. 1975.

Aviation. There are 7 international airports, 16 domestic airports and about 300 landing grounds. Chile is served by 19 commercial air companies (2 Chilean) In 1980, 325,800 passengers were carried into and out of Chile on international services; 265,400 passengers were carried on internal routes

Shipping. The mercantile marine had, in 1982, 60 ships of over 100 tons (825,076 DWT) but most of the fleet operates under flags of convenience Valparaiso is the chief port. The free ports of Magallanes, Chiloé and Aysén serve the southern provinces. Chilean ports handled 45 6m tons in 1982 There are 2,185 km of navigable rivers.

Post and Broadcasting. There are 1,486 post offices and agencies. The length of telegraph lines in 1971 was 12,870 km. In 1983 there were 608,200 (Santiago, 360,053) telephones in use.

A chain of wireless stations along the coast for shore-to-ship transmission is operated by the Navy. At the end of 1982 there were 267 commercial broadcasting stations. Three television stations are operated by the Universities and there is a national television station using NTSC 525 line colour standards. On 9 Aug. 1968 the satellite station at Longovilo, 50 miles south-west of Santiago, was inaugurated to cover transmissions (including colour) from the USA and Europe In 1977 there were 2m. radio receivers and (1976) 710,000 television receivers.

Cinemas (1982). Cinemas numbered 170, 50 of them are in Santiago

Newspapers (1981) There were 59 daily newspapers and 96 magazines

#### JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. There are a High Court of Justice in the capital, 12 courts of appeal distributed over the republic, tribunals of first instance in the departmental capitals and second-class judges in the sub-delegations. The police force had (1975) about 27,000 officers and men, it is organized and regulated by the Ministry of Defence

Religion. The Roman Catholic religion was disestablished in 1925, it remains, however, a national Church in a state wherein 89 5% of the population are Catholics There are 1 cardinal-archbishop, 5 archbishops, 22 bishops and 2 vicars apostolic Latest estimates show 6 7m Roman Catholics, 880,500 Protestants and 25,000 Jews

Education. Education is in 3 stages: Basic (6-14 years), Middle (15-18) and University (19-23). Enrolment (1981) 2,139,319 pupils in the basic schools, 392,940 pupils in the middle schools and 161,809 pupils in technical schools, teachers in 1980 numbered 66,354 in basic, 24,387 in middle and 4,176 in technical schools

University education is provided in the state university, University of Chile (founded in 1842), the Catholic University at Santiago (1888), the University of Concepción (1919), the Catholic University at Valparaíso (1928), the Universidad Técnica Federico Santa María at Valparaíso (1930), the Universidad Técnica del Estado (1952), Universidad Austral, Valdivia (1954) and Universidad del Norte, Antofagasta (1957) with a total student population of 118,978 in 1981

Health. In 1982 there were 205 hospitals, 296 health centres and 888 emergency posts State-owned hospitals had 33,879 beds, private hospitals, 4,088 Total expenditure (1982), US\$1,000m

HISTORY. In the course of 1949 the Communists obtained full control of the mainland of China, and in 1950 also over most islands off the coast, including Hainan

On 1 Oct. 1949 Mao Zedong (Tse-tung) proclaimed the establishment of the People's Republic of China.

AREA AND POPULATION. China is bounded north by the USSR and Mongolia, east by Korea, the Yellow Sea and the East China Sea, with Hong Kong and Macao as enclaves on the south-east coast, south by Vietnam, Laos, Burma, India, Bhután and Nepál; west by India, Pakistan, Afghánistán and the USSR. China is composed of 22 provinces (this figure includes Taiwan), 5 autonomous regions originally entirely or largely inhabited by national minorities (owing to the immigration of Han Chinese the original nationality is sometimes outnumbered, eg, by 10 to 1 in Inner Mongolia), namely Inner Mongolia, Xinjiang-Uygur, Guangxi-Zhuang, Ningxia-Hui, Tibet and 3 centrally controlled municipalities (Peking, Shanghai, Tianjin)

The capital is Peking (Beijing)
See map in The Statesman's Year-Book, 1968-69

The total area is estimated at 9,597,000 sq. km (3,704,400 sq. miles)

At the 1982 census population was 1.008.175.288. Han Chinese numbered 936 7m. There are 55 ethnic minorities, the 3 largest were Zhuang (1 3m.), Hui (0 7m.) and Uighur (0.6m)

Since 1979 married couples in urban areas have been permitted to have only one child (usually two in rural areas), a policy enforced by compulsory abortions and economic sanctions.

Population in 1984: 1,036.04m Vital statistics, 1984 birth rate, 1 7%, death rate, 0.7%, growth rate, 1 08% Population density, 108 per sq. km in 1983 Expectation of life was 67 in 1985

Estimates of persons of Chinese race outside China, Taiwan and Hong Kong in 1980 varied from 15m to 20m China permits the emigration of a limited number of persons to Hong Kong annually. Since 1982 there has been a quota of 75 persons

A number of widely divergent varieties of Chinese are spoken. The official 'Modern Standard Chinese' is based on the dialect of North China. The ideographic writing system of 'characters' is uniform throughout the country, and has undergone systematic simplification. In 1958 a phonetic alphabet (Pinyin) was devised to transcribe the characters, and on 1 Jan. 1979 this was officially adopted for use in all texts in the Roman alphabet (see also Post and Broadcasting, p. 360) The previous transcription scheme (Wade) has now been generally abandoned, but is still used in Taiwan. The STATESMAN'S YEAR-BOOK introduced Pinyin transcriptions in its 1979-80 edition, and now with a few exceptions (e.g. Peking) Pinvin forms are used for all names.

From 1949 to 1955 the country was divided into 6 large administrative regions. This system was terminated in 1955, but in 1961 was revived in the form of 6 regional Party Bureaux These ceased to function during the Cultural Revolution The table below shows the Provinces, Autonomous Regions and Government-con-

trolled Municipalities grouped regionally. The cities shown in brackets are the seats of the former regional Party Bureaux

Tibet. For events before the revolt of 1959 see The Statesman's Year-Book, 1964-65, under Tibet. After the revolt was suppressed the Preparatory Committee for the Autonomous Region of Tibet (set up 1955) took over the functions of local government, led by its Vice-Chairman, the Banqen Lama, in the absence of its Chairman, the Dalai Lama, who had fled to India in 1959. In Dec. 1964 both the Dalai and Banqen Lamas were removed from their posts and on 9 Sept. 1965 Tibet became an Autonomous Region. 301 delegates were elected to the first People's Congress, of whom 226 were Tibetans and in 1968 a Revolutionary Committee was established to administer the Region. This gave way to a People's Government in Aug. 1979. The Banqen Lama was re-elected to the Standing Committee of the Chinese People's Political Consultative Conference in March 1978—he became one of its Vice-Chairmen in July 1979—and has made several appeals to the Dalai Lama to return to China. In 1982 the population was reported to be 1,892,393, of which 1 7m. is Tibetan. 4.25m. Tibetans live outside Tibet, in China, and in India and Nepál Chinese efforts to modernize Tibet include irrigation, road-building and the establishment of light industry: in 1985 296 small and medium-sized

factories and mines were producing electric power, coal, building materials,

lumber, textiles, chemicals and animal products.

In 1979, 1.6m. were engaged in agriculture, including 0.5m. nomadic herdsmen. Agricultural communes were first introduced in 1965; by 1975 99% of villages had formed them. By 1984, however, a large measure of autonomy for the peasantry had been re-introduced: compulsory deliveries and some taxes were abolished and private ownership of livestock and 30-year disposition of land were granted. There were 23m, cattle in 1984 In 1975 Tibet became self-sufficient in grain for the first time. There are now 21,000 km of highways, and air routes link Lhasa with Chengdu and Xian.

It was officially admitted in Peking in 1980 that the administration of Tibet had been badly conducted hitherto The borders were opened for trade with neighbouring countries.

Efforts are being made to revive Tibetan culture as part of China's new liberal policy towards minorities. 45 Buddhist monasteries closed in the Cultural Revolution were open in 1984. There were 1,300 monks. In 1984 a Buddhist seminary in Lhasa opened with 200 students. Circulation of the Tibetan-language Xizang Daily now totals 38,000. In 1983 there were 2,542 primary schools, 55 secondary schools, 13 technical schools and 3 higher education institutes. In 1984 only 56% of children were at school A university was established in 1985. There were more than 7,000 medical workers, some 5,000 rural doctors and 962 hospitals, with a total of 4,500 beds.

CLIMATE. Most of China has a temperate climate but, with such a large country, extending far inland and embracing a wide range of latitude as well as containing large areas at high altitude, many parts experience extremes of climate, especially in winter Most rain falls during the summer, from May to Sept, though amounts decrease inland. Peking (Beijing). Jan 24°F (-4 4°C), July 79°F (26°C) Annual rainfall 24 9" (623 mm) Chongqing Jan 45°F (7 2°C), July 84°F (28.9°C). Annual rainfall 43.7" (1,092 mm). Shanghai. Jan 39°F (3 9°C), July 82°F (27.8°C). Annual rainfall 45 4" (1,135 mm). Tianjin. Jan 24°F (-4 4°C), July 81°F (27-2°C). Annual rainfall 21 5" (533 4 mm)

CONSTITUTION AND GOVERNMENT. On 21 Sept. 1949 the 'Chinese People's Political Consultative Conference' met in Peking, convened by the Chinese Communist Party. The Conference adopted a 'Common Programme' of 60 articles and the 'Organic Law of the Central People's Government' (31 articles) Both became the basis of the Constitution adopted on 20 Sept. 1954 by the 1st National People's Congress, the supreme legislative body. The Consultative Conference continued to exist after 1954 as an advisory body. Both bodies stopped functioning in the Cultural Revolution. The People's Congress was revived in 1975 and the Consultative Conference in 1978, when Deng Xiaoping was elected as its head. In 1979 it had 1,734 members.

In Jan. 1975 the 4th National People's Congress approved a constitution, under which China was defined as a 'socialist state of the dictatorship of the proletariat'. The 1975 Constitution was a simpler document than its predecessor emphasizing the role of politics in society, especially the thought of Mao, but giving fewer organizational details. In March 1978 the 5th National People's Congress adopted a new constitution of 60 articles which revived several of the provisions of the 1954 constitution dropped in the 1975 document and eliminated much of the latter's innovatory radicalism. More administrative detail was given.

. A new Constitution was adopted in 1982. It defines 'socialist modernisation' as

China's basic task. Its most striking change is the restoration of the post of State President (i.e Head of State).

The National People's Congress is the highest organ of state power. It can amend the Constitution, elects and has power to remove from office the highest State dignitaries, decides on the national economic plan, etc. The Congress elects a *Standing Committee* (which supervises the State Council) and the State President, currently Li Xiannian.

The Constitution provides that the Congress be elected for a 5-year term and should meet once a year. It is composed of deputies elected on a constituency basis by direct secret ballot. Any voter, and certain organizations, may nominate candidates. Nominations may exceed seats by 50-100%. 2,978 deputies were elected to the 6th Congress in June 1983.

Government structure was streamlined in 1983 and the number of Ministries reduced. In 1986 there were 33 Ministries and 9 Commissions under the State Council. The Premier is Zhao Ziyang. Vice-Premiers. Li Peng, Tian Jiyun, Yao Yilin, Wan Li. Other ministers include: Wu Xueqian (Foreign Affairs), Zheng Tuobin (Foreign Trade), Zhang Aiping (Defence), Wang Bingqian (Finance) and

Ruan Chongwu (Public Security).

Since 1970 China's diplomatic relations have expanded considerably. On 25 Oct. 1971 the UN voted for the People's Republic to take over the China seat from the Nationalists by 76 votes to 35 with 17 abstentions. US President Nixon visited China in Feb. 1972 and in 1973 'hiason offices' were opened in the capitals of the two countries. On 1 Jan. 1979 the US recognized the Peking government as the sole legal government of China and diplomatic relations were established. In Jan.—Feb. 1979 Deng Xiaoping paid an official visit to USA. On 12 Aug. 1978 China and Japan signed a 10-year treaty of peace and friendship (ratified 22 Oct. 1978). China did not renew its treaty of friendship with the USSR which expired in 1980, but in 1985 there were signs that both countries were endeavouring to normalize their relations.

De facto power is in the hands of the Communist Party of China, which had 40m members in 1986. There are 8 other parties, all members of the Chinese People's Political Consultative Conference In mid-1966 the Party Chairman, Mao Tse-tung, launched the 'Great Proletarian Cultural Revolution' to eradicate 'revisionism' and numerous Party and State officials were dismissed The Cultural Revolution can be taken to have terminated by April 1969 when the long-delayed 9th Party Congress was convened, although it was not officially declared to have been brought to a 'victorious conclusion' until Aug. 1977. The 9th Congress adopted a new Party Constitution which proclaimed the leading rôle of the Party in the State and designated Lin Biao as Chairman Mao's successor. A factional dispute developed, however, centred on Lin Biao (killed in an air crash in Mongolia in Sept. 1971) and in Aug. 1973 the 10th Party Congress adopted amendments to the Party Constitution, removing references to Lin Biao and the succession to Chairman Mao, and electing a new Central Committee which appointed a new Politburo and Standing Committee. In Jan. 1975 the Central Committee appointed as a vicechairman of the Politburo Deng Xiaoping, former Party Secretary-General dismissed during the Cultural Revolution. In April 1976 a 'radical' faction in the Politburo engineered a second dismissal of Deng from all his posts, and Hua Guofeng was appointed First Party Vice-Chairman as well as Premier. On the death of Mao Tse-tung on 9 Sept. 1976 Hua became Party Chairman. In Oct. 1976 the 'radical' faction (now identified and branded as the 'Gang of Four': Mao's widow, Jiang Qing, Zhang Chunqiao, Wang Hongwen and Yao Wenyuan) were placed under arrest. At the 11th Party Congress in Aug. 1977 a new Party Constitu-

tion was adopted, and a new Central Committee was elected. Changes in the leadership saw the elimination of the 'radical' faction and a second reinstatement of Deng to his Party and government posts. In Feb. 1980 Liu Shaoqi, former head of state denounced by Mao as a traitor, was posthumously reinstated, and 4 Politburo members of Maoist persuasion were dismissed. Hua Guofeng was replaced as Premier by Zhao Ziyang in Sept. 1980. The 'Gang of Four', along with Chen Boda (a former secretary of Mao), were brought to trial only on 20 Nov. 1980. At the same time the trial opened of five generals accused of complicity with Lin Biao in an attempt to seize power. All 10 accused were found guilty on 25 Jan 1981. Suspended death sentences were passed on Jiang Qing and Zhang Chunqiao. Hua Guofeng was removed from the Party Chairmanship in June 1981 and replaced by Hu Yaobang. At the 12th Party Congress (Sept. 1982), the posts of Chairman and Vice-Chairman of the CPC were abolished, and greater stress laid on the position of General Secretary of the Central Committee. In 1985 a nationwide drive to promote younger and better-qualified personnel and favour supporters of Deng Xiaoping resulted in massive reshuffles at ministerial and Politburo level. The members of the Standing Committee of the Politburo in 1986 were Hu Yaobang (General Secretary), Deng Xiaoping (Chairman of the Military Commission of the Central Committee), Zhao Ziyang, Li Xiannian and Chen Yun (Chairman of the Central Commission for Discipline Inspection) Other members of the Politburo are. Wan Li, Xi Zhongxun, Fang Yi, Yang Shangkun, Yang Dezhi. Yu Qiuli, Hu Qiaomu, Ni Zhifu, Peng Zhen, Li Peng, Hu Qili, Qiao Shi, Tian Jiyun, Yao Yilin, Wu Xueqian A new central Party body—the Central Advisory Commission, chaired by Deng Xiaoping—was elected by the 12th Congress.

Local Government There are 4 administrative levels. (1) Provinces, Autonomous Regions and the municipalities directly administered by the Government, (2) prefectures and autonomous prefectures (zhou), (3) counties, autonomous counties and municipalities, (4) towns A policy began in 1982 of replacing rural communes by townships as the basic unit of rural local government Local government after 1968 was in the hands of Revolutionary Committees From 1 Jan 1980 these were replaced by elected People's Congresses and People's Governments. These exist at provincial, county and township levels and in national minority autonomous prefectures, but not in ordinary prefectures which are just agencies of the provincial government. Up to county level Congresses are elected directly.

**DEFENCE.** China is divided into 7 military regions. The military commander also commands the air, naval and civilian militia forces assigned to each region.

Conscription is compulsory but for organizational reasons selective. only some 10% of potential recruits are called up. Service is 3 years with the Army and 4 years with the Air Force and Navy

Marks of rank were abolished in 1965 but it is intended to restore them. It was announced in 1985 that the armed forces would be reduced by one million by 1988, and most of the regional commanders were replaced by younger officers. A Defence University to train senior officers in modern warfare was established in 1985

Army. The Army (PLA. 'People's Liberation Army') is divided into main and local forces. Main forces, administered by the military regions in which they are stationed but commanded by the Ministry of Defence, are available for operation anywhere and are better equipped. Local forces concentrate on the defence of their own regions. The Army consists of 191 divisions including 31 artillery, 13 armoured, 118 infantry, 3 airborne and 73 local divisions. Land-based missile forces consisted of (1985 estimate): 4 intercontinental, 60 intermediate range and 50 medium range ballistic missiles. Total strength in 1986 was 2,973,000.

The security forces, including the armed police, number some 300,000.

The People's Militia consists of the Armed Militia of up to 6m. strength, the Ordinary Militia of several million, unarmed but with some basic military training, which includes the Urban Militia.

Navy. The steady new construction programme of all classes of warships in

modernized yards, many with advanced nuclear and/or missile capability, has been maintained. Chinese naval strength is an important factor in the present and future balance of power in the eastern hemisphere.

Strength comprises 2 nuclear powered and ballistic missile armed submarines, 1 diesel-powered submarine with ballistic missile tubes, 6 nuclear propelled fleet submarines, 113 patrol submarines, 20 destroyers, 30 frigates, 14 patrol escorts, 230 missile boats, 21 large patrol boats, 70 fast patrol craft, 350 fast gunboats, 200 fast torpedo boats, 24 ocean minesweepers, 80 mine warfare craft, 100 river patrol craft, 35 coastal patrol craft, 50 survey and research ships, 36 supply ships, 16 support ships, 32 oilers, 9 boom defence vessels, 3 repair ships, 44 landing ships, 530 landing craft, 7 salvage ships, 3 icebreakers, 43 tugs, 375 coast and river defence craft and 525 vessels of the Maritime Militia

Active personnel in 1986 exceeded 300,000 officers and men, including 30,000 in the naval air force and over 28,000 marines.

Main naval bases. Qingdao (North Sea Fleet), Shanghai (East Sea Fleet); Tsamkong (Zhanjiang) (South Sea Fleet)

The largely land-based naval air force of 820 aircraft, primarily for defensive and anti-submarine service, includes MiG-17, MiG-19, MiG-21 and Q-5 fighters, some 130 II-28 torpedo bombers, Be-6 flying boats, Mi-4, Mi-8 and Super Frelon helicopters, and communications, research, training and transport aircraft.

Air Force. In 1984 the Air Force was estimated at 5,300 front-line aircraft, organized in over 100 regiments of jet-fighters and about 12 regiments of tactical bombers, plus reconnaissance, transport and helicopter units. Each regiment is made up of 3 or 4 squadrons (each 12 aircraft), and 3 regiments form a division

Equipment is predominantly Russian in design and includes about 500 J-7 (MiG-21), 2,000 F-6 (MiG-19) and 500 F-5 (MiG-17) interceptors and fighter-bombers, with about 400 H-5 (Il-28) jet-bombers, about 120 H-6 Chinese-built copies of the Soviet Tu-16 twin-jet strategic bomber, plus 500 Q-5 twin-jet fighter-bombers (known in the west as 'Fantan'), evolved from the MiG-19. Under development is a new fighter designated J-8 (known in the west as 'Finback'). Transport aircraft include about 300 Y-5 (An-2), Y-8 (An-12), An-24/26, 100 Li-2, 30 Il-14 and a few three-turbofan Trident fixed-wing types, plus 300 Z-5 (Mi-4) and Z-6 (Mi-8) helicopters. The MiG fighters and Antonov transports have been manufactured in China, initially under licence, and other types have been assembled there, including several hundred JJ-5 (2-seat MiG-17) trainers.

Total strength (1986) about 490,000, including 220,000 in air defence organization

At least 26 nuclear tests have been made since 1964 and a nuclear force capable of reaching large parts of the USSR and Asia is operational. Land-based missile forces thought to be deployed consist of 4 intercontinental, 60 intermediate-range (approximately 3-5,000 km) and 50 medium-range (1,100 km) ballistic missiles. Missile forces are controlled by the Second Artillery, the missile arm of the PLA

#### **ECONOMY**

Planning. For planning history 1953-73 see The Statesman's Year-Book, 1973-74, p. 817.

The long-term aim of the present leadership is to transform China by the year 2000 into a modern developed economic power by the implementation of 'the 4 modernizations', i.e., of agriculture, industry, defence and science and technology. In 1978, as a first step to the realization of the '4 modernizations', a 10-year plan (1976-85) was introduced. However this proved in practice to be over-ambitious; many of the planned targets were too high and the scale of capital construction was too great. The pursuit of the plan caused serious imbalances in the economy. Since

1979 a policy of 'readjusting, restructuring, consolidating and improving' the economy has been followed.

Agriculture and light industry now receive higher priority in investment than heavy industry. The average annual increase in the value of industrial and agricultural output was 9 6% during the 1981-85 plan. A fundamental economic reform was introduced in 1985, to be fully implemented by 1990. The state plan is being reduced in scope and enterprises are to have a degree of freedom in deciding their production and marketing a portion of it. Wages will vary according to work performed, and prices will gradually be adjusted to reflect market conditions. The seventh 5-year plan is running from 1986 to 1990. It aims initially to curb investment in order to deal with the symptoms of inflation which had appeared in 1985 and to restrict the pace of development to within the limits imposed by infrastructural resources. Production in agriculture is scheduled to rise at an annual average of 6%, and in industry, 7%

Budget. 1985 (estimates) revenue was 153,500m yuan; expenditure, 156,600m yuan.

Revenue, 1984 (in million yuan): enterprises, 26,000, taxation, 94,000 Expenditure. capital construction, 48,000, defence, 18,000, administration, 12,000 Income tax was introduced in 1980. Registration of British claims for loss of assets of £61m. in 1949 was requested by the Foreign Compensation Commission in Jan. 1981. A credit of 450in SDF was granted by IMF in March 1981

China's foreign exchange reserves in March 1985 were US\$11,360m Gold reserves in 1984 were 12 7m. troy oz. of gold

Currency. The currency is called Renminbi (RMB, ie, People's Currency) The unit of currency is the *yuan* which is divided into  $10 \, \mu ao$ , the  $\mu ao$ , into  $10 \, fen$  The official rate of exchange is £1 = 4.76  $\mu ao$ , US\$1 = 3.21  $\mu ao$ , Hong Kong\$1 = 0.32  $\mu ao$ , 1 rouble = 2.222  $\mu ao$  (non-commercial, 1 rouble = 1.29  $\mu ao$ ).

Notes are issued for 1, 2 and 5  $\mu ao$  and 1, 2, 5 and 10  $\nu uan$  and coins for 1, 2 and 5  $\mu ao$  fen.

Banking. A re-organization of the banking system in 1983 resulted in the People's Bank of China assuming the role of a Central Bank. Its former commercial role has been taken over by the Industrial and Commercial Bank. Other specialized banks include the Agricultural Bank of China, the China Investment Bank and the Chinese People's Construction Bank. The Bank of China will continue to be responsible for foreign banking operations. It has branches in London, New York, Singapore, Luxembourg, Macao and Hong Kong, and agencies in Tökyö and Paris Savings bank deposits were 65,740m, yuan in 1982

Weights and Measures. The metric system is in general use alongside traditional units of measurement, for which see The Statesman's Year-Book, 1975-76, p 826 and 1954, pp. 877-88

#### **ENERGY AND NATURAL RESOURCES**

Electricity. Sources of energy in 1982. coal 73 8%; oil, 18 76%, hydroelectric power, 4 87%; gas, 2.57% Hydroelectric potential is 676m. kw. Generating is not centralized, local units range between 30 and 60 mw of output. Output in 1983. 351,400m. kwh. There are nuclear energy plants under construction at Shanghai and Liaoning, and a joint venture in Guangdong.

Oil. China has made rapid progress in oil extraction and refining. There are probably about 100 oilfields, of which the largest are at Daqing, Shengli, Dagang and Karamai. Offshore resources in Bohai Bay are also being exploited and exploration is taking place in the South China and Yellow Seas. Oil reserves may be as much as 10,000m, tonnes. Crude oil production was 114.5m. tonnes in 1984.

Gas. Natural gas is available from fields near Canton and Shanghai and in Sichuan province. Production was 12,460m. cu. metres in 1984, but is only used locally.

Minerals. Coal. Most provinces contain coal, and there are 70 major production centres, of which the largest are in Hebei, Shanxi, Shandong, Jilin and Anhui, Coal

reserves are estimated at 770,000m tonnes. Coal production was 770m. tonnes in 1984

Iron ore deposits are estimated at 447,000m. tonnes and are abundant in the anthracite field of Shanxi, in Hebei and in Shandong and are found in conjunction with coal and worked in Manchuria Estimated output of iron ore in 1984, 122m tonnes. The biggest steel bases are at Anshan (in Manchuria) with a capacity of 6m tons, Wuhan (capacity 3 5m tonnes), Baotou and Maanshan (both 2 5m tonnes) and Baoshan near Shanghai

Tin Tin ore is plentiful in Yunnan, where the tin-mining industry has long existed Tin production was 15,000 tonnes in 1981

Tungsten China is the world's principal producer of wolfram (tungsten ore), producing 14,000 tonnes in 1981 Mining of wolfram is carried on in Hunan, Guangdong and Yunnan

Production of other minerals in 1978 (in tonnes) Phosphate rock, 4 5m; aluminium, 225,000; copper, 200,000, lead, 120,000, zinc, 125,000, antimony, 9,000, manganese, 2m, (1973) sulphur, 130,000, (1967) bauxite, 350,000; (1973) salt, 18,000, (1969) asbestos, 160,000. Other minerals produced barite, bismuth, gold, graphite, gypsum, mercury, molybdenum, silver

Agriculture. China remains essentially an agricultural country. 224m. hectares are under cultivation. Intensive agriculture and horticulture have been practised for millennia. Present-day policy aims to avert the traditional threats from floods and droughts by soil conservancy, afforestation, irrigation and drainage projects, and to increase the 'high stable yields' areas by introducing fertilizers, pesticides and improved crops.

Since 1958 modifications have been made in the commune system, including size reductions. There were 54,352 in 1982.

Since 1978 more flexible methods of management have been adopted comprising 'responsibility systems', whereby individual households or other small units are contracted to supply to the commune or government purchasing agency a quantity of crops to be produced from an allotted area of commune land. Any surplus is at the disposal of the household, to be consumed or marketed. In 1984 peasants were granted contracts to commune land with inheritance rights, and were permitted to hire up to 7 labourers. Initially production was improved considerably, but a fall in the 1985 total grain harvest to 380m, tonnes from the 1984 record of 407m tonnes led to a more cautious policy of encouraging grain production in 1986. Reasons for the shortfall included the greater profitability in devoting land to cash crops and stock-breeding and the migration of 60m, peasants to industry.

In 1981 there were estimated to be 145m hectares of arable land and 792,000 large and medium-sized tractors.

Agricultural production (in 1m. tonnes), 1982, rice, 161, wheat, 68; maize, 60, soybeans, 9, tubers, 26; tea, 0.4, 1984, cotton, 6 1; oilseed crops, 11 9, sugar-cane, 48. The gross value of agricultural output in 1984 was 361,260m. yuan.

Livestock, 1984. Horses and cattle, 69 4m.; sheep and goats, 167 1m.; pigs, 304 4m. Pork and mutton production in 1984 was 15 24m. tonnes.

Forestry. In 1984 there were 2.6m hectares of timber forest. The chief forested areas are in Heilongjiang, Sichuan and Yunnan Timber output in 1984 was 55m. cu. metres.

Fisheries. Total catch, 1984: 6.1m. tonnes.

## INDUSTRY AND TRADE

Industry. 'Cottage' industry is very old in the economy and persists into the 20th century. Modern industrial development began with the manufacture of cotton textiles, and the establishment of silk filatures, steel plants, flour-mills and match factories. In 1982 there were 388,600 industrial enterprises, of which 301,900 were collectives and 86,100 state-owned. Only 1,584 were classified as 'large'. Expand-

ing sectors of manufacture are: steel, chemicals, cement, agricultural implements, plastics and lorries.

1984 production (in tonnes): Chemical fertilizer, 14.8m.; pig-iron, 40m, cement, 121m.; cotton cloth, 13,400m. metres, motor vehicles, 315,000, tractors, 40,000, bicycles, 28 6m., (1983) chemical fibres, 541,000, (1982) steel, 37m, rolled steel, 29m., coke, 33m.; paper, 5 9m., sugar, 3 4m., drugs, 42,200, cotton yarn, 3 4m. and 5.9m. TV sets.

The gross value of industrial output in 1984 was 701,560m. yuan.

Labour. Total workforce, 1983. 447m., including 112 8m. industrial workers, 1 47m. urban artizans and 332.8m rural workers. Average annual non-agricultural wage in 1984 961 yuan There is a 6-day 48-hour working week

Commerce. Foreign trade is being decentralized and has expanded rapidly since 1978 A rush for consumer imports led to a trade deficit of US\$15,000m. in 1984, and measures to curb this were taken in 1985. Special Economic Zones have been set up in the provinces of Guangdong and Fujian, in which concessions are made to foreign businessmen to encourage their investment. In 1984, 14 coastal cities and Hainan Island were opened for technological imports. A law of July 1979 permits the establishment of joint ventures with foreign firms. There is no maximum limit on the foreign share of the holdings; the minimum limit is 25%. Foreign indebtedness was US\$3,020m in 1983. In 1985, the IMF lent China US\$3,000m repayable over 5 years.

Trade in 1985: Imports, US\$33,400m., exports, US\$25,800m.

In 1984 only 7.2% of China's trade was with Communist countries (2.5% with the USSR), but trade with the USSR rose by 61% in 1985: Imports, US\$940m; exports, US\$960m. A trade agreement covering 1986–90 was signed in July 1985. Japan is China's biggest trading partner. Other major trading partners are Hong Kong, USA, Federal Republic of Germany and Canada. Customs duties with Taiwan were abolished in 1980.

Main export is oil and oil products, others are textiles, chemicals, light industrial goods and arms Major imports are machinery and transport equipment, iron and steel, and chemicals

Total trade between China and UK (British Department of Trade returns, in £1,000 sterling).

	1981	1982	1983	1984	1985
Imports to UK	184,069	193,231	231,417	278,474	307,963
Exports and re-exports from UK	120,048	103,051	159,722	317,256	396,156

In April 1978 a most-favoured-nation agreement was signed with EEC, and in 1980 the EEC extended preferential tariffs to China

In July 1979 the USA and China signed a 3-year trade agreement which accords China most-favoured-nation status from 1980 In 1985 both the UK and the USA signed nuclear power agreements with China, and the UK and China signed a second agreement on economic co-operation valid till 1990.

China gained representation in the IMF in Apr. 1980, and in the IBRD in May 1980 and became an observer at GATT in Nov. 1984

**Tourism.** 1 13m. foreigners and 1 72m overseas Chinese visited China in 1984 Restrictions on Chinese wishing to travel abroad were lifted in Feb. 1986.

#### COMMUNICATIONS

Roads. The total road length was 915,000 km in 1983 Highways are well graded but mostly unmetalled, 90% of townships can be reached by road

In 1983, 790m. tonnes of freight and 3,390m. passengers were transported by road.

Railways. Chinese railway history begins in 1876, when the Wusong-Shanghai line was opened. In 1984 there were some 52,000 km of railway including 2,600 km electrified.

The principal railways are.

(1) The great north-south trunk lines: (a) Peking-Canton Railway (over 2.300)

km), via Zhengzhou-Wuhan-Zhuzhou-Hengyang. (b) Tianjin-Shanghai Railway (1,500 km), via Pukow and Nanjing (double-tracked in July 1976) (c) Baoji-Chongqing Railway, via Chengdu (1,174 km). Chongqing with the east-west route from Hengyang to the Vietnam border, and to Kunming, connecting there with the Yunnan Railway to the Vietnam border. Two further lines connect Baoji

(2) Great east—west trunk lines: (a) Longhai Railway; Lianyungkang—Xuzhou—Zhengzhou (on the Peking—Canton line) —Xian—Baoji—Tianshui—Lanzhou (1,500 km) The Baoji—Lanzhou section was upgraded in 1978. (b) Lanzhou—Xinjiang Railway Lanzhou—Yumen—Hami—Turfan—Urumqi (1,800 km); (c) Shanghai—Youyiguan (Vietnam border) via Hangzhou, Nanchang, Hengyang (on the Peking—Canton line), Guilin, Liuzhou and Nanning. (d) Peking—Lanzhou via Xining (from which a branch connects with the lines through Mongolia to the Trans—Siberian Railway), Dadong (from which a branch serves the province of Shanxi), Baotou and Yinchuan (Ningxia). (e) Zhuzhou—Guiyang (632 km) A new east—west line was opened in 1978 between Xiangfan and Chongqing.

Branches link coastal areas (e g, Fujian province) and the smaller inland centres with the main parts of the system. Surveys have been made for a new 500-km

railway, linking the trunk line with the oilfield of Karamai in Xinjiang.

(3) The Manchurian system (a) Chinese Eastern (Changchun) Railway (2,370 km), from Manzhouli on the Soviet border through northern Inner Mongolia and Manchuria via Qiqihar, Harbin and Mudanjiang to the Soviet border near Vladivostok (b) South Manchuria Railway (705 km, 1,120 km with branches), Changchun-Shenyang-Luda. (c) Peking-Shenyang Railway, with branches in Manchuria (854 km, 1,350 km with branches).

Branches give connexions with outlying parts of Manchuria and Inner Mongolia as well as international links with Korean railways. Chinese railways are all constructed to the standard gauge except for some 600 mm gauge in Yunnan. Trunk routes are being converted from single to double track. The route between Baoji and Chengdu (676 km) was electrified in 1975 and that between Yangpingguan (on the Baoji-Chengdu route) and Ankang in 1977.

Capacity is being expanded under the 1976-85 development plan. 6 new lines are to be built by 1985 Lines are planned to link Tibet with the Chinese network (opened as far as Golmud in 1979) and to bridge gaps in the system such as Liuzhou-Canton, Kantang-Taiyuan and southern Xinjiang.

In 1983 the railways carried 1,160m. tons of freight and 1,094m. passengers

Aviation. Since 1985 the Civil Aviation Administration of China has become the administrative body for 5 new airlines. Air China (based on Beijing); Eastern Airways (Shanghai), Southern Airways (Canton), South-Western Airways (Chengdu) and the Capital Helicopter Company. There are services to Pyongyang, Hanoi, Rangoon, Karachi, Tökyö, Moscow, Ulan Bator, Teheran, Addis Ababa, Bucharest, Belgrade, Zürich, Paris. Frankfurt, Manila, New York, San Francisco, London, Sydney and Hong Kong. Route lengths in 1982. international, 9 99m. km, domestic, 13 28m. km. British Airways have a direct flight London-Beijing. Japan Airlines have a route from Tökyö to Beijing (via Osaka and Shanghai), Air France Paris to Beijing (via Athens and Karachi), Pakistan Airlines Karachi to Beijing, Aeroflot Moscow to Beijing, Ethiopian Airlines Addis Ababa to Shanghai, Tarom Bucharest to Beijing, Swissair Geneva to Beijing and Shanghai, Iran Air Paris to Peking and PANAM Beijing via Tökyö.

In 1982 CAAC carried 4 45m. passengers and 102,000 tonnes of freight.

Air services agreements have been signed with 42 countries.

Shipping. In 1980 the ocean-going merchant fleet consisted of 431 vessels with a total DWT of 7.92m.

The major ports are at Tianjin, Shanghai, Qingdao, Luda and Canton. New ports are under construction at Changchiang, Huangpu, Qinhuangdao, Yantai and Lienyunkang. Ports cannot accommodate vessels over 100,000 GRT and most harbours have a draught limitation of 35 ft. In 1982 46m tonnes of freight were carried

Inland waterways totalled 108,600 km in 1982. 397m. tonnes of freight were carried.

Pipeline. A pipeline links the Daqing oilfield to the port of Luda and to refineries in Peking. There is a pipeline from Lanzhou to Lhasa. There were 10,400 km of pipeline in 1982 which carried a load of 108 6m. tonnes.

Post and Broadcasting. There were 49,700 post offices in 1982. There were 5m. telephones in 1985. The use of *Pinyin* transcription of place names has been requested for mail to addresses in China (e.g., 'Beijing' not 'Peking', 'Tianjin' not 'Tientsin'; 'Guangzhou' not 'Canton', etc.).

In 1983 there were 122 radio and 52 television stations and in 1981 9.02m. TV receivers. Most are communally owned.

Cinemas. Cinemas numbered 162,000 in 1983

Newspapers and books. In 1983 there were 277 newspapers with a circulation of 15,150m, and 3,100 periodicals. The Party newspaper is *Renmin Ribao* (People's Daily). In 1979 it had a daily circulation of 7m. 31,784 book titles were produced in 5 8m, copies in 1982.

# JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Six new codes of law (including criminal and electoral) came into force in 1980, to regularize the legal unorthodoxy of previous years. There is no provision for habeas corpus. An anti-crime campaign was launched in Aug 1983 which, it was claimed in 1985, had cut the crime rate sharply. The death penalty has been extended from treason and murder to include rape, embezzlement, smuggling, drug-dealing, bribery and robbery with violence. Courts will no longer be subject to the intervention of other state bodies, and their decisions will be reversible only by higher courts. 'People's courts' are divided into some 30 higher, 200 intermediate and 2,000 basic-level courts, and headed by the Supreme People's Court. The latter tries cases, hears appeals and supervises the people's courts.

People's courts are composed of a president, vice-presidents, judges and 'people's assessors' who are the equivalent of jurors. 'People's conciliation committees' are charged with settling minor disputes

There are also special military courts.

Procuratorial powers and functions are exercised by the Supreme People's Procuracy and local procuracies

Religion. Confucianism, Buddhism and Taoism have long been practised Confucianism has no ecclesiastical organization and appears rather as a philosophy of ethics and government. Taoism—of Chinese origin—copied Buddhist ceremonial soon after the arrival of Buddhism two millennia ago. Buddhism in return adopted many Taoist beliefs and practices. It is no longer possible to estimate the number of adherents to these faiths. A more tolerant attitude towards religion had emerged by 1979, and the Government's Bureau of Religious Affairs was reactivated.

Ceremonies of reverence to ancestors have been observed by the whole population regardless of philosophical or religious beliefs.

Moslems are found in every province of China, being most numerous in the Ningxia-Hui Autonomous Region, Yunnan, Shaanxi, Gansu, Hebei, Honan, Shandong, Sichuan, Xinjiang and Shanxi. They totalled 14m. in 1986.

Roman Catholicism has had a footing in China for more than 3 centuries. In 1985 there were about 3m. Catholics who are members of the Patriotic Catholic Association, which declared its independence of Rome in 1958. In 1979 there were about 1,000 priests. In 1977 there were 78 bishops and 4 apostolic administrators, not all of whom were permitted to undertake religious activity. This figure included 46 'democratically elected' bishops not recognized by the Vatican. A bishop of Peking was consecrated in 1979 without the consent of the Vatican and 2 auxiliary bishops of Shanghai in 1984.

Protestants are members of the All-China Conference of Protestant Churches

Education. After the radical experimentalism of the Cultural Revolution 1977 marked the beginning of a return to a more conventional educational system, and by 1985 primary schooling was practically universal, and two-thirds of school children went on to secondary school At the 1982 census 23.5% of the population were illiterate. An educational reform of 1985 is phasing in compulsory 9-year education. University entry is dependent upon entrance examinations. Since 1985 instead of receiving grants based on parents' income students have been funded by competitive scholarships. Obligatory manual labour has been reduced to 1 month per year. In 1978 a system of 'key' schools for the best-performing pupils was set up, and it was announced that new universities and colleges would be established. In 1982, there were 715 universities and institutes of higher education, with 1,396,000, students in 1984. In 1983 there were some 135.78m. pupils in 880,000 primary schools, and 46.87m. pupils in 108,000 secondary schools.

The Academy of Sciences had in 1964 some 20 provincial branches and an

Academy of Social Sciences was established in 1977.

Among the universities are the following: People's University of China, Peking (founded 1912 by Dr Sun Yat-sen, reorganized 1950, about 3,000 students), Peking University, Peking (1898, enlarged 1945, about 10,000 students); Xiamen University, Fujian (1921 and 1937); Fudan University, Shanghai (1905); Inner Mongolia University, Hohhot, Lanzhou University, Lanzhou (Gansu Prov.), Nankai University, Tianjin (1919), Nanjing University, Nanjing (1888 and 1928), Jilin University, Changchun (Jilin Prov.), North-West University, Xian (Shanxi Prov.), Shandong University, Qingdao (1926); Sun Yat-sen University, Canton (founded 1924 by Dr Sun Yat-sen), Sichuan University, Chengdu (1931), Qinghua University, Peking, Wuhan University, Wuhan (Hubei Prov., 1905 and 1928); Yunnan University, Kunming In 1985 some 36,000 students were studying abroad.

Health. Medical treatment is free only for certain groups of employees, but where costs are incurred they are partly borne by the patient's employing organization. In 1984 there were 1,577,000 doctors, of whom 715,000 practise both Chinese and Western medicine. In rural areas there were also 1.5m. 'bare-foot doctors', who receive 3 months' training and remain in the community treating simple ailments and implementing public health directives

In 1982 there were 66,149 hospitals with 2 05m. beds (59 4% in rural areas)

# 'Republic of China'

HISTORY. The island of Taiwan (Formosa) was ceded to Japan by China by the Treaty of Shimonoseki on 8 May 1895. After the Second World War the island was surrendered to Gen. Chiang Kai-shek in Sept. 1945 and was placed under Chinese administration on 25 Oct. 1945. USA broke off diplomatic relations with Taiwan on 1 Jan. 1979 on establishing diplomatic relations with the Peking Government. Relations between the USA and Taiwan are maintained through the American Institute on Taiwan and the Co-ordination Council for North American Affairs in the USA, set up in 1979 and accorded diplomatic status in Oct. 1980.

AREA AND POPULATION. Taiwan lies between the East and South China Seas about 100 miles from the coast of Fujian province. The total area of Taiwan Island and the Penghu Archipelago is 13,969 sq. miles (36,179 sq. km). Population (1985), 19,135,254, of whom some 2m. are mainland Chinese who came with the Nationalist Government. There are also some 306,000 aboriginals. Population density: 528·1 per sq. km.

In 1984, birth rate was 2%; death rate, 0.48%; rate of growth, 1 48% per annum (1989 target. 1.25% per annum). Life expectancy, 1984: males, 70 5 years;

females, 75 5 years

Taiwan is divided into two special municipalities (Taipei, the capital, population 2 45m. in 1984 and Kaohsiung, population 1 29m. in 1984), 5 municipalities (Taichung, the seat of the Provincial Government, Keelung, Tainan, Chiayi and Hsinchu) and 16 counties (hsien). Changhua, Chiayi, Hsinchu, Hualien, Ilan, Kaohsiung, Miaoli, Nantou, Penghu, Pingtung, Taichung, Tainan, Taipei, Taitung, Taoyuan, Yunlin.

CLIMATE. A tropical climate with hot, humid conditions and heavy rainfall in the summer months but cooler from Nov to March when rainfall amounts are not so great. Typhoons may be experienced. Taipei. Jan. 58°F (14 3°C), July 83°F (28 1°C). Annual rainfall 100" (2,500 mm).

CONSTITUTION AND GOVERNMENT. Taiwan is controlled by the remnants of the Nationalist Government. On 1 March 1950, Chiang Kai-shek resumed the presidency of the 'Republic of China'. He died 5 April 1975 and was succeeded by Dr Yen Chia-kan who was replaced in the presidential elections of 21 March 1978 by Chiang Kai-shek's eldest son Chiang Ching-kuo (nominated for a second 6-year term in 1984). There are 3 political parties: the ruling Kuomintang (2m members in 1982), which has a youth movement (China Youth Corps) of over 1m. members, the Young China Party and the China Democratic Socialist Party.

The National Assembly was elected in 1947. In June 1985 it had 1,020 delegates. Government is conducted through 5 councils (Executive, Legislative, Judicial, Examination, and Control Yuan). The highest administrative organ is the Executive Yuan, headed by the premier, which includes a number of ministers. The highest legislative body is the Legislative Yuan, elected in 1948, which in July 1985 numbered 348 members. The National Assembly, Legislative Yuan and Control Yuan are elected bodies. Their terms of office have been extended indefinitely. As the number of original delegates dwindled, regulations introduced in 1966 and 1972 provided for the election of additional members to the National Assembly and Legislative Yuan, and elections were held in 1969, 1972, 1975, 1980 and 1984, the latter resulting in the election of 62 Kuomintang candidates and 9 independents to the Legislative Yuan. Opposition parties were forbidden to campaign. There is also a Provincial Assembly of which the current Eighth Assembly with 77 members was elected on 16 Nov. 1985. Electoral turn-out was 71%. 60 seats went to the Kuomintang. Further local government elections were held 1 Feb. 1986.

# **DEFENCE**

Army. The Army, which embodies the remnants of the forces which escaped to Taiwan with Chiang Kai-shek at the end of the civil war in 1949, numbered about 290,000 in 1986. It was reorganized, re-equipped and trained by the USA and in 1985 consisted of 12 heavy and 6 light infantry divisions, 6 armoured infantry and 3 airborne brigades, 4 tank groups, 20 field artillery and 5 SAU battalions. The aviation element has 80 UH-IH Iroquois and 3 Chinook helicopters, O-1 Bird Dog observation aircraft and Bell 47G trainer helicopters. There is a conscription system for 2 years and reserve liability. US supplies of military equipment were resumed in 1980 after a moratorium in 1979 US forces were withdrawn by 1 May 1979.

Navy. Most of the 260 vessels in naval service are former US Navy ships now well over 30 years old and overdue for replacement. There are 2 diesel powered patrol submarines, 26 destroyers, 10 frigates, 1 new corvette, 3 escort vessels, 53 fast missile craft, 13 coastal minesweepers, 1 coastal minelayer, 9 minesweeping boats, 28 coastal patrol craft, 2 dock landing ships, 1 amphibious flagship, 26 landing ships, 22 utility landing craft, 2 repair ships, 4 surveying ships, 12 support ships, 3 transports, 7 oilers, 1 supply ship, 17 tugs, 5 floating docks and 25 service craft. There are also 260 LCMs and 150 minor landing craft. Customs have 18 coast-guard cutters.

Active personnel in 1986 totalled 38,000 officers and ratings in the Navy and 39,000 officers and men in the Marine Corps There are 45,000 naval reservists and 35,000 marine reservists

The Navy has 18 anti-submarine torpedo helicopters and operational control of 2 squadrons of Air Force anti-submarine warfare Tracker aircraft, and the Marine Corps operates a number of observation aircraft and helicopters

Air Force. The Nationalist Air Force is equipped mainly with aircraft of US design, including F-5E fighters built in Taiwan. It has 11 front-line squadrons of F-5E/F Tiger IIs, 3 of F-104G Starfighters and 1 tactical reconnaissance squadron of RF-104G Starfighters There are 6 reserve fighter squadrons, 4 with F-5A/Bs and 2 with F-100 Super Sabres. The 6 transport squadrons are equipped with a VIP Boeing 720, 4 Boeing 727s, 5 C-54s, 20 C-47s, about 40 C-119Gs and 10 C-123 Providers. There is a naval co-operation squadron with S-2A/E Trackers and an ASW squadron with Hughes 500 MD helicopters. Search and rescue units operate Albatross amphibians and Iroquois helicopters, and there are other helicopter and large training elements, some equipped with AT-3 twin-jet trainers designed and built in Taiwan. Total strength in 1986: 77,000 personnel and 485 combat aircraft.

INTERNATIONAL RELATIONS. By a treaty of 1 Dec. 1954 the USA was pledged to protect Taiwan, but this treaty lapsed 1 year after the USA established diplomatic relations with the People's Republic of China on 1 Jan. 1979 In April 1979 the US Congress approved a law to maintain commercial, cultural and other relations between USA and Taiwan.

The People's Republic took over the China seat in the UN from the Nationalists on 25 Oct. 1971.

#### **ECONOMY**

Planning. There have been a series of development plans. The eighth (1986–89), aims at an annual growth rate of 6 5% (industry 6 1%, agriculture 1 3%).

**Budget.** There are 2 budgets, the national together with a special defence budget (partly secret) and the provincial (*i.e.*, for Taiwan proper). For the fiscal year July 1984—June 1985 tax revenue was NT\$578,151m.; expenditure, NT\$577.673m

Currency. The unit of currency is the New Taiwan dollar, divided into 100 cents, which is linked to the US\$. There are coins of NT\$ 1, 5 and 10 and notes of NT\$ 10, 50, 100, 500 and 1,000. There are no cent coins or notes. Exchange rates (March 1986), £1 = NT\$55 96; US\$1 = NT\$39 13.

Banking. The Central Bank of China (reactivated in 1961) regulates the money market, manages foreign exchange and issues currency.

The Bank of Taiwan is the largest commercial bank and the fiscal agent of the Government In addition, there are 17 domestic commercial banks and 30 local branches of foreign banks.

#### **ENERGY AND NATURAL RESOURCES**

Electricity. Output of electricity in 1984 was 49,286m. kwh., total generating capacity was 13m. kw There are 3 nuclear power-stations (capacities 1m., 1m. and 0 6m kw.) and a fourth is envisaged.

Minerals. There are reserves of coal (182m tonnes), gold (6m tonnes), copper (12m tonnes), sulphur (2 4m. tonnes), oil (1 5m kl.) and natural gas (18,490 cu metres) In 1984, coal production was 4 2m. tonnes; refined oil, 20,193,000 kl.; natural gas (1983), 1,237 1m. cu metres.

Agriculture. The cultivated area was 891,700 hectares in 1984, of which 496,900 hectares were paddy fields. Production in 1,000 tonnes, in 1984 Rice, 2,244; tea, 24, bananas, 203, pineapples, 124, sugar-cane, 6,545; sweet potatoes, 424, wheat, 24, soybeans, 95; peanuts, 87.

# República de Colombia

HISTORY. The Vice-royalty of New Granada gained its independence of Spain in 1819, and was officially constituted 17 Dec 1819, together with the present territories of Panama, Venezuela and Ecuador, as the state of 'Greater Colombia', which continued for about 12 years. It then split up into Venezuela, Ecuador and the republic of New Granada in 1830. The constitution of 22 May 1858 changed New Granada into a confederation of 8 states, under the name of Confederación Granadina. Under the constitution of 8 May 1863 the country was renamed 'Estados Unidos de Colombia', which were 9 in number. The revolution of 1885 led the National Council of Rogotá, composed of 2 delegates from each state, to promule National Council of Bogota, composed of 2 delegates from each state, to promulgate the constitution of 5 Aug 1886, forming the Republic of Colombia, which abolished the sovereignty of the states, converting them into departments, with governors appointed by the President of the Republic, though they retained some of their old rights, such as the management of their own finances

EVENTS. Eruptions by the volcano Nevado del Ruiz on 13 Nov. 1985 buried the town of Armero and engulfed 13 other towns and villages, 25,000 were missing or dead

Republique fédérale islamique des Comores

HISTORY. The 3 islands forming the present state became French protectorates at the end of the 19th century, and were proclaimed colonies on 25 July 1912. With neighbouring Mayotte they were administratively attached to Madagascar from 1914 until 1947, when the 4 islands became a French Overseas Territory, achieving internal self-government in Dec. 1961.

In referenda held on each island on 22 Dec. 1974, the 3 western islands voted overwhelmingly for independence, while Mayotte voted to remain French The Comoran Chamber of Deputies unilaterally declared the islands' independence on

6 July 1975, but Mayotte remained a French dependency

The first government of Ahmed Abdallah was overthrown on 3 Aug 1975 by a coup led by Ali Soilih (who assumed the Presidency on 2 Jan 1976), but Ahmed Abdallah regained the Presidency after a second coup ousted Ali Soilih in May 1978

AREA AND POPULATION. The Comoros consists of 3 islands in the Indian ocean between the African mainland and Madagascar. Population (estimate, 1985) 469,000

# République Populaire du Congo

HISTORY. First occupied by France in 1882, the Congo became (as 'Middle Congo') a territory of French Equatorial Africa from 1910–58, when it became a member state of the French Community. It became an independent Republic on 15 Aug. 1960.

The first President, Fulbert Youlou, was deposed on 15 Aug. 1963 by a coup led by Alphonse Massemba-Débat, who became President on 19 Dec. Following a second coup in Aug. 1968, the Army took power under the leadership of Major Marien Ngouabi, whose colleague, Major Alfred Raoul, was appointed President from 3 Sept. until 1 Jan. 1969, when Ngouabi himself became President

The country's present name was established on 3 Jan. 1970, when a Marxist-Leninist state was introduced. Ngouabi was assassinated on 18 March 1977, and succeeded by Col. Joachim Yhombi-Opango, who in turn was replaced on 5 Feb 1979 by Col. Denis Sassou-Nguesso.

AREA AND POPULATION. The Congo is bounded by Cameroon and the Central African Republic in the north, Zaïre to the east and south, the Cabinda province of Angola and the Atlantic to the south-west and Gabon to the west, and covers 342,000 sq. km; census population (1974), 1,300,120. Estimate (1985) 1-8m. The main towns (1980) are Brazzaville, the capital (422,402), Pointe-Noire, the main port and oil centre (185,105), N'Kayı (formerly Jacob) (32,520) and Loubomo (30,830). The areas, populations, and capitals of the Regions in 1980 were:

Region	Sq km	1980	Capital	Region	Sq km	1980	Capual
Kouilou	13,694	261,370	Pointe-	Fed	55	422,402	Brazzaville

In 1984, 45% spoke Kongo dialects, chiefly in the south and south-west; 20% were Teke (in the south-east); 15% Sanka and 16% Ubangi chiefly inhabit the north. There are also about 12,000 pygiiies and 12,000 Europeans (mainly French). French is the official language, but 2 local patois, Monokutuba (west of Brazzaville) and Lingala (north of Brazzaville), serve as linguas francas.

CLIMATE. An equatorial climate, with moderate rainfall and a small range of temperature. There is a long dry season from May to Oct in the S W. plateaux, but the Congo Basin in the N.E. is more humid, with rainfall approaching 100" (2,500 mm). Brazzaville. Jan. 78°F (25.6°C), July 73°F (22.8°C). Annual rainfall 59" (1,473 mm).

CONSTITUTION AND GOVERNMENT. In July 1979 a new Constitution was approved by referendum. Executive power was vested in the President, elected for a 5-year term by the National Congress of the *Parti congolais du travail* (the sole legal party since 1969). The President is assisted by a Council of Ministers, appointed and led by him. The PCT Congress elects a Central Committee of 75 members and a Political Bureau of 13 to administer it; it nominates all candidates for the 153-member People's National Assembly and for the regional, district and local councils, all of which were last elected on 11 Aug. 1984. In 1984 a constitu-

1983	18,507	72,953	9,432

The population of European descent, many of them of pure Spanish blood, dwell mostly around the capital of the republic, San José, and in the principal towns of the provinces. Limón, on the Caribbean coast, and Puntarenas, on the Pacific coast, are the chief commercial ports. The United Fruit Co., who in 1941 abandoned their banana plantations on the Atlantic coast in favour of large new plantations on the Pacific coast, have constructed ports at Quepos and Golfito. The Standard Fruit Co. and others have cleared land since 1958 in the Atlantic coast area and now have 2,325 acres producing some 4 2m. stems a year. There are some 15,000 West Indians, mostly in Limón province. The indigenous Indian population is dwindling and is now estimated at 1,200.

Spanish is the language of the country.

CLIMATE. The climate is tropical, with a small range of temperature and abundant rains. The dry season is from Dec. to April San José. Jan. 66°F (18 9°C), July 69°F (20.6°C). Annual rainfall 72" (1,793 mm).

CONSTITUTION AND GOVERNMENT. The Constitution, promulgated on 7 Dec. 1871, has been modified very frequently, last in 1949. The Constitution forbids the establishment or maintenance of an army. The legislative power is normally vested in a single chamber called the Legislative Assembly, which since 1962 consists of 57 deputies, 1 for every 25,214 inhabitants, elected for 4 years. The President is elected for 4 years; the candidate receiving the largest vote, provided it is over 40% of the total, is declared elected, but a second ballot is required if no candidate gets 40% of the total. Suffrage is universal, there being no exemption for reasons of economic status, race or sex. The vote is direct by secret ballot for all nationals of 18 years or over. Elections are normally held on the first Sunday in

February. Voting for President, Deputies and Municipal Councillors is secret and compulsory for all men under 70 years of age. Independent non-party candidates are barred from the ballot.

The Cabinet in March 1986 was composed as follows:

President. Oscar Arias Sánchez, elected 2 Feb. 1986.

Army. The Army was abolished in 1948, and replaced by a Civil Guard reputed to be 4,500 strong. There has never been compulsory military service or training

Navy. The flotilla includes 1 fast patrol craft and 1 armed tug on the Atlantic coast and 5 small coastguard cutters on the Pacific coast Personnel (1986) 100 officers and men.

Air Wing. The Civil Guard operates a small air wing equipped with 2 Aviocar transports, plus a few lightplanes and helicopters

# INTERNATIONAL RELATIONS

Membership. Costa Rıca ıs a member of UN and OAS.

### **ECONOMY**

**Budget.** The budget for 1980 balanced at 8,029m. colones. The income-tax law of 10 March 1972 raised the maximum rate to 50% for personal incomes of 350,000 colones and over, and to 40% for corporate incomes of 1 m. colones and over.

External government debt on 31 Dec. 1982 was US\$3,500m

Currency. The unit of currency is the *colone* ( $\mathbb{C}$ ). The official rate in March 1986 was  $\mathbb{C}53.95 = US$1$ ; 77.39 = £1. The official rate is used for all imports on an essential list and by the Government and autonomous institutions and a free rate is used for all other transactions.

The currency is chiefly notes. The Banco Central issue notes for 5, 10, 20, 50, 100, 500 and 1,000 colones. Silver coins of 1 colone, 50 centimos and 25 centimos were in 1935 replaced by coins (2 and 1 colones and 50 and 25 centimos) made up of 3 parts copper and 1 part nickel, and given the same value as the subsidiary silver currency. There are copper coins (and chromium stainless steel coins) of 10 and 5 centimos.

Banking. By a law passed on 28 Jan. 1950 a Central Bank was established for the organization and direction of the national monetary system and of dealings in

foreign exchange, the promotion of facilities for credit and the supervision of all banking operations in the country. The bank has a board of 7 directors appointed by the Government, including ex officio the Minister of Finance and the Planning Office Director

The National Insurance Institute (Instituto Nacional de Seguros) is a Government organization, created in 1924, which has a monopoly of new insurance business

Weights and Measures. The metric system is legally established, but in the country districts the following old Spanish weights and measures are found libra = 1 014 lb. avoirdupois, arroba = 25 35 lb avoirdupois; quintal = 101 40 lb avoirdupois, and fanega = 11 Imperial bushels

#### **ENERGY AND NATURAL RESOURCES**

Electricity. Electricity, derived from water power in the highlands, is increasingly used as motive power Output, 1984, was 2,700m kwh

Minerals Gold output is about 3,000 troy oz. per year Salt production from sea water is about 10,000 tonnes annually Haematite ore was discovered on the Nicoya Peninsula late in 1960 and sulphur near San Carlos in 1966 The United Nations have offered US\$1m. towards a 3-year mining survey

Agriculture. Agriculture is the principal industry. The cultivated area is about 1 m. acres; grass lands cover 1 8m acres; forests and woodlands, 9,855,000 acres There are thousands of square miles of public lands that have never been cleared on which can be found quantities of rosewood, cedar, mahogany and other cabinet woods. The principal agricultural products are coffee, bananas, sugar and cattle Coffee normally accounts for about half the country's foreign-exchange earnings. Cocoa, maize, sugar, tobacco, rice and potatoes are commonly cultivated. The distillation of spirits is a government monopoly.

Coffee production in 1984 was 124,000 tonnes. Sugar production (1984) 2,850,000 tonnes.

Dairy-farming and cattle-raising are substantial pursuits. In 1984 cattle numbered 2 55m. and pigs 223,000.

Costa Rica is the seat of the Inter-American Institute of Agricultural Sciences, with headquarters at Turrialba.

# INDUSTRY AND TRADE

**Industry.** The main manufactured goods are foodstuffs, textiles, fertilizers, pharmaceuticals, furniture, cement, tyres, canning, clothing, plastic goods, plywood and electrical equipment.

Industrial production was valued at 25.1m. colones in 1980, compared with 1 499m in 1972.

Labour. As Costa Rica is still essentially an agricultural country, the organization of labour has made progress only in the larger centres of population, and even there it is not a strong movement. There are two main trade unions, Rerum Novarum (anti-Communist) and Confederación General de Trabajadores Costarricenses (Communist).

Commerce. The value of imports into and exports from Costa Rica in 5 years was as follows in USS:

	1980	1981	1982	1983	1984
<b>Imports</b>	1,523,797,000	1,208,529,000	867,000,000		1,093,739,311

Tourism. There was a total of 371,582 visitors in 1982.

# **COMMUNICATIONS**

Roads. In 1981 there were about 28,525 km of all-weather motor roads open. On the Costa Rica section of the Inter-American Highway it is possible to motor to Panama during the dry season. The Pan-American Highway into Nicaragua is metalled for most of the way and there is now a good highway open almost to Puntarenas. Motor vehicles, 1980, numbered 195,105.

Railways. The nationalized railway system (Ferrocarriles de Costa Rica), totalling 700 km (260 km electrified) of 1,067 mm gauge, connect San José with Limón, the Atlantic port, and San José with Puntarenas, the Pacific port. Total railway traffic in 1984 was 1 m. tonnes of freight and 2 m. passengers

Aviation. Passenger movement in and out of Costa Rica is almost entirely by air via the local company, LACSA, PANAM and TACA. LACSA links San José by daily services with all the more important towns. The international airport at Juan Santamaría was opened in June 1955.

Shipping. In 1981, 1,221 ships entered and cleared the ports of the republic (Puerto Limón, Puntarenas and Golfito), combined cargo, 1,395 tonnes.

Post and Broadcasting. There were 281,042 telephones in 1983

The commercial wireless telegraph stations are operated by Cia Radiográfica Internacional de Costa Rica The stations are located at Cartago, Limón, Puntarenas, Quepos and Golfito. The Government has 19 wireless telegraph stations in its local network. The principal or central station at San José also maintains international radio-telegraph circuits to Nicaragua, Honduras, San Salvador and Mexico. The Government has 202 telegraph offices and 88 official telephone stations. The official list of broadcasting stations shows 28 long-wave stations and 7 short-wave stations. Television was inaugurated in May 1960; there were 6 stations and (estimate) 277,694 receivers in 1980.

Cinemas (1979). Cinemas numbered 106, with seating capacity of 105,000

Newspapers (1984). There were 4 daily newspapers all published in San José.

#### JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Justice is administered by the Supreme Court, 5 appeal courts divided into 5 chambers, the Court of Cassation, the Higher and Lower Criminal Courts, and the Higher and Lower Civil Courts. There are also subordinate courts in the separate provinces and local justices throughout the republic. Capital punishment may not be inflicted.

Religion. Roman Catholicism is the religion of the State, which contributes to its maintenance but controls the Church Patronage and insists on lay instruction in history, economics and similar subjects; there is entire religious liberty under the constitution, but religious appeals are forbidden in current political discussions. The Archbishop of Costa Rica has 4 bishops at Alajuela, Limón, San Isidro el General and Tilarán.

Protestants number about 40,000.

Education. Costa Rica has a very low illiteracy rate. Elementary instruction is compulsory and free; secondary education (since 1949) is also free. Elementary schools are provided and maintained by local school councils, while the national government pays the teachers, besides making subventions in aid of local funds. In 1982 there were 3,509 public primary schools with 11,615 teachers and administrative staff and 377,274 enrolled pupils; there were 242 public and private secondary

schools with 165,649 pupils. The University of Costa Rica, founded in San José in 1843, has 2,337 professors in 13 faculties and 38,629 students. A medical school was opened in 1961. The budget for 1971 provides C250m for public education. Since 1944 English has been taught in all secondary schools.

Social Welfare. The labour code of 1943 provides considerable protection for the workers, while a system of social insurance against sickness covering 756,347 workers in 1968, old age and death covering 68,949 is gradually being extended throughout the country.

# República de Cuba

HISTORY. Cuba, except for the brief British occupancy in 1762-63, remained a Spanish possession from its discovery by Columbus in 1492 until 10 Dec. 1898, when the sovereignty was relinquished under the terms of the Treaty of Paris, which ended the struggle of the Cubans against Spanish rule. Cuba thus became an independent republic, but the United States stipulated under the 'Platt Amendment' (abrogated by Roosevelt in 1934) that Cuba must enter into no treaty relations with a foreign power, which might endanger its independence. A convention which assembled on 5 Nov 1900 adopted the first constitution of the republic on 21 Feb. 1901.

The revolutionary movement against the Batista dictatorship, led by Dr Fidel Castro, started on 26 July 1953 (now a national holiday). It achieved power on 1 Jan 1959 when Batista fled the country

An invasion force of émigrés and adventurers landed in Cuba on 17 April 1961, the main body was defeated at the Bay of Pigs (Mantanzas province) and mopped up by 20 April

The US Navy blockaded Cuba from 22 Oct. to 22 Nov. 1962.

AREA AND POPULATION. The island of Cuba forms the largest and most westerly of the Greater Antilles group and lies 135 miles south of the tip of Florida, USA It has an area of 44,206 sq. miles (114,524 sq. km); the Isle of Youth (formerly Isle of Pines) has 1,180 sq. miles, and other islands about 1,350 sq. miles Estimated population in 1984 was 10m.

The area, population and density of population of the 14 provinces and the special Municipality of the Isle of Youth were as follows (1982 estimate).

	Area.			4rea

CLIMATE. Situated in the sub-tropical zone, Cuba has a generally rainy climate, affected by the Gulf Stream and the N E. Trades, though winters are comparatively dry after the heaviest rains in Sept and Oct Hurricanes are liable to occur between June and Nov. Havana. Jan. 72°F (22 2°C), July 82°F (27 8°C). Annual rainfall 48" (1,224 mm).

CONSTITUTION AND GOVERNMENT. The previous Constitution was suspended in Jan 1959. The first socialist Constitution came into force on 24 Feb 1976.

Since the last representative in Cuba of the King of Spain, Gen Don Adolfo Jiménez Castellanos, handed over the island on 1 Jan. 1899 the following have been at the head of the administration:

President Dr Fidel Castro Ruz became President of the Council of State on 3 Dec. 1976 He is also President of the Council of Ministers, First Secretary of the Cuban Communist Party and C.-in-C of the Revolutionary Armed Forces.

Dr Castro on 2 Dec. 1961 proclaimed 'a Marxist-Leninist programme adapted to the precise objective conditions existing in our country'. The provisional Organizaciones Revolucionarias Integradas (ORI) were established as an intermediate stage towards a single (communist) party, and gave way to the Partido Unido de la Revolución Socialista (PURS) This brought together the Partido Socialista Popular, Movimiento de 26 Julio and (Students') Directorio Revolucionario The PURS in turn became (3 Oct 1965) the Partido Comunista de Cuba. The Communist Party had been outlawed by Batista in 1954, but legally reinstated after the revolution.

National flag 3 blue, 2 white stripes (horizontal), a white 5-pointed star in a red triangle at the hoist.

National anthem. Al combate corred bayameses (words and tune by P Figueredo, 1868).

Local Government The country is divided into 14 provinces the special Municipality (the Isle of Youth) and 169 municipalities. Local Government is the responsibility of the organizations of Peoples' Power Elections were held in 1976, 1979, 1981 and 1984 for delegates to the Provincial and Municipal Assemblies and in 1976 and 1981 to the National Assembly.

**DEFENCE.** On 13 Nov 1963 conscription was introduced for all men between the ages of 16 and 45, later raised to 50 (3 years); women of the 17–35 age groups may volunteer (for 2 years)

Army. The strength was 130,000 officers and men (80,000 conscripts) in 1986. Reserves are estimated at 135,000.

The Army is organized in 15 infantry brigades, 3 armoured brigades and 8 independent battalions. Equipment includes 350 T-34, 250 T-54/-55, 60 T-62 and a few T-72 tanks. Para-military forces total 15,000 and the new Territorial Militia, 1 2m. including reservists, all armed.

Navy. The expanding Navy consists of 4 ex-Soviet diesel-powered submarines (of which 1 is in static reserve), 2 ex-Soviet guided missile-armed frigates, 23 missile boats, 9 hydrofoil attack craft, 6 patrol vessels, 13 torpedo boats, 27 fast gunboats, 3 minehunters, 12 inshore minesweepers, 12 motor launches, 14 coastguard vessels, 13 survey vessels, 2 landing ships, 6 landing craft and 15 service craft. The large majority of over 160 craft are former units of the Soviet Navy. Personnel in 1986 exceeded 12,000 including marines, maritime air and coastguard. The USA is still in possession of the Guantanámo naval base, but the Cuban Government refuses to accept the nominal rent of US\$5,000 per annum.

Air Force. The Air Force has been extensively re-equipped with aircraft supplied by USSR and in 1986 had a strength of some 16,000 officers and men and 250 combat aircraft. About 16 interceptor and 4 ground-attack squadrons fly MiG-23,

MiG-21 and MiG-17 jet fighters. There is a squadron of An-26 twin-turboprop transports, some An-24 twin-turboprop transports, piston-engined II-14s, and about 100 Mi-24 gunship, Mi-8 (some armed), Mi-17 and Mi-4 helicopters, Zlin 326 piston-engined trainers and L-39s, MiG-15UTI, MiG-21U and MiG-23U jet trainers. Many An-2M biplanes are operated by the Air Force, mainly on agricultural and liaison duties. Soviet-built surface-to-air ('Guideline', 'Goa' and 'Gainful') and coastal defence ('Samlet') missiles are in service.

## INTERNATIONAL RELATIONS

Membership. Cuba is a member of the UN, Sela and Comecon.

#### **ECONOMY**

**Planning.** The Cuban economy is now centrally planned. Since July 1972 Cuba has been a member of the Council for Mutual Economic Assistance (COMECON) and, since Jan. 1974, of the two COMECON international banks

Budget. Revenue in 1985 was 11,311 2m pesos and expenditure, 11,060.9m

**Currency.** The peso is not a freely exchangeable currency but an official exchange rate is announced monthly reflecting any changes in the strength of the US\$. In March 1986, the sterling-peso rate was £1 = 1 260 pesos. The old gold pesos and all US currency are no longer legal tender US currency is accepted in tourist/hotel shops, but is not normally legal tender

Copper-nickel coins of 1 peso and 40, 20, 5 and 1 cent are issued Notes are for

100, 50, 20, 10, 5, 3 and 1 peso.

**Banking.** On 23 Dec. 1948 the president signed the law creating a central bank (with capital of US\$10m.) and which began operating 27 April 1950

On 14 Oct. 1960 all banks were nationalized, except the Royal Bank of Canada and the Bank of Nova Scotia, which were bought out later All banking is now carried out by the National Bank of Cuba through its 250 agencies

All insurance business was nationalized in Jan. 1964. A National Savings Bank was established in 1983.

Weights and Measures. The metric system of weights and measures is legally compulsory, but the American and old Spanish systems are much used The sugar industry uses the Spanish long ton (1 03 tonnes) and short ton (0 92 tonne) Cuba sugar sack = 329 59 lb. or 149.49 kg Land is measured in caballerias (of 13 4 hectares or 33 acres).

### **ENERGY AND NATURAL RESOURCES**

Electricity. Production in 1984 was 12,292m. kwh

Minerals. Iron ore abounds, with deposits estimated at 3,500m, tons, of which 90% were held as reserves by American steel interests but are now controlled by the Cuban Mining Institute, output (tonnes), wrought iron (1980), 1,180, steel (1984), 338,200.

Output of copper (1982) was 1,465 tonnes, refractory chrome (1982), 27,300 tonnes. Other minerals are nickel and cobalt (1984, 33,200 tonnes), silica and barytes. Gold and silver are also worked. Cuba has a small output of petroleum (1983: 7.4m. tonnes). Salt output from the solar evaporation of sea water was \$1,400 tonnes in 1984.

Agriculture. In May 1959 all land over 30 caballerias was nationalized and has since been turned into state farms. In Oct. 1963 private holdings were reduced to a maximum of 5 caballerias (approximately 67 hectares). By 1960, 764 co-operative farms had been formed, and by late 1966 almost 65% of farm land was state-owned: the balance being in private hands.

In Sept. 1982 there were 1,402 co-operatives comprising 47,357 caballerias of land. The total cultivated land included state-owned, 3,398,200 hectares, and

in the private sector, 475,400 hectares.

The most important product is sugar, of which Cuba is the world's second largest producer; with its by-products it furnishes nearly 80% by value of the national exports. The 1983-84 crop was estimated at 8 2m tonnes. There are 152 mills, including 40 of the largest, which were taken over from US interests, and which represent 39% of total capacity. Tobacco, coffee, cotton, maize, rice and potatoes are grown.

Production of other important crops in 1984 was (in tonnes) Tobacco, 40,100, rice (1984), 240,900; maize (1983), 21,561, coffee (1983), 28,684

Tobacco is grown mainly in the Vuelta-Abajo district, near Pinar del Río Coffee is grown chiefly in the province of Oriente

A fast-growing fibre, kenaf, originally from India, soft in texture, is replacing jute for sacking (production, 1982, 15,773 tonnes); the tobacco industry uses majagua, another local fibre, while a third fibre, yarey, from palms is also used. 206,700 tonnes of potatoes were produced in 1983. A nitrate plant has been built at Nuevitas and a large British-built urea plant at Cienfuegos. The principal fruits exported are pineapples, citrus fruit, tomatoes and pimentos. A rice cultivation plan began in 1967 in the south of Havana province. Cultivation is highly mechanized and the area so far sown produces two crops a year.

In 1984 citrus fruit production was 502,800 tonnes.

Cotton production, 1982, was 3,000 tons against 13,000 tons in 1962

In 1984 the livestock included 2 3m pigs, 759,000 horses, 478,000 sheep and goats, 6 4m head of cattle

Forestry. Cuba has extensive forest lands These forests contain valuable cabinet woods, such as mahogany and cedar, besides dye-woods, fibres, gums, resins and oils Cedar is used locally for cigar-boxes, and mahogany is exported. During the re-forestation campaign of 1959–60, 34,000 eucalyptus saplings were planted over 1,120 caballerias Cedars, mahogany, majagua, teca, etc., are also being raised and planted out. In 1983 saplings planted included Eucalyptus, 12 9m., pine, 36 9m., majagua, 5 5m.; mahogany, 2 1m., cedar, 2 1m., casuarina, 15 5m.

Fisheries. Fishing is the third most important export industry, after sugar and nickel Catch (1981) 150,000 tonnes

# INDUSTRY AND TRADE

Industry. Production in 1984 was. Textiles, 173 8m sq metres; cement, 3 3m tonnes, wheat flour, 423,000 tonnes, fuel oil (1982), 3,298,100 tonnes; diesel oil (1982), 1,126,600 tonnes, 449,100 tyres, 373,100 inner tubes, leather shoes, 12 5m. pairs, paint (1982), 68,988 hectolitres, soft drinks, 2,051,200 hectolitres, 359m cigars, 18,697,400m cigarettes, fertilizers, 1,036,200 tonnes

**Trade Unions.** All workers have a right to join a trade union. The Workers' Central Union of Cuba, to which 23 unions are affiliated, had 2m members in 1978

Commerce. Imports and exports (including bullion and specie) for calendar years (in 1 m pesos).

•	1980	1981	1982	1983
Imports	4,059	5,081	5,537	6,224
Exports	3.967	4.259	4.939	5.537

Cuba's principal exports are sugar, minerals, tobacco and fish, which in 1974 were planned to furnish 86%, 6 4%, 2 7% and 2 3% respectively by value The main imports from non-Communist countries are chemicals and engineering and electrical machinery and transport equipment

Sugar accounts for approximately 80% of the exports. In 1983 over 1,600,000 tons were sold in free world markets, the balance going mainly to Eastern Europe under long-term guaranteed price contracts. Tobacco, fish and nickel are the other major exports. Most trade is with Eastern Europe, particularly with the USSR which supplies approximately 70% of total Cuban imports.

Total trade between Cuba and UK (British Department of Trade returns, in £1,000 sterling):

	1981	1982	1983	1984	1985
Imports to UK	16,829	17,688	14,010	13,020	7,273
Exports and re-exports from UK	27,656	64,835	45,737	64,377	59,332

**Tourism.** In 1982 there were 200,000 visitors (280,000 in 1957).

# COMMUNICATIONS

Roads. In 1982 there were 11,746 km of paved highways open to traffic, traversing the island for 760 miles from Pinar del Rio to Santiago In 1983 there were 49,841 hire cars (including coaches and buses)

Railways. There were (1984) 4,909 km of public railway (mainly 1,435 mm gauge) of which 151 km is electrified. In 1984 it carried 67 4m passengers and 16 5m tonnes of freight. In addition, the large sugar estates have 9,638 km of lines on 1,435, 914 and 760 mm gauges

Aviation. The state airline CUBANA operates all internal services, and from Havana to Mexico City, Madrid, Berlin, Montreal, Prague, and also to Lima, Panama, Kingston, Bridgetown, Port of Spain, Georgetown The other regular foreign services are Mexican, Spanish, Soviet, Czech, East German and Canadian.

Shipping. The coastline is over 3,500 miles long and has many fine harbours. The merchant marine, in 1984, consisted of 107 sea-going vessels of 1,071,500 DWT

Post and Broadcasting. There are 3,545 miles of public and 8,902 miles of private telegraph wires. Cuba has 103 broadcasting stations and 2 television stations Radio receiving sets, 1974, numbered 909,000, television sets, 300,000 The national telephone system (1984) had 430,000 instruments.

Cinemas. In 1983 there were 520 (35mm) and 843 (16mm) cinemas

Newspapers. In 1983 there were 29 newspapers of which 16 were daily newspapers

# JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. There is a Supreme Court in Havana and 7 regional courts of appeal The provinces are divided into judicial districts, with courts for civil and criminal actions, with municipal courts for minor offences. The civil code guarantees aliens the same property and personal rights as are enjoyed by nationals.

The 1959 Agrarian Reform Law and the Urban Reform Law passed on 14 Oct 1960 have placed certain restrictions on both. Revolutionary Summary Tribunals have wide powers.

Religion. There is no state Church, though Roman Catholics predominate There is a bishop of the American Episcopal Church in Havana; there are congregations of Methodists in Havana and in the provinces. Protestants numbered 265,000 in 1962; they have been organized as the Cuban Council of Evangelical Churches.

Education. Education is compulsory (between the ages of 6 and 14) and free, and now available everywhere. In 1964 illiteracy was officially declared to have been completely eliminated.

In 1982–83 the universities had 173,403 students and 12,222 teaching staff. There were 1,363,078 pupils and 71,251 teachers at primary schools, 118,072 at pre-primary, 774,400 pupils at intermediate schools; 173,403 students at higher schools; 392,945 students at adult primary and intermediate schools, and 56,721 students at other schools.

The Camilo Cienfuegos school city in the Sierra Maestra was designed for 12,000 boys and 8,000 girls by 1970 (1965: 4,000, total). In 1974 the V. I. Lenin vocational school opened as a forerunner of 6 such schools.

Health. There were (1983) 18,828 doctors, 4,380 dentists and (1984) 270 hospitals. The 1984 health and education budget was 2,405m persons.

Free medical services are provided by the state polyclinics, though some doctors still have private practices. All serious tropical diseases are effectively kept under control, and virtually all children under the age of 15 have been vaccinated against poliomyelitis.

# Kypriaki Dimokratia— Kibris Cumhuriyeti

**HISTORY.** About the middle of the 2nd millennium B.C. Greek colonies were established in Cyprus and later it formed part of the Persian, Roman and Byzantine empires In 1193 it became a Frankish kingdom, in 1489 a Venetian dependency and in 1571 was conquered by the Turks They retained possession of it until its cession to England for administrative purposes under a convention concluded with the Sultan at Constantinople, 4 June 1878. On 5 Nov 1914 the island was annexed by Great Britain and on 1 May 1925 given the status of a Crown Colony.

For the history of Cyprus from 1931 to 1974 see The Statesman's Year-Book, 1958, pp. 237–38, 1959, p. 236, and 1983–84, p 385.

On 15 July 1974 a coup was staged in Cyprus by the men of the Greek ruling junta, for the overthrow of President Makarios. The President left the island and the coup was short-lived. On 23 July power was handed over to the President of the House of Representatives, Glascos Clerides, in accordance with the Constitution He acted as President until the return of President Makarios on Dec. 7

Turkey invaded the island on 20 July, eventually landing 40,000 troops supported with heavy armament and tanks. In two military operations 20-30 July and 14-16 Aug. the Turkish troops managed to occupy 40% of the northern part of Cyprus. As a result 200,000 Greek Cypriots fled to live as refugees in the south The Cyprus crisis was raised in the UN and the General Assembly unanimously adopted resolutions calling for the withdrawal of all foreign troops from Cyprus and the return of refugees to their homes, but without result

On 13 Feb. 1975 at a special meeting of the executive council and legislative assembly of the Autonomous Turkish Cypriot Administration a Turkish Cypriot Federated State was proclaimed. Rauf Denktash was appointed President and he declared that the state would not seek international recognition. The proclamation was denounced by President Makarios and the Greek Prime Minister but welcomed by the Turkish Prime Minister. In 1984 the UN Secretary-General initiated talks on a possible federal state but these failed in Jan. 1985.

AREA AND POPULATION. The island lies in the eastern Mediterranean, about 50 miles off the south coast of Turkey and (at the nearest points) 65 miles off the coast of Syria Area 3,572 sq miles (9,251 sq. km), about 150 miles is greatest length from east to west, and about 60 miles is greatest breadth from north to south. The Turkish occupied area is 3,400 sq km (about 37% of the total area) Populations by religions

Justice. The administration of justice is exercised by separate and independent judiciary Under the 1960 Constitution and other legislation in force there are the Supreme Court of the Republic, Assize Courts, District Courts, Ecclesiastical Courts and Turkish Family Courts.

The Supreme Court is composed of 5-7 judges one of whom is the President of the Court. There is an Assize Court and a District Court for each district. The Assize Courts have unlimited criminal jurisdiction and may order the payment of compensation up to £C800. The District Courts exercise original civil and criminal jurisdiction, the extent of which varies with the composition of the Bench.

There is a Supreme Council of Judicature, consisting of the Attorney-General of the Republic, the President and Judges of the Supreme Court, entrusted with the appointment, promotion, transfers, termination of appointment and disciplinary control over all judicial officers, other than the Judges of the Supreme Court

Religion. See Area and Population, p. 390.

Education. Until 31 March 1965 each community in Cyprus managed its own schooling through its respective Communal Chamber. Intercommunal education had been placed under the Minister of the Interior, assisted by a Board of Education for Intercommunal Schools, of which the Minister was the Chairman In 1965 the Greek Communal Chamber was dissolved and a Ministry of Education was established to take its place Intercommunal education has been placed under this Ministry.

Greek-Cypriot Education Elementary education is compulsory and is provided free in 6 grades to children between 5½ and 12 years of age. In some towns and large villages there are separate junior schools consisting of the first three grades Apart from schools for the deaf and blind and the Lambousa School for juvenile offenders, there are also 7 schools for handicapped children. In 1983–84 the Ministry ran 183 kindergartens for children from low-income families, there were 150 privately run pre-primary schools There were 413 primary schools with 46,653 pupils and 2,221 teachers in 1983–84

Československá Socialistická Republika

HISTORY. The Czechoslovak State came into existence on 28 Oct 1918, when the Czech Národní Výbor (National Committee) took over the government of the Czech lands upon the dissolution of Austria-Hungary Two days later the Slovak National Council manifested its desire to unite politically with the Czechs On 14 Nov 1918 the first Czechoslovak National Assembly declared the Czechoslovak State to be a republic with T G Masaryk as President (1918–35)

State to be a republic with T G Masaryk as President (1918–35)

The Treaty of St Germain-en-Laye (1919) recognized the Czechoslovak Republic, consisting of the Czech lands (Bohemia, Moravia, part of Silesia) and Slovakia To these lands were added as a trust the autonomous province of Subcarpathian

Ruthenia

This territory was broken up for the benefit of Germany, Poland and Hungary by the Munich agreement (29 Sept. 1938) between UK, France, Germany and Italy

In March 1939 the German-sponsored Slovak government proclaimed Slovakia independent, and Germany incorporated the Czech lands into the Reich as the 'Protectorate of Bohemia and Moravia' A government-in-exile, headed by Dr Beneš, was set up in London in July 1940.

Liberation by the Soviet Army and US Forces was completed by May 1945.

Territories taken by Germans, Poles and Hungarians were restored to Czechoslovak sovereignty Subcarpathian Ruthenia was transferred to the USSR

Elections were held in May 1946, at which the Communist Party obtained about 38% of the votes

A coalition government under a Communist Prime Minister, Klement Gottwald, remained in power until 20 Feb 1948, when 12 of the non-Communist ministers resigned in protest against infiltration of Communists into the police.

In Feb a predominantly Communist government was formed by Gottwald In May elections resulted in an 89% majority for the government and President Beneš

esigned.

In the first months of 1968 mounting pressure for liberalization culminated in the overthrow of the Stalinist President and Party Secretary, Antonín Novotný, and his associates Under a new leadership the Communist Party introduced in April 1968 an 'Action Programme' of far-reaching political and economic reforms.

Soviet pressure to abandon this programme was exerted between May and Aug 1968, and finally, Warsaw Pact forces occupied Czechoslovakia on 21 Aug. The enforced Moscow agreement of 26 Aug. bound the Czechoslovak government to a policy of 'normalization' (*i e*, abandonment of most reforms) and to the stationing of Soviet forces on Czechoslovak soil. This situation was confirmed by the Czechoslovak-Soviet 'Status of Forces Agreement' of 16 Oct. In 1969–1970 Soviet pressure led to extensive changes in the Party and Government. In Oct 1969 Czechoslovakia repudiated its condemnation of the Warsaw Pact invasion.

A Czechoslovak-Soviet 20-year Treaty of Friendship, Co-operation and Mutual Assistance was signed in May 1970. Since 1977 a dissident civil rights movement

'Charter 77' has been active despite official efforts to supress it.

On 11 Dec. 1973 the German Federal Republic and Czechoslovakia signed a treaty normalizing relations and annulling the Munich agreement of 1938 This was ratified by both countries' parliaments in July 1974.

CONSTITUTION AND GOVERNMENT. For details of previous constitutions, see The Statesman's Year-Book, 1968-69, pp 927-28.

Since I Jan. 1969 Czechoslovakia has been a federal socialist republic consisting of two nations of equal rights: the Czech Socialist Republic (the Czech lands, previously Bohemia, Moravia and part of Silesia), and the Slovak Socialist Republic (Slovakia). Each Republic is governed by a National Council (the Czech with 200 deputies, the Slovak with 150), which delegates to an overall Federal Assembly responsibility for constitutional and foreign affairs, defence and important economic decisions. The Federal Assembly consists of the Chamber of Nations, which has 75 Czech and 75 Slovak delegates elected by their respective National Councils, and the Chamber of the People, which has 200 deputies elected by national suffrage.

The previous constitution (1960) remains in force as amended by Constitutional Acts 143 and 144 of 1968. Since 1971 deputies are elected for a 5-year term so as to coincide with Communist Party congresses. Minimum age of voters is 18, of deputies, 21 years. At the elections of 5-6 June 1981 a single list of National Front candidates was presented. Turnout was 10,736,312 from an electorate of 10,789,574 (99 5%), 99.96% of the votes were cast for the official candidates.

President of the Republic Gustáv Husák (born 1913), President of the Federal

Assembly Alois Indra

The de facto primary source of power is the Communist Party of Czechoslova-kia, of which the Communist Party of Slovakia (First Secretary Jozef Lenárt) is a constituent part Communists head the National Front, which incorporates the remaining political parties (Czechoslovak Socialist Party, Czechoslovak People's Party, Slovak Reconstruction Party, Slovak Freedom Party) and the trade unions and youth organizations The Communist Party had 1,584,011 members and 123,000 candidate members on 1 Oct 1982. In March 1986 the Presidium consisted of Gustáv Husák (General Secretary); Vasil Bil'ak, Peter Colotka (Deputy Prime Minister), Karel Hoffmann (Chairman, Central Council of Trade Unions), Alois Indra, Miloš Jakeš, Antonín Kapek, Josef Kempný, Josef Korčák (Deputy Prime Minister), Jozef Lenárt, Lubomír Štrougal (Prime Minister) Candidate members Jan Fojtík, Josef Hamán, Miloslav Hruškovič.

In March 1986 members of the government not mentioned above included (Deputy Prime Ministers) Ladislav Gerle, Karol Laco, Matej Lúčan, Jaromír Obzina, Svatopluk Potáč (Chairman, State Planning Commission), Rudolf Rohlíček, (other ministers) Bohumil Urban (Foreign Trade); Milan Vaclavik (Defence), František Ondřich (Chairman, Czechoslovak Control Commission), Bohuslav Chňoupek (Foreign), Jaromír Žák (Finance), Miloslav Boda (Labour and Social Welfare), Vratislav Vajnar (Interior), Vlastimir Ehrenberger (Fuel and Power).

The Czech Prime Minister is Josef Korčák, the Slovak, Peter Colotka.

Local government is carried on by National Committees consisting of deputies elected for 5-year terms. There are 10 regional Committees, 2 City Committees with the same status for Prague and Bratislava, 108 district Committees and 7,979 town and community Committees. Elections were held in 1981.

CLIMATE. The climate is much modified by marine influences, and the effect of the Gulf Stream, to give winters that are cold and cloudy but warm and sunny summers In general, the east is direr than the west, though few places have more than 27" (675 mm) of rain a year. Long periods of calm weather are exceptional and windy conditions are common. Copenhagen. Jan. 33°F (0.5°C), July 63°F

REIGNING QUEEN. Margrethe II, born 16 April 1940, married 10 June 1967 to Prince Henrik, born Count de Monpezat; offspring Crown Prince Frederik, born 26 May 1968; Prince Joachim, born 7 June 1969. She succeeded to the throne on the death of her father, King Frederik IX, on 14 Jan. 1972

Mother of the Queen Queen Ingrid, born Princess of Sweden, 28 March 1910. Sisters of the Queen. Princess Benedikte, born 29 April 1944 (married 3 Feb. 1968 to Prince Richard of Sayn-Wittgenstein-Berleburg); Princess Anne-Marie, born 30 Aug. 1946 (married 18 Sept. 1964 to King Constantine of Greece).

The crown of Denmark was elective from the earliest times. In 1448 after the death of the last male descendant of Swein Estridsen the Danish Diet elected to the throne Christian I, Count of Oldenburg, in whose family the royal dignity remained for more than 4 centuries, although the crown was not rendered hereditary by right till 1660. The direct male line of the house of Oldenburg became extinct with King Frederik VII on 15 Nov. 1863. In view of the death of the king, without direct heirs, the Great Powers signed a treaty at London on 8 May 1852, by the terms of which the succession to the crown of Denmark was made over to Prince Christian of Schleswig-Holstein-Sonderburg-Glucksburg, and to the direct male descendants of his union with the Princess Louise of Hesse-Cassel, niece of King Christian VIII of Denmark. In accordance with this treaty, a law concerning the succession to the Danish crown was adopted by the Diet, and obtained the royal sanction 31 July 1853 Linked to the constitution of 5 June 1953, a new law of succession, dated 27 March 1953, has come into force, which restricts the right of succession to the descendants of King Christian X and Queen Alexandrine, and admits the sovereign's daughters to the line of succession, ranking after the sovereign's sons.

Subjoined is a list of the kings of Denmark, with the dates of their accession, from the time of election of Christian I of Oldenburg

CONSTITUTION AND GOVERNMENT. The present constitution of Denmark is founded upon the 'Grundlov' (charter) of 5 June 1953.

The legislative power lies with the Queen and the Folketing (Diet) jointly. The executive power is vested in the Queen, who exercises her authority through the ministers. The judicial power is with the courts. The Queen must be a member of the Evangelical-Lutheran Church, the official Church of the State. The Queen cannot assume major international obligations without the consent of the Folketing. The Folketing consists of one chamber. All men and women of Danish nationality of more than 18 years of age and permanently resident in Denmark possess the franchise and are eligible for election to the Folketing, which is at present composed of 179 members; 135 members are elected by the method of proportional representation in 17 constituencies. In order to attain an equal representation of the different parties, 40 tillægsmandater (additional seats) are divided among such parties which have not obtained sufficient returns at the constituency elections. Two members are elected for the Faroe Islands and 2 for Greenland. The term of the legislature is 4 years, but a general election may be called at any time.

The Folketing must meet every year on the first Tuesday in October. Besides its legislative functions, it appoints every 6 years judges who, together with the ordi-

nary members of the Supreme Court ( $H_{\emptyset}$ ), form the  $R_{igsret}$ , a tribunal which can alone try parliamentary impeachments. The ministers have free access to the House, but can vote only if they are members

Folketing, elected 10 Jan. 1984 56 Social Democrats, 10 Radical Liberals, 42 Conservatives, 21 Socialist People's Party, 8 Centre Democrats, 5 Christian People's Party, 22 Liberals, 5 Left Socialists, 6 Progress Party, 2 Faroe Islands and 2 Greenland representatives.

The executive (callèd the State Council (Statsraudet) when acting with the Queen presiding) is a minority non-Socialist coalition government, consisting of the Conservatives, the Liberals, the Centre Democrats and the Christian People's Party; it was in March 1984 as follows

Prime Minister Poul Schluter

Foreign Affairs Uffe Ellemann-Jensen Finance Palle Simonsen Economy Anders Andersen Industry Ib Stetter Greenland Tom Høyem Social Affairs Elsebeth Kock-Petersen Agriculture Niels Anker Kosoed. Fisheries Henning Grove Education Bertel Haarder Culture Mimi Stilling Jakobsen Desence Hans Engell Labour Grethe Fenger Møller Housing Niels Bollman Inland Revenue Isi Foighel Energy Knud Enggaard Interior Britta Schall Holberg Justice Erik Ninn-Hansen. Environment and Nordic Affairs Christian Christensen Public Works Arne Melchior Ecclesiastical Affairs Mette Madsen

The ministers are individually and collectively responsible for their acts, and if impeached and found guilty, cannot be pardoned without the consent of the Folketing

In 1948 a separate legislature (Lagting) and executive (Landsstyre) were established for the Faroe Islands, to deal with specified local matters and in 1979 a separate legislature (Landsting) and executive (Landsstyre) were established for Greenland also to deal with specified local matters

National flag Red with white Scandinavian cross (Dannebrog)

Local Government For administrative purposes Denmark is divided into 275 municipalities (kommuner), each of them has a district council of between 5 and 25 members, headed by an elected mayor. The city of Copenhagen forms a district by itself and is governed by a city council of 55 members, elected every 4 years, and an executive (magistraten), consisting of the chief burgomaster (overborgmesteren) and 6 burgomasters, appointed by the city council for 4 years. There are 14 counties (amtskommuner), each of which is administered by a county council (amstråd) of between 13 and 31 members, headed by an elected mayor. All councils are elected directly by universal suffrage and proportional representation for 4-year terms. A third council, the Metropolitan Council, with a constitution similar to the counties was established 1 April 1974. The Metropolitan Council is responsible for overall development within Metropolitan Copenhagen.

The counties and Copenhagen are superintended by the Ministry of Interior Affairs. The municipalities are superintended by 14 local supervision committees, headed by a state county prefect (statsamtmand) who is a civil servant appointed by the Queen.

DEFENCE. The Danish military defence is organized in accordance with the Defence Act of May 1982 and the overall organization of the Danish Armed Forces comprises the Defence Command, the Army, the Navy, the Air Force and interservice authorities and institutions. To this should be added the Home Guard, which is an indispensable part of Danish military defence. The Home Guard is based on the Home Guard Act of May 1982.

In accordance with the Defence Act the Chief of Defence has full command of the three services, the Army, the Navy and the Air Force. The Chief of Defence, and the Defence Staff constitute the Defence Command. The Inspector Generals of the Army, the Navy and the Air Force are members of the Defence Staff

The Minister of Defence is assisted by a Defence Council consisting of the Chief of Defence, the Chief of Defence Staff, the Chief of Danish Operational Forces, the Inspector Generals of the Army, the Navy and the Air Force and the Chief of the Home Guard.

The Constitution of 1849 declared it the duty of every fit man to contribute to the national defence, and this provision is still in force. According to the Personnel Act of May 1982, the military personnel comprises officers, n.c o.s and privates. Private personnel are provided by enlistment and by recruiting of volunteers Selection of conscripts takes place at the age of 18–19 years, and the conscripts are normally called up for 9 months service ½-1½ years later Afterwards conscripts may be recalled for refresher training or musters From 1986 the initial training period for conscripts in combat and engineer units will be 12 months.

Army. The Army comprises field army formations and the local defence forces The field army formations are organized in a covering force and in reserve units (comprising 6 regimental formations and some independent battalions). The covering force numbers about 14,000 men and comprises a standing force (regulars and conscripts with more than six months' service), and a supplementary force consisting of men newly released from service. The standing force number about 7,000 men organized in standing brigade units, headquarters units and support units. The brigade units are organized in 5 mechanized infantry brigades. The field army is equipped with 200 medium battle tanks and about 650 armoured personnel carriers as well as artillery including 72 self-propelled howitzers. The Army has 14 Hughes 500 helicopters and 8 Supporter aircraft for observation and liaison. The local defence units consist of about 18,000 men organized in 9 infantry battalions and some artillery battalions. The men of the latest annual service groups form the troops of the line, while those of the previous years form the local defence, the reserve and the reserve for the Home Guard The mobilization units of the field army and the local defence force will total about 58,000 men.

Navy. The Navy comprises the fleet and coast-defence which includes several permanent fortifications. The fleet includes 4 submarines, 2 frigates, 3 small frigates, 5 ocean escorts (for fishery protection and surveying duties), 10 fast missile craft, 6 fast torpedo boats, 4 ocean minelayers, 3 coastal minelayers, 3 coastal minesweepers, 3 torpedo recovery vessels, 22 patrol vessels, 8 coastal patrol launches, 2 oilers, 20 auxiliary vessels and the royal yacht. The Naval Air Arm comprises 7 Lynx helicopters (one is carried in each of the ocean escorts).

Total strength of the Navy is 8,300 officers and men (1,300 officers, 3,300 regular ratings, 1,200 national service, 2,500 civilians). Reserves total 10,000 (the mobilization force is 4,000 men).

The Naval Home Guard has 37 vessels and 5,300 officers and men

Air Force. The operational units of the Air Force comprise 8 surface-to-air missile squadrons and 6 flying squadrons

The air defence force consists of the 8 Hawk surface-to-air missile squadrons and 4 all-weather air-defence squadrons with a total of 52 F-16s. All squadrons have an air-defence and a fighter-bomber rôle.

The fighter bomber force comprises 2 squadrons with a total of 32 F 35 Drakens, and 1 squadron has a secondary reconnaisance role.

In addition the Air Force has a number of supplementary units, including 1 transport squadron (C-130 Hercules and Gulfstream III), 1 helicopter rescue squadron (S-61As), and a control and warning system.

Total strength of the Air Force is about 9,400, and the mobilization force about 10,000 men.

Home Guard. The overall Home Guard organization comprises the Home Guard Command, the Army Home Guard, the Naval Home Guard and the Air Force Home Guard.

The personnel of the Home Guard is recruited on a voluntary basis. The personnel establishment of the Home Guard is at present about 76,000 persons (59,200 in

the Army Home Guard, 4,900 in the Navy Home Guard and 11,900 in the Air Force Home Guard)

Weights and Measures. The use of the metric system of weights and measures has been obligatory in Denmark since 1 April 1912

#### ENERGY AND NATURAL RESOURCES

Electricity. Owing to the concentration of power production, the number of generating power stations has declined from 371 in 1949–50 to 18 in 1984, while the net power production (in 1m. kwh) has risen from 1,689 in 1949–50 to 19,695 in 1984

Agriculture. Land ownership is widely distributed. In June 1984 (sample survey) there were 95,346 holdings with at least 5 hectares of agricultural area (or at least a production equivalent to that from 5 hectares of barley). About 10,000 holdings were below the sample threshold There were 19,105 small holdings (with less than 10 hectares), 62,476 medium sized holdings (10–50 hectares) and 13,765 holdings with more than 50 hectares

The number of agricultural workers declined from 120,442 in July 1961 to 23.886 in June 1984.

In June 1984 the cultivated area was utilized as follows (in 1,000 hectares): Grain, 1,669; peas and beans, 57; root crops, 237; other crops, 273; green fodder and grass, 616, fallow, 3, total cultivated area, 2,855.

Newspapers. In 1984 there were 47 daily newspapers with a combined circulation of 1 84m on weekdays; 9 of them (899,000) appeared in Copenhagen

#### JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The lowest courts of justice are organized in 84 tribunals (byretter), where cases are dealt with by a single judge. The tribunals at Copenhagen have 34 judges, Aarhus 13, Odense 10, Aalborg 9, and the other tribunals have 1 to 4. Cases of greater consequence are dealt with by the superior courts (Landsretterne); these courts are also courts of appeal for the above-named cases. Of superior courts there are two Ostre Landsret in Copenhagen with 46 judges, Vestre Landret in Viborg with 23 judges. From these an appeal lies to the Supreme Court (Hojesteret) in Copenhagen, composed of 16 judges. Judges under 65 years of age can be removed only by judicial sentence

In 1982, 12,476 men and 1,269 women were convicted of violations of the criminal code, fines not included In 1984, the daily average population in penal institutions, local prisons, etc., was 3,100 men and 129 women, of whom 741 men and 45 women were on remand

Religion. At the Reformation in 1536 the Danish Church ceased to exist as a legally independent unit, a part of the Roman Catholic Church, and became instead a Lutheran Church under the direction of the State Since that time the State has, in one form or another, continued to exercise supreme authority in the affairs of the Church, and has regulated these by the passing of laws, by royal decree, or other appropriate means. The great majority of Danish citizens (about 90%) belongs to the National Church. Administratively, Denmark is divided into 10 dioceses each with a Bishop who, within the framework of the law, is the supreme diocesan authority in ecclesiastical affairs. The Bishop together with the Chief Administrative Officer of the county make up the diocesan governing body, responsible for all matters of ecclesiastical local finance and general administra-

tion. Bishops are appointed by the Crown after an election at which the clergy and parish council members of the diocese have had the opportunity of voting for the candidates nominated. Each diocese is divided into a number of deaneries (about 107 in the whole country) each with its Dean and Deanery Committee, who have certain financial powers. Local government at parish level (there are about 2,200 parishes in all) is in the hands of Parish Councils, who are elected for a 4-year period of office.

Since the Constitution of 1849 complete religious toleration is extended to every sect, and no civil disabilities attach to Dissenters

Kjær, J. C., History of the Church of Denmark Blair, Nebr., 1945 Roesen, August, Religion in Denmark Copenhagen, 1963

Education. Education has been compulsory since 1814. The folkeskole (public primary and lower secondary school) comprises a pre-school class (bornehave-klasse), a 9-year basic school corresponding to the period of compulsory education and a 1-year voluntary tenth form Compulsory education may be fulfilled either through attending the folkeskole or private schools or through home-instruction, on the condition that the instruction given is comparable to that given in the folkeskole. The folkeskole is mainly a municipal school and no fees are paid. In the year 1984–85, 2,289 primary and lower secondary schools had 722,508 pupils and employed 66,808 teachers. Approximately 15% of the total number of schools were private schools and they were attended by 9% of the total number of pupils. The 9-year basic school is in practice not streamed. However, a certain differentiation may take place in the eighth and ninth forms.

On completion of the eighth and ninth forms the pupils may sit for the leaving examination of the folkeskole (folkeskolens afgangsprøve) On completion of the tenth form the pupils may sit for either the leaving examination of the folkeskole (folkeskolens afgangsprøve) or the advanced leaving examination of the folkeskole (folkeskolens udvidede afgangsprøve)

Under certain conditions the pupils may continue school either in the 3-year gymnasium (upper secondary school) ending with studentereksamen (upper secondary school leaving examination) or in the 2-year higher preparatory examination course ending with the højere forberedelseseksamen. There were (1984–85) 165 of these upper secondary schools with 78,124 pupils and 7,796 teachers

Youth and leisure-time education (1982–83). 324 schools (continuation schools, youth residential schools, home economics schools, folk high schools, youth high schools and agricultural schools) with 22,550 pupils

Vocational education and training are divided into 3 main fields EFG (Basic Vocational Education), apprenticeship training and diploma courses, each of which contains various different lines of education. The largest field is Basic Vocational Training (EFG) In 1984–85, 23,493 students enrolled within trade and commerce and 17,472 within technical education. In apprenticeship training, 2,559 students enrolled (1982–83) within trade and commerce and 10,971 within the technical branches Finally, 9,337 students were admitted to the diploma courses within the field of trade and commerce, and 1,786 students were admitted to the technical diploma courses in 1982–83

There were 25 teacher-training colleges with 6,693 students and 35 colleges for training of teachers for kindergartens and leisure-time activities with 5,891 students.

Degree-courses in engineering. The Technical University of Denmark had 4,262 students. The Engineering Academy had 1,946 students and 8 engineering colleges had 4,773 students.

Universities: The University of Copenhagen (founded 1479) 28,912 students. The University of Aarhus (founded in 1928) 13,043 students. The University of Odense (founded in 1964) 5,560 students. Roskilde University Centre (founded in 1972) 2,360 students. Aalborg University Centre (founded in 1974) 4,359 students.

Other types of post-secondary education. The Royal Veterinary and Agricultural University had 2,431 students. The two dental colleges had 1,068 students. The Danish School of Pharmacy had 830 students. The 11 colleges of economics, business administration and modern languages had 20,303 students. The 2 schools

of architecture had 1,921 students. Five academies of music had 897 students. The Danish School of Librarianship had 805 students. The Royal Danish School of Educational Studies had 2,088 students. The Danish State Institute of Physical Education had 134 students. The 4 schools of social work had 908 students. The Danish School of Journalism had 689 students. Nine colleges of physical therapy had 1,303 students. The School of Midwifery Education had 124 students.

Social Security. The main body of Danish social welfare legislation is consolidated in 7 acts concerning (1) public health security, (2) sick-day benefits, (3) social pensions (for disablement, early retirement and old age), (4) employment injuries insurance, (5) employment services and unemployment insurance, (6) social assistance including assistance to handicapped, rehabilitation, child and juvenile guidance, day-care institutions, care of the aged and sick, and (7) family allowances.

Public health security, covering the entire population, provides free medical care, substantial subsidies for certain essential medicines together with some dental care and a funeral allowance. Hospitals are primarily municipal and the hospital treatment is normally free. Wage-earners are granted daily sickness allowances, others can have limited daily sickness allowances. Daily cash benefits are granted in the case of temporary incapacity for work because of illness, injury or child-birth to all persons who earn an income derived from personal work. The benefit is paid at the rate of 90% of the average weekly earnings. There was a maximum rate of 2,008 kroner a week (Oct. 1985).

Social pensions cover the entire population Entitlement to old-age pensions at the full rates is subject to the condition that the beneficiary has been ordinarily resident in Denmark for a number of years (40) For a shorter period of residence, the benefits are reduced proportionally. The basic amount of the old-age pension in Oct 1985 was 68,136 kroner to married couples and 37,080 to single persons. Various supplementary allowances, depending on age and income, may be payable with the basic amount. Persons aged 55-66 may, depending on health and income, apply for an early-retirement pension. Persons over 67 years of age are entitled to the basic amount. The pensions to a married couple are calculated and paid to the husband and the wife separately. Invalidity pension is payable, having regard to the degree of disability, at a rate of up to 84,792 kroner to a single person. Invalidity and early-retirement pensions may be subject to income regulation. The same applies to the basic amount of the old age pension to persons aged 67-69.

Employment injuries insurance provides for disablement or survivors' pensions and funeral allowances. The scheme covers practically all employees.

Employment services are provided by regional public employment agencies. The insurance against unemployment provides daily allowances. The unemployment insurance funds had in Dec. 1984 a membership of 1,869,103, of which 1,645,467 were full-time insured and 223,636 part-time.

The Social Assistance Act applies to the field of social legislation which rules the individually granted benefits in contrast to the other fields of social legislation which apply to fixed benefits.

Total social expenditure, including hospital and health services, statutory pensions, etc, amounted in the financial year 1983 to 158,362m kroner.

## GREENLAND

## Grønland/Kalaallit Nunaat

HISTORY. A Danish possession since 1380, Greenland became on 5 June 1953 an integral part of the Danish kingdom. Following a referendum in Jan. 1979, home rule was introduced from 1 May 1979, and full internal self-government was attained in Jan. 1981 after a transitional period.

AREA AND POPULATION. Area 2,175,600 sq. km (840,000 sq miles), made up of 1,833,900 sq. km of ice cap and 341,700 sq. km of ice-free land. The population, 1 Jan. 1985, numbered 52,940; West Greenland, 47,575, East Greenland, 3,278; North Greenland (Thule), 789, and 1,298 not belonging to any specific municipality. Of the total, 9,353 were born outside Greenland. Capital, Godthaab (Nuuk) (1984), 10,559

CONSTITUTION. Greenland has the same rights as other counties in Denmark with a democratically elected council (landsråd). A referendum held in Jan. 1979 approved of home rule from 1 May 1979. At the elections held on 12 April 1983 for the new 26-member Parliament, Landsting, the Siumut gained 12 seats, the Atassut, 12 seats and the Inuit Ataqutigut, the remaining 2 seats. The Premier, Jonathan Motzfeldt, formed a 6-member administration, Landsstyre.

INDUSTRY. Until the beginning of this century, the hunting of land and sea mammals, especially seals, was the main occupation of the population, now fishing is most important. Fish-processing industries, construction and trade are also important occupations.

Coal production ceased in 1972 A deposit of the valuable mineral cryolite has been mined at Ivigtut. The mine is now worked out, but exports from stock will continue for some years. In 1973 the Danish company Greenex A/S began producing lead and zinc concentrate near Umanak. Annual production of lead and zinc concentrates is about 34,000 tonnes and 153,000 tonnes respectively. In 1975, 6 groups of oil companies were granted 13 oil concessions off the west coast. These concessions were terminated by 31 Dec. 1978.

Public authorities are investigating uranium and coal deposits in Greenland as well as possibilities of hydro-electric power and there are other private prospectors for various minerals

# **DOMINICAN** REPUBLIC

Capital Santo Domingo Population 6 6m (1985) GNP per capita US\$1,380 (1983)

República Dominicana

HISTORY. On 5 Dec. 1492 Columbus discovered the island of Santo Domingo. which he called La Española, for a time it was called Hispaniola. The city of Santo Domingo, founded by his brother, Bartholomew, in 1496, is the oldest city in the Americas. The western third of the island—now the Republic of Haiti—was later occupied and colonized by the French, to whom the Spanish colony of Santo Domingo was also ceded in 1795. In 1808 the Dominican population, under the command of Gen Juan Sánchez Ramirez, routed an important French military force commanded by Gen Ferrand, at the famous battle of Palo Hincado This battle was the beginning of the end for French rule in Santo Domingo and culminated in the successful siege of the capital. Eventually, with the aid of a British naval squadron, the French were forced to capitulate and the colony returned again to Spanish rule, from which it declared its independence in 1821. It was invaded and held by the Haitians from 1822 to 1844, when they were expelled, and the Dominican Republic was founded and a constitution adopted Independence day 27 Feb 1844 Great Britain, in 1850, was the first country to recognize the Dominican Republic. The country was occupied by American Marines from 1916 until 1924. In 1936 the name of the capital city was changed from Santo Domingo to Ciudad Trujillo; and back again in 1961.

AREA AND POPULATION. The Dominican Republic occupies the eastern portion (about two-thirds) of the island of Hispaniola, Quisqueya or Santo Domingo, the western division forming the Republic of Haiti It consists of the National District (containing the capital, Santo Domingo, population, census 1,550,739), and 26 provinces.

Area is 48,442 sq km (18,700 sq miles) with 870 miles of coastline, 193 miles of frontier line with Haiti (marked out in 1936)

The populations of the 26 provinces at the 1981 census were

La Altagracia	100,112	Puerto Plata	206,757
Azua	142,770	La Romana	109,769

CONSTITUTION AND GOVERNMENT. A new Constitution was promulgated on 28 Nov. 1966.

The President is elected for 4 years, by direct vote In case of death, resignation or disability, he is succeeded by the Vice-president. There are 12 secretaries of state, a judicial adviser with secretary-of-state rank and 2 ministers without portfolio in charge of departments. Citizens are entitled to vote at the age of 18, or less when married

Recent Presidents have been Dr Joaquín Balaguer, 4 Aug 1960–62, Lic Rafael Bonnelly, 18 Jan. 1962, Professor Juan Bosch, 27 Feb –25 Sept. 1963 (deposed); Dr Héctor Gracía Godoy, 3 Sept 1965–1 July 1966; Joaquin Balaguer, 1 July 1966–15 Aug 1978; Antonio Guzan, 26 May 1978–4 July 1982.

President Salvador Jorge Blanco (assumed office 14 Aug. 1982)

The country's first free elections for nearly 40 years were held in Dec 1962 when Juan Bosch was elected President with a clear majority, after which a new Constitution was approved on 29 April 1963. Bosch was overthrown by a military coup d'état in Sept 1963 and the declared aim of the Constitutionalist side in the Civil War of April-Sept 1965 was the restoration of Bosch as President and a return to the 1963 Constitution.

On 29 April 1965 USA landed a force of 44,000 Marine and Army, later assisted by Organization of American States contributions. The capital remained divided between these forces and various rival factions of nationals. A provisional government was eventually installed on 3 Sept. 1965.

Until elections on 1 June 1966 there was government by decree

HISTORY. The Spaniards under Francisco Pizarro founded a colony after their victory at Cajamarca (16 Nov. 1532) Their rule was first challenged by the rising of 10 Aug. 1809 Marshal Sucre defeated the Spaniards at Pichincha in 1821, and in 1822 Bolívar persuaded the new republic to join the federation of Gran Colombia. The Presidency of Quito became the Republic of Ecuador by amicable secession 13 May 1830.

AREA AND POPULATION. Ecuador is bounded on the north by Colombia, on the east and south by Peru, on the west by the Pacific ocean. The frontier with Peru has long been a source of dispute between the two countries. The latest delimitation of it was in the treaty of Rio, 29 Jan 1942, when, after being invaded by Peru, Ecuador lost over half her Amazonian territories Ecuador unilaterally denounced this treaty in Sept. 1961 See map in The Statesman's Year-Book, 1942. Fighting between Peru and Ecuador began again in Jan. 1981 over this border issue but a ceasefire was agreed in early Feb.

No definite figure of the area of the country can yet be given, as a portion of the frontier has not been delimited. One estimate of the area of Ecuador is 270,670 sq. km, excluding the litigation zone between Peru and Ecuador, which is 190,807 sq.

km, but including the Galápagos Islands (7,844 sq. km).

Ecuador has 3 distinct zones: the Sierra or uplands of the Andes, consisting of high mountain ridges with valleys, with 3 76m. of the population and high-priced farming land; the Costa, the coastal plain between the Andes and the Pacific, with 4 03m., whose permanent plantations furnish bananas, cacao, coffee, sugar-cane and many other crops, the Oriente, the upper Amazon basin on the east and the site of the main oilfields, consisting of tropical jungles threaded by large rivers (0 26m.).

The population is predominantly of Amerindians, with small proportions of

people of European or African descent.

### INTERNATIONAL RELATIONS

Membership. Egypt is a member of UN, OAU, the Arab League and OAPEC

#### **ECONOMY**

Planning. A 5-year development plan runs 1982/83–1986/87 and provides for investments totalling £E35,000m.

Budget. Ordinary revenue and expenditure for fiscal years ending 30 June, in £E1m.

	1982–83	1983–84	1984-85
Revenue	9,768	11,197	12,877
Expenditure	8,754	9,891	11,354

Currency. By decree of 18 Oct. 1916 (20 Z1-E1-Higga 1934), the monetary unit of Egypt is the gold Egyptian pound of 100 piastres of 1,000 millièmes. Coins in circulation are 20, 10, 5, 2 piastres (silver); 2, 1 piastre, 5 millièmes, 1 millième (bronze) Gold coins are no longer in circulation. Silver coin is legal tender only up to £E1, and bronze coins up to 10 piastres. The Treasury issues 5- and 10-piastre currency notes. Bank-notes are issued by the National Bank in denominations of 5, 10, 25 and 50 piastres, £E1, 5, 10, 20, and 100.

In March 1986, £1 sterling=£E1 19, US\$=£E1 31.

Banking. On 18 Aug 1960 a Central Bank of Egypt was established by decree It manages the note issue, the Government's banking operations and the control of commercial banks. At the same date the National Bank founded in 1898 ceased to be the central bank and became a purely commercial bank. In 1985, there were 39 commercial and 10 investment banks.

Weights and Measures. In 1951 the metric system was made official with the exception of the feddân and its subdivisions.

Capacity Kadah = 1/96th ardeb = 3 36 pints Rob = 4 kadahs = 1 815 gallons. Keila = 8 kadahs = 3 63 gallons Ardeb = 96 kadahs = 43 555 gallons, or 5 44439 bu, or 198 cu. decimetres

Weights. Rotl = 144 dirhems = 0 9905 lb Oke = 400 dirhems = 2 75137 lb. Quntâr or 100 rotls or 36 okes = 99 0493 lb 1 Quntâr of unginned cotton = 315 lb 1 Quntâr of ginned cotton = 99 05 lb The approximate weight of the ardeb is as follows: Wheat, 150 kg, beans, 155 kg, barley, 120 kg; maize, 140 kg, cotton seed, 121 kg.

Surface Feddân, the unit of measure for land = 4,200.8 sq. metres = 7,468.148 sq. pics = 1.03805 acres 1.92 sq. pic = 6.0547 sq. ft = 0.5625 sq. metre

#### **ENERGY AND NATURAL RESOURCES**

Electricity. Electricity generated in 1983–84 was 28,400m. kwh.

Oil. The first commercial discovery of oil in the Middle East outside Iran was made in Egypt in 1909, but production long remained low and often insufficient to meet Egypt's domestic requirements. Policy is controlled by the Egyptian General Petroleum Corporation (EGPC) a wholly state-owned corporation answerable to the Minister of Petroleum EGPC is whole or part-owner of the various production and refining companies and controls supplies to the domestic marketing companies. With the agreement of EGPC several foreign oil companies were exploring for oil in 1986.

Production 1984, was 38,694,000 tonnes of crude petroleum Net oil earnings (1983-84) US\$2,340m.

Minerals. Production (1981 in tonnes). Phosphate rock, 691,000, iron ore, 2,130,000; marine salt, 869,000

Agriculture. Rain seldom falls in Upper Egypt, and only at irregular intervals in Cairo, where the average for the year is no more than 1 2 in. At Alexandria the average is 8 in.

The cultivated area of Egypt proper was estimated in 1982 at 11·17m. feddâns (1 feddân = 1 038 acres) and of this, 4,945,000 feddâns were under winter crops, 5,017,000 under summer crops, 818,000 under Nile crops and 390,000 under orchards.

Irrigation occupies a predominant place in the economic development of the country. Export earnings from agriculture have fallen and Egypt is no longer self sufficient in food production partly due to the increase in population. No priority has been given in government planning and because of inadequate investment earnings have fallen for its three most important export crops, cotton, oranges and rice.

On 8 Nov. 1959 the United Arab Republic and Sudan concluded agreements on

the sharing of the Nile waters (after construction of the Aswan High Dam), and trade, payments and Customs dues

In 1982 the area (1,000 hectares) and production (1,000 tonnes) were Wheat, 577(2,017); barley, 45(122), beans (dry), 7(13), lentils, 5(6), onions, 21(657), maize, 817(2,709), millet, 174(633); sugar-cane, 108(8,700)

The rice crop was 2 23m tonnes in 1984

Livestock (1984) 1,825,000 cattle, 2.41 m buffaloes, 1 45 m sheep, 1 5 m goats, 82,000 camels and 15,000 pigs.

Forestry. In 1982 total removal of roundwood was 1 89m cu metres of which 1 8m was fuel wood

Fisheries. The catch of the Egyptian sea, Nile and lake fisheries in 1982 amounted to 155,000 tonnes.

#### INDUSTRY AND TRADE

Industry. In 1979 there were 1 5m Egyptians employed in manufacturing. Production in 1981–82 included 690,000 tonnes of crude steel, 4m. tonnes of nitrogenous fertilizers and 4m tonnes of cement

**Trade Unions.** Trade unions were first recognized in 1942. In 1952 the acts concerning trade unions, individual contracts, and conciliation and arbitration were recast. Employment exchanges and unemployment statistics were introduced in 1953. Social insurance was enacted in 1955.

Commerce. Imports and exports for 5 years (in £E1,000)

	1979	1980	1981	1982	1983
Imports	2,686,212	3,401,499	6,187,486	6 354,517	7,192,657
Exports	1,287,813	2,132,178	2,262,982	2,184,122	2,250,295

In 1983, raw cotton represented 11 1% of total exports, crude oil and petroleum products 62 8%, 27% of exports went to Italy, 8% to the USSR and 8% to the Netherlands, 18% of imports came from the USA, 11% from Federal Republic of Germany

Tourism. In 1984 there were 1,560,460 tourists spending US\$233 3m

#### COMMUNICATIONS

Roads. In 1980, the total length of roads was 21,637 km, of which 16,182 km were paved Motor vehicles, in 1981, 580,000 private cars, 165,000 commercial vehicles (including buses)

Railways. In 1982 there were 4,321 km of state railways (1,435 mm gauge) which carried 486m, passengers and 7 5m tonnes of freight.

Aviation. There is an international airport at Cairo There are 95 airfields (77 unusable) The national airline Egyptair operates scheduled flights connecting Cairo with Athens, Rome, Frankfurt, Zürich, London, Khartoum, Tökyö, Bombay, Aden, Jeddah, Doha, Dharan, Kuwait, Beirut, Baghdad, Tripoli, Benghazi, Algiers, Entebbe, Nairobi, Dar-es-Salaam, Kano, Lagos, Accra, Abidjan, Damascus, Amman, Manilla, Paris, Munich, Copenhagen, Nicosia, Karachi, Aleppo, Bahrain, Abu Dhabi, Dubai, Sharjah, Sanaa and Vienna In addition, Egyptair operates scheduled flights on a widespread domestic network connecting Cairo with Port Said, Mersa Matruh, Asyût, Luxor, Aswân. In 1982, 62,000 tonnes of cargo were carried

Shipping. The Egyptian merchant navy in 1980 consisted of 75 steamers of 387,460 tons.

In 1977, 3,050 ships of 11,432,000 tons entered the port of Alexandria and 876 ships of 4,583,000 tons entered Port Said.

Suez Canal. The Suez Canal was opened for navigation on 17 Nov. 1869. By the convention of Constantinople of 29 Oct. 1888 the canal is open to vessels of all nations and is free from blockade, except in time of war, but the UAR Government did not allow Israeli ships to use the canal until May 1979, when the embargo was lifted. It is 173 km long (excluding 11 km of approach channels to the harbours), connecting the Mediterranean with the Red Sea. Its minimum width is 197 ft at a depth of 33 ft, and its depth permits the passage of vessels up to 38 ft draught.

In 1976 a 2-stage development project was started. The first stage which was completed in 1980 allowing vessels, of up to 150,000 tons, fully loaded, and up to 370,000 tons in ballast to pass through the canal and give a draught of 53 ft

During the war with Israel in June 1967 the Canal was blocked. The canal was cleared and re-opened to shipping on 5 June 1975. This is part of a programme to develop and rebuild the whole area of Suez to make it one of the largest tax-free industrial zones. Canal toll fees reached US\$980m. in 1984, and in 1983 22,224 vessels (378.2 m. tons) went through the canal.

On 1 Jan. 1981 charges were increased by 30%. The first tunnel below the canal, located 10 miles north of Suez City, was completed on 30 April 1980

Marlow, J, The Making of the Suez Canal London, 1964

HISTORY. In 1839 the Central American Federation, which had comprised the states of Guatemala, El Salvador, Honduras, Nicaragua and Costa Rica, was dissolved, and El Salvador declared itself formally an independent republic in 1841

AREA AND POPULATION. El Salvador is the smallest and most densely populated (256 inhabitants per sq. km) of the Central American states. Its area (including 247 sq. km of inland lakes) is estimated at 21,393 sq. km (8,236 sq. miles) with population estimate (1985) 5.48m.

A Treaty was signed in Peru on 30 Oct 1980 settling the border dispute between El Salvador and Honduras which caused 4 days of fighting in July 1979

The republic is divided into 14 departments, each under an appointed governor. Their areas and populations in 1981 were

República de Guinea Ecuatorial

HISTORY. The Republic of Equatorial Guinea became independent on 12 Oct 1968 after having been a Spanish colony (Territorios Españoles del Golfo de Guinea) until 1959 From 1959 to 1963 the territory was made into two Spanish provinces with a status comparable to the metropolitan provinces From 1964 to 1968 this Equatorial Region became an autonomous entity still retaining the status of two Spanish provinces, but with a certain amount of internal self-government Serious political disturbances in Rio Muni occurred in March—April 1969 This led to the partial withdrawal of the Spanish community Agreements for co-operation in education and economic development were signed with Spain in 1971, 1972 and 1979. From 1968—79 the republic depended heavily on the Soviet bloc including Cuba and the People's Republic of China, Spanish economic, technical and social co-operation has become essential since 1979

AREA AND POPULATION. The mainland part of Equatorial Guinea is bounded north by Cameroon, east and south by Gabon, and west by the Gulf of Guinea in which lie the islands of Bioko (formerly Macías Nguema, formerly Fernando Póo) and Annobón (called Pagalu from 1973 to 1979). The total area is 28,051 sq. km (10,831 sq. miles) and the population (provisional) at the 1983 Census was 304,000 Estimate (1985) 315,000

The 7 provinces are grouped into 3 regions with areas and populations as follows

	Sq km	Census 1983	Chieftown
Annobon	17	3,000	, <del>-</del>
Bioko Norte   Bioko Sur	2,017	70,000	│ Malabo │ Luba
Centro Sur Kie-Niem Litoral Wele-Nzas	26,017 1	231,000	Kogo Mikomeseng Bata Evinayong

<sup>&</sup>lt;sup>1</sup> Including the adjacent islets of Corisco, Elobey Grande and Elobey Chico (17 sq. km)

The main ethnic group on the mainland (Río Muni) is the Fang; there are several minority groups along the coast and adjacent islets. On Bioko the indigenous inhabitants (Bubis) constitute 60% of the population there, the balance being mainly Fang and coast people from Río Muni; the formerly numerous immigrant workers from Nigeria and Cameroon have mostly been repatriated. On Annobón the indigenous inhabitants are the descendents of Portuguese slaves and still speak a Portuguese patois. The official language is Spanish.

CLIMATE. The climate is equatorial, with alternate wet and dry seasons. In Rio Muni, the wet season lasts from Dec. to Feb.

CONSTITUTION AND GOVERNMENT. A new Constitution was approved in Aug 1982 by 95% of the votes cast in a plebiscite, which also confirmed the President in office for a further 7-year term A 41-member National Assembly was elected on 28 Aug 1983.

President Lieut -Col Teodoro Obiang Nguema Mbasogo (from 3 Aug 1979).

National flag Three horizontal stripes of green, white, red; a blue triangle based on the hoist; in the centre the national arms

**DEFENCE.** Under President Macías the Guardia Nacional consisted mainly of Fang soldiers with Cuban and Chinese military advisers. Total strength (1986) about 2,200 Since the 1979 coup, Moroccan troops and Spanish military and police personnel have replaced Soviet bloc advisers.

#### INTERNATIONAL RELATIONS

Membership. Equatorial Guinea is a member of UN, OAU and is an ACP state of EEC

#### **ECONOMY**

**Budget.** The 1982 budget envisaged income at 2,980m Bikuele and expenditure at 4,038m, Bikuele.

Currency. In July 1973 the Guinean peseta was redesignated the Ekuele (plural, Bikuele). In Dec. 1984 the currency joined the franc zone

**Banking.** The Banco Central de Guinea Ecuatorial in Malabo was established in 1969 with Spanish technical and financial assistance

### **ENERGY AND NATURAL RESOURCES**

Electricity. Production (1982) 26m kwh

Agriculture. The chief products are cocoa (74,000 hectares in 1984), coffee (18,000 hectares) and wood, in 1984 production was about 10,000 tonnes of cocoa, most of it high-grade exported to Spain and the US Coffee, of mediocre quality, is chiefly a Fang product. Production (1984) 7,000 tonnes, palm oil, 5,200, palm kernels, 3,000, bananas, 18,000 Food crops include cassava, 54,000, sweet potatoes, 35,000 Plantations in the hinterland have been abandoned by their Spanish owners and except for cocoa, commercial agriculture is under serious difficulties. Livestock (1984) Cattle, 4,000, sheep, 34,000, goats, 7,000

Forestry. Wood was almost entirely exported from Rio Muni to Spain and the Federal Republic of Germany Production 1981, 465,000 cu metres Since 1979 the lumber industry has resumed activity but there was (1981) a shortage of labour

#### INDUSTRY AND TRADE

Industry. Bioko has very few industries Rio Muni has no industry except lumbering. Post-independence political conditions have not been conducive to private investment

Commerce. In 1981 imports amounted to 7,982m Bikuele (of which 80% came from Spain) and exports to 2,502m Bikuele (of which Spain took 87%) Cocoa amounted to 71% of all exports and timber to 24%

HISTORY. The ancient empire of Ethiopia has its legendary origin in the meeting of King Solomon and the Queen of Sheba Historically, the empire developed in the centuries before and after the birth of Christ, at Aksum in the north, as a result of Semetic immigration from South Arabia. The immigrants imposed their language and culture on a basic Hamitic stock. Ethiopia's subsequent history is one of sporadic expansion southwards and eastwards, checked from the 16th to early 19th centuries by devastating wars with Moslems and Gallas. Modern Ethiopia dates from the reign of the Emperor Theodore (1855–68)

Menelik II (1889–1913) defeated the Italians in 1896 and thereby safeguarded the empire's independence in the scramble for Africa. By successful campaigns in neighbouring kingdoms within Ethiopia (Jimma, Kaffa, Harar, etc.) he united the country under his rule and created the empire as it is today

In 1936 Ethiopia was conquered by the Italians, who were in turn defeated by the

Allied forces in 1941 when the Emperor returned

The former Italian colony of Eritrea, from 1941 under British military administration, was in accordance with a resolution of the General Assembly of the UN, dated 2 Dec 1950, handed over to Ethiopia on 15 Sept 1952 Eritrea thereby became an autonomous unit within the federation of Ethiopia and Eritrea

This federation became a unitary state on 14 Nov 1962 when Entrea was fully

integrated with Ethiopia

A provisional military government assumed power on 12 Sept 1974 and deposed the Emperor On 24 Nov. 1974 the Provisional Military Government announced that on 23 Nov it had executed 60 former military and civilian leaders including Gen Aman Andom who was Chairman of the Provisional Military Administrative Council

On 3 Feb. 1977 it was announced that Brig -Gen Teferi Bante, the Chairman of PMAC and 6 other members of the ruling military council were executed

In mid-1977 Somalia invaded Ethiopia and took control of the Ogaden region After an offensive mounted with strong USSR and Cuban support the area was recaptured and in March Somalia withdrew all troops from the area. Control was re-established by Ethiopia later in 1978 and nationalist guerrillas were pushed back but sporadic fighting continues (1985) in the Ogaden and along the border

AREA AND POPULATION. Ethiopia is bounded north-east by the Red Sea, east by Djibouti and Somalia, south by Kenya and west by Sudan. It has a total area of 1,221,900 sq km (471,800 sq miles). The first census was carried out in 1984 Population (preliminary) 42,019,418

The dominant race of Ethiopia, the Amhara, inhabit the central Ethiopian highlands. To the north of them are the Tigréans, akin to the Amhara and belonging to the same Christian church, but speaking a different, though related, language. Both these races are of mixed Hamitic and Semitic origin, and further mixed by intermarriage with Oromo (Galla) and other races. The Oromos, some of whom are Christian, some Moslem and some pagan, comprise about 40% of the entire population, and are a pastoral and agricultural people of Hamitic origin. Somalis, another Hamitic race, inhabit the south-east of Ethiopia, in particular the Ogaden desert region. These like the closely related Afar people, are Moslem. The Afar stretch northwards from Wollo region into Entrea.

Local Government The country is divided into 15 administrative regions, each under a Chief Administrator, and under the administrative control of the Minister of the Interior The regions are divided into 103 awraja (sub-regions), and thence into 505 woredo (districts).

CLIMATE. The wide range of latitude produces many climatic variations between the high, temperate plateaus and the hot, humid lowlands. The main rainy season lasts from June to Aug., with light rains from Feb to April, but the country is very vulnerable to drought Addis Ababa Jan 59°F (15°C), July 59°F (15°C) Annual rainfall 50" (1,237 mm) Harar Jan 65°F (18 3°C), July 64°F (17 8°C) Annual rainfall 35" (897 mm) Massawa Jan 78°F (25 6°C), July 94°F (34 4°C) Annual rainfall 8" (193 mm)

CONSTITUTION AND GOVERNMENT. Pending the promulgation of a new constitution, Ethiopia is controlled by a Provisional Military Administration Council (the Derg) to whom the Council of Ministers is responsible A Commission for Organizing the Party of the Working Peoples of Ethiopia (COPWE) was established in early 1980 and charged with the task of preparing the formation of a civilian party which will ultimately take over from the PMAC The second congress of COPWE was held in Jan 1983 and elected a 91-member central committee and a 7-member executive committee, both chaired by Mengistu The Workers Party of Ethiopia (WPE) was founded in 1984. An 11-member Politbureau was elected which includes all 7 members of the former COPWE executive committee The central committee was increased to 136 members, including most former COPWE central committee members The WPE is the leading organ of the state and Lieut-Col. Mengistu is General Secretary of the Party. The transition to civilian government still awaits the promulgation of the new Constitution, the preparation of which was entrusted to a new Commission for the Constitution created in Sept 1985.

Chairman of the PMAC, Head of State, Chairman of the Council of Ministers, Secretary-General of the WPE Lieut -Col. Mengistu Haile Manam

Vice-Chairman of the Council of Ministers and Secretary-General of the PMAC Capt. Fikre Selassie Wogderesse.

Foreign Affairs Lieut.-Col. Goshu Wolde.

National flag. Three horizontal stripes of green, yellow and red. National anthem Ityopya, Ityopia Kidemi (tune by Daniel Yohannes, 1975).

**DEFENCE.** Ethiopia's military rulers have moved away from US military assistance since they came to power and now rely on USSR for most of their military aid. Large amounts of USSR military equipment have been sent to help her in her conflict with Somalia over the Ogaden desert region

Selective conscription was introduced in 1983 for a period of 30 months is in force. Some 1,400 Soviet, 3,000 Cuban and 250 East German military advisers and technicians are reported to be serving with the armed forces

Army. The Army, comprises 23 infantry divisions with some 20 tank battalions, 4 para-commando brigades, 30 artillery battalions and 30 air defence battalions Equipment includes 700 T-54/-55, 150 T-34 and 40 M-47 tanks Strength (1986) 210,000 including a People's Militia

Navy. The Navy consists of 2 ex-Soviet light frigates, 4 ex-Soviet fast missile boats, 2 ex-Soviet fast torpedo boats, 1 training ship (1,768 tons, ex-US seaplane tender), 1 ex-Netherlands coastal minesweeper, 2 patrol craft (ex-US coastguard motor gunboats), 3 patrol boats, 3 ex-Soviet coastal cutters, 4 harbour defence craft, 2 medium landing ships, 2 landing craft and 4 minor landing craft. The Naval Base and College are at Massawa

Personnel in 1986, totalled 1,500 officers and men. It is presumed that Soviet advisers remain embarked in the 6 attack craft recently acquired until Ethiopian naval officers and ratings have sufficient experience to operate independently the missiles and torpedoes

Air Force. The Air Force, trained originally by Swedish and American personnel, but now operating aircraft of Soviet origin, has its headquarters at Debre Zeit, near Addis Ababa It includes a training school and a central workshop. Fighter equipment is understood to comprise 140 MiG-21s and MiG-23s. There is a squadron of Mi-24 helicopter gunships, and a transport squadron equipped with An-12s, and An-26s. Training aircraft include two-seat MiG-21s and L-39 jet basic trainers. More than 40 Mi-8 helicopters are in service. Most equipment surviving from the 1960s and '70s (such as F-5 fighters, Canberra bombers and US-built transports) is in storage. However since 1984 India has delivered 10 Chetdk (Alouette III) helicopters and Italy 21 SF-260TP turboprop trainers. Personnel, (1986) 4,000 officers and men.

#### INTERNATIONAL RELATIONS

Membership. Ethiopia is a member of UN, OAU and is an ACP state of EEC

#### **ECONOMY**

**Planning.** A 10-year development plan (1984–94) places emphasis on socialist development and a growth rate of 6%

**Budget.** Revenue and expenditure estimates for financial years (ended 7 July) were as follows (in EBI m)

	1 <i>975–7</i> 6	1976-77	1977–78	1978–79	1979-80
Revenue	1,331	1,466	1,601	2,119	2,365
Expenditure	1.331	1.466	1.601	2.119	2,365

Of the estimated revenue in 1979-80, EB1,327m is expected to come from taxes and EB417m, from external assistance. Of the 1979-80 expenditure, EB1,655m is on current account and EB710m for capital expenditure

Currency. The Ethiopian birr, divided into 100 cents, is the unit of currency, it is based on 5 52 grains of fine gold. It consists of notes of EB1, 2, 10, 50 and 100 denominations, and bronze 1-, 5-, 10-, 25- and 50-cent coins. Birr 2 98 = £1 sterling; Birr 2 07 = US\$1 (in March 1986)

Banking. The State Bank was renamed the National Bank of Ethiopia in Oct 1963, when its commercial activities were transferred to the newly established Commercial Bank of Ethiopia. At the same time another new bank, the Investment Bank of Ethiopia, was set up with a capital of EB10m, of which the Government held the majority of shares. In Sept. 1965 it became the Ethiopian Investment Corporation, which is a substantial shareholder in a number of industrial and other ventures.

The Investment Corporation has now been merged with the Development Bank

of Ethiopia and the two are now known as the Agricultural and Industrial Development Bank, SC

Two Italian banks have subsidiaries in Asmara, and one has a subsidiary in Addis Ababa The Addis Ababa Bank Share Co is connected with National & Grindlays Bank Ltd

On 1 Jan 1975 the Government nationalized all banks, mortgage and insurance companies

Weights and Measures. The metric system of weights and measures is officially in use Traditional weights and measures vary considerably in the various provinces the principal ones are Frasilla = approximately 37½ lb, gasha, the principal unit of land measure, which is normally about 100 acres but can vary between 80 and 300 acres, depending on the quality of the land

#### **ENERGY AND NATURAL RESOURCES**

Electricity. Production in 1979 totalled 544m kwh.

Oil. A Russian built state-owned oil refinery at Assab came on stream in 1967 with a capacity of 600,000 tonnes of crude per annum

Gas. A natural gas-strike was made offshore near Massawa in Dec 1969, but it was not exploited Traces of gas and oil have been found in south-east Ethiopia

Minerals. Ethiopia has little proved mineral wealth. Salt is produced mainly in Eritrea, while a placer goldmine is worked by the Government of Adola in the south. Gold production, in 1980, was 373 kg. Small quantities of other minerals are produced including platinum.

Agriculture. Coffee is by far the most important source of rural income accounting for 70% of foreign earnings in 1982. Harari coffee (long berry Mocha) is cultivated in the east.

Teff (*Eragrastis abissinica*) is the principal food grain, followed by barley, wheat, maize and duira Pulses and oilseeds are imported for local consumption and export Cane sugar is an important crop

Production (1984 in 1,000 tons) Maize, 1,275, sorghum, 870, barley, 848, pulses, 791

Livestock (1984) 26m cattle, 23 45m sheep, 17 25m goats; smaller numbers of donkeys, horses, mules and camels. Hides and skins and butter (ghee) are important for home consumption and export. Sheep, cattle and chickens are the main providers of meat. In 1983 85% of the population were engaged in agriculture, producing 40% of GDP. The continuing drought has had a devastating effect on production.

#### INDUSTRY AND TRADE

Industry. The most important products of the small but growing industries are cotton yarn (9,600 tons in 1978) and fabrics, cement (100,000 tons), sugar, salt, cigarettes, canned foodstuffs, beer, building materials, footwear, pharmaceuticals, tyres and paint Most industry is centred around Addis Ababa and Asmara industry around Asmara has been severely hit by actions of Eritrean guerrillas

# FALKLAND ISLANDS

Capital Stanley
Population. 1,813 (1980)

HISTORY. France established a settlement in 1764 and Britain a second settlement in 1765. In 1770 Spain bought out the French and drove off the British. In 1806 Spanish rule was overthrown in Argentina, and the Argentinians claimed to succeed Spain in the French and British settlements in 1820. The British objected and reclaimed their settlement in 1832 as a Crown Colony.

On 2 April 1982 Argentine forces invaded the Falkland Islands and the Governor was expelled. At a meeting of the UN Security Council, held on 3 April, the voting was 10 to 1 in favour of the resolution calling for Argentina to withdraw Britain regained possession on 14–15 June after the Argentinians surrendered

AREA AND POPULATION. The Crown Colony is situated in the South Atlantic Ocean about 480 miles north-east of Cape Horn The numerous islands cover 4,700 sq. miles. The main East Falkland Island, 2,610 sq. miles; the West Falkland, 2,090 sq. miles, including the adjacent small islands.

The population of the Falkland Islands at census 1980 was 1,813 Estimated population (31 Aug 1985), 1,920 The only town is Stanley, in East Falkland, with a population of just over 1,000 The population of the Falkland Islands is nearly all of British descent, with about 80% born in the islands A large garrison of British servicemen was stationed near Stanley in 1985.

CLIMATE. A cool temperate climate, much affected by strong winds, particularly in spring. Stanley. Jan. 49°F (9 4°C), July 35°F (1 7°C) Annual rainfall 27" (681 mm)

CONSTITUTION AND GOVERNMENT. A new Constitution came into force on 3 Oct. 1985 This incorporated a chapter protecting fundamental human rights and in the preamble recalled the provisions on the right of self-determination contained in international covenants

Executive power is vested in the Governor who must consult the Executive Council except on urgent or trivial matters. He must consult the Commander British Forces on matters relating to defence and internal security (except police).

There is a Legislative Council consisting of 8 elected members and 2 ex officio members, the Chief Executive and Financial Secretary Only elected members have a vote The Commander British Forces has a right to attend and take part in its proceedings but has no vote. The Attorney General also has a similar right to take part in proceedings with the consent of the person presiding. The Governor presides over sittings. He also presides over sittings of the Executive Council which consists of 3 elected members (elected by and from the elected members of Legislative Council) and the Chief Executive and Financial Secretary (ex officio) who do not vote. The Commander British Forces and Attorney General have a right to attend but may not vote.

Offices in the Public Service are constituted by the Governor and he makes appointments and is responsible for discipline. The Constitution allows for the establishment of a public service commission

Governor G. W. Jewkes, CMG.
Chief Executive. D. G. P. Taylor.
Financial Secretary. H. T. Rowlands, OBE.
Attorney General. M. C. Ll. Gaiger.
Government Secretary. D. Fernyhough, MBE.
Flag. British Blue Ensign with arms of Colony on a white disc in the fly

**DEFENCE.** Since 1982 the Islands have been defended by a garrison of several thousand servicemen. The Commander British Forces is responsible for all military matters in the Islands. He liaises with the Governor on civilian and political matters, and advises him on matters of defence and internal security except police.

Currency. The Falkland £ is at parity with the £ sterling

Banking. On 1 Dec. 1983 the government savings bank was dissolved, and all savings bank deposits were transferred to the Standard Chartered Bank, which has a branch in Stanley, and provides a full range of banking facilities

SHEEP FARMING. Most of the Colony is divided into large sheep runs Subdivision into smaller family units is gradually being effected. Wool is the principal product, but hides are exported. In 1985 there were 692,456 sheep, 7,550 cattle and 2,092 horses in the islands.

**DEVELOPMENT.** The economy is mainly dependent on the production of wool for export. The Falkland Islands Development Corporation was established by statute in June 1984 with the aim of encouraging economic development. The first projects assisted by the Corporation include inshore and offshore fisheries surveys to establish potential catch size and value, agricultural improvement schemes to encourage investment in the land, and a wool spinning and knitting factory to process a portion of the islands' main product.

#### COMMUNICATIONS

Roads. There are 27 km of made-up roads in and around Stanley and another 54 km of all-weather road between Stanley and Mount Pleasant Airfield Other settlements outside Stanley are linked by tracks, which are passable, with high axle clearing four-wheel drive vehicles in all but the worst weather

Aviation. Air communication is currently via Ascension Island. A new airfield, operational by mid-1985 and to be completed in 1986, is sited at Mount Pleasant on East Falkland. From Dec. 1985 RAF Tristar aircraft will operate a thrice-weekly service between the Falklands and the UK. Internal air links are provided by the government operated air service, which carries passengers, mail, freight and medical patients between the settlements and Stanley on non-scheduled flights in Islander aircraft.

Shipping. A charter vessel calls 4 or 5 times a year to/from the UK There is occasional direct communication with South Georgia, the South Sandwich Islands and the British Antarctic Territory by the Royal research ships John Biscoe and Bransfield and by the ice-patrol vessel HMS Endurance Vessels of the Royal Fleet Auxiliary run regularly to South Georgia.

Post and Broadcasting. Number of telephones (1984) 474 International direct dialling is available, as are international telex and facsimile links. There is a government-operated broadcasting station at Stanley

# JUSTICE, EDUCATION AND WELFARE

Justice. There is a Supreme Court, and a Court of Appeal sits in the United Kingdom; appeals may go from that court to the judicial committee of the Privy Council Judges have security of tenure and may only be removed for inability or misbehaviour on the advice of the judicial committee of the Privy Council. The senior resident judicial officer is the Senior Magistrate.

Education. Education is compulsory between the ages of 5 and 15 years. In 1984 there were 339 children receiving education in the Colony Almost 75% attended schools in Stanley, the others were taught in settlement schools or by itinerant teachers. 5 children were being educated abroad.

Health. The Government Medical Department is responsible for all medical services to civilians. The Chief Medical Officer advises the Government on policy, and is chairman of the Board of Health responsible for public health. Medical services for the Islands are run from a temporary hospital, a new hospital was under construction in Dec. 1985. Services include all primary care for Stanley and the flying doctor service for outlying farm settlements.

WILD LIFE. The Falkland Islands are noted for their outstanding wild life, including penguin and seal Four Nature Reserves have been declared and 18 Wild Animal and Bird Sanctuaries gazetted. The brown trout introduced between 1947 and 1952 can now be found in nearly all the rivers and there are good runs of seatrout during spring and autumn.

HISTORY. The Fiji Islands were discovered by Tasman in 1643 and visited by Capt Cook in 1774, but first recorded in detail by Capt. Bligh after the mutiny of the *Bounty* (1789). In the 19th century the search for sandalwood, in which enormous profits were made, brought many ships Deserters and shipwrecked men stayed on; firearms salvaged from wrecks were used in native wars, new diseases swept the islands, and rum and muskets became regular articles of trade. Tribal wars became bloody and general until Fiji was ceded to Britain on 10 Oct. 1874, after a previous offer of cession had been refused. British administrators produced order out of chaos, and since then there has been steady political, social and economic progress. Fiji gained independent status on 10 Oct. 1970.

AREA AND POPULATION. Fig. comprises about 332 islands and islets (about 110 inhabited) lying between 15° and 22° S lat and 174° E and 177° W long The largest is Viti Levu, area 10,429 sq km (4,027 sq miles), next is Vanua Levu, area 5,556 sq km (2,145 sq. miles) The island of Rotuma (47 sq km, 18 sq miles), about 12° 30′ S lat, 178° E long, was added to the colony in 1881 Total area, 7,078 sq miles (18,333 sq. km)

A population census is taken every 10 years Total population (census, Dec 1977), 601,485, Dec 1983 (estimate) 677,481 The 1983 total population consisted of the following 304,575 (44 9%) Fijians, 339,456 (50 1%) Indians, 11,344 (1 7%) Part Europeans, 3,184 (0 5%) Europeans; 8,336 (1 2%) Rotumans, 4,651 (0 7%) Chinese, 5,846 (0 9%) other Pacific Islanders, 89 others

Suva, the capital, is on the south coast of Viti Levu, population (1982), 71,255. CLIMATE. A tropical climate, but oceanic influences prevent undue extremes of heat or humidity. The S.E. Trades blow from May to Nov., during which time nights are cool and rainfall amounts least. Suva. Jan. 80°F (26.7°C), July 73°F (22.8°C). Annual rainfall 117" (2,974 mm).

CONSTITUTION AND GOVERNMENT. Fiji became an independent nation within the Commonwealth on 10 Oct 1970 This had been agreed at a constitutional conference held in London in April 1970 There is a Lower House, the House of Representatives, which consists of 52 elected members and an Upper House, the Senate, of 22 members (8 nominations by the Council of Chiefs, 7 by the Prime Minister, 6 by the Leader of the Opposition and 1 by the Rotuma Council). Elections are held every five years

At elections held in July 1982 for the 52 seats in the House of Representatives the Alliance Party won 28 seats, the National Federation Party won 22 seats and the Western United Front won 2 seats. In Jan. 1982, the National Federation Party entered into a formal agreement with the Western United Front to form a coalition.

Local Government The Fijian Administration, established in 1876, had jurisdiction over all Fijians.

Fig. 1s divided into 13 provinces, each with its own council. Elections to these councils in 90 constituencies were conducted for the first time in 1967 on a full adult franchise amongst Fijians.

The councils have wide powers to make by-laws and draw up their own budget subject to confirmation by the Fijian Affairs Board. Each council has its own treasury and levies rates to raise its revenue. These provincial rates vary from \$F6 to \$F9 per annum for every male adult, but those maintaining 5 or more children pay

lower rates until their children become taxpayers. A start has been made, however, to change over to a system of land rating based upon the unimproved value of Fijian-owned land. This is considered to be more equitable and related to ability to pay.

pay.

These newly elected councils held their inaugural and 1968 budget meetings towards the end of 1967, when the chairman for each of these 13 councils was also elected from among its members. Members were elected for 2 years and new elec-

tions were held in 1969.

At the apex of the Fijian Administration is the Great Council of Chiefs presided over by the Minister for Fijian Affairs. The Council of Chiefs consists of 22 Fijian members elected to the House of Representatives, 30 representatives, elected by the Provincial Councils and 15 representatives nominated by the Minister for Fijian Affairs.

# JUSTICE, RELIGION AND EDUCATION

Justice. An independent Judiciary is guaranteed under the Constitution of Fiji. The Constitution allows for a Supreme Court of Fiji which has unlimited original jurisdiction to hear and determine any civil or criminal proceedings under any law.

The Supreme Court also has jurisdiction to hear and determine constitutional and electoral questions including the membership of members of the House of Representatives and the Senate

The Chief Justice of Fiji is appointed by the Governor-General acting after con-

sultation with the Prime Minister and the Leader of the Opposition.

Parliament prescribes the number of puisne judges. They are appointed by the Governor-General acting after consultation with the Judicial and Legal Services Commission.

The Constitution provides that a person cannot be qualified to be appointed as a judge of the Supreme Court unless he holds, or has held, high judicial office in some part of the Commonwealth or in any country outside the Commonwealth that may be prescribed by Parliament, or unless he has qualified to practise in the Supreme Court for not less than three years.

The Fiji Court of Appeal of which the Chief Justice is ex officio President is formed by four specially appointed Justices of Appeal. The Justices of Appeal are appointed by the Governor-General acting after consultation with the Judicial and Legal Services Commission Generally any person convicted of any offence has a right of appeal from the Supreme Court to the Fiji Court of Appeal The final appellant court is the Privy Council Most matters coming before the Superior Courts originate in Magistrates' Courts

HISTORY. Since the Middle Ages Finland was a part of the realm of Sweden In the 18th century parts of south-eastern Finland were conquered by Russia, and the rest of the country was ceded to Russia by the peace treaty of Hamina in 1809. Finland became an autonomous grand-duchy which retained its previous laws and institutions under its Grand Duke, the Emperor of Russia. After the Russian revolution Finland declared itself independent on 6 Dec. 1917. The Civil War began in Jan. 1918 between the 'whites' and 'reds', the latter being supported by Russian bolshevik troops. The defeat of the red guards in May 1918 consequently meant freeing the country from Russian troops. A peace treaty with Soviet Russia was signed in 1920

On 30 Nov. 1939 Soviet troops invaded Finland, after Finland had rejected territorial concessions demanded by the USSR. These, however, had to be made in the peace treaty of 12 March 1940, amounting to 32,806 sq km and including the

Carelian Isthmus, Viipuri and the shores of Lake Ladoga.

When the German attack on the USSR was launched in June 1941 Finland again became involved in the war against the USSR On 19 Sept. 1944 an armistice was signed in Moscow Finland agreed to cede to Russia the Petsamo area in addition to cessions made in 1940 (total 42,934 sq km) and to lease to Russia for 50 years the Porkkala headland to be used as a military base. Further, Finland undertook to pay 300m. gold dollars in reparations within 6 years (later extended to 8 years) The peace treaty was signed in Paris on 10 Feb 1947 The payment of reparations was completed on 19 Sept. 1952 The military base of Porkkala was returned to Finland on 26 Jan 1956

# CONSTITUTION AND GOVERNMENT. Finland is a republic according to the Constitution of 17 July 1919

Parliament consists of one chamber of 200 members chosen by direct and proportional election in which all Finnish citizens (men or women) who are 18 years have the vote (since 1972) The country is divided into 15 electoral districts with a representation proportional to their population. Every citizen over the age of 18 is eligible for Parliament, which is elected for 4 years, but can be dissolved sooner by the President.

The President is elected for 6 years by a college of 301 electors, elected by the votes of the citizens in the same way as the members of Parliament.

President of Finland Dr Mauno Koivisto (elected 27 Jan. 1982).

State of Parties for Parliament elected on 20–21 March 1983. Conservative 44, Swedish Party, 11 (including 1 for Coalition of Aland); Centre, 38, Rural, 17, Social Democratic Party, 57; Communists, 27; Christian League, 3; Constitutional Party, 1. Local Government For administrative purposes Finland is divided into 12 provinces (laani, Sw · lan) The administration of each province is entrusted to a governor (maaherra, Sw landshovding) appointed by the President. He directs the activities of the provincial office (laaninhallitus, Sw lansstyrelse) and of local sheriffs (nimismies, Sw . lansman) In 1986 the number of sheriff districts was 225.

The unit of local government is the commune. Main fields of communal activities are local planning, roads and harbours, sanitary services, education, health services and social aid. The communes raise taxes independent from state taxation. Two different kinds of communes are distinguished. Urban communes (kaupunki, Sw. stad) and rural communes. In 1986 there were altogether 461 communes of which 94 were urban and 367 rural. In all communes communal councils are elected for terms of 4 years, all inhabitants (men and women) of the commune who have reached their 18th year are entitled to vote and eligible. The executive power is in each commune vested in a board which consists of members elected by the council and one or a few chief officials of the commune. Several communes often form an association for the administration of some common institution, e.g., a hospital or a vocational school

The autonomous county (landskap) of Aland has a county council (landsting) of one chamber, elected according to rule corresponding to those for parliamentary elections. In addition to its provincial governor it has a county board with executive power in matters within the field of the autonomy of the county

## JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The lowest courts of justice are the municipal courts in towns and district courts in the country. Municipal courts are held by the burgomaster and at least 2 members of court, district court by judge and 5 jurors, the judge alone deciding, unless the jurors unanimously differ from him, when their decision prevails From

these courts an appeal lies to the courts of appeal (Hovioikeus) in Turku, Vaasa, Kuopio, Kouvola, Rovaniemi and Helsinki The Supreme Court (Korkein oikeus) sits in Helsinki Appeals from the decisions of administrative authorities are in the final instance decided by the Supreme Administrative Court (Korkein hallintooikeus), also in Helsinki. Judges can be removed only by judicial sentence

Two functionaries, the Oikeuskansleri or Chancellor of Justice, and the Oikeusasiamies, or Solicitor-General, exercise control over the administration of justice The former acts also as counsel and public prosecutor for the Government, while the latter, who is appointed by the Parliament, exerts a general control over

all courts of law and public administration

# République Française

HISTORY. The republic proclaimed on the fall of the Bourbon monarchy in 1792 lasted until the First Empire, under Napoleon I, was established in 1804. The Bourbon monarchy was restored in 1814 and (with an interval during 1815) lasted until the abdication of Louis Philippe in 1848. The Second Republic was established on 12 March 1848, the Second Empire (under Louis Napoleon) on 2 Dec 1852. The Third Republic was established on 4 Sept. 1870 following the capture and imprisonment of Louis Napoleon in the Franco-Prussian war, and lasted until the German occupation of 1940. The Fourth Republic was established on 24 Dec 1946 and lasted until 4 Oct. 1958.

France is a Republic, indivisible, secular, democratic and social, all citizens are equal before the law (Art 2) National sovereignty resides with the people, who exercise it through their representatives and by referenda (Art 3). Political parties carry out their activities freely, but must respect the principles of national

sovereignty and democracy (Art 4)

The President of the Republic sees that the Constitution is respected, he ensures the regular functioning of the public authorities, as well as the continuity of the state. He is the protector of national independence and territorial integrity (Art 5). He is elected for 7 years by direct universal suffrage (Art 6). He appoints a Prime Minister and, on the latter's advice, appoints and dismisses the other members of the Government (Art 8). He presides over the Council of Ministers (Art 9). He can dissolve the National Assembly, after consultation with the Prime Minister and the Presidents of the two Houses (Art 12). He appoints to the civil and military offices of the state (Art 13). In times of crisis, he may take such emergency powers as the circumstances demand, the National Assembly cannot be dissolved during such a period (Art 16).

Women's Rights Yvette Roudy (Soc.)

Ministers-Delegate Jack Lang (Culture), Alain Calmat (Youth and Sports), André Labarrère (Parliamentary Relations), Christian Nucci (Overseas Cooperation and Development), Louis Mexandeau (Posts and Telecommunications)

The Government also includes 20 Secretaries of State.

Parliament consists of the National Assembly and the Senate; the National

Assembly is elected by direct suffrage and the Senate by indirect suffrage (Art 24) It convenes as of right in two ordinary sessions per year, the first on 2 Oct for 80

days and the second on 2 April for not more than 90 days (Art 28)

The National Assembly comprises 491 Deputies, elected for a 5-year term from single-member constituencies – 474 in Metropolitan France, 11 in Overseas Departments, I for Mayotte (a 'special collectivity'), and 5 in Overseas Territories However, under 1985 legislation, these constituencies have been replaced by multi-member constituencies electing Deputies under a system of proportional representation General Elections, held in June 1981, resulted in a new composition of 269 Parti Socialiste, 44 Parti Communiste Français, 14 Mouvement des Radicaux de Gauche and 6 others supporting the Government, together with 88 Rassemblement Pour la République (Gaullists), 63 Union de la Démocratic Française (Giscardians and Centrist Union), and 7 others forming the opposition On 17 Sept 1984 the PCF withdrew support and joined the opposition

The Senate comprises 318 Senators elected for 9-year terms (one-third every 3 years) by an electoral college in each Department or Overseas Territory, made up of all members of the Departmental Council or Territorial Assembly together with all members of Municipal Councils within that area, 298 Senators represent Metropolitan France, 8 Overseas Departments, 1 Mayotte, 3 Overseas Territories and 8 Frenchmen residing outside France Following the partial elections in Sept 1983, the Senate was composed of 70 Groupe Socialiste, 72 Union Centriste, 49 Union des Republicans et des Indépendants (Giscardians), 58 RPR (Gaullists), 27 Gauche Démocratique, 24 Groupe Communiste, 12 MRG, 5 non-inscrits (unaffi-

liated) and I seat vacant

The Constitutional Council is composed of 9 members whose term of office is 9 years (non-renewable), one-third every 3 years, 3 are appointed by the President of the Republic 3 by the President of the National Assembly, and 3 by the President of the Senate, in addition, former Presidents of the Republic are, by right, life members of the Constitutional Council (Art. 56) It oversees the fairness of the elections of the President (Art. 58) and Parliament (Art. 59) and of referenda (Art. 60), and acts as a guardian of the Constitution (Art. 61).

The Economic and Social Council advises on Government and Private Members' Bills (Art. 69) It comprises representatives of employers', workers' and

farmers' organizations in each Department and Overseas Territory

National flag The Tricolour of three vertical stripes of blue, white, red

National anthem La Marseillaisc (words and music by C Rouget de Lisle, 1792).

Local Government France is divided into 22 regions for national development work, for planning and for budgetary policy Under far-reaching legislation on decentralisation promulgated in March 1982, state-appointed Regional Prefects were abolished and their executive powers transferred to the Presidents of the Regional Councils, which are to be directly elected

There are 96 départements within the 22 regions each governed by a directlyelected Conseil Général From 1982 their Presidents' powers are greatly extended to take over local administration and expenditure from the former Departmental prefects, now called 'Commissioners of the Republic' with responsibility for public order The arrondissement (324 in 1975) and the canton (3,509 in 1975), have little

administrative significance

The unit of local government is the commune, the size and population of which vary very much. There were, in 1975, in the 96 metropolitan departments, 36,394 communes. Most of them (31,593) had less than 1,500 inhabitants, and 16,550 had less than 300, while 229 communes had more than 30,000 inhabitants. The local affairs of the commune are under a Municipal Council, composed of from 9 to 36 members, elected by universal suffrage for 6 years by French citizens of 21 years or over after 6 months' residence. Each Municipal Council elects a mayor, who is both the representative of the commune and the agent of the central government.

In Paris the Conseil de Paris is composed of 109 members elected from the 20 arrondissements. It combines the functions of departmental Conseil Général and Municipal Council

**DEFENCE.** The President of the Republic exercises command over the Armed Forces. He is assisted by the research organization of the High Council of Defence (Conseil Supérieur de la Défense Nationale) and two Committees (Comité de Défense and Comité de Défense restreint) which formulate directives. The Prime Minister is responsible for the national defence, he exercises his military responsibilities through the General Secretariat of National Defence (SGDN). Under the Prime Minister's authority, the Comité d'Action Scientifique de Défense co-ordinates research

On 5 July 1969 the Army Ministry was replaced by the Ministry of State for National Defence which is responsible for the Army, Air Force and Navy In addition to the powers of the Army Ministry, the Ministry of State prepares general directives for negotiations relating to defence It is assisted by the Departmental Assistant for Weapons, the Secretary-General for Administration, the Chief of Staff of the Armed Forces and the Chiefs of Staff of the 3 Armed Forces—Army, Navy and Air.

French forces are not formally committed to NATO

Army. The Army consists of regular officers and n c o s, long-term n c o.s and soldiers, and conscripts serving 12 months

The peace-time units comprise infantry, armoured troops and cavalry, artillery, engineering, signals, transport, materiel, naval infantry and artillery In addition, there are the Foreign Legion, mountain and airborne troops and other specialized units 5 artillery units can deliver the 'Pluton' nuclear missile.

In 1986 the effective strength of the Army was 341,948 all ranks (excluding Gendarmerie).

Higher military instruction is provided in 3 stages: the staff school (École d'État-major) for officers of formation staffs; the Ecole Supérieure de Guerre for officers earmarked for the higher command; the Institut des Hautes Études de Défense Nationale where high-ranking officers and civilians study together the problems of national defence.

Light Army Aircrast Formed in 1952, the Aviation Légère de l'Armée de Terre (ALAT) is a well-equipped force, with 75 light aeroplanes and more than 560 helicopters for observation, reconnaissance, combat area transport, liaison and supply duties. Effective strength, 1985, 6,600.

The Gendarmerie is an integral part of the Armed Forces but also co-operates with the civil administration in maintaining public order. Effective strength, 1985, 86,417.

Navy. The Navy is under the supreme direction of the Minister of Defence, being administered by the Chief and Deputy Chiefs of Naval Staff

All naval aircraft and coastal defences are under the control of the Navy, and have been reorganized in 3 coast 'naval frontier' districts (with headquarters in Cherbourg, Brest and Toulon), in relation to the aircraft attached to the fleet

The French Navy is manned partly by conscription but mainly by voluntary enlistment. In 1985 the active personnel was 74,829 officers and men, including the Naval Air Arm.

The following is a summary of the strength of the fleet at the end of the years shown:

\*The latter, with M4 missiles, is of intermediate type between her predecessors and a new class. One more is reportedly planned and two or three more of an improved class envisaged. All the named vessels above are also armed with four 21-inch torpedo tubes.

There are also 2 nuclear-powered fleet submarines of 2,670 tons (submerged), 1 large experimental missile submarine, 14 diesel-powered submarines, 16 destroyers, 25 fingates, 5 fast missile craft, 4 fast attack craft, 5 offshore patrol vessels, 10 large minehunters (ex-ocean minesweepers), 8 coastal minehunters, 13 coastal minesweepers (3 used as patrol vessels and 4 as diving ships), 8 inshore minesweepers (used as diving and utility tenders), 7 surveying vessels, 2 dock landing ships, 7 tank landing ships, 19 landing craft, 16 minor landing craft, 6 maintenance, repair and depot ships, 6 oilers, 11 boom defence vessels, 8 support ships, 18 transports, 16 training vessels, 42 auxiliary ships and 106 tugs

One more nuclear-powered ballistic missile submarine, 3 nuclear-powered fleet (torpedo-armed) submarines, 4 guided missile destroyers and 10 avisos (escorts) are under construction. One nuclear-powered aircraft carrier, Charles de Gaulle, 36,000 tons, 40 aircraft, for keel-laying in 1986 and commissioning in 1995, 4 more nuclear-powered fleet, torpedo-armed (hunter-killer) submarines, 4 diving tenders, 3 finates and 5 mine-hunters are projected.

tenders, 3 frigates and 5 mine-hunters are projected

The naval air arm, known usually as Aéronavale, includes 3 squadrons of nation-

ally designed Super Etendard transonic fighter-bombers, 1 squadrons of nationally designed Super Etendard transonic fighter-bombers, 1 squadron of Etendard reconnaissance fighters, 1 squadron of US-built Crusader all-weather fighters, 2 squadrons of Alizé turboprop anti-submarine aircraft, 4 maritime reconnaissance squadrons with Atlantic and Neptune aircraft and 3 anti-submarine and assault squadrons with Super Frelon, Lynx and HSS-1 helicopters. Strength is 410 aircraft comprising 310 fixed-wing and 100 helicopters.

Air Force. Formed as the Service Aéronautique in April 1910, the Arméé de l'Air is organized in 7 major commands. Its bases and installations were regrouped and modernized in 1967 The Commandement des Forces Aériennes Stratégiques (CFAS) commands the nuclear deterrent force. The Commandement de la Force

Aérienne Tactique (FATAC) directs the tactical air forces, commands the air force reserve and is responsible for support of the ground forces. Under FATAC the 1st Commandement Aérien Tactique (1° CATAC) controls tactical air units based in eastern France, the 2nd Commandement Aérien Tactique (2° CATAC) controls the reserve forces and the air component of the Force d'Intervention The Commandement du Transport Aérien Militaire (COTAM) is responsible for air transport operations and participates also in the training and transport of airborne forces. The Commandement Air des Forces de Défense Aérienne (CAFDA) controls French airspace. The Commandement des Écoles de l'Armée de l'Air (CEAA) is responsible for training the personnel for all branches of the Air Force. The Commandement des Transmissions has responsibility for communications and electronic warfare Finally, the Commandement du Génie de l'Air, made up mainly of Army personnel, undertakes airbase construction and maintenance under Air Force control

The home-based French Air Force is divided territorially among 4 metropolitan air regions (Metz, Villacoublay, Bordeaux, Aix-en-Provence); overseas, small air units are integrated into the local joint-service commands. There are about 40 combat squadrons plus about 30 transport, helicopter and support squadrons, and

the Air Force uses a total of 66 bases

The strategic, tactical and air defence forces are equipped entirely with jet aircraft. The CFAs has 30 first-line Mirage IV supersonic nuclear bombers, and 10 reserves, deployed in 2 wings (each 2 squadrons) supported by 11 C-135F refuelling tanker transports. The 1° CATAC deploys 7 wings (20 squadrons), with about 180 Mirage III-E and 5F ground-attack fighters, and 135 Jaguar strike aircraft, plus 2 OCUs equipped with Mirage III-Bs and Jaguars Five of these squadrons can deliver AN 52 nuclear weapons. The 3 reconnaissance squadrons were reequipped with Mirage F1-CRs. The air defence forces have 4 wings, with 9 squadrons of Mirage F1 multi-mission fighters and 2 squadrons of Mirage 2000s The COTAM is organized into 4 wings, equipped with 60 Transall C 160 turboprop transports, 26 Nord 250ls, 6 DC-8s and 105 helicopters Training aircraft include CAP-10 piston-engined primary trainers, Epsilon piston-engined and Fougamagister jet basic trainers, Mirage F1Bs, Mirage III-Bs and two-seat Jaguars in wings for operational transformation; 25 EMB-121 Xingus bought from Brazil and dual-purpose training/liaison aircraft

Total officers and other ranks (1985) 96,547, 450 combat aircraft

Currency. The unit of currency is the france Coins are issued for 5, 10, 20 and 50 centimes, 1, 2, 5 and 10 francs, and bank-notes for 10, 50, 100 and 500 francs. In Feb 1986, £1 sterling = 10 20 francs, US\$1 = 6 93 francs

Banking. The Banque de France, founded in 1800, and nationalized on 2 Dec 1945, has the monopoly (since 1848) of issuing bank-notes throughout France Note circulation at 31 Dec 1981 was 151,900m francs. As a Central Bank, it puts monetary policy into effect and supervises its application.

The National Credit Council, formed in 1945 to regulate banking activity and consulted in all political decisions on monetary policy, comprises 45 members nominated by the Government, its president is the Minister for the Economy, its vice-president is the Governor of the Banque de France. Four principal deposit banks were nationalized in 1945 and the remainder in 1982, the chief ones being the Crédit Lyonnais (founded 1863), Banque Nationale de Paris (founded by amalgamation 1966), Société Générale (founded 1864), Crédit Industriel et Commercial, Crédit Commercial de France, the Banque de Paris et des Pays-Bas and the Credit du Nord. Total deposits and short- and medium-term held bills by the banks at 31 Dec. 1981 was 1,302,800m. The rest of the banking system comprises the popular banks, the Credit agricole, the Crédit mutuel, the Banque française du commerce exterieur and the various financial establishments.

The state savings organization (Caisse nationale d'epargne) is administered by the post office on a giro system. On 31 Dec. 1981 the private savings banks (Caisses d'epargne et de prévoyance), numbering about 500 had 434,000m francs in deposits, the state savings banks had 206,300m francs in deposits. Deposited funds are centralized by a non-banking body, the Caisse de Dépôts et Consignations, which finances a large number of local authorities and state aided housing projects, and carries an important portfolio of transferable securities.

Weights and Measures. The metric system is in general use

#### **ENERGY AND NATURAL RESOURCES**

Electricity. Production of electrical power (in 1m kwh) 1981, 260,759, 1982, 262,813, 1983, 277,164, of which 24% was hydro-electric and 49% nuclear.

Oil. In 1984 2m tonnes (14m. bbls) of crude oil were produced. The greater part came from the Parentis oilfield in the Landes Reserves (1984) total 140m bbls. France has an important oil-refining industry, chiefly utilizing imported crude oil Total capacity in 1984 was about 2 37m bbls a day. The principal plants are situated in Seine-Maritime and in Bouches-du-Rhône. In 1982, 75.3m. tonnes of petroleum products were refined.

There has been considerable development of the production of natural gas and sulphur in the region of Lacq in the foothills of the Pyrenees. Production of natural gas was 6.662m, cu. metres in 1983.

Minerals. Principal minerals and metals produced in 1983, in 1,000 tonnes Coal, 33,396, crude steel, 17,616, iron ore, 15,972, pig iron, 13,752, bauxite, 1,660, potash salts, 1,651.

Agriculture. Of the total area of France (54 9m hectares) 17 3m were under cultivation, 12 6m were pasture, 1 1m were under vines, 14 4m were forests and 8 5m. were uncultivated land in 1982

The following table shows the area under the leading crops and the production for 3 years

of 5 years	1rea (1,000 hectares)			Produce (1,000 torines)

In 1984, there were 23,594,000 employed (42.5% female), of whom 1 9m were foreign workers; in Feb. 1985, there were 2,484,855 unemployed.

Trade Unions. The main confederations recognized as nationally representative are the CGT (Confédération Générale du Travail), founded in 1895, the CGT-FO (Confédération Générale du Travail-Force Ouvrière) which broke away from the CGT in 1948 as a protest against Communist influence therein; the CFTC (Confédération Française des Travailleurs Chrétiens), which was founded in 1919 and divided in 1964, with a breakaway group retaining the old name and the main body continuing under the new name of CFDT (Confédération Française Démocratique du Travail), and the CGC (Confédération Générale des Cadres) formed in 1944 which only represents managerial and supervisory staff.

Membership is estimated because unions are not required to publish figures, but at elections held on 8 Dec. 1982 for labour tribunals, the CGT was supported by 2 8m. members, the CGT-FO by 1 4m, the CFDT by 1.8m., the CFTC by 650,000 and the CGC by 740,000 Except for the CGC unions operate within the framework of industries and not of trades

Tourism. In 1983 foreign visitors contributed about 55,052m francs to the French economy

#### COMMUNICATIONS

Roads. In 1984 the French road system consisted of 6,290 km of motorway, out of a

total road network of 1,521,351 km. In 1983, there were 20 6m. passenger cars and 3 23m commercial vehicles in use.

Railways. As from 1 Jan 1938 all the independent railway companies were merged with the existing state railway system in a Société Nationale des Chemins de Fer Français, which became a public industrial and commercial establishment in 1983

In 1984, the State railway totalled 34,688 km (11,358 km electrified) of 1,435 mm gauge, and carried 177m tonnes of freight and 755m passengers. A new railway for high-speed trains was completed in 1983 between Paris and Lyon

The Paris transport network consisted in 1985 of 472 km of underground railway (métro) and regional express railways and 2,134 km of bus routes. In 1984 it carried 1,176m passengers on the métro and 782m, by bus

Aviation. Air France, UTA and Air Inter, the national airlines, had (31 Dec. 1979) a fleet of 166 aircraft, servicing Europe, North America, Central and South America, West and East Africa, Madagascar, the Near, Middle and Far East There are local networks in the West Indies and Central America.

In 1982 Air France, UTA and Air Inter flew 2,298m tonne-km (excluding mail) and 37,846m, passenger-km There were (1984) 60 airports with scheduled services

Shipping. French merchant ships of more than 100 tons, on 1 Jan 1982, numbered 393 vessels of 10 32m GRT

Shipping (excluding fishing vessels) in foreign trade in 1979. Entered, 85,026 vessels and disembarked 259.2m tonnes of imports and loaded 71.6m tonnes of exports. Total cargo traffic 330.8m tonnes.

In 1984 there were 8,500 km of navigable rivers, waterways and canals (of which 1,647 km accessible to vessels over 3,000 tons), with a total traffic of 68 9m tonnes.

Post and Broadcasting. On 31 Dec 1983 the telephone system (government-owned) had 29,373,663 subscribers, the Paris region (including the Paris and Seine-et-Marne, Yvelines, Essonne, Hauts-de-Seine, Scine-Saint-Denis, Val-de-Marne and Val-d'Oise departments) accounted for 5,396,726

Radio and television broadcasting was reorganized under the Act of 7 Aug 1974 which replaced the Office de Radiodiffusion Télévision Française with 4 broadcasting companies, a production company and an audio-visual institute Organization, development, operation and the maintenance of networks and installations became the responsibility of the Public Broadcasting Establishment Radio programmes are broadcast from 363 transmitters by 3 stations France Inter, France Musique and France Culture Television programmes are broadcast from 325 transmitters and 4,661 relay stations on 3 channels There were about 20m radio and 19m TV sets in use in 1983 (of which 8 9m in colour)

Cinemas (1984) There were 5,050 cinemas with a scating capacity (1979) of 1,472,400, attendances totalled 187 8m

Newspapers (1983) There were 72 daily papers published in the provinces with a circulation of 6 7m copies, and 14 published in Paris with a national circulation of 2 5m Among Paris dailies France-Soir sells 550,000, Le Monde 550,000, Le Parisien Libéré 438,000, Le Figaro 407,000, and L'Aurore 220,000 Among provincial dailies Ouest-France (Rennes) sells 783,000, Le Progrés (Lyon) 447,000, La Voix du Nord (Lille) 372,000, Sud-Ouest (Bordeaux) 430,000, La Dauphine Libérée (Grenoble) 401,000 and Le Provençal (Marseilles) 345,000

## JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Since 1958, 474 tribunaux d'instance (11 in overseas departments), under a single judge each and with increased material and territorial jurisdiction, have replaced the former juges de paix (1 in each canton), and 181 tribunaux de grande instance (6 in overseas departments) have taken the place of the 357 tribunaux de première instance (1 in each arrondissement)

The tribunaux de grande instance usually have a collegiate composition, however a law dated 10 July 1970 has allowed them to administer justice under a

single judge in some civil cases.

All petty offences (contraventions) are disposed of in the Police Courts (Tribunaux de Police) presided over by a Judge on duty in the tribunal d'instance. The Correctional Courts pronounce upon all graver offences (délits), including cases involving imprisonment up to 5 years. They have no jury, and consist of 3 judges who administer both criminal and civil justice. An Act of 29 Dec. 1972 established that there is only 1 judge, in some cases, the correctional courts may consist of a single judge each. In all cases of a délit or a crime the preliminary inquiry is made in secrecy by an examining magistrate (juge d'instruction), who either dismisses the case or sends it for trial before a court where a public prosecutor (Procureur) endeavours to prove the charge

The Conciliation Boards (Conseils des Prud'hommes) composed of an equal number of employers and employees deal with labour disputes Commercial litigation goes to the Commercial Courts (Tribunaux de Commerce) composed of tradesmen and manufacturers elected for 2 years. The judges hold office for 2 years

and they can be re-elected, 3 years for the President

When the decisions of any of these Tribunals are susceptible of appeal, the case goes to one of the 35 Courts of Appeal (Cours d'Appel), (including 3 in overseas departments and 2 in overseas territories), composed each of a president and a variable number of members

The Courts of Assizes (Cours d'Assises), composed each of a president, assisted by 2 other magistrates who are members of the Courts of Appeal, and by a jury of 9 people, sit in every département, when called upon to try very important criminal cases. The decisions of the Courts of Appeal and the Courts of Assizes are final, however, the Court of Cassation (Cour de Cassation) has discretion to verify if the law has been correctly interpreted and if the rules of procedure have been followed exactly. The Court of Cassation may annul any judgment, and the cases have to be tried again by a Court of Appeal or a Court of Assizes.

The State Security Court, established in 1963, was abolished by law on 4 Aug 1981 Capital punishment was abolished in the same month

On 24 Jan 1973 the first Ombudsman (médiateur) was appointed for a 6-year period

The French penal institutions consist of. (1) maisons d'arret and de correction, where persons awaiting trial as well as those condemned to short periods of imprisonment are kept, (2) central prisons (maisons centrales) for those sentenced to long imprisonment, (3) special establishments, namely (a) schools for young adults, (b) hostels for old and disabled offenders, (c) hospitals for the sick and psychopaths, (d) institutions for recidivists. Special attention is being paid to classified treatment and the rehabilitation and vocational re-education of prisoners including work in open-air and semi-free establishments. There are 2 penal institutions for women

Juvenile delinquents go before special judges and courts; they are sent to public or private institutions of supervision and re-education.

The population at 1 June 1984 of all penal establishments was 40,870 men and

Religion. No religion is officially recognized by the State Under the law promulgated on 9 Dec 1905, which separated Church and State, the adherents of all creeds are authorized to form associations for public worship (associations culturelles). The law of 2 Jan 1907 provided that, failing associations culturelles, the buildings for public worship, together with their furniture, would continue at the disposition of the ministers of religion and the worshippers for the exercise of their religion, but in each case there was required an administrative act drawn up by the préfet as regards buildings belonging to the State or the departments and by the maire as regards buildings belonging to the communes.

There are 18 archbishops and 92 bishops of the Roman Catholic Church, with (1974) 43,557 clergy of various grades and 45 3m. church members. The Protestants of the Augsburg confession are, in their religious affairs, governed by a General Consistory, while the Reformed Church is under a Council of Administra-

tion, the seat of which is in Paris. In 1975 communicant Protestants numbered 750,000. There were (1978) about 2m. Moslems.

Education. The primary, secondary and higher state schools constitute the 'Université de France'. The Supreme Council of 84 members has deliberative, administrative and judiciary functions, and as a consultative committee advises respecting the working of the school system, the inspectors-general are in direct communication with the Minister For local education administration France is divided into 25 academic areas, each of which has an Academic Council whose members include a certain number elected by the professors or teachers. The Academic Council deals with all grades of education Each is under a Rector, and each is provided with academy inspectors, I for each department

Compulsory education is now provided for children of 6-16. The educational

stages are as follows:

1. Non-compulsory pre-school instruction for children aged 2-5, to be given in

infant schools or infant classes attached to primary schools.

2 Compulsory elementary instruction for children aged 6-11, to be given in primary schools and certain classes of the *lycées* It consists of 3 courses: preparatory (1 year), elementary (2 years), intermediary (2 years) Physically or mentally handicapped children are cared for in special institutions or special classes of primary schools

- 3. Lower secondary education (Enseignement du premier cycle du Second Degré) for pupils aged 11-15, consists of 4 years of study in the lycées (grammar schools), Collèges d'Enseignement Secondaire or Collèges d'Enseignement Général.
- 4. Upper secondary education (Enseignement du second cycle du Second Degré) for pupils aged 15–18.

Long, général or professionel provided by the lycées and leading to the

baccalauréat or to the baccalauréat de technicien after 3 years

Court, professional courses of 3, 2 and 1 year are taught in the lycées

d'enseignement professionel, or the specialized sections of the lycées, CES or CEG

The following table shows the various types of schools in 1983-84 and the numbers of enrolled pupils

Description	State	Private	Total
Pre-primary '	2,139,607	321,755	2,461,362

The state schools in 1978 had 64,676 nursery, 172,969 primary, 18,908 special school, 143,572 secondary and 44,624 secondary technical school and 65,797 grammar school (*lycée*) teachers.

Higher Instruction is supplied by the State in the universities and in special schools, and by private individuals in the free faculties and schools. The law of 12 July 1875 provided for higher education free of charge. This law was modified by that of 18 March 1880, which granted the state faculties the exclusive right to confer degrees. A decree of 28 Dec. 1885 created a general council of the faculties, and the creation of universities, each consisting of several faculties, was accomplished in 1897, in virtue of the law of 10 July 1896.

The law of 12 Nov. 1968 laying down future guidelines for higher education redefined the activities and working of universities. Bringing several disciplines together, 780 units for teaching and research (UER-Unités d'Enseignement et de Récherche) were formed which decided their own teaching activities, research programmes and procedures for checking the level of knowledge gained. They and the other parts of each university must respect the rules designed to maintain the national standard of qualifications.

The UERs form the basic units of 69 Universities and 3 National Polytechnic

Institutes (with university status), grouped into 25 academies with 924,583 students in 1983-84 Students by academie in 1978-79 (total 849,998) were

There are also Catholic university facilities in Paris, Angers, Lille, Lyon and Toulouse with (1981–82) 34,118 students and private universities (1983–84) 19,099 students.

Outside the university system, higher education (academic, professional and technical) is provided by over 400 schools and institutes, including the various Grand Écoles. In 1983–84 there were 138,314 students in state establishments and 53,945 in private establishments.

In 1978-79 there were also 99,000 students in preparatory classes leading to the Grande Écoles, the Sections de Techniciens Supérieurs and other bodies, there were also 21,000 students in Écoles normales d'instituteurs (teacher-training)

Health. On 1 Jan. 1983 there were 114,534 physicians, 43,662 pharmacists, 33,048 dentists, 271,253 nursing personnel and 8,660 midwives practising On 1 Jan 1984 there were 3,364 hospitals with 622,552 beds

Social Welfare. An order of 4 Oct 1945 laid down the framework of a comprehensive plan of Social Security and created a single organization which superseded the various laws relating to social insurance, workmen's compensation, health insurance, family allowances, etc. All previous matters relating to Social Security are dealt with in the Social Security Code, 1956, this has been revised several times, and finally by orders laid down on 21 Aug. 1967, which were ratified on 31 July 1968. The Social Security general scheme covers all wage-earning workers in industry and commerce that are not covered by a special scheme of their own

Contributions All wage-earning workers or those of equivalent status are insured regardless of the amount or the nature of the salary or earnings. The funds for the general scheme are raised mainly from professional contributions, these being fixed within the limits of a ceiling (assessed at 68,760 francs per annum on 1 Jan 1981) and calculated as a percentage of the salaries. The calculation of contributions payable for family allowances, old age and industrial injuries relates only to this amount, on the other hand, the amount payable for sickness, maternity expenses, disability and death is calculated partly within the limit of the 'ceiling' and partly on the whole salary. These contributions are the responsibility of both employer and employee, except in the case of family allowances or industrial injuries, where they are the sole responsibility of the employer.

Contributions and benefits paid in 1984 (in 1 m francs) were

,	Contributions	Benefits
Health service	259,258	219,476
Industrial injuries	34,049	25,551
Old age pensions	135,243	123,414
Family benefits	93,948	91,561

Sclf-employed Workers From 17 Jan 1948 allowances and old-age pensions were paid to self-employed workers by independent insurance funds set up within their own profession, trade or business Schemes of compulsory insurance for sickness were instituted in 1961 for farmers and in 1966, with modifications in 1970, for other non-wage-earning workers

Social Insurance The orders laid down in Aug. 1967 ensure that the whole population can benefit from the Social Security Scheme, at present all elderly persons who have been engaged in the professions, as well as the surviving spouse, are entitled to claim an old-age benefit; 98% of the population, both working and retired, are

covered by a compulsory scheme of insurance for sickness, the remaining 2% who are not covered by a compulsory insurance scheme have been able to participate in a voluntary scheme since 1967, the whole population benefit from the legislation regarding family allowances

Sickness Insurance refunds the costs of treatment required by the insured and the needs of dependants. A decree of 12 Oct. 1976 laid down conditions on which students of 20 or over at public or private educational institutions, who do not benefit from a social security scheme in their own right, are guaranteed insurance benefits for sickness or maternity, holding their parents entitlement until the end of the academic year in which they attain their 21st birthday, provided they have proof that their studies have been interrupted by illness. The general principles relating to medical care consist of a free choice by the patient of his doctor, his pharmaceutical chemist, his place of treatment, etc; the medical practitioner is granted freedom of prescription. Reimbursement is not as a rule made in full, the insured person usually pays between 10% and 30% of the legal rate except in cases of exemption. The insured who is recognized as medically unfit for work receives daily allowances equal to half of the wage which has been used to calculate the contributions, or to two-thirds of this if the person has 3 or more children. These allowances may be paid for 3 years, plus 1 additional year if the insured undergoes readaptation treatment or takes up fresh vocational training

Maternity Insurance covers the costs of medical treatment relating to the pregnancy, confinement and lying-in period, the beneficiaries being the insured person or the spouse. The daily allowances are equal to 90% of the salary on which contributions were calculated

Insurance for Invalids is divided into 3 categories (1) those who are capable of working, (2) those who cannot work, (3) those who, in addition, are in need of the help of another person. According to the category, the pension rate varies from 30 to 50% of the average salary for the last 10 years, with additional allowance for home help for the third category

Old-age Pensions for workers were introduced in 1910 and are now fixed by the Social Security Code of 28 Jan 1972. Since 1983 people who have paid insurance for at least 37½ years (150 quarters) receive at 60 a pension equal to 60% of basic salary. People who have paid insurance for less than 37½ years but no less than 15 years can expect a pension equal to as many 1/150ths of the full pension as their quarterly payments justify. In the event of death of the insured person, the husband or wife of the deceased person receives half the pension received by the latter. Compulsory supplementary schemes ensure benefits equal to 70% of previous earnings.

Family Allowances The system comprises (a) Family allowances proper, equivalent to 25 5% of the basic monthly salary (1,246 francs) for 2 dependent children, 46% for the third child, 41% for the fourth child, and 39% for the fifth and each subsequent child, a supplement equivalent to 9% of the basic monthly salary for the second and each subsequent dependent child more than 10 years old and 16% for each dependent child over 15 years. (b) Family supplement (519 francs) for persons with at least 3 children or one child aged less than 3 years. (c) Antenatal grants (d) Maternity grant equal to 260% of basic salary; increase for multiple births or adoptions, 198%; increase for birth or adoption of third or subsequent child, 457% (e) Allowance for specialized education of handicapped children (f) Allowance for orphans. (g) Single parent allowance. (h) Allowance for opening of school term. (i) Allowance for accommodation, under certain circumstances (j) Minimum family income for those with at least 3 children. Allowances (b), (g), (h) and (j) only apply to those whose annual income falls below a specified level.

Workmen's Compensation The law passed by the National Assembly on 30 Oct 1946 forms part of the Social Security Code and is administered by the Social Security Organization. Employers are invited to take preventive measures. The application of these measures is supervised by consulting engineers (assessors) of the local funds dealing with sickness insurance, who may compel employers who do not respect these measures to make additional contributions; they may, in like manner, grant rebates to employers who have in operation suitable preventive measures. The injured person receives free treatment, the insurance fund re-

imburses the practitioners, hospitals and suppliers chosen freely by the injured. In cases of temporary disablement the daily payments are equal to half the total daily wage received by the injured. In case of permanent disablement the injured person receives a pension, the amount of which varies according to the degree of disablement and the salary received during the past 12 months

A law promulgated on 11 Oct 1946 has created a medical labour service of doctors who hold a diploma of 'industrial health specialists'. These doctors are entrusted with the control of hygiene and health matters in all industrial undertakings or groups of undertakings. In addition, it is the duty of this medical service to examine wage-earners when they are engaged, to carry out periodical medical examinations and to ensure the application of the existing rules relating to safety in work

Unemployment Benefits vary according to circumstances (full or partial unemployment) which are means-tested Since 1926 unemployment benefits have been paid from public funds. Full unemployment benefit amounts to 13 50 francs per day for the head of the family and 5 40 francs for the spouse or a dependent person After 3 months the payment is reduced to 12 40 francs

A collective agreement signed on 31 Dec 1958 between the national council of employers and certain trade unions has established a system of special allowances for totally unemployed workers in industry and trade. The costs are shared by employers (2 76% of wages) and employees (0 84%) and the benefits vary according to circumstances. The system is now governed by the law of 16 Jan 1979. A similar agreement of 21 Feb. 1968 extends the system to partial unemployment.

# OVERSEAS DEPARTMENTS

On 19 March 1946 the French colonies of Guadeloupe, French Guiana, Martinique and Réunion each became an Overseas Department of France, with the same status as the departments comprising Metropolitan France. The Territory of Saint Pierre and Miquelon acquired a similar status in July 1976

# GUADELOUPE

HISTORY. Discovered by Columbus in Nov. 1493, the two main islands were then known as Karukera (Isle of Beautiful Waters) to the Carib inhabitants, who resisted Spanish attempts to colonize. A French colony was established on 28 June 1635, and apart from short periods of occupancy by British forces, Guadeloupe has since remained a French possession On 19 March 1946 Guadeloupe became an Overseas Department, in 1973 it additionally became an administrative region

AREA AND POPULATION. Guadeloupe consists of a group of islands in the Lesser Antilles The two main islands, Basse-Terre to the west and Grande-Terre to the east, are separated by a narrow channel, called Rivière Salée Adjacent to these are the islands of Marie Galante (Cerre to the Caribs) to the south-east, La Désirade to the east, and the Îles des Saintes to the south The islands of St Martin and St Barthélemy lie 250 km to the north-west

The Territory of the TAAF was created on 6 Aug 1955 It comprises the Kerguelen and Crozet archipelagoes, the islands of Saint Paul and Amsterdam (formerly Nouvelle Amsterdam), all in the southern Indian ocean, and Terre Adélie

The Administrator is assisted by a 7-member consultative council which meets twice yearly in Paris; its members are nominated by the Government for 5 years. The 12 members of the Scientific Council are appointed by the Senior Administra-

tor after approval by the Minister in charge of scientific research A 15-member Consultative Committee on the Environment, created in Nov. 1982, meets at least once a year to discuss all problems relating to the preservation of the environment. The administration has its seat in Paris.

Administrateur supérieur Vice-Adm. Claude Piéri

There are 4 postal agencies, the TAAF has its own postage stamps.

The scientific stations of the TAAF which took an important part in the International Geophysical Year, 1956-58, have been made permanent, the staff of the French bases (168 in 1983) is renewed annually and forms the only population

Kerguelen islands, situated 48-50° S lat., 68-70° E long., consists of 1 large and 85 smaller islands and over 200 islets and rocks with a total area of 7,215 sq km (2,786 sq miles), of which Grande Terre occupies 6,675 sq km (2,577 sq miles). It was discovered in 1772 by Yves de Kerguelen, but was effectively occupied by France only in 1949 Port-aux-Français has several scientific research stations (76 members) Reindeer, trout and sheep have been acclimatized

Crozet islands, situated 46° S lat, 50–52° E long, consists of 5 larger and 15 tiny islands, with a total area of 505 sq km (195 sq miles); the western group includes Apostles. Pigs and Penguins islands, the eastern group, Possession and Eastern islands. The archipelago was discovered in 1772 by Marion Dufresne, whose mate, Crozet, annexed it for Louis XV. A meteorological and scientific station (33 members) at Base Alfred-Faure on Possession Island was built in 1964.

Amsterdam Island and Saint-Paul Island, situated 38–39° S lat, 77° E long Amsterdam, with an area of 54 sq km (21 sq miles) was discovered in 1522 by Magellan's companions, Saint-Paul, lying about 100 km to the south, with an area of 7 sq km (2 7 sq miles), was probably discovered in 1559 by Portuguese sailors Both were first visited in 1633 by the Dutch explorer, Van Diemen, and were annexed by France in 1843. They are both extinct volcanoes. The only inhabitants are at Base Martin de Vivies, established in 1949 on Amsterdam Island, with several scientific research stations, hospital, communication and other facilities (33 members). Crayfish are caught commercially on Amsterdam.

Ferre Adélie comprises that section of the Antarctic continent between 136° and 142° F long, south of 60° S lat The ice-covered plateau has an area of about 432,000 sq km (166,800 sq miles), and was discovered in 1840 by Dumont d'Urville A research station (26 members) is situated at Base Dumont d'Urville, which is maintained by the French Polar Expeditions

# **NEW CALEDONIA**

# Nouvelle Calédonie

HISTORY. New Caledonia was annexed by France in 1853 and, together with most of its former dependencies, became an Overseas Territory in 1958.

AREA AND POPULATION. The territory comprises the island of New Caledonia and various outlying islands, all situated in the south-west Pacific with a total land area of 18,576 sq km (7,172 sq miles) In 1983 the population (census) was 145,368, including 53,974 Europeans (majority Fiench), 61,870 Melanesians (Kanaks), 7,700 Vietnamese and Indonesians, 5,570 Polynesians, 12,174 Wallisians, 4,080 others; 1985 (estimate) 150,200. The capital, Nouméa had (1983) 60,112 inhabitants

Vital statistics (1983): Live births, 3,807; deaths, 843.

The main islands are:

1. The island of New Caledonia with an area of 16,192 sq. km, has a total length of about 400 km, and an average breadth of 50 km, and a population (census, 1983) of 127,885. The east coast is predominantly Melanesian, the Nouméa region predominantly French, and the rest of the west coast of mixed population.

2. The Loyalty Islands, 100 km (60 miles) east of New Caledonia, consisting of 3 large islands, Maré, Lifou and Uvéa, and many small islands with a total area of 1,981 sq. km and a population (census, 1983) of 15,510, nearly all Melanesians except on Uvéa, which is partly Polynesian. The chief culture in the islands is that

of coconuts the chief export, copra.

3. The Isle of Pines, 50 km (30 miles) to the south-east of Nouméa, with an area of 152 sq km and a population of 1,287 (census 1983), is a tourist and fishing centre 4. The Bélep Archipelago, about 50 km north-west of New Caledonia, with an

area of 70 sq. km and a population of 686 (census 1983).

The remaining islands are all very small and none have permanent inhabitants, although many were formerly exploited for their guano deposits. The largest are the Chesterfield Islands, a group of 11 well-wooded coral islets with a combined area of 10 sq. km, about 550 km west of the Bélep Archipelago. The Huon Islands, a group of 4 barren coral islets with a combined area of just 65 hectares, are 225 km north of the Bélep Archipelago. Walpole, a limestone coral island of 1 sq. km, lies 150 km east of the Isle of Pines, Matthew Island (20 hectares) and Hunter Island (2 sq. km), respectively 250 km and 330 km east of Walpole, are spasmodically active volcanic islands also claimed by Vanuatu

CONSTITUTION AND GOVERNMENT. Following constitutional changes introduced by the French government in Sept 1985, the Territory is administered by a 5-member Executive Council consisting of a High Commissioner appointed by the French government and the Presidents of the 4 Regional Councils which were elected on 29 Sept 1985

There is a 46-member Territorial Congress consisting of the complete membership of the 4 Regional Councils, which has replaced the former 42-member Territorial Assembly. The Rassemblement Pour la Calédonie dans la République (Gaullists) gained 51% of the vote, the Front de Libération Nationale Kanake Socialiste (nationalists) 28% and others 5 seats

New Caledonia is represented in the National Assembly by 2 deputies, in the Senate by 1 senator and in the Economic and Social Council by 1 councillor

The Territory is divided into 4 regions (Nord, Centre-Sud-Ést, Nouméa and Îles Loyauté), each under a directly-elected Regional Council They are sub-divided into 32 communes administered by locally-elected councils and mayors

# **GERMANY**

POST-WAR HISTORY. Since the unconditional surrender of the German armed forces on 8 May 1945 there has been no central authority whose writ runs in the whole of Germany Consequently no peace treaty has been signed with a government representing the whole of Germany, and the country is virtually partitioned between the Federal Republic of Germany and the German Democratic Republic.

By the Berlin Declaration of 5 June 1945 the governments of the USA, the UK, the USSR and France assumed supreme authority over Germany. Each of the 4 signatories was given a zone of occupation, in which the supreme power was to be exercised by the C.-in-C. in that zone (see map in The Statesman's Year-Book, 1947). Jointly these 4 Cs -in-C constituted the Allied Control Council in Berlin, which was to be competent in all 'matters affecting Germany as a whole' The territory of Greater Berlin, divided into 4 sectors, was to be governed as an entity by the 4 occupying powers.

At the Potsdam Conference (17 July-2 Aug. 1945) the northern part of the Province of East Prussia, including its capital Konigsberg (renamed Kaliningrad), was transferred to the Soviet Union, pending final ratification by a peace treaty, and it was agreed that, pending the final peace settlement, Poland should administer those parts of Germany lying east of a line running from the Baltic Sea immediately west of Swinemunde along the river Oder to its confluence with the Western Neisse and thence along the Western Neisse to the Czechoslovak frontier

The agreements between the war-time allies concerning the occupation zones (12 Sept 1944) and control of Germany (1 May 1945) were repudiated by the USSR on 27 Nov 1958

A Treaty was signed in East Berlin between the German Democratic Republic and the Federal Republic of Germany on 21 Dec 1972 agreeing the basis of relations between the two countries

**DEFENCE.** On 18 Jan. 1956 the People's Chamber established a 'national people's army' and a defence ministry A 12-member defence council, under the chairmanship of E Honecker, General Secretary of the SED, was set up on 10 Feb. 1960

The 'law for the defence of the GDR', of 20 Sept. 1960, makes military service (in case of emergency) and civil defence compulsory for all citizens

Conscription for men between 18 and 25 years was introduced on 24 Jan 1962 (18 months' service in the army, 2 years in the navy and air force)

Some 422,000 Soviet troops with about 1,000 heavy tanks and 6,000 armoured vehicles are stationed in the German Democratic Republic, chiefly along the Polish border

Army. The Army, set up on 1 March 1956, is organized in 2 army corps, including 2 armoured divisions and 4 motorized infantry divisions. Operationally these divisions are subordinate to the Soviet formations of the Warsaw Pact forces. They are armed with about 3,100 tanks (mostly Soviet T-54, T-55 and T-72), 216 self-propelled guns and ground-to-air 'Guideline' missiles. The Border Police was taken out of the Army in 1974. Total army strength was (1986) 170,000 (71,500 conscripts) with a reserve of 580,000 men.

Police. The Police force (Volkspolizei) numbered 25,000 security and 46,500 border troops. There are also 450,000 militiamen organized in combat groups. The militia receive military instruction from the People's Police.

Navy. The 'People's Navy' (Volksmarine) includes 2 frigates, 15 corvettes, 15 missile boats, 50 torpedo boats, 6 patrol vessels, 51 coastal minesweepers, 3 intelligence ships, 20 coastguard boats, 13 tank landing ships, 10 oilers, 2 training ships, 4 supply ships, 5 survey vessels, 9 small survey craft, 13 buoy tenders, 3 diving vessels, 1 cable layer, 2 torpedo recovery craft, 2 icebreakers, 30 auxiliary ships and service craft and 13 tugs. The Navy operates a small number of Mi-4, Mi-8 and Mi-14 helicopters. Personnel in 1986 totalled 15,500 officers and men, including the GBK Coastal Frontier Guards (Grenz Brigade Kuste).

Air Force. The ex-'air-police', set up in Nov 1950, had in 1985 a strength of about 37,000 officers and men and 375 combat aircraft. Two air defence divisions consist respectively of 2 and 4 regiments (each with 3 squadrons of 12 aircraft), plus a fighter training division, equipped with MiG-21, MiG-23, Su-7 and Su-20 supersonic fighters. There is 1 squadron of MiG-21 reconnaissance fighters. Mi-24 gunship helicopters have been delivered to the German Democratic Republic. Other units include a regiment of Mi-2, Mi-4 and Mi-8 helicopters, a regiment of An-2, Let L.410, II-14, An-26 and Tu-134 transports and a Flight Training Division with Yak-18, Trener, L-29 Delfin, L-39 Albatross, MiG-15UTI and MiG-21U training aircraft 'Guideline' and 'Goa' surface-to-air missile units are operational

#### **ECONOMY**

Planning. The economy is one of the most successful of the centrally-planned type Although there have been small concessions to 'market forces' (a New Economic System of Planning and Management was introduced in 1963 and revised in 1966), improvement is rather sought in rationalization and the combination of production units. Extrasystemic features favouring economic performance include the beneficial special relationship with Federal Germany and special support from the USSR. The current 5-year plan is running from 1986 to 1990.

**Budget.** The budget of the German Democratic Republic was as follows (in M 1 m) for calendar years.

Bundesrepublik Deutschland

HISTORY. The Federal Republic of Germany became a sovereign independent country on 5 May 1955 and is a member of EEC, the Council of Europe, Western European Union, NATO, the European Coal and Steel Community, Euratom, the European Monetary Agreement and the Agencies of the UN In June 1948 USA, UK and France agreed on a central government for the 3

western zones An Occupation Statute, which came into force on 30 Sept 1949, reduced the responsibilities of the occupation authorities. Formally, the Federal Republic of Germany came into existence on 21 Sept 1949. The Petersberg Agreement of 22 Nov. 1949 freed the Federal Republic of numerous restrictions of the Occupation Statute. In 1951 USA, UK and France as well as other states terminated the state of war with Germany, the Soviet Union followed on 25 Jan. 1955 On 5 May 1955 the High Commissioners of USA, UK and France signed a proclamation revoking the Occupation Statute On the same day, the Paris and London treaties, signed in Oct 1954, came into force and established the sover-eignty of the Federal Republic of Germany.

AREA AND POPULATION. Federal Germany is bounded north by Denmark and the North and Baltic Seas, east by the German Democratic Republic, and Czechoslovakia, south-east and south by Austria, south by Switzerland and west by France, Luxembourg, Belgium and the Netherlands. Area: 248,706 sq km Population, at 31 Dec. 1984, 61,049,000, at 30 June 1984, 61,175,000 (29,241,000 males). Density 246 per sq km. In April 1949 some minor frontier rectifications were carried out in favour of the Netherlands (68 sq km), Belgium (18 sq. km), Luxembourg (6 sq. km) and France (7 sq km), subject to a final peace settlement. Belgium (1956) and the Netherlands (1963) returned most of this territory to Gerniany

CONSTITUTION. The Constituent Assembly (known as the 'Parliamentary Council') met in Bonn on 1 Sept. 1948, and worked out a Basic Law which was approved by a two-thirds majority of the parliaments of the participating Länder and came into force on 23 May 1949.

The Basic Law (Grundgesetz) consists of a preamble and 146 articles. The first section deals with the basic rights which are legally binding for legislation, adminis-

tration and jurisdiction. ,

The Federal Republic is a democratic and social constitutional state on a parliamentary basis. The federation is constituted by the 11 Lander (states) Baden-Wurttemberg, Bavaria, Bremen, Berlin (West), Hamburg, Hessen, Lower Saxony, North Rhine-Westphalia, Rhineland-Palatinate, Saarland and Schleswig-Holstein. In Berlin (West) the Basic Law applies with certain restrictions. The Basic Law decrees that the general rules of international law form part of the federal law. The constitutions of the Lander must conform to the principles of a republican, democratic and social state based on the rule of law Executive power is vested in the Lander, unless the Basic Law prescribes or permits otherwise. Federal law takes precedence over state law

Legislative power is vested in the Federal Assembly (Bundestag) and the Federal Council (Bundestat)

The Federal Assembly, elected in universal, direct, free, equal and secret elections, for a term of 4 years

The Federal Council consists of 45 members appointed by the governments of the Lander in proportions determined by the number of inhabitants. Each Land has at least 3 votes

The Head of State is the Federal President (Bundesprasident) who is elected for a 5-year term by a Federal Convention specially convened for this purpose This Convention consists of all the members of the Federal Assembly and an equal number of members elected by the Lander parliaments according to proportional representation. Presidents may be re-elected for one further term only

Executive power is vested in the Federal Government, which consists of the Federal Chancellor, elected by the Federal Assembly on the proposal of the Federal President, and the Federal Ministers, who are appointed and dismissed by

the Federal President upon the proposal of the Federal Chancellor.

The Federal Republic has exclusive legislation on: (1) foreign affairs (2) federal citizenship, (3) freedom of movement, passports, immigration and emigration, and extradition, (4) currency, money and coinage, weights and measures, and regulation of time and calendar, (5) customs, commercial and navigation agreements, traffic in goods and payments with foreign countries, including customs and frontier protection; (6) federal railways and air traffic, (7) post and telecommunications, (8) the legal status of persons in the employment of the Federation and of public law corporations under direct supervision of the Federal Government, (9) trade marks, copyright and publishing rights; (10) co-operation of the Federal Republic and the Lander in the criminal police and in matters concerning the protection of the constitution, the establishment of a Federal Office of Criminal Police, as well as the combating of international crime; (11) federal statistics.

For concurrent legislation in which the Länder have legislative rights if and as far as the Federal Republic does not exercise its legislative powers, see THE

STATESMAN'S YEAR-BOOK, 1956, p. 1038.

Federal laws are passed by the Federal Assembly and after their adoption submitted to the Federal Council, which has a limited veto. The Basic Law may be amended only upon the approval of two-thirds of the members of the Federal Assembly and two-thirds of the votes of the Federal Council.

The foreign service, federal finance, railways, postal services, waterways and

shipping are under direct federal administration.

In the field of finance the Federal Republic has exclusive legislation on customs and financial monopolies and concurrent legislation on: (1) excise taxes and taxes on transactions, in particular, taxes on real-estate acquisition, incremented value and on fire protection; (2) taxes on income, property, inheritance and donations; (3) real estate, industrial and trade taxes, with the exception of the determining of the tax rates.

The Federal Republic can, by federal law, claim part of the income and corporation taxes to cover its expenditures not covered by other revenues Financial jurisdiction is uniformly regulated by federal legislation

National flag Three horizontal stripes of black, red, gold

National anthem Einigkeit und Recht und Freiheit (words by H Hoffmann, 1841, tune by J Haydn, 1797).

GOVERNMENT. The 10th Federal Assembly, elected in March 1983, is composed of 520 members. These include 22 members for Berlin with limited voting rights. Electoral turnout was 89 1%. The government is formed by a coalition of the Christian Democrat/Christian Socialist (CDU/CSU) alliance with the Free Democrats (FDP). (The CSU is a Bavarian party where the CDU does not stand). Percentage votes, and seats gained (1980 electoral results in brackets) CDU/CSU 48.8%, 244 (44.5%, 226); SPD, 38.2%, 193 (42.9%, 218); FDP, 7%, 34 (10.6%, 53); Greens, 5.6%, 27 (1.5%, nil) Elections are due in Jan. 1987

Federal President Dr Richard von Weizsacker (sworn in 1 July 1984)

**DEFENCE.** The Paris Treaties, which entered into force in May 1955, stipulated a contribution of the Federal Republic to western defence within the framework of NATO and the Western European Union. The Federal Armed Forces (Bundeswehr) had a total strength (1985) of 495,000 all ranks (236,000 conscripts) and a further 750,000 reserves

Army. The Army is divided into the Field Army, containing the units assigned to NATO in event of war, and the Territorial Army. The Field Army is organized in 3 corps, comprising 17 armoured, 15 armoured infantry, 1 mountain and 3 airborne brigades. Equipment includes 1,232 M-48, 2,437 Leopard 1 and 800 Leopard II tanks. An air component operates 200 BO 105P anti-armour helicopters, 108 CH-53G and 180 UH-1D Iroquois transport helicopters, plus 150 Alouette II and 95 BO 105M liaison/observation helicopters. The Territorial Army is organized into 5 Military Districts, under 3 Territorial Commands. Its main task is to defend rear areas and remains under national control even in wartime. Total strength was (1986) 335,600 (conscripts 180,300; Territorial Army 44,200).

Navy. The Federal Navy comprises 24 diesel-powered coastal submarines, 7 destroyers, 9 frigates, 6 corvettes, 40 fast missile boats (Exocet armed), a light cruiser type training ship, 10 frigate-type support ships, 18 coastal minesweepers and minehunters, 21 fast minesweepers, 18 inshore minesweepers, 22 utility landing craft, 28 smaller landing craft, 12 supply and support ships, 2 fleet replenishment ships, 8 oilers, 8 coast patrol boats, 12 torpedo recovery vessels, 9 coastguard cutters, 2 repair ships, 24 tugs and 45 auxiliaries and service craft.

The projected construction programme includes 12 submarines, 2 more guided missile frigates and 20 minehunters.

The Naval Air Arm operates 140 fixed-wing aircraft, including 50 Tornados, 50 Starfighters, 19 Atlantics and 20 DO28s, and 33 helicopters (21 Sea Kings and 12 Lynx)

Navy personnel in 1986 totalled 5,600 officers and 32,900 men, including 6,700 in the Naval Air Arm

Air Force. Since Oct 1970, the *Luftwaffe* has comprised the following commands German Air Force Tactical Command, German Air Force Support Command (including two German Air Force Regional Support Commands—North and South) and General Air Force Office. Its strength in 1986 was approximately 106,000 officers and other ranks and about 500 first-line combat aircraft Combat units. including 12 heavy fighter-bomber squadrons, 7 light ground attack/ reconnaissance squadrons, 4 reconnaissance squadrons, 8 surface-to-surface missile squadrons, and an air defence force of 4 interceptor squadrons, 24 batteries of Nike-Hercules and 36 batteries of Improved Hawk surface-to-air missiles, are assigned to NATO There are 4 F-4F Phantom interceptor squadrons, 4 Tornado attack squadrons, 4 F-104G fighter-bomber squadrons (to re-equip with Tornados), 4 attack squadrons of F-4Fs, 4 RF-4E Phantom reconnaissance squadrons, and 7 light attack/reconnaissance squadrons of Alpha Jets Four transport squadrons (each 15 aircraft) with turboprop Transall C-160 aircraft and 1 wing of 5 helicopter squadrons with UH-1D Iroquois add to the air mobility of the Bundeswehr There are also VIP, support and light transport aircraft, and Piaggio P.149D initial training aircraft. Guided weapons in service include 8 squadrons of *Pershing* surface-to-surface missiles and 6 battalions of Nike-Hercules and 9 battalions of Improved Hawk surface-to-air missiles

#### JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Justice is administered by the federal courts and by the courts of the Lander. In criminal procedures, civil cases and procedures of non-contentious jurisdiction the courts on the Land level are the local courts (Amtsgerichte), the regional courts (Landgerichte) and the courts of appeal (Oberlandesgerichte). Constitutional federal disputes are dealt with by the Federal Constitutional Court (Bundesverfassungsgericht) elected by the Federal Assembly and Federal Council The Lander also have constitutional courts. In labour law disputes the courts of the first and second instance are the labour courts and the Land labour courts and in the third instance, the Federal Labour Court (Bundesarbeitsgericht) Disputes about public law in matters of social security, unemployment insurance, maintenance of war victims and similar cases are dealt with in the first and second instances by the social courts and the Land social courts and in the third instance by the Federal Social Court (Bundessozialgericht). In most tax matters the finance courts of the Länder are competent and in the second instance, the Federal Finance Court (Bundesfinanzhof) Other controversies of public law in non-constitutional matters are decided in the first and second instance by the administrative and the higher administrative courts (Observerwaltungsgerichte) of the Lander, and in the third instance by the Federal Administrative Court (Bundesverwaltungsgericht)

For the inquiry into maritime accidents the admiralty courts (Seeamter) are competent on the Land level and in the second instance the Federal Admiralty Court (Bundesoberseeamt) in Hamburg.

HISTORY. The State of Ghana came into existence on 6 March 1957 when the former Colony of the Gold Coast and the Trusteeship Territory of Togoland attained Dominion status. The name of the country recalls a powerful monarchy which from the 4th to the 13th century A.D. ruled the region of the middle Niger.

The Ghana Independence Act received the royal assent on 7 Feb. 1957 The General Assembly of the United Nations in Dec 1956 approved the termination of British administration in Togoland and the union of Togoland with the Gold Coast on the latter's attainment of independence.

The country was declared a Republic within the Commonwealth on 1 July 1960 with Dr Kwame Nkrumah as the first President On 24 Feb 1966 the Nkrumah regime was overthrown in a military coup and ruled by the National Liberation Council until 1 Oct. 1969 when the military regime handed over power to a civilian regime under a new constitution. Dr K. A Busia was the Prime Minister of the Second Republic On 13 Jan. 1972 the armed forces and police took over power again from the civilian regime in a coup

In Oct 1975 the National Redemption Council was subordinated to a Supreme Military Council (SMC). In 1979 the SMC was toppled in a *coup* led by Flight-Lieut. J. Rawlings. The new government permitted elections already scheduled and these resulted in a victory for Dr Hilla Limann and his People's National Party However on 31 Dec. 1982 by another *coup* led by Flight-Lieut Rawlings dismissed the government and Parliament, suspended the Constitution and established a Provisional National Defence Council to exercise all government powers

## **ENERGY AND NATURAL RESOURCES**

Electricity. Production (1984) 2,102m kwh, mainly from the Volta Dam at Akosombo, opened in 1966, which has a capacity of 1,200 mw

Oil. The Government announced in Jan. 1978 that oil had been found in commercial quantities with known reserves (1980) 7m bbls and in Oct 1983 formed the Ghanaian National Petroleum Corporation with exploration rights in all areas not covered by existing agreements.

Minerals. In 1983 gold production was 9,260 kg, diamonds, 342,000 carats, manganese, 268,000 tons, bauxite, 27,500 tons

Agriculture. Cocoa is by far the most important crop and covers about 2m. acres Production (1982) 190,000 tons. There has been considerable increase in cocoa yields as a result of the Capsid control and the introduction of improved varieties. A Cocoa Affairs Ministry has been established to formulate policy and provide technical supervision for developing cocoa, coffee, shea-nuts, copra and bananas Coffee, improved types of oil-palm and coconut are being planted on an increased scale and production from these crops is increasing. Progress has been made in the planting of Clonal rubber in south-west Ghana. In the south-east coastal belt irrigation works have been constructed and black-clay farming is being successfully undertaken in the Accra plains.

Of the main foodstuffs in south and central Ghana, maize, rice, cassava, plantain, groundnuts, yam and cocoyam predominate Tobacco is proving an attractive and very important cash crop in food-crop producing areas.

In northern Ghana the chief food crops are groundnuts, rice, maize, guinea corn, millet and yams, with tobacco and cotton as important cash crops.

Agricultural cash crops, eg, pepper, ginger, pineapple, avocado and citrus, etc., are being extensively cultivated for export. CLIMATE. Coastal regions and the islands have typical Mediterranean conditions, with mild, rainy winters and hot, dry, sunny summers. Rainfall comes almost entirely in the winter months, though amounts vary widely according to position and relief. Continental conditions affect the northern mountainous areas, with severe winters, deep snow cover and heavy precipitation, but summers are hot Athens. Jan. 48°F (8.6°C), July 82.5°F (28.2°C). Annual rainfall 16 6" (414 3 mm).

CONSTITUTION AND GOVERNMENT. A coup d'état took place on 21 April 1967, 'to avert the danger of a communist threat against the nation'. A Military Government was formed, which suspended the 1952 Constitution. Following the unsuccessful counter-coup in 1967, King Constantine went abroad. Voting took place on 29 July 1973 in the referendum to change Greece from a Monarchy to a Republic and to elect a President. 77.2% of the valid votes were cast for a republican régime.

On 25 Nov. 1973, in a bloodless *coup*, President Papadopoulos was overthrown and Lieut.-Gen. Phaedon Ghizikis was sworn in. The military dictatorship collapsed on 23 July 1974 and the 1952 Constitution was reintroduced in a modified form. A new Constitution was introduced in June 1975. Parliamentary elections took place on 12 Nov. 1974.

A further referendum on the Monarchy took place on 8 Dec 1974 and 69 2% of

the valid votes were cast for an 'uncrowned democracy'.

Elections were again held on 2 June 1985 The results were New Democracy, 126, Pan-Hellenic Socialist Movement, 161; Communists, 13, Euro-Communists, 1

#### INTERNATIONAL RELATIONS

Membership. Guatemala is a member of UN, OAS and Cacom.

External Debt. In 1983 the external debt was Q.503 9m

## **ECONOMY**

Planning. The 1979-82 National Economic Development Plan involved government investment of Q 1,937 5m

**Budget.** The estimates of ordinary revenue and expenditure balanced as follows, in quetzales (1 quetzal = US\$1). 1984, 1,314m

Currency. The gold quetzal was established 7 May 1925 equal to 60 old Guatemala paper pesos, with a gold content equal to that of the US\$. Coins of 25, 10, 5 and 1 centavos were issued by the Banco de Guatemala on 16 Sept 1965, they are of a lower content value than the previous ones There are also paper notes of 100, 50, 20, 10, 5, 1 and  $\frac{1}{2}$  quetzales (50 centavos) In March 1986, £1 = Q 1 44, US\$1 = Q 1

Banking. By an Act effective 4 Feb 1946 the Central Bank of Guatemala (founded in 1926 as a mixed central and commercial bank) was superseded by a new institution, the Banco de Guatemala, to operate solely as a central bank Savings and term deposits at commercial banks were Q 1,652 1m at the end of 1983 Total currency circulation (backed by a gold reserve fixed by law at a minimum of 40%) on 31 Dec 1984 was Q 1,162 6m, total net international reserves amounted to Q.—26 4m. on 31 Dec 1983. In July 1965 the country's quota with the IMF was increased from US\$15m, to 25m

There are 19 banks, including the Banco de Guatemala, Banco Nacional de Desarollo, set up in 1971 to promote agricultural development, its counterpart for small industries (Banco de los Trabajadores) set up in Jan. 1966 with initial capital of US\$1 3m., a branch of Lloyds Bank International Ltd and a branch of the Bank of America.

#### **ENERGY AND NATURAL RESOURCES**

Electricity. 1,800m. kwh of electricity were generated in 1983. A large hydroelectric plant was inaugurated in Dec. 1985.

Oil. Guatemala began exporting crude oil in 1980, exports, 1984, were valued at Q.34m. Production is from wells in Alta Verapaz department from where the oil is piped to Santo Tomas de Castilla. Further exploration is proceeding in the Petén.

Minerals. Mineral production includes zinc and lead concentrates, some antimony and tungsten, a small amount of cadmium and silver, some copper is also being mined. Exports (1983) Q 2m. In 1965 a subsidiary of International Nickel Company of Canada was granted a 40-year concession to extract and process nickel ore in northern Guatemala Production and exports started in 1977 but production had ceased temporarily in 1982.

Agriculture. The Cordilleras divide Guatemala into two unequal drainage areas, of which the Atlantic is much the greater. The Pacific slope, though comparatively narrow, is exceptionally well watered and fertile between the altitudes of 1,000 and 5,000 ft, and is the most densely settled part of the republic. The Atlantic slope is sparsely populated, and has little of commercial importance beyond the chicle and timber-cutting of the Petén, coffee cultivation of Cobán region and banana-raising of the Motagua Valley and Lake Izabal district. Soil erosion is serious and a single week of heavy rains suffices to cause flooding of fields and much crop destruction

The principal crop is coffee, there are about 12,000 coffee plantations with 138m coffee trees on about 338,000 acres, but 80% of the crop comes from 1,500 large coffee farms employing 426,000 workers. Coffee exports in 1984 were valued at 0.360 7m. mainly to USA and Federal Republic of Germany

Bananas are still an important export crop, but exports have at times been seriously reduced, partly by labour troubles and by hurricanes Exports 1984 were worth O 59m

Cotton exports in 1984 were valued at Q 70.4m Other important exports (1984) were sugar, Q 74 5m, beef, Q 11 6m Guatemala is, after Mexico, the largest producer of chicle gum (used for chewing-gum manufacture in USA) Rubber development schemes are under way, assisted by US funds Guatemala is one of the largest sources of essential oils (citronella and lemon grass), exports in 1984 were valued at Q.1 7m. Cardamom, exported mainly to the Arab countries, was valued at Q 9 4m in 1984

Livestock (1984): Cattle, 2,605,000, pigs, 810,000, sheep, 660,000, horses, 100,000, poultry, 15m

Forestry. The forest area has an extent of 17,784,000 acres. The department of Petén is rich in mahogany and other woods. Production (1980) 11 23m cu metres.

Fisheries. Exports were about Q 11 8m in 1984

## INDUSTRY AND TRADE

**Industry.** The principal industries are food and beverages, tobacco, chemicals, hides and skins, textiles, garments and non-metallic minerals. New industries include electrical goods, plastic sheet and metal furniture.

Trade Unions. Trade unions are small in 1954 the trade unions were ordered to reorganize and there are now two main federations

Commerce. Values in Q 1,000 (1 quetzal = US\$1) were

	1980	1981	1982	1983	1984
Imports (c i f.)	1,615,000	1,773,600	1,387,000	1,135,000	1,278,496
Exports (f o b.)	1,522,000	1,281,200	1,120,000	1,150,000	1,122,286

Total trade between Guatemala and UK for 5 years (British Department of Trade returns, in £1,000 sterling):

	1981	1982	1983	1984	1985
Imports to UK	8,197	13,476	9,764	9,565	5,176
Exports and re-exports from UK	11,280	8,127	7,440	10,660	13,397

**Tourism.** There were 235,166 foreign visitors in 1983

# COMMUNICATIONS

Roads. In 1985 there were 18,000 km of roads, of which 2,850 are paved There is a trunk highway from coast to coast via Guatemala City There are 2 trunk highways from the Mexican to the Salvadorean frontier the Pacific Highway serving the fertile coastal plain and the Pan-American Highway running through the highlands and Guatemala City. Motor vehicles number about 200,000

Railways. The principal railway system is the government-owned (since 1968) Ferrocarriles de Guatemala. All railways are of 914 mm gauge. Total length of all lines is 820 km. Passengers carried, 1984, numbered 1,051,892, and freight carried (1984), 40,843 short tons. The bridge across the Suchiate River between Mexico and Guatemala in 1942 linked the railways of North and Central America, though differences in gauge make it necessary to change trains at Ayutla.

Aviation. The government-owned airline, Aviateca, furnishes both domestic and international services, 6 other airlines handle international traffic

Shipping. The chief ports on the Atlantic coast are Puerto Barrios and Santo Tomás de Castilla on the Pacific coast, San José and Champerico Total tonnage handled was, 1983, 6 17m tons.

Post and Broadcasting. The Government own and operate the telegraph and telephone services, there were (1982) 97,670 telephone instruments. There are some 70 broadcasting stations. Radio receiving sets in use, 1976, numbered about 1m There are 4 commercial TV stations, I government station and about 192,000 TV receivers.

Cinemas (1984) Cinemas numbered approximately 100

Newspapers (1984) There are 4 daily newspapers

## JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Justice is administered in a Supreme Court, 6 appeal courts and 28 courts of first instance. Supreme Court and appeal court judges are elected by Congress Judges of first instance are appointed by the Supreme Court.

All holders of public office have to show on entering office, and again on leaving, a full account of their private property and income

Religion. Roman Catholicism is the prevailing faith, but all other creeds have complete liberty of worship Guatemala has an archbishopric.

Education. In 1984 there were 11,587 schools with 45,611 teachers and an attendance of 1,331,294 pupils, these figures include private schools. There are 1,237 secondary and other schools having 13,891 teachers and an attendance of 194,484 pupils; the autonomous University of San Carlos de Borromeo, founded in 1678, was reopened in 1910 with 7 faculties and schools and there are 4 new universities. Students at state university (1984) approximately 45,552. All education is in theory free, but owing to a grave shortage of state schools private schools flourish. The 1964 census showed that 63% of those 10 years of age and older were illiterate.

Social Welfare. A comprehensive system of social security was outlined in a law of 30 Oct 1946. Medical personnel include about 1,250 doctors and 275 dentists for the whole republic. There are about 60 public hospitals and about 100 dispensaries.
